March 6, 2012

To : Dmitri Paris and Trumbull Parks and Recreation Commission

Dear Board members ,

Trumbull BMX as received a generous donation of equipment and labor from one of the riders parents and his employer to help to rebuild our BMX track to make it safer and flow better and meet the expectations of our riders . GT bicycles and United cycling group of Bethel Ct. has also donated the time and services of a professional track builder to re form the obstacles this combined donation has a value of at least \$ 15,000 dollars .

The scope of this work will be confined to the straits between the corners , starting hill and finish lines . There will be no work done to the starting hill , any of the corners or the finish line area . The work will involve one hydraulic excavator with a professional operator provided by the parents employer . His work will be limited to scraping the dirt that now form the obstacles and piling it in between the 1st and 2nd and inside the 3rd straits

After this work has been done a wheel loader , roller and bobcat will be brought to the track for the professional track builder to operate and rebuild the obstacles. The entire project should take about 6-8 days to complete from start to finish . When the track re build is complete myself and some volunteers will rake and seed all the areas around the work that was done .

There will be no poles moved , no drainage work or plumbing work done and no structural work done .

If you have any questions please feel free to contact me
