Memorandum

To: Maria Pires, Director of Finance

From: Jamie Bratt, Director of Planning and Zoning

Date: 4/29/2013

Re: Request for Transfer of Funds

It has come to my attention that the line item for part-time permanent payroll (account 501102) within the Planning and Zoning budget (org 01014200) is underfunded by approximately \$6,000. We have two part-time employees whose work is important to department functionality, so I would like to maintain their working hours through the end of the fiscal year. Note that these positions were defunded in order to allow one full-time position to be added to the staff beginning in July. As such I feel it is important for our part-time staff to finish existing projects in May and June. I have identified the necessary funds as surplus from other line items within the Planning & Zoning budget. By writing, I request the following fund transfers in order to replenish the 501102 account for part-time payroll:

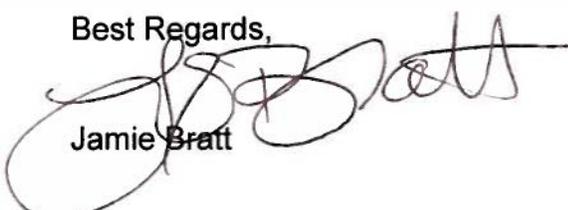

522202 - \$2,000

522205 - \$2,000

545501 - \$2,000

Thank you for your consideration and please let me know if you have any questions.

Best Regards,

Jamie Bratt

RESOLUTION APPROPRIATING \$6,070,000 FOR THE TRUMBULL (TOWN) CAPITAL IMPROVEMENT PLAN 2013-2014 AND AUTHORIZING THE ISSUE OF \$6,070,000 BONDS OF THE TOWN TO MEET SAID APPROPRIATION AND PENDING THE ISSUANCE THEREOF THE MAKING OF TEMPORARY BORROWINGS FOR SUCH PURPOSE

Section 1. The sum of \$6,070,000 is appropriated for the planning, acquisition and construction of the Town of Trumbull (Town) Capital Improvement Plan 2013-2014, as adopted and amended by the Town Council from time to time, and consisting of: (i) roadways; (ii) work on Public Facilities including the Trumbull Library, Town Hall, Police Headquarters, the Senior Center, the Public Works Yard and the EMS Building; (iii) Fleet and equipment; (iv) other projects, consisting of recreation, roads, and environment projects; and (v) enterprise (WPCA), and for appurtenances, equipment and services related thereto, or for so much thereof or such additional improvements as may be accomplished within said appropriation, and for administrative, advertising, printing, legal and financing costs to the extent paid therefrom. Said appropriation shall be in addition to grant funding and all prior appropriations for said purpose. The Town Council may by resolution transfer funding herein authorized among projects within the 2013-2014 Town CIP.

Section 2. To meet said appropriation \$6,070,000 bonds of the Town or so much thereof as shall be necessary for such purpose, shall be issued, maturing not later than the twentieth year after their date. Said bonds may be issued in one or more series as determined by the First Selectman and the Town Treasurer (hereafter the Town Officials), and the amount of bonds of each series to be issued shall be fixed by the Town Officials. Said bonds shall be issued in an amount which will provide funds sufficient with other funds available for such purpose to pay the principal of and the interest on all temporary borrowings in anticipation of the receipt of the proceeds of said bonds outstanding at the time of the issuance thereof, and to pay for the administrative, printing and legal costs of issuing the bonds. Capital project revenues, including bid premiums and investment income derived from investment of bond proceeds (and net investment income derived from note proceeds) are authorized to be credited by the Director of Finance to the project account and expended to pay project expenses customarily paid therefrom. The remaining appropriation and bond authorization shall be reduced by the amount of capital project revenues so credited. The bonds shall be in the denomination of \$1,000 or a whole multiple thereof, or, be combined with other bonds of the Town and such combined issue shall be in the denomination per aggregate maturity of \$1,000 or a whole multiple thereof, be issued in bearer form or in fully registered form, be executed in the name and on behalf of the Town by the manual or facsimile signatures of the Town Officials, bear the Town seal or a facsimile thereof, be certified by a bank or trust company designated by the Town Officials, which bank or trust company may be designated the registrar and transfer agent, be payable at a bank or trust company designated by the Town Officials, and be approved as to their legality by Joseph Fasi LLC, Attorneys-at-law, Bond Counsel of Hartford. They shall bear such rate or rates of interest as shall be determined by the Town Officials. The bonds shall be general obligations of the Town and each of the bonds shall recite that every requirement of law relating to its issue has been duly complied with, that such bond is within every debt and other limit prescribed by law, that the full faith and credit of the Town are pledged to the payment of the principal thereof and

the interest thereon and will be paid from property taxation to the extent not paid from other sources. The aggregate principal amount of the bonds to be issued, the annual installments of principal, redemption provisions, if any, the date, time of issue and sale and other terms, details and particulars of such bonds, shall be determined by the Town Officials, in accordance with the General Statutes of the State of Connecticut, as amended.

Section 3. Said bonds shall be sold by the Town Officials, in a competitive offering or by negotiation, in their discretion. If sold at competitive offering, the bonds shall be sold upon sealed proposals, auction, or similar competitive process at not less than par and accrued interest on the basis of the lowest net or true interest cost to the Town. A notice of sale or a summary thereof describing the bonds and setting forth the terms and conditions of the sale shall be published at least five days in advance of the sale in a recognized publication carrying municipal bond notices and devoted primarily to financial news and the subject of state and municipal bonds. If the bonds are sold by negotiation, the provisions of purchase agreement shall be approved by the Town Officials.

Section 4. The Town Officials, are authorized to make temporary borrowings in anticipation of the receipt of the proceeds of said bonds. Notes evidencing such borrowings shall be executed in the name and on behalf of the Town by the manual or facsimile signatures of the Town Officials, bear the Town seal or a facsimile thereof, be payable at a bank or trust company designated by the Town Officials, be approved as to their legality by Joseph Fasi LLC, Attorneys-at-law, Bond Counsel of Hartford, and be certified by a bank or trust company designated by the Town Officials, pursuant to Section 7-373 of the General Statutes of Connecticut, as amended. They shall be issued with maturity dates which comply with the provisions of the General Statutes governing the issuance of such notes, as the same may be amended from time to time. The notes shall be general obligations of the Town and each of the notes shall recite that every requirement of law relating to its issue has been duly complied with, that such note is within every debt and other limit prescribed by law, that the full faith and credit of the Town are pledged to the payment of the principal thereof and the interest thereon and will be paid from property taxation to the extent not paid from other sources. The net interest cost on such notes, including renewals thereof, and the expense of preparing, issuing and marketing them, to the extent paid from the proceeds of such renewals or said bonds, shall be included as a cost of the project. Upon the sale of said bonds, the proceeds thereof, to the extent required, shall be applied forthwith to the payment of the principal of and the interest on any such notes then outstanding or shall be deposited with a bank or trust company in trust for such purpose.

Section 5. Resolution of Official Intent to Reimburse Expenditures with Borrowings. The Town (the "Issuer") hereby expresses its official intent pursuant to §1.150-2 of the Federal Income Tax Regulations, Title 26 (the "Regulations"), to reimburse expenditures paid sixty days prior to and after the date of passage of this ordinance in the maximum amount and for the capital project defined in Section 1 with the proceeds of bonds, notes, or other obligations ("Bonds") authorized to be issued by the Issuer. The Bonds shall be issued to reimburse such expenditures not later than 18 months after the later of the date of the expenditure or the substantial completion of the project, or such later date the Regulations may authorize. The Issuer hereby certifies that the intention to reimburse as expressed herein is based upon its reasonable expectations as of this date. The Director of Finance or his designee is authorized to

pay project expenses in accordance herewith pending the issuance of reimbursement bonds, and to amend this declaration.

Section 6. The Town Officials, are hereby authorized to exercise all powers conferred by section 3-20e of the general statutes with respect to secondary market disclosure and to provide annual information and notices of material events as enumerated in Securities and Exchange Commission Exchange Act Rule 15c2-12, as amended, as may be necessary, appropriate or desirable to effect the sale of the bonds and notes authorized by this resolution.

Section 7. It is hereby found and determined that it is in public interest to issue all, or a portion of, the Bonds, Notes or other obligations of the Town as qualified private activity bonds, or with interest that is includable in gross income of the holders thereof for purposes of federal income taxation. The Town Officials are hereby authorized to issue and utilize without further approval any financing alternative currently or hereafter available to municipal governments pursuant to law including but not limited to any "tax credit bonds" or "Build America Bonds" including Direct Payment and Tax Credit versions.

**2013 - 2017
CAPITAL IMPROVEMENT PLAN
NARRATIVE**

STANDARD DEFINITION FOR CAPITAL IMPROVEMENT

- Any acquisition or lease of land
- Purchase of major equipment or vehicles in excess of \$10,000 with life expectancy 3+ years
- Construction of new building facilities with cost in excess of \$10,000
- Major building improvements with a cost in excess of \$10,000
- Major equipment or furnishings in excess of \$10,000

BOARD OF EDUCATION

The Board of Education based their request on a capital improvement plan prepared by Savin Engineers, P.C., in September 2007. Facility Manager Al Barbarotta and Plant Administrator Steve Kennedy reviewed the plan and made updates as necessary to each respective school. Per Superintendent Ralph Iassogna, the total plan cost of \$93,740,711 over the five years can be reduced to \$78,229,640 by eliminating items such as air conditioning. See Exhibit A for the proposal detail.

ROADWAYS

Streets were prioritized based on wear, safety, and usage for years 2013-2017. The original cost to repave these roads was based on State of Connecticut bid prices. Cost includes asphalt, tack, catch basin, manholes, curbing as needed, grading/compacting, loading and trucking of excess material, in addition to an estimate for escalation charges that will be incurred. Year 2013 roads are specifically for Contract IV of the sanitary sewer project.

PUBLIC FACILITIES

Costs are based on professional estimates from a report prepared by Antinozzi Associates, which was revised on September 30, 2010. Projects were reviewed and updated as necessary. Projects will be bid as required by Charter and costs are subject to change.

FLEET & EQUIPMENT

Highway and Parks Departments replace equipment based on usage and condition. The vehicle may have rust and erosion due to road or work conditions that require replacement sooner than the recommended useful life. The general rule is to replace this equipment every 15 to 20 years. Cost estimates are based on State bid contracts or MSRP.

ECONOMIC DEVELOPMENT

Emergency Exit at the Trumbull Corporate Park - \$50,000

Purpose is to provide an emergency exit out of the Corporate Park(onto Route 8) in the event of a catastrophic incident. This has been requested by several of the businesses that are currently

located in the Corporate Park. In addition, the lack of an emergency exit has been an expressed concern of prospective businesses over the past few years. The access would be opened by Town or State emergency officials only.

Corporate Drive Road Rehab - \$510,000

Road improvements near Cooper Surgical. Pending grant application. Town cost \$10K.

Long Hill Green - \$600,000

Business District enhancements. Pending grant application.

Merritt Blvd Traffic Safety - \$100,000

Traffic calming features near Unilver. Corporate cost share possible.

Trumbull Municipal Center Microgrid - \$100,000

Public and private partnership to propose microgrid to ensure power supply for municipal center. State currently reviewing application.

Nature Center - \$50,000

Estimate of renovation cost provided by Nature Center.

Rails to Trails (Pequonnock River Railroad Trail – PRRT) - \$3,349,500

The Town of Trumbull has worked with the City of Bridgeport and the Town of Monroe through the Greater Bridgeport Regional Council (GBRC) to design and construct the regional Pequonnock River Railroad Trail (PRRT) since 1994. When completed, the PRRT will span sixteen (16) miles and pass through the communities of Trumbull, Monroe, and Bridgeport. The Trail is a valuable asset to the region as it winds through many scenic state and municipal parks and greenways including Wolfe Park, Old Mine Park, Pequonnock Valley State Park, Twin Brooks Park, Fairchild Memorial Park, Beardsley State Park and the Beardsley Zoo. The Town is responsible for 20% of the total costs shown for Section A1/A2, B, and D/E. The balance will be covered by State and Federal grants through the CT Department of Transportation and the Federal Highway Administration. Contracts between ConnDOT and the Town will be available in the fall. The Town has already documented \$417,000 in match from trail sections already completed.

Reservoir Avenue Design and Best Use Analysis - \$40,000

The purpose of this study is to provide the Town's land use boards with data that enables them to make educated decisions on the best use for this area. Due to changing market and economic conditions, the town is likely to be confronted with applications that may not be in line with the Plan of Conservation or the Zoning Code, which were adopted under very different conditions. The analysis will determine if zoning regulations should change to reflect the current conditions.

PARK IMPROVEMENTS

Park improvements are necessary for the functioning and usefulness of the recreational facilities and for safety purposes. Costs are estimated based on manufacturer quotes or professional estimate. Project costs are spread out over several years where feasible. Abraham Nichols Barn needs to be made structurally sound. Invasive Plant Species Mitigation is a State mandated project by DEEP.

OTHER PROJECTS

Moose Hill Road and Old Town Road – \$6,900,000

Road and drainage rehabilitation projects to be funded on a 80/10/10 basis which is Federal/State/Local.

Trumbull Main Library Furnishings - \$28,000

Modernize public library facilities with replacement of furnishings. Replace furnishings over 35 years old with modern rectangular tables and chairs for patron use. Cost estimated at \$1,000 each table x 10 tables and 40 chairs at \$250 each. Comfortable stuffed chair seating to scatter throughout library for quiet reading similar to bookstore layouts. Stuffed chairs estimated at \$1,000 each for 8 chairs.

Building Security - \$55,000

EMS, Animal Shelter, and other Town building security cameras and hardening of entryways. Other security projects specific to buildings are included in the Public Facilities section of this plan.

Senior Center Additional Parking - \$30,360

Project would remove the playground which is not used by the seniors and add 69 additional parking spaces.

Engineering Projects - \$47,000

Brock Street Bridge, Old Mine Park, Horse Tavern Brook, Canoe Brook Road projects based on estimated from Town Engineer or Conservation Commission (some to be funded by grants).

Bill Property Demo - \$25,000

Demo of structures that are unstable on Town owned property.

PUBLIC SAFETY

Radio System Replacement & Dispatch Center - \$3,000,000

See Exhibit B for proposal. Additional funding added for furnishing and renovations.

Cell Block Modifications - \$100,000

Replace the barred cells with clear, heavy plastic cell doors to offer greater visibility for both officer and prisoner safety.

TECHNOLOGY

GIS - \$38,200

Additional hardware and software based on quotes for Asset Management Module for \$12K, ArcGIS for Desktop Advanced (EOC) for \$7K, and Data Conversion to GIS-Storm Sewers \$19.2K.

Technology Upgrades - \$247,950

Technology upgrades to be bonded over five year period. See Exhibit C from general fund detailing costs.

Time & Attendance System – Card and biometric identification system used to track employee work hours to be integrated with financial system. Cost based on vendor quote for equipment, software, implementation and training. Includes first year of system maintenance.

ENTERPRISE

WPCA projects provided by Town Engineer for various repairs to pump stations and generator.

Information regarding Cap Ex Plan CY 2013

Paving:

All Contract IV Roads: Per Attached report prepared by Tighe and Bond

Cypress/Hillside – Per asphalt, basin, etc.. costs based on linear footage of roadway. Pricing from calculations still within reasonableness to current state bid pricing.

Drainage Improvements: See attached Engineering Calculations

Equipment:

Snowplows/Sanders: Initial request in prior years was \$160,000 per vehicle. Pricing increases each year with state bid pricing for chassis and increase in cost for additional equipment required to make vehicle road ready. For FY13, actual cost per truck was \$166,194. For the current request a nominal increase was requested over FY13 pricing for cost adjustments as described above.

Brushloader: Estimate attached from local vendor of this type of equipment (204k)

Wheelloader: Preliminary Estimate from CAT Dealer/Prior Cost history for Volvo

Parks Groundmaster: Based on cost history

2355 Mower – Per J. Mitri, based on industry standard

310G Parks Backhoe – Based on industry standard, Have a preliminary estimate of \$117k

Public Works Yard – Roofing: Per Antinozzi Associates building inspection report, roof replacement totaling \$265k was recommended for 2013/14. Based on need this cost is being allocated over CY13 and CY14, with attention to areas requiring priority being handled first. Copy of relevant report pages are attached.

Total of Contract IV Paving and Storm Drainage Improvements: \$4,508,166

Cost Analysis

Pavement reconstruction is a major undertaking with major cost implications. Pavements should be designed with life cycle costs in mind and should be inventoried, analyzed and designed using AASHTO criteria for thicknesses of pavement structure, traffic loading, material relationships and soil support. The only economical way to maintain a roadway network is to increase the life cycle between major reconstructions so that the present worth of a long series of expenditures is minimized. The key to achieving that result is to keep good pavement goods and to delay making significant repairs until they are required. Pavement life cycle is illustrated in Figure 5 showing the way pavements generally deteriorate.

The current Contract IV plans show placing a 1.5" overlay on the full street width for the roadways within the project limits. The Mark IV Construction Co. bid cost for paving items was approximately \$4,125,000, which included milling, bituminous concrete curbs, 1.5" bituminous concrete overlay, maintenance and protection of traffic and traffic men. Depending on the condition of these pavement they can be compared to a band-aid approach to pavement management. If the roadways are in the fair to poor range there will be significant reflective cracking in the future and this approach ignores life cycle costs.

Based on our visual observations of pavement conditions, borings and soil analysis and pavement analysis we have developed a pavement rehabilitation recommendation for each of the streets in Contract IV. Table 3 shows the proposed recommendations and associated costs.

Table 3 - Cost Analysis

Street Name	Recomm. / Recommendations	Reclamation Cost	Milling Cost	Paving Cost	Bit. Conc. Curbs	Total Cost
Baldwin Avenue	Full Depth Reclamation	\$5,799		\$13,514	\$5,847	\$25,159

Huntington Road	This road was previously reconstructed by the CT DOT. No roadwork anticipated in the sewer contract.	\$0	\$0	\$0	\$0	\$0
-----------------	--	-----	-----	-----	-----	-----

Huntington Turnpike Rte. 108 <i>Don't Include Complete per R.I.</i>	This is a State road partially reconstructed in 1985. The reconstructed portion was 0.75" class 14 on 1.5" class 1 on 3" class 1 on 6" class 4 on 10" sub base. The overlay portion was 1.5" class 1 over the existing pavement. Cost includes 9" bit. concrete patch at sewer and 2" mill and overlay.	\$0	\$49,059	\$701,716	\$0	\$350,775
Merritt Blvd.	This road is to be rehabilitated under a separate road program funded by the Conn DOT. Road is being paved under a separate town contract.	\$0		\$0	\$0	\$0
Shelton Road <i>Don't Include Complete per R.I.</i>	This was a former DOT roadway and currently has 3-4" bituminous concrete surface course over 8" concrete surface course. The 3" temporary patch should be removed and a 8-10" bituminous patch should be installed and a overlay may be installed in 10 years	\$0	\$8,612	\$321,145	\$0	\$367,757
SUBTOTALS		\$0	\$57,671	\$622,861	\$0	\$718,532

TOTALS \$51 \$600,381 \$3,924,368 \$367,820 \$5,522,629

- Sedimentation & Erosion Control \$10,000
- Project Survey & Stakeout \$20,000
- Base Course Patching at Milled Roadways \$60,000
- Maintenance & Protection of Traffic \$25,000
- Traffic Men \$150,000
- Signing & Striping \$20,000

Notes: Milling unit cost \$100/LF, Full Depth Reconstruction unit cost \$7/SY, Bit. Concrete unit cost \$100/LF, Pavement cost \$100/Ton

PAVING PROJECT TOTAL \$5,810,000

Information regarding Cap Ex Plan CY 2013

Paving:

All Contract IV Roads: Per Attached report prepared by Tighe and Bond

Cypress/Hillside – Per asphalt, basin, etc.. costs based on linear footage of roadway. Pricing from calculations still within reasonableness to current state bid pricing.

Drainage Improvements: See attached Engineering Calculations

~~X~~ **Equipment:**

Snowplows/Sanders: Initial request in prior years was \$160,000 per vehicle. Pricing increases each year with state bid pricing for chassis and increase in cost for additional equipment required to make vehicle road ready. For FY13, actual cost per truck was \$166,194. For the current request a nominal increase was requested over FY13 pricing for cost adjustments as described above.

Brushloader: Estimate attached from local vendor of this type of equipment (204k)

Wheelloader: Preliminary Estimate from CAT Dealer/Prior Cost history for Volvo

Parks Groundmaster: Based on cost history

2355 Mower – Per J. Mitri, based on industry standard

310G Parks Backhoe – Based on industry standard, Have a preliminary estimate of \$117k

Public Works Yard – Roofing: Per Antinozzi Associates building inspection report, roof replacement totaling \$265k was recommended for 2013/14. Based on need this cost is being allocated over CY13 and CY14, with attention to areas requiring priority being handled first. Copy of relevant report pages are attached.

Grapple
bucket*

Dear Dmitri:

Ed Hart – our salesperson, asked me to forward this quotation to you for a new TIGER Boom Mower Assembly complete, mounted onto a new John Deere model 6105M-4 wheel drive tractor. Pricing per State of Connecticut contract #10PSX0307 is as follows:

One - new TIGER model "Bengal" Mid-Mount Boom Mower model BB-22 with
3OSBB – Open, 3 Point Stow Transport System with Travel Lock
High Point Mount System and approximately 22+' of reach
Wheel weight installed in left rear tire and tires filled with counterweight
50" Flail Head
Proportional electronic Joystick controller
Fully installed and operational upon a John Deere 6105M-4WD Tractor with
IT4 diesel engine
Deluxe Cab, Heater-Defroster and Air Conditioning as standard
9 x 9 Power Reverser – Wet Clutch transmission
Backup Alarm, complete road lighting including brake lights, strobe light as requested
License plate bracket with light, AM/FM radio installed in cab, LED Safety Bars-F & R
Front wiper/washer kit
Entire package installed and operational Per State Contract #10PSX0307

FOB: Trumbull, CT. \$108,409.35 ✓

OPTIONS:

RT50D – 50" Rotary Head with hydraulic controlled door ADD: \$ 8,790.70 ✓

One - new model RF-90SD – 90" rear mounted flail mower ADD: \$ 8,580.75 ✓

One - Herbicide Wetcut control system complete with WC-B50
Spray Head Assembly for a 50" cutter head, Auto P24
automatic rate control with GPS speed sensor, 12V diaphragm pump
and pressure sensor, WC-P150 150 gallon poly tank with 3 point
mounting, installation ADD: \$ 9,898.25 ✓

One - new 11' Reversible snowplow complete with TSP-11SC Plow
and front attaching kit for the John Deere tractor, H Kit2 Hose Kit,
Rubber deflector mounted on top of reversible snowplow,
setup and installed on tractor ADD \$ 9,361.30 ✓
145,038

Unfortunately at this time there is not a loader kit available for this tractor when it has a boom
mower mounted onto it. There are loader kits available for the tractor without a boom mower
mounted on it, but nothing when the boom mower gets mounted.

We do have an alternative; this would be the WACKER NEUSON WL-30 also on the State
contract #10PSX0307. This is a compact loader that has a tremendous amount of power in a
small footprint. We could equip this machine with enclosed cab, heater-defroster-A/C, Lighting,
72" grapple bucket for \$54,162.00 delivered. This machine can also be used for sidewalk snow
removal as it could be setup for winter use with an overall width of 47.5". Other attachments
and accessories are available to make this machine a "MultiTool" carrier for year round use. We
also have machines coming off a winter rental which could be set up like this for less than
\$50,000.00. Machines would be delivered with a new 2 year warranty and ready to operate.

After reviewing this information if you have any questions or if we could be of any additional
assistance please feel free to contact us.

Thank you!

Sincerely,

Robert H. Clark, Jr.
President
Tri County Contractors Supply Inc.

February 26, 2013

Joe Mitri
Fleet Superintendent
Town of Trumbull
366 Church Hill Road
Trumbull, CT 0661

Dear Joe,

Thank you for your invitation to quote a new 2013 John Deere 410K backhoe loader. Your machine will be equipped with all the standard features including but not limited to:

- John Deere 4-cylinder Interim Tier IV diesel developing 107 peak horsepower.
- Wet sleeve engine design with replaceable cylinder liners.
- One-piece unitized construction mainframe.
- Two-position tilt over hood.
- Extended grille frame.
- Built-in external toolbox.
- Full ROPS pressurized and filtered cab with heater, defroster and air conditioning.
- Air suspension seat covered in cloth.
- Keyless ignition with security code capability.
- Programmable auto-shutdown feature to meet idling regulations and fuel savings.
- Backhoe auto-idle for fuel savings.
- Mechanical front wheel drive with limited slip differential and full power-shift 5-Speed transmission.
- 12.5X80-18 front and 21L X 24 R-4 rear tires.
- Extendable dipperstick with outer box design.
- Spring applied, hydraulically released park brake with electric switch control.
- Auxiliary one-way plumbing with flow control valve for future hammer or plate compactor.
- Auxiliary two-way plumbing for factory installed hydraulic thumb.
- Backhoe "pilot" controls with in-cab hand pattern switch and hydraulic lock out switch.
- Extended stabilizers with reversible pads.
- O.E.M. mechanical backhoe coupler.
- 24" severe duty trenching backhoe bucket.
- 18" severe duty trenching backhoe bucket
- 3-Function loader hydraulics with return-to-dig feature.
- Hydraulic front coupler with in cab attach/detach switch.
- 1.32 cubic yard multi-purpose (4 in 1) quick coupler loader bucket with reversible B.O.C.E.
- Loader boom service lock.

JOHN DEERE 410K

- Front counterweight.
- Two heavy-duty 1500 CCA batteries.
- 120 Amp alternator.
- 12-volt accessory outlet.
- Built in beverage and thermos bottle holders.
- Rotary hand throttle for backhoe operation.
- Cruise control.
- Sealed switch touch pad monitor system with audible and visual alarms, and machine diagnostic information via 4-push button/LCD operator interface.
- Tilt steering wheel.
- Auxiliary work lights with 360-degree illumination.
- Two front facing Whelen LED strobe lights mounted below the roof drip edge.
- Two rear facing Whelen LED strobe lights mounted below the roof drip edge.
- Am/Fm/CD/Weather band radio with digital clock.
- 1000-Watt 110-volt block heater.
- Glow plug cold weather start aid.
- Ride control.
- License plate bracket with light.
- "JDLink" remote machine monitoring with 3 year subscription.
- Operator, repair, and parts manuals.
- 12 Month unlimited hour full machine warranty.

Machine will be delivered to the Town of Trumbull Highway Department fully fueled and ready for work. Delivery in approximately 45 to 60 days. Quote good for 30 days. Payment in full due within 30 days of delivery. For budget purposes only, prices subject to change.

DPW Truck Wash Facility

CONCEPTUAL DESIGN REPORT

Submitted to

**Town of Trumbull
Department of Public Works**

March 20, 2012

*Public Facility
Capital*

29-0196-5-01
March 20, 2012

Mr. John Marsilio, Director
Department of Public Works
Town of Trumbull
5866 Main Street
Trumbull, CT 06611

Re: **DPW Truck Wash Facility
Conceptual Design Report**

Dear John:

We are pleased to submit our conceptual design report for the Truck Wash facility at the Trumbull DPW facility off Church Hill Street. The Town is pursuing the need for a new Truck Wash facility as the existing Truck Wash facility is beyond its useful life. This conceptual design report is based on the culmination of several pieces of information gathered and discussed throughout the project development phase.

Project Development

The Project Development was divided in to a sequence of individual tasks: obtaining relevant mapping from the Town's Engineering Department, conducting a site walk with town staff, obtaining equipment information from qualified product vendors, conducting geotechnical investigation at the DPW Yard, developing an opinion of probable construction cost, and summarizing the conceptual design information in a letter report. Below is more descriptive information for each of the individual tasks.

Mapping – Mapping of the DPW Yard site at 366 Churchill Road was obtained from the Trumbull Engineering Department. The existing conditions mapping was developed at a scale of 1-inch equals 80-feet with the site topography added from the Town's GIS mapping. The approximate location of above and below ground utilities are included based on existing conditions, existing mapping and on-site observations. The proposed condition's mapping is developed at a scale of 1-inch equals 40-feet to provide more detail of the conceptual design.

Site Walk Thru – A site walk thru was conducted on August 12, 2011 with Tom Baldwin and Chris Dubuque from our office. Two possible locations and orientations for the Truck Wash facility were discussed and considered during the site walk. The two locations are indicated as Area 1 and Area 2 respectively on the attached site plan, S-001. The general location of underground utilities was provided during the site walk as well.

Building Vendor Information – Tighe & Bond researched a variety of Truck wash facilities that are used in Connecticut for fleet equipment washing purposes. There are a number of manufacturers that specialize in truck wash equipment. Our research included the following manufacturers:

- Hotsy
- Inter Clean
- Rieskamp
- Belanger
- Evans Equipment & Environmental

Tighe & Bond researched the performance of several wash system types/technologies via telephone interviews with vendors and DPW staff in other municipalities to get a sense for the performance of the various wash systems and any design or construction issues that could/should be considered to render a better truck wash solution.

In initial talks with the Town of Trumbull the preference of an automated wash system was revealed. Tighe & Bond considered this option first and conducted research into this type of wash system. A few advantages to this type of wash system are the speed of wash, no manual labor, and predictable chemical use. Through discussions with users of automated wash systems and a specific site visit to Manchester, CT to inspect the DPW's automated wash system it became clear that the results were poor with regard to removal of salt/sand frozen to the undercarriage/dump body of trucks. The salt/sand caked on the trucks would need to be removed manually before sending the vehicles through the automated wash system. This is a major drawback of the automated wash system and order to attain the town's desired results there would also need to be a manual wash system in front of the automated system to clean the undercarriage/dump body.

The second wash system researched was a manual two bay wash system. This system would include a central pressure washer and water heater able to operate two wash bays. Accessories to the system would include pressure nozzles, mobile undercarriage wash unit, high pressure hoses, hose reels, swivel booms, and curtains. The advantages of this type of wash system are that it offers the most flexibility for washing and the ability to wash more than one truck at a time. The disadvantages are that it requires manual labor, wash times are longer and the amount of chemicals used will depend on the user.

The Town requested a demonstration of the undercarriage wash accessory to see if the unit provides satisfactory washing results. Hotsy has provided the Trumbull DPW with an undercarriage washing unit for their evaluation.

Geotechnical Investigation/Report – On November 20th and 28th 2011, a two test borings were drilled by New England Boring Contractors within the area for proposed for the truck wash facility. Attached is the Geotechnical Technical Memorandum with the detail of the geotechnical investigation. To summarize the subsurface geotechnical conditions based on boring B-5, subsurface conditions at the proposed truck wash generally consisted of asphalt and approximately 5 feet of fill overlying sand and probable bedrock. The fill consists of a loose to medium dense, brown to gray, sand, some to little (10 to 30 percent)

silt, little to no gravel (0 to 20 percent), woodchips were also encountered in the boring B-5. Refusal in test boring B-5 occurred at 18.5 feet, and then again at 21 feet in offset boring B-5A. A petroleum odor was noted in the 3 foot to 5 foot sample, and a sheen was noted on the water coming out of the rods in the 10 foot to 12 foot sample, however the soil did not have an odor. Weathered bedrock was encountered at approximately 13.5 feet below existing grade, with refusal at a depth of 21 feet.

The proposed truck wash building should be supported on conventional shallow foundations bearing on natural soils, compacted granular fill, or crushed stone after the complete over-excavation of the existing fill. Crushed stone greater than 6-inches in thickness should be wrapped in a geotextile separation fabric, such as Mirafi 160N. Prior to backfilling, the excavated subgrade should be proof compacted as described later in this memorandum.

A net allowable bearing capacity of 2 tons per square foot (tsf) for footings bearing on natural soils, compacted Granular Fill, or Crushed Stone is recommended.

The floor slab at the truck wash building may be designed as a slab-on-grade bearing on a 12 inch thick layer of compacted Gravel Borrow placed over compacted Granular Fill or crushed stone wrapped in a geotextile separation fabric placed, after over-excavation of fill to at least two feet below the existing slab. Fill should be placed as described later in this report.

Design Criteria:

Structural

Governing Building Codes:

- Connecticut State Building Code
- ASCE 7-02

Minimum Live Loads:

- Floors 100 psf
- Roof 30 psf plus snow drift

Snow Load Criteria:

In accordance with Section 1608, using the following factors:

- C_e (Snow Exposure Factor) 1.0
- C_t (Thermal Factor) 1.0
- I_s (Snow Importance Factor) 1.1
- P_g (Ground Snow Load) 30 psf

Wind Load Criteria:

- Basic Wind Speed 110 mph
- Building Category III

- Exposure Classification B
- L_w (Importance Factor) 1.15
- K_d (Directionality Factor) .85
- K_{zt} (Topographic Factor) 1.00

Earth Quake Load Criteria:

- Seismic Site Class D
- Seismic Use Group III
- Seismic Design Category C
- I_s (Importance Factor) 1.5
- S_s (Short Period Spectral Response) 0.238
- S_1 (1 Second Period Spectral Response) 0.062
- R (Response Modification Factor) (CMU) 2.0
- C_d (Deflection Amplification Factor) (CMUI) 1.75

Structural Systems:

- Foundations: Reinforced Concrete
- Slab on Grade: 8-inches thick Reinforced Concrete
- Roof: Wood Truss with asphalt shingles
- Lateral Support: Load Bearing Concrete Masonry Unit Shear Walls

Electrical Criteria:

Applicable Codes:

- NFPA 70 National Electrical Code (NEC)
- NFPA 72 National Fire Protection Association (NFPA)
- International Building Code (IBC)
- NFPA 101 Life Safety Code
- NFPA 780 Lighting Protection

Basic Building Services:

- Primary electrical service
- Secondary electrical distribution
- Wiring devices, conduit, and branch circuits
- Mechanical equipment
- Interior and exterior lighting
- Emergency lighting
- Fire Alarm

- Grounding
- Lighting Protection
- Security system
- Communications

Site Criteria:

- Site grading
- Surface treatments
- Stormwater management
- Sedimentation and erosion control

Permits:

- Site Plan Approval
- Building permits
- Industrial stormwater discharge permit modifications

Opinion of Probable Construction Cost – To develop probable construction cost we contacted vendors and requested equipment quotes. For building costs we used Means Cost Estimating System, which typically are on the high side and is reflected in our Opinion of Probable Cost below in Table 1. A breakdown of the individual building cost components are attached in the detail building cost estimate.

Truck Wash Building - Trumbull, CT
ESTIMATE OF PROBABLE CONSTRUCTION COST

Engineering & Design Fees 10% \$57,493

TOTAL PROJECT COST \$632,418

Summary - The Town has selected a two bay wash configuration at the Highway Department facility at 366 Church Hill Street. The attached site plan indicates the proposed building location and traffic flow. A simple cross section has been added to the site plan to illustrate the general components of the truck wash facility.

We are pleased to present this letter report to the Town and we look forward to meeting with you to review the findings.

Sincerely yours,
TIGHE & BOND, INC.

**RE: Application, Main Street Investment Fund Program;
Long Hill Green Enhancement Initiative Plan**

Dear Mr. Desai:

We are excited to submit for your agency's consideration the Town of Trumbull's application to the Main Street Investment Fund Program.

The Plan

The Town requests funding for the Long Hill Green Enhancement Initiative (LHGEI), a multi-phase plan to re-establish the functionality of a former village while promoting connections to emerging open space and recreational assets. The first steps in this plan actually occurred nearly 3 years ago, when the Planning & Zoning Commission undertook the creation of a Long Hill Green Zone, intended to be the first location in Trumbull where business and residential mixed used development would be allowed. The Long Hill Green Zone was formally adopted in 2010, and while general economic conditions have predictably delayed new private construction, recent months have brought tangible signs that multiple development interests are readying to proceed with projects. We believe the public improvements to be undertaken with the requested funding would provide a powerful impetus for private investment, and there has been great enthusiasm in response to our plans. In fact, we have concluded that the re-establishment of a functional village in the Long Hill Green area requires the public improvements for

pedestrian mobility that will allow and encourage the residents of the dense, surrounding residential neighborhood to walk to the green and the commercial establishments that will surround it in the future.

Additionally, the Town has had a productive collaboration with the Greater Bridgeport Regional Council and Connecticut DOT on the extension of the Pequonnock River Valley Trail, a regional recreational asset that is ultimately intended to connect Trumbull with Bridgeport, Monroe and Newtown. The quality of these plans has already attracted considerable federal and state funding, and an important objective of the LHGEI is to improve the pedestrian access for the area's residents to the Trail. The complete LHGEI Plan is an Attachment within this submission.

The Project

The primary purpose of this application is to request funding for approximately 2,700 linear feet of sidewalks, related improvements, and a pedestrian crosswalk and traffic light at the intersection of Route 111 and Whitney Avenue. Complete construction estimates, as well as schematic diagrams, are an Attachment within this submission. If funding is awarded, the Town will immediately utilize its own funds to engage a qualified firm to complete all necessary design, engineering, and bid package preparation, the scope of the work to be commensurate with the amount of the funding award. The Town has had a preliminary consultation with Connecticut DOT regarding the establishment of the traffic light and crosswalk, from which it received positive feedback.

Consistency With and Furtherance of the State's Plan of Conservation and Development

We believe strongly that the Long Hill Green Enhancement Initiative supports several of the Growth Management Principles in the State's Plan of Conservation and Development.

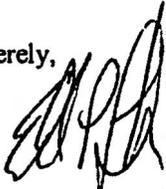

- By fostering real estate developments that will create new rental housing of various types and unit sizes, the LHGEI will Expand Housing Opportunities and Design Choices to Accommodate a Variety of Household Types and Needs.
- By intensifying commercial and residential development on an existing State Route, as well as a Greater Bridgeport Transit Route (Bus Route 14), the LHGEI will Concentrate Development Around Transportation Nodes and Along Major Transportation Corridors to Support the Viability of Transportation Options.
- By improving and promoting access to the Pequonnock River Valley Trail and Indian Ledge Park, the LHGEI will Conserve and Restore the Natural Environment, Cultural and Historical Resources, and Traditional Rural Lands.
- By reintroducing and promoting appropriate mixed used density in an area where it previously existed, the LHGEI will Conserve and Restore the Natural Environment, Cultural and Historical Resources, and Traditional Rural Lands.
- By promoting the historical importance of Long Hill Green and reintroducing an elevated volume of resident pedestrian traffic to the Green, the LHGEI will Conserve and Restore the Natural Environment, Cultural and Historical Resources, and Traditional Rural Lands.
- By connecting the Pequonnock Valley River Trail with a greater portion of the Town's residential base, and introducing an elevated volume of resident pedestrian traffic to the Trail the LHGEI will promote awareness of this natural asset and will Protect and Ensure the Integrity of Environmental Assets Critical to Public Health and Safety.

Time Schedule for the Project

If funding is awarded, the Town will immediately utilize its own funds to engage a qualified firm to complete all necessary design, engineering, and bid package preparation, commensurate with the amount of the funding award. It is expected that bids could be received within 90 days of award. Subsequently, bid award, contractor mobilization and construction is anticipated to require a total of 180 days, subject to seasonal delays.

Should you have any questions, or require clarification of any portion of our funding request, please do not hesitate to call me. Thank you for the opportunity to apply, your attention, and your guidance in the preparation of this application.

Sincerely,

Edward P. Lavernoich
Economic & Community Development Director

Microgrid

Microgrid Grant and Loan Pilot Program PFA Review Results - February 26, 2013

<u>Applicant</u>	<u>Invited to Submit to Next Round?</u>	<u>Generation Details</u>	<u>Facilities Covered</u>
Bridgeport (City Hall et al)	Yes	355 kW of existing natural gas generator plus 1.6 MW of new natural gas generators	City hall, police HQ, senior center
Bridgeport (Public Works)	Yes	500 kW existing natural gas generator plus 1.6 MW new natural gas generators	Public works command center, public works truck barn, emergency communications and operation center
CT Studios	Yes	5 MW fuel cell installation	CT Studio campus (with public sheltering capabilities)
CT Transit	Yes	existing 400 kW fuel cell, 875 kW from dual fuel generator, 23 kW solar PV	Two CT Transit buildings and state police communications tower
Glastonbury (Celtic Energy)	Yes	new 400 kW fuel cell, 260 kW existing solar, 1.32 MW of existing diesel generation	Water pollution control facility, town hall, police HQ
Great Pond (ABB)	Yes	6.5 MW of solar and fuel cells	Community center, assisted living center, grocery store, YMCA, EV charging station, emergency shelter, police station, fire station
Hamden (high school, Shop Rite)	Yes	Existing 400 kW fuel cell, additional natural gas generators	Hamden HS, Shoprite, Louis Astorina Ice Arena
Hamden (Town hall, police, etc)	Yes	830 kW of new CHP, plus existing diesel generators	town hall, police and fire HQ's, town government center, EOC, library, senior center, middle school
Hartford (Jennings Road - Public Works)	Yes	700 kW of fuel cells or CHP	DPW yard, fire training academy, former police HQ
Hartford (Parkville Cluster)	Yes	550 kW of fuel cells or CHP	Parkville school, senior center, library, supermarket, gas station
Sikorsky	Yes	10.8 MW cogeneration	main facility, fire department, flight-field Telemetry Tower
Southington (Woodard & Curran)	Yes	600 kw new propane generators	National Guard Armory, middle school, senior center

Microgrid

Town
Share
\$100K

SUBASE	Yes	existing 5 MW CHP, existing 1.5 MW diesel generators	Subase campus
Town of Windham	Yes	27 kW of solar pv, add generator or backup storage system	Sweeney Elementary school and the Middle School
Trumbull	Yes	900 kW of gas generators and solar	town hall, library, shopping center w/ grocery store
UConn Depot Campus	Yes	existing 400 kW fuel cell+7kW of solar	40 buildings
Univ of Hartford	Yes	5 MW of existing diesel generators	North Dorms, operation building, campus center
Wesleyan	Yes	2.4 MW existing CHP, plus adding 676 kW CHP	Freeman athletic center/public shelter
Woodbridge	Yes	600 kW fuel cell, 150 kW CHP, 1 MW natural gas generators	police station, fire station, senior center, DPW facility, town hall, high school (shelter), library
Ansonia (Greenpoint Energy)	Yes, Conditionally	700 kW Anaerobic digester, 1.05 MW natural gas generator	Wastewater Treatment plant, WCPA facility, transfer station, DPW facility, grocery store
Backus Hospital	Yes, Conditionally	10 MW of new diesel generators	Hospital campus including 123 bed hospital, several health centers, Backus home health care center, Backus outpatient care center
City of New London	Yes, Conditionally	300 kW diesel generator	public works garage, transfer station, city fuel pumps
Fairfield (Public Safety)	Yes, Conditionally	Existing 50 kW nat gas generator, 47 kW new solar, 350 kW existing diesel generator	Police HQ, Emergency Communications Center, cell phone tower, fire station, homeless shelter
Simsbury	Yes, Conditionally	Existing 250 kW diesel generator, additional diesel generation	town hall, police station, EOC
Stamford	Yes, Conditionally	400 kW fuel cell, and natural gas generators	Government Center and Clinton Manor (housing authority HQ/13 fl apartment complex)
Town of Southbury	Yes, Conditionally	Existing generators, diesel and CHP	DPW, police station, fire station, town hall, senior center, emergency shelter
Windham Hospital	Yes, Conditionally	Current diesel generators plus 1.5 MW new diesel generators	Hospital campus

TOWN OF TRUMBULL CONNECTICUT

January 3, 2013
Mr. Daniel C. Esty
Commissioner
Connecticut Department of Energy & Environmental Protection
79 Elm Street
Hartford, CT 06106-5127

RE: PROJECT FEASIBILITY APPLICATION; Microgrid Grant and Loan Program

Dear Commissioner Esty:

I am pleased to submit to your agency the attached Project Feasibility Application for the Trumbull Municipal Center Microgrid Project. The project concept has my complete support and endorsement. In our view, the project concept that the Town of Trumbull is presenting to you is fully consistent with the goals of the General Assembly when it passed Public Act 12-148. Trumbull residents have been severely impacted by recent weather events, and keeping Critical Facilities energized, open, and operating to full capacity is of paramount importance to our community. Our project concept would incorporate existing solar photovoltaic assets into the new microgrid, as well as offering the potential for a true public-private partnership with AHOLD USA, the corporate parent of Stop & Shop Supermarkets, and owner of the retail plaza within the proposed project area. The company has expressed strong interest for participating in every aspect of the project.

Thank you for the guidance provided by your agency's staff as we prepared this application, and thank you for your attention.

Sincerely,

A handwritten signature in black ink that reads "Timothy M. Herbst".

Timothy M. Herbst
First Selectman

MICROGRID GRANT AND LOAN PILOT PROGRAM
PROPOSAL COVER PAGE

(Please follow the instructions in Attachment A, Proposal Cover Page Instructions, and type answers using the space provided)

1. Name, Address, Phone Number and E-mail Address of Respondent (Include Legal name. If a CT Corporation or LLC, provide name as registered with the CT Secretary of the State):	
<i>Timothy M. Herbst</i>	
<i>First Selectman</i>	
<i>Trumbull Town Hall 5866 Main Street Trumbull, CT 06611</i>	
<i>(203) 452-5005</i>	
<i>firstselectman@trumbull-ct.gov</i>	
2. Contact Name, Title, Address, Phone Number, and E-mail Address of Contact (if different from Respondent):	
<i>Edward P. Lavernoich</i>	
<i>Economic & Community Development Director</i>	
<i>Trumbull Town Hall 5866 Main Street Trumbull, CT 06611</i>	
<i>(203) 452-5043</i>	
<i>elavernoich@trumbull-ct.gov</i>	
3. Name, Title and Signature of Authorized Representative (legally authorized to sign the contract):	
Name and Title: <i>Timothy M. Herbst, First Selectman</i>	
Signature: 	Date: <i>1 / 3 / 2013</i>
4. Title of the Proposed Project:	
<i>Trumbull Municipal Center Microgrid Project</i>	
5. Brief Description: The project, when completed, is intended to enable continuous operations of critical government and commercial facilities during general power outages. The major facilities within the project will include: Trumbull Town Hall (TTH), 5866 Main Street; Trumbull Library (TL), 33 Quality Street; and Stop & Shop Plaza (SSP), 8 Quality Street. Critical municipal functions are located in TTH, including the executive offices, the Public Works Director, the Town Engineer, the Town's Geographic Information System, the Land Records, the Finance Department, the Fire Marshall, and the Building Inspector. In addition, TTH is the nerve center for virtually all of the municipal internet and e-mail capabilities. TL is envisioned to serve as a warming center, charging center, community briefing center, and a Point of Distribution for the local Health Department. SSP is a centrally located 100,000 sq ft commercial center encompassing the Town's only full service supermarket and several other smaller commercial establishments. The project is currently contemplated to include a natural gas fueled Generating Facility within a Microgrid that will support Intentional Islanding. Solar PV will be increased in the most optimal locations within the project, solely to augment the primary Generating Facility. The Microgrid will rely primarily on the existing natural gas infrastructure, and would require a total connected load (of the three Critical Facilities of approx. 900kW. Other adjacent properties, if ultimately included, would increase the load to approx. 950kW.	
6. Duration of Project Requested: 12 months From: Date of Award Commitment To: Unknown, dependent on timing of award	
<i>List Time Constraints, if any: Upon award, the Town of Trumbull and the private owners of 8 Quality Street will negotiate and execute a funding agreement for the project. The legal abandonment of Quality Street, if necessary, and the granting of easements for the EDC, if necessary, may create a time constraint for the project that can only be quantified upon final design.</i>	

Items 7-10 must be appropriately labeled and included as an attachment to this form.

7. Addresses or Locations of Proposed Project:

*5866 Main Street (Trumbull Town Hall) Tax lot E7-174
33 Quality Street (Trumbull Library) Tax Lot E7-291
8 Quality Street (Stop & Shop Plaza) Tax lot E7-175*

The microgrid project area may ultimately include neighboring commercial or residential properties on Church Hill Road and/or Main Street, to be dictated by a complete evaluation of project feasibility and design considerations.

8. Purpose and Need for the Proposed Project:

The Town of Trumbull has been heavily impacted by recent storm events, with general power outages impacting the entire residential population of the Town. The power outages have also caused critical municipal and commercial facilities to go without power on multiple occasions when the normal capabilities of those facilities were needed more than ever. The critical municipal facilities within the proposed project are essential to the continuity of every aspect of the Town's public safety operations, including electronic communications. The critical commercial facilities within the proposed project are located in the geographical center of Trumbull's 36,000 residents, and are within a 5 minute automobile trip of more than 50% of the Town's population.

9. Scope of Work:

The project is currently contemplated to include a natural gas fueled Generating Facility within a Microgrid that will support Intentional Islanding. Existing Solar PV will be maintained and incorporated into the project; additional Solar PV may be installed in the most optimal location within the project, subject to a complete evaluation of project feasibility and design consideration, but solely to augment the primary Generating Facility. The Generating Facility is currently anticipated to be located on Town property (5866 Main Street or 33 Quality Street) in a specific location to be determined at the design stage. It is anticipated that the project might be undertaken in two or more phases, with the additional necessary connections occurring prior to, rather than simultaneously with the installation of the new Generating Facility. The project's scope of work is more fully described in the answers to Questions 6-9 in Attachment C.

10. Schedule for Completion of the Scope of Work for the Proposed Project:

It is anticipated that the project can be completed within 12 months of the award commitment. See attached Project Milestone Schedule.

**GRANT EXHIBIT
SELECTED COMPLETED STATE FUNDED PROJECTS
2012
TOWN OF TRUMBULL**

Animal Shelter Expansion

\$123,376 STEAP and LoCIP funds

9/25/10-6/30/12

Addition added to brick structure to safely and humanely house animals. Parking lot expanded and paved.

Town Hall Window Replacement

\$125,620 ARRA Energy Efficiency and Conservation Block Grant (EECBG) funds

3/1/10-3/31/12

Replacement of Town Hall windows with energy efficient windows.

Whitney Avenue Repavement

\$943,590 ARRA Department of Transportation

10/1/11-8/31/12

Pavement rehabilitation and resurfacing of Whitney Avenue.

Merritt Boulevard Repaving.

\$1,400,000 ARRA ConnDOT

9/12-12/12

Pavement reclamation, repaving and ADA improvements.

Church Hill Road Streetscape

\$200,000 STEAP and LoCIP

Drainage, paving & curb installation.

ATTACHMENT C
MICROGRID GRANT AND LOAN PILOT PROGRAM
TECHNICAL FEASIBILITY CRITERIA AND SUBMISSION REQUIREMENTS

1. Include a minimum of 2 or more critical facilities, not served by a common electrical service entrance, located in proximity to each other.

See attached diagrams.

The proposed project area encompasses a total of three (3) critical facilities, with a total aggregate load of approx. 900kW.

The Trumbull Town Hall, 5866 Main Street, has a Total and Critical Load of 150kW, and is anticipated to be 200 to 500 feet from the Generating Facility.

The Trumbull Library, 33 Quality Street, has a Total and Critical Load of 135kW, and is anticipated to be 100 to 250 feet from the Generating Facility.

The Stop & Shop Plaza, 8 Quality Street, has a Total and Critical Load of approximately 615 kW, and is anticipated to be 300 to 400 feet from the Generating Facility.

2. Number of people likely to be served or benefit from the Microgrid.

The population of Trumbull is approximately 36,000 people. From a public safety perspective, all will benefit from the proposed project. In regard to access to critical commercial facilities, approximately 20,000 people are expected to benefit from the proposed project.

3. kW rating of Microgrid generation.

Standby generating facilities with a capacity of a minimum of 900 kW are contemplated for the proposed project.

4. Microgrid generation to load ratio.

A cost-effective, optimal generation to load ratio for the project cannot be determined at this time.

5. Generation in close proximity to the loads it is serving.

See attached diagram. The generating facilities contemplated for the project are anticipated to be no more than 400 feet from any of the critical facilities.

6. Demonstrate the ability to form an intentional island upon local EDC or MEU request (e.g. prior to major storms, testing, and maintenance etc.)

Intentional island operation will allow the microgrid control system (SCADA) to bring the microgrid generation on-line and synchronize with the main grid such that the microgrid achieves a zero import/export of real and reactive power across the points of connection with the main grid before opening the connections and islanding. In this intentional island situation, no loads are disturbed during the transition to island mode. An intentional island would typically be used when the grid is secure but the threat of storms is imminent, testing is necessary or maintenance is scheduled.

The Trumbull microgrid will support intentional islanding by bringing the generation online, synchronizing with the main grid and then opening the reclosers and breakers to create the microgrid. The microgrid SCADA system and generator paralleling system will maintain the microgrid frequency and voltage. The microgrid control system will also maintain adequate spinning reserve to ensure unplanned loads can be accommodated. However, if generation resources cannot support the entire load, the control system will curtail loads in a prioritized order to ensure the most critical loads remain served.

7. Demonstrate ability to form an intentional island, automatically, during loss of grid supply and a method to return to grid Parallel Mode when the grid is restored in compliance with IEEE 1547-2003 and the UI Generator Interconnection Guidelines

The distributed energy resources (DER) chosen for the Trumbull microgrid are TBD. It is assumed that at least one natural gas engine will be present – additional generation (PV, fuel cell, etc) is TBD.

Various protection functions are available to ensure the safe disconnection/decoupling of the Trumbull microgrid from the UI system in the event of voltage and frequency issues. These include:

- *Overvoltage protection $V>$ and Undervoltage protection $V<$: Two-stage overvoltage/undervoltage measurement for one of the 6 input voltages of the device, Separated tripping delay time, Settable drop-off to pickup for both stages*
- *Underfrequency $f<$ and Overshooting $f>$ protection : Monitoring on undershooting ($f<$) and/or overshooting ($f>$) with 4 frequency limits and delay times that are independently adjustable, Insensitive to harmonics and abrupt phase angle changes, Settable undervoltage threshold.*
- *Rate-of-frequency $df/dt>$; $-df/dt<$: Monitors whether the frequency overshoots ($df/dt>$) and/or undershoots ($df/dt<$) a set limit value, with 4 individually settable limit values or delay times, Variable measuring windows, Coupling to frequency protection pickup, Settable undervoltage threshold.*
- *Vector jump protection $\Delta\phi$: Sensitive phase jump detection to be used for network disconnection*

The microgrid management system is constantly monitoring the reserve available within the system in the event of an outage of the main grid. In the first few seconds of an outage, the primary breakers (to be installed) will trip to isolate the Trumbull microgrid from the UI system, non-critical loads will start to trip off-line and the engine(s) will start. Approximately 15-20 seconds after the outage, the first (if more than one) engine will be synchronized to the bus and will carry load. Each additional engine (if present) will require 90-120 seconds to start and synchronize to the bus. As more generation comes online, more non-critical loads will be brought on line. The goal of this process is to have critical loads supported by uninterruptable power supply (UPS) systems for a short amount of time until the engines can take the load.

Paralleling of DER and re-synchronization with main grid

The project will utilize protection devices from a industry leading supplier. This will be fully digital multifunctional compact devices with powerful 32-bit microprocessors and have specific products used for paralleling/synchronizing systems. The synchronism check verifies that the switching does not endanger generators or the stability of the power system. For this purpose the voltage vectors of the power system sections to be synchronized are checked within definite limits for compatibility. The project will utilize protection devices with a very high reliability during paralleling/synchronizing due to a "2 out of 2" decision design from two separate measuring algorithms in the same device – this is better than two separate devices which can have a simultaneous failure mode when each device uses the same algorithm. The devices can also be used for the protection function and in addition to paralleling/synchronizing tasks for small, medium and large generators.

The devices recognize automatically the operating conditions and react depending on the preset settings.

- *The operation mode "Synchrocheck" will check the validity of a restart according to different considerations.*
- *The operation mode "Switching Synchronous Systems" will determine the frequency difference with high accuracy. The connection will take place if the difference frequency is near 0 for a specified period of time.*
- *If asynchronous conditions are present, as in the case of synchronization for generators and systems, the speed can be automatically adjusted to the system frequency and the generator voltage at the system voltage. The circuit breaker closing time will depend on when the generator will be switched to a point of synchronism.*
- *Devices recognize a de-energized line or bus via the multi-voltage circuit and the multiple inquiries of the voltage. As a result, a trouble-free synchronization with the main grid is established.*

The protection devices to be used will be equipped with control functions which operate (close and open) switchgear via the integrated operator panel, the system interface, binary inputs, or an HMI. The status of the primary equipment can be transmitted to the device via auxiliary contacts connected to binary inputs. The present status (or position) of the primary equipment can be displayed on the device, and used for interlocking or plausibility monitoring. The number of the operating equipment to be switched is limited by the binary inputs and outputs available in the device or the binary inputs and outputs allocated for the switch position indications.

Depending on the primary equipment being controlled, one binary input (single point indication) or two binary inputs (double point indication) may be used for this process. The capability of switching primary equipment can be restricted by a setting associated with switching authority (remote or local), and by the operating mode (interlocked/non-interlocked, with or without password request). Processing of interlocking conditions for switching (e.g. system interlocking) can be established with the aid of integrated, user-configurable logic functions.

Once the microgrid is reconnected to the main grid the system needs to be returned to the state it was in prior to the outage.

The microgrid control system will communicate the status of the generation assets and the breaker and recloser positions to UI.

8. Demonstrate the ability of the Microgrid's Interconnection Facilities to continuously operate during an extreme weather event; identify the types of weather conditions during which proposed Microgrid Interconnection Facilities are capable of continuously operating.

The microgrid control system will be housed indoors. The microgrid will use the existing power distribution network – this is the most feasible and economic solution today. The intention is to deploy enough intelligence onto the power distribution network to account for various scenarios during storms. If the power distribution network around Trumbull City Hall is not affected – the proposed form of microgrid could continuously operate during a Category 3 hurricane.

9. Demonstrate the ability to continuously operate with no planned outage or down time for maintenance while in Island Mode 24x7, despite extreme weather event, for a minimum of four consecutive weeks utilizing Microgrid combined generation resources.

The Trumbull microgrid will not include any significant storage assets – this is not economically feasible. The project will depend on the robust natural gas infrastructure to supply four consecutive weeks of fuel. The generation assets we will procure will be from trusted and industry leading suppliers and vendors like Waukesha, Jenbacher or MTU Onsite Energy.

10. Locate generation in proximity to an uninterruptable fuel source capable of sustaining the Microgrid for a minimum of two weeks and describe a plan to secure additional fuel resources beyond two weeks as part of storm preparation and storm management.

Please see answer to #9. The primary fuel source will be the already present natural gas infrastructure. The project will deploy a limited amount of solar PV, both currently existing on the Trumbull Library, and potential future installations on the Trumbull Library and/or Trumbull Town Hall, but this will not be in sufficient quantities to sustain the microgrid. It is not economically feasible for the Town of Trumbull to locally store 2 weeks of fuel.

11. Project must pass all associated Interconnection Guideline screens per the respective EDC or MEU.

The project will meet the specifications set forth in IEEE 1547 and the CL&P and UI Generator Interconnection Technical Requirements as appropriate. The Town, in collaboration with a qualified developer, will undertake the appropriate feasibility and impact studies as a part of the interconnection process.

12. Possess black start capability during Island Mode.

The primary generation asset in the Trumbull microgrid will be a reciprocating engine with black start capability.

13. Demonstrate the ability to improve the reliability for Microgrid customers and not adversely impact customers outside of the Microgrid electric boundary and the ability to not inhibit or delay system restoration.

The local generation source(s) – reciprocating engine and potentially solar PV and fuel cell – will ensure that the microgrid customers will not experience an outage longer than the 2-3 minutes it takes to synchronize the generation assets to the bus. This outage will be less than an outage on the main grid. The protection devices deployed and the communication with the EDC will ensure that the EDC maintenance personnel are aware of the status of the microgrid and able to safely work on the main grid.

It is assumed that the UI distribution network is configured in loops such that the customers outside of the proposed Trumbull microgrid can be fed from more than one direction.

14. Demonstrate the ability to support and manage existing Microgrid loads and describe techniques and equipment designed to manage future added Microgrid loads in Island Mode. Minimum generation capacity shall be no less than 120% of Critical Facility load.

This section describes the basic building blocks of the control system to be used to manage existing and new microgrid loads and generation assets. We will implement a fully digital automation system that is suitable for applications at all voltage levels. Digital control systems reduce costs for the installation of secondary systems and provide more operational clarity than a classical hardwired concept. Integrated switch interlocking prevents switching errors and hazards to staff. Flexible architecture fulfills the most stringent demands for user convenience and expandability.

The first part of the control system is the real-time software and hardware. The hardware is a real-time data processor which is a rugged industrial computer built to tolerate harsh environments. This can perform its job in a single or redundant configuration with auto failover, when higher availability (near 100% uptime) is required. The software performs all of the real-time data acquisition from IEDs, PLCs and RTUs, and maintains a real-time database. The software acts as a data concentrator, and it speaks many protocols to accomplish its task including IEC 61850, Profibus DP, Modbus, DNP V3.00, and OPC. The software also performs calculations and processing functions dedicated to power automation tasks. The configuration software allows the user to build database structures from templates or imported database structures, which simplifies the database building and maintenance process.

The second part of the system is the User Interface. The User Interface displays real-time data in a graphical environment, and allows the user to perform control of equipment. The User Interface displays one-line diagrams of the real-time data, and allows the user to perform actions such as open or close breakers or switches, or raise or lower a transformer tap. The User Interface also displays alarms and events, as well as reports and archival data.

The third part of the system is the LAN structure. The Process LAN is an Ethernet LAN between the hardware and the User Interface. Further into the power system and substations, the Station LAN may be Ethernet, Profibus, or other communication network. The LAN (using Ethernet) may be configured in a redundant loop configuration or for wireless communications over a cellular network.

The general use of standard protocols complying with IEC 61850 offers the greatest level of openness and data transparency with added benefits offered by the quality information provided in the standard. Our control system will offer an open and scalable concept with optimum interface facilities to higher level control systems at the EDC via IEC 60870-5-101, IEC 60870-5-104 (TCP/IP) and DNP V3.00 (level 2) (Serial and TCP/IP).

15. Demonstrate the ability to perform load shedding in case of a shortage in generation in Island Mode.

In order to maintain the power system stability and critical process survivability during Island mode or in times of power network emergencies, a load shedding function has to supervise and establish the balance of supply and demand (generation and load) at the customer site during this transition. This is generally accomplished by shedding customer circuits with low priority using a prioritization matrix.

The load shedding solution we intend to implement consists of three applications: fast load shedding, dynamic power-based load shedding and frequency based load shedding

- *Fast load shedding: In case of a defined critical event (e.g. loss of utility feed or trip of a generator – the list of critical events depending on the topology of the power network) consumers of low priority have to be shed very fast, so to adapt the consumed power to the generated power. It is possible to define the list of circuits to be shed in advance. To make sure, that only as much power is shed, as necessary in the respective situation, the balance of active power is calculated periodically for the scenario of every critical event. This determines which circuits will have to be shed in case of the critical event, based on the available power, spinning reserve, and actual topology. If the critical event occurs, fast load shedding can react within <100 ms based on the previously calculated balance of power. Thus the stability of the power network is maintained and frequency based load shedding is usually avoided.*

- **Dynamic power based load shedding:** In island mode, this monitors the difference between all generated power plus the spinning reserve on one hand, and the consumed power plus defined reserve for stability on the other hand. If the system finds that the current consumed power plus defined reserve is above the maximum potential power able to be generated, loads are shed according to the priority list of consumer circuits. In addition, dynamic power based load shedding supervises relatively large consumers (loads), which are currently not operating (e.g. big motors). If their typical power consumption is bigger than the current reserve they will be inhibited from starting. Please note that the process of transitioning to island mode, i.e. separation of the network from the utility infeed is part of the protection scheme and not included in the load shedding applications.
- **Frequency based load shedding:** Frequency based load shedding is used as a backup function. It works independent of power based load shedding and is based on a distributed architecture. One frequency relay per busbar section supervises the frequency for up to four thresholds. In case of violation of a threshold a fast shedding of predefined circuits is initiated automatically. This is primarily done to protect the power generation equipment and prevent the generators from tripping off line which could cause a domino effect. Every stage of the frequency relay is associated with a delay time to avoid unwanted operation.

16. Demonstrate the ability to communicate with the local EDC or MEU via Supervisory Control and Data Acquisition (SCADA) and other communication devices during parallel and Island Modes, while maintaining Cyber Security as required by interconnecting EDC or MEU. Operation of the Microgrid shall not be degraded by loss of communications between SCADA equipment. SCADA hardware and protocols to be compatible with utility requirements.

Please see the answer to question #14. The current intention is to procure a SCADA system from an industry recognized supplier with extensive experience in SCADA systems. Protocols supported will include DNP V3.0 (serial and TCP/IP), Modbus RTU (serial and TCP/IP), Modbus TCP RTU protocols, IEC 61850, IEC 60870-5-101, and IEC 60870-5-104 (TCP/IP).

17. Demonstrate the ability to maintain acceptable voltage and frequency levels per the local or regional regulations and standards in Island Mode.

Voltage and frequency in island mode will be maintained by the local engine controllers and by the load shedding scheme. For a description of the load shedding capability please see response to question #15.

18. Demonstrate the ability to meet the requirements of IEEE 1547-2003 while operating in Parallel Mode with the local EDC or MEU.

In parallel mode with the EDC the generation assets will not actively regulate the voltage at the point of common coupling (PCC) with the EDC nor will it cause a voltage fluctuation greater than $\pm 5\%$. We will also conduct the appropriate power system studies to ensure that the asset will not cause the unnecessary operation of any of the network protection devices installed on the EDC network. We will have appropriate isolation devices for the generation assets that will be accessible and comply with all lock-out, tag-out safety standards. The protection devices installed will be from an industry recognized vendor like GE, SEL or Siemens and the protection setting will comply with IEEE 1547-2003 and the EDC under-frequency trip settings. We will not inject harmonics into the EDC network – the amount of solar PV that may be installed will be relatively minor. We will conduct a test in accordance with IEEE 1547-2003 section 5.1 for the generation assets prior to interconnection.

19. Demonstrate the design of protection and control schemes while functioning in Island and grid Parallel Modes. Utilize utility grade protective equipment in design.

The project will utilize utility grade protection equipment from companies such as GE, ABB or Siemens. For a description of the protection functions deployed please see response to questions #15 and #7.

20. Demonstrate the ability to operate and maintain the Microgrid and all Interconnected Facilities in Island and Grid Parallel Modes in accordance with prevailing electrical safety and reliability standards.

The Town has an internal facilities group which actively maintains the infrastructure of the Town of Trumbull buildings. This group has deep experience in general system maintenance, and engages outside expertise in electrical and mechanical engineering on a frequent basis. The base generation asset for the Trumbull microgrid will likely be a natural gas fueled reciprocating engine; the engine technology is proven, and Trumbull – with its

network of suppliers and vendors has sufficient resources to ensure these assets are operated and maintained correctly. The control system and protection scheme to be used to operate the microgrid and interface with the EDC has been discussed previously. This scheme will ensure the safe and reliable operation of the microgrid.

21. Evidence of experience in distributed generation and Microgrid design, build and operation.

The Town possesses limited experience in the subject matter. The Town would engage experienced designers, developers, and local utility resources in the implementation of the project. Only industry-proven vendors and suppliers will be utilized for the project.

22. Demonstrate the ability and means to secure funding to reach project completion in specified time schedule.

The following sources of capital have been identified as potential funders for the project: 1. general obligation bonds of the Town of Trumbull; 2. annually budgeted operating funds of the Town of Trumbull; 3. monetary contributions by the property owner of commercial real estate within the project; 4. CT OPM LoCIP; and 5. monetary or other forms of contribution from system developers that may be engaged for the project.

Other sources of potential funding will be researched upon notification of permission to submit in response to the future Request For Proposals.

23. Demonstrate the respondent's ability to implement the project in expected Program Timeframe.

See the attached Project Milestone Schedule; which is subject to wholesale refinement. The Town will utilize in-house capabilities; will retain and fully utilize industry-proven designers to develop a detailed and realistic schedule for the project, and utilize industry-proven project managers to oversee the project's execution.

24. Past performance of projects for which the respondent has previously received state funding.

The Town has successfully completed numerous projects that received State of Connecticut funding; see attached GRANT EXHIBIT: SELECTED STATE FUNDED PROJECT 2012 TOWN OF TRUMBULL.

The Town's Finance Department employs personnel that have significant backgrounds and experience in all aspects of grant management, compliance, and reporting. The Town's Economic & Community Development Director, the Interim Project Manager, has over 20 years of experience managing State grant-funded projects for a previous municipal employer.

Layout Diagram and One-Line Electrical Diagram

As of the date of the submission of this application, there is no location determined for the proposed Generating Facility.

As of the date of the submission of this application, there has been no One-Line Electrical Diagram devised for the project concept.

6.3 COST EFFECTIVE ANALYSIS

In order to determine the cost-effectiveness of completing the rehabilitation work associated with each identified defect, an analysis of the cost to rehabilitate defects in the system versus the cost to transport and treat the flow related with the defects was completed. The data related to this investigation is located in Tables 6-3 and Table 6-4 in Appendix U and V and includes all defects located within the Town's Rights-of-way identified during the SSES work. The process of calculating the cost to transport and treat the flows associated with the defects is described below:

- The cost to transport and treat a gallon of flow was calculated using the current year actual operating costs for the entire sewer system, including payments to Bridgeport, salaries, electricity, and operation costs.

Mr. Frank Smeriglio
Town Engineer
Town of Trumbull
5866 Main Street
Trumbull, CT 06611

Re: **Video Inspections for Trumbull 2013 and 2014 Paving Program**

Dear Mr. Smeriglio:

As requested, Tighe & Bond is pleased to present this proposal to perform and evaluate video inspections for the sanitary sewers installed in roads that will be included in the Trumbull 2013 and 2014 Paving Program. Based on the list you provided you on December 27, 2012, we have included the following roads in this proposal;

2013 Paving Program

ROADWAY	APPROXIMATE LENGTH (FT)
Corporate Drive	2,600
Elliot Road	3,350
Magnolia Road	2,000
Nokomis Drive	900
Putting Green Road	6,500
Quarry Road	3,800
Zephyr Road	1,500
TOTAL	20,650

2014 Paving Program

ROADWAY	APPROXIMATE LENGTH (FT)
Alice Place	300
Burton Avenue	375
Cedarcrest Road	475
Chalon Road	1,400
Cypress Lane / Hillside Avenue	900
Lake Avenue	6,700
Pequonnock Road	800
Sunset Avenue	875
Wordins Lane	750
TOTAL	12,575

Scope of Services

Video inspections will be performed to identify any deficiencies or potential blockages in the sanitary sewers that have been installed in the above referenced roads.

The scope of services is as follows:

1. Subcontract with Mobile Robotics of South Hadley, Massachusetts to videotape the sanitary sewers.
2. A Tighe & Bond staff person will be present during the videotaping operations to observe the videos with Mobile Robotics as they are recorded. This ensures that essential information is captured, and reports of deficiencies and defects can be relayed back to the office expediting the evaluation process.
3. Perform a detailed review of the videos in the office, and prepare spreadsheets documenting the location and types of observed deficiencies.

2013 Paving Program

1. We have estimated that 20,650 LF of sanitary sewers will be video inspected. At an average production rate of 3,000 linear feet per day, we anticipate that this effort will take about 7 days.

2014 Paving Program

1. We have estimated that 12,575 LF of sanitary sewers will be video inspected. At an average production rate of 3,000 linear feet per day, we anticipate that this effort will take about 5 days.

Assumptions and Exclusions

1. As-built drawings for all roads will be provided by the Town of Trumbull
2. Sanitary sewer segments are accessible from above grade manholes
3. Videotape production is 3,000 LF per day, weather may extend the schedule, which could result in additional cost
4. An allowance of \$650 per day for a traffic detail is included for Corporate Drive, Quarry Road and Lake Avenue., additional days will result in additional cost
5. Fee estimates are based on the total length of each street in lineal feet

FEE

Due to the scope of work variables, Tighe & Bond recommends services be performed on an hourly plus expenses basis. For budgeting purposes we suggest an initial budget of \$35,000, as broken down below. Services will be invoiced in accordance with RFP #5936. Reimbursable expenses performed by other than Tighe & Bond employees, such as subcontractors and materials purchased directly for this project will be invoiced at cost plus ten percent. In the event that the scope of work of any phase is modified for any reason, the fee to complete the work shall be mutually revised by written amendment. The Terms and Conditions of our current on-call contract is part of this letter agreement.

2013 Paving Program -	\$ 21,000
<u>2014 Paving Program -</u>	<u>\$ 14,000</u>
Total	\$ 35,000

We look forward to working with you. Please indicate your acceptance of the scope of work, fee, and terms and conditions of this proposal by signing below, and returning an executed copy of this proposal to us along with a purchase order.

If you agree with the scope and fee of this proposal, please authorize us to proceed by signing on the line below.

Sincerely,

TIGHE & BOND, INC.

Alfred J. Mascia, Jr. P.E.
Project Manager

Dana C. Hull, P.E.
Vice President

Acceptance:

On behalf of Town of Trumbull the scope, fee, and terms of this proposal are hereby accepted.

	\$6,533,623.00

Budget Discussion:

522202 – Services and Fees Professional

Frank went over the Munis report and gave a breakdown of anticipated services and fees. Attorney Kokenos said the \$75,000.00 for legal services for Contract 4 could be potentially less and can be reduced by \$35,000.00 to \$40,000.00. Also, the \$15,000.00 for sewer assessment appeals should be increased to \$20,000.00 because one is in conjunction with a different lawsuit. Chairman Egri said the proposed changes reduce the professional services and fees by \$30,000.00 bringing it down to \$425,000.00.

522204 – Services & Fees Contractual

Frank Smeriglio went over the breakdown of anticipated Bridgeport WPCA charges of \$4,902,282. He explained since the WPCA changed the way we charge our sewer usage by charging the actual usage, if the charge to Bridgeport goes up our sewer usage fees also goes up. In years past we were just estimating the winter months and projecting that for the whole year.

Joe Solemene said Computil’s Contract expired at the beginning of the year and the next Contract may be going out to bid. Maria Pires explained Computil wants us to sign a Contract for 24 months and a six month extension was suggested. Discussion followed. Attorney Kokenos stated for the record that anything involving Computil he would be conflicted out so there would have to be a different attorney reviewing any RFP’s or Contracts with regard to that matter.

Chairman Egri noted Computil’s Contract will be added to tonight’s Agenda under Any Other Business.

581888 – Capital Outlay - \$85,000.00

\$20,000.00 – getting information out to the public; \$30,000.00 – computer and GIS equipment; \$35,000.00 - second year of five year lease. This account is the biggest difference between this year and the previous years. Frank explained the current process of handling call before you dig notifications and described changes to update the process. Discussion followed.

5 Year Capital Plan

As part of capital outlay there are 8 projects. Frank summarized each project, went over the capital outlay, costs, spreadsheets and information from Wright Pierce. Discussion followed.

- \$ 308,330.00 – I/I study – Phase 2 - defects and immediate repair list
- \$ 252,556.00 – I/I study – Phase 2 - leaks – recommended repair list (Wright Pierce’s spreadsheet)
- \$ 250,000.00 - Roosevelt Drive – repairs
- \$ 50,000.00 – 2013 paving road – sanitary repairs
- \$ 21,000.00 – 2014 paving roads – video inspections
- \$ 13,000.00 – 2015 paving roads – video inspections
- \$ 350,000.00 – Strobel Road
- \$ 60,000.00 – Generator at Park Avenue pump station

\$1,304,886.00 – TOTAL

Frank said because these repairs have a 20 year life we investigated paying for them as part of bonds and paying for this as part of the 20 year bonds is proposed. The last 2 items in this budget are the interest and principal associated with the first year’s payment for the bonds. Chairman Egri commented that the need for a capital plan has been discussed many times and the initial system was put in place in the 1970’s so this is the first step at addressing obvious needs and then looking into the future for the maintenance of the system. Frank briefly listed what needs to be addressed next year in 2015.

Christine from Wright-Pierce addressed the Commission regarding fees for Phase IV of the SSES work and regionalization support work they have been doing. Brief discussion and comments followed.

Chairman Egri thanked and acknowledged Maria, Dennis, John, Frank, and Joe for all their work and for supplying materials to work with regarding the budget. She asked for a motion that the WPCA approve the budget for the fiscal year 2013-2014 in the amount of \$6,533,623.00. That is basically flat of this year's current budget and it's a difference of \$8,034.00.

MOTION made Hampford seconded Pulie to approve the fiscal year 2013-2014 budget as stated for \$6,533,623.00. Discussion. MOTION CARRIED UNANIMOUSLY.

Chairman Egri asked for a motion to move up Agenda item number 8 Executive Session.

8. Executive Session.

MOTION made Pulie seconded Hampford to move up on the Agenda item number 8 Executive Session and to move into executive session to discuss with the Town Attorney strategy and negotiations with respect to pending litigation as defined by 1-200(6) and/or to discuss attorney client-privileged information as set forth by 1-210 relating to the following:

- Mark IV – Contract 3 and Contract 4
- Regionalization and/or re-negotiation of Bridgeport Sewer Treatment Contract
- Mihaly v Trumbull WPCA, et al

Staying for the executive session is the WPCA Commission, Joe Solemene, Attorney Dennis Kokenos, John Marsilio, Frank Smeriglio, Fred Mascia from Tighe & Bond, Christine Kurtz from Wright-Pierce. No Discussion. MOTION CARRIED UNANIMOUSLY.

At 8:26 p.m. the tape recorder was turned off, the Clerk left the room and the Commission went into executive session.

At 9:44 p.m. the Clerk was called back into the room and the recorder was turned on.

The Chairman asked for a motion to come out of execution session.

MOTION made Pulie seconded DeVita to come out of execution session and to state for the record that no vote was taken and to also state that Commissioner Hampford left at 9:25 p.m. No discussion. MOTION CARRIED UNANIMOUSLY.

The Chairman asked for a motion to reopen the regular meeting.

MOTION made Pulie seconded DeVita to reopen the regular scheduled meeting at 9:45 p.m. No discussion. MOTION CARRIED UNANIMOUSLY.

The Chairman asked for a motion to move up Agenda item number 4 Wright-Pierce update next on the Agenda. MOTION made Pulie seconded DeVita to move up Agenda item 4 Wright-Pierce update. No Discussion. MOTION CARRIED UNANIMOUSLY.

4. Wright-Pierce Update. Christine Kurtz stated the CCTV work should be finishing up this week and then the field work will be complete and they will proceed with reviewing the tapes and putting together the summary report. Last month she informed the commission about the increased costs associated with this work. There are about 10,000 linear feet of pipe more in this area that were TV'd and additional police protection/traffic costs associated with having the camera crew and truck out on busy roads which was not part of their contract work. She said she will have a final fee with invoices for next month's meeting and Frank Smeriglio suggested she meet with him next week.

Phase 4: Christine said the Board has approved the work and they are waiting for authorization and inquired if it could be given tonight. She said one of the first things they need to do is get meters in the ground around late February early March for six weeks, but they have to get authorized to proceed. Frank said it needs to be set up

TOWN OF TRUMBULL CONNECTICUT

April 5, 2013

Dear Chairwoman Hammers and Members of the Trumbull Board of Finance:

It is my understanding that one of your members has asked for an explanation as to why the Trumbull Day Commission elected to hire a consultant to assist with the planning of Trumbull Day. I have also been advised that an issue has been raised concerning the amount charged by the vendor.

Last year the Trumbull Day Commission was reconstituted to begin planning for the return of Trumbull Day in 2013. This undertaking requires significant hours and manpower. In order to make sure that this event was successful in its return, it was critical for the commission to have resources at its disposal to adequately plan for and prepare for the June 29, 2013 event. The vendor retained to help assist with the planning of this event has taken an active role in private fundraising. This fundraising has been a tremendous success and the money both raised and committed exceeds the fee charged by the commission's consultant. Their efforts are in essence paying for their services through private fundraising.

To date, the consultants have assisted the commission in securing a vendor for rides and fireworks. They have worked with Star 99.9 to develop a media campaign to promote Trumbull Day's return through the spring and into the summer. They have worked with the commission to reconstitute the fee schedule for vendors and the public at large to make sure that revenue projections adequately meet expenses. Unlike previous years, the consultants working collaboratively with the Trumbull Day Commission have sought qualified bids for services that relate to the event. They have worked with our Economic and Community Development Director, Edward Lavernoich, in integrating the day's festivities with that of the Barnum Festival, which was the original intent of Trumbull Day when the commission was formed by ordinance several years ago.

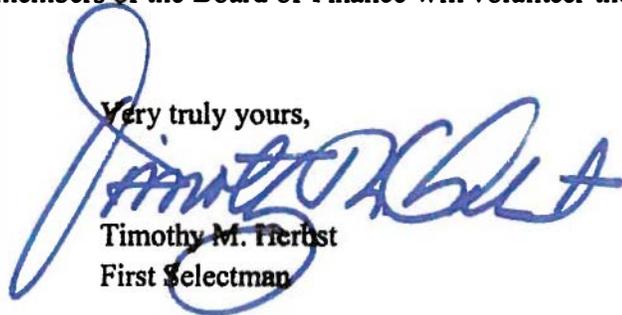

The amount charged for their services is de minimus in nature. As I indicated above, the money that has been privately raised will offset the expense of their services, without adverse impact to

the Trumbull taxpayers. The awarding of this contract for professional services comports with every aspect of the Trumbull Town Charter. The planning for this event has been organized, meticulous and disciplined.

As a point of reference, in previous years at the annual Town Concert at Indian Ledge Park, there were services rendered well in excess of the \$10,000 threshold, including the services of a concert promoter. Those services were not procured through a formal bid process and there is no record of any bid waiver. In contrast, Trumbull Day 2013 has been planned for in accordance with the Town Charter and the Town's purchasing policies.

I trust this answers the questions raised by the Trumbull Board of Finance. Thank you for your support of Trumbull Day and we hope that members of the Board of Finance will volunteer their time the day of the event.

Very truly yours,

A handwritten signature in blue ink, appearing to read "Timothy M. Herbst", is written over the typed name and title. The signature is fluid and cursive, with a large loop at the beginning.

Timothy M. Herbst

DRAFT 2– Subject to Modification and Approval

**BOARD OF FINANCE
MINUTES
February 14, 2013**

CALL TO ORDER

Vice Chairman Paul Lavoie called the Board of Finance meeting to order at 7:00 p.m. at the Town Hall, Trumbull, Connecticut. All those present joined in the Pledge of Allegiance.

PUBLIC COMMENT

There was no public comment.

Members present and absent as follows:

PRESENT

Paul Lavoie
Andrew Palo
Cindy Penkoff, Alternate
Susan LaFrance, Alternate
Vincent DeGennaro, Alternate
Steve Lupien
Tom Tesoro

ABSENT

Elaine Hammers
Dave Rutigliano

Also present: First Selectman Timothy M. Herbst, Maria Pires, Finance Director; James Henderson, Auditor; Joseph Rodriguez, Chairman of the EMS Commission.

Vice Chairman Lavoie indicated that Mrs. LaFrance would be voting for Chairman Hammers and Mrs. Penkoff would be voting for David Rutigliano.

F/Y/E 2013 SUPPLEMENTAL APPROPRIATION

2-13-02	Jamie Bratt - Director Planning and Zoning	FROM: General Fund	31,297
		TO: Professional Services 01014200-522202	31,297
		Outstanding FY 2013 balance due Planimetrics	

Mrs. LaFrance moved, seconded by Mr. Lupien, to take the Supplemental Appropriation request for Jamie Bratt, Director of Planning and Zoning, out of order on the Agenda.

Vote: 6-0 Motion Passes

Mrs. Bratt indicated that the funds allocated for PO #20121086 should have been allocated over several budget years, and therefore would like to return the balance of the PO to the General Fund and allocate \$29,297 for FY 2013.

Mr. Lupien moved, seconded by Mrs. LaFrance, to transfer \$31,297 from the General Fund to Professional Services 01014200-522202.

Vote: 6-0 Motion Passes

Mr. Palo moved, seconded by Mr. Lupien to change the requested amount from \$31,297 to \$29,297.

Vote: 6-0 Motion Passes

AGENDA ITEM

Vice Chairman Lavoie requested an item be added to the Agenda for the Trumbull Day Commission.

Mrs. LaFrance moved, seconded by Mr. Lupien, to amend the Agenda by adding the following item: To allow the Trumbull Day Commission access to the Public Events/Program Expenses 01080000-522205.

Vote: 6-0 Motion Passes

Mrs. LaFrance moved, seconded by Mrs. Penkoff, to allow The Trumbull Day Commission access to the Public Events/Program Expenses 01080000-522205.

Vote: 6-0 Motion Passes

First Selectman Herbst spoke regarding the reinstatement of Trumbull Day. He indicated that the Trumbull Day account had been consolidated with the Special Events Account. At this time, the Trumbull Day Commission has RFPs out for fireworks and rides for pricing options. Since deposits might be required to fund these RFPs, he is requesting access to these funds on their behalf so they would be able to cover the RFPs.

Mr. Lupien suggested that the funds be moved into the Trumbull Day account from the Special Events Account, less the funds needed for other town events.

Mrs. LaFrance withdrew her motion.

Mr. Lupien moved, seconded by Mrs. LaFrance, to transfer \$33,600 from Public Events/Program Expenses 01080000-522205 to the Trumbull Day account 32110000-430000

Vote: 6-0 Motion Passes

F/Y/E 2013 SUPPLEMENTAL APPROPRIATION

2-13-01	Timothy M. Herbst First Selectman	FROM: General Fund	28,500
		TO: Salaries – Full time 01022600-501101	28,500
		To fund the EMS Director position starting 3/1/2013.	

Mrs. LaFrance moved, seconded by Mrs. Penkoff, to move \$28,500 from the General Fund to Salaries-Full time 01022600-501101.

Vote: 4-1-1 (against: Palo) (abstained: Tesoro) Motion Passes

First Selectman Herbst spoke to the Board of Finance regarding the candidate unanimously selected by the interview committee to serve as the Director of the Emergency Medical Service, indicating that he would like to move forward and needed the requested funding to do so. He went on to indicate that since the Holdsworth Group, hired to perform an audit and evaluate the EMS, found that we lack a clear chain of command it was necessary to hire an EMS Director. He then read into the minutes the letters of recommendation provided by both Chief Kiely and Fire Marshal Murphy, which are attached hereto and made a part hereof these minutes.

First Selectman Herbst then called on Mr. Rodriguez, Chairman of the EMS Commission to speak.

Mr. Rodriguez indicated to the Board of Finance that the candidate chosen by the selection committee was the strongest candidate that he had ever interviewed. He went on to add that the entire selection committee was so impressed with this candidate currently under consideration that there was absolutely no hesitation or discussion as to their first choice. However, they could not agree as a group on a second or third choice. He went on to add that in addition to his experience in a hybrid service such as ours, the candidate also possessed a very strong interpersonal skill set.

Mr. Rodriguez thanked Mrs. Crandall personally for the eight years she has served as the volunteer Chief of Service, as well as the other volunteer work she continues to do in many other capacities. He indicated that Mrs. Crandall also serves as the EMS Administrative Assistant, which is a paid position.

Mr. Rodriguez went on to add that over the years the EMS had been able to function with qualified volunteers being able to cover key positions; however, the time has come to put someone in place as a full-time paid Executive Director of the service.

Mrs. LaFrance questioned the decision to have the individual report directly to both the First Selectman and the Chief of Police. First Selectman Herbst indicated that the position would report to him and would also report to the Chief of Police in the event that EOC is activated.

Mr. Tesoro indicated that the Charter clearly states that supervision of the EMS falls with the Commission, and not the First Selectman. He feels that the person coming in needs to know who to report to and thinks this should be tabled until the next meeting. Once this role has been clarified, he will give them his full support.

First Selectman Herbst indicated that the language in the Charter has carried forward for many years when the EMS was a strictly volunteer organization and not a hybrid model. He also indicated that he does not get actively involved in the Police activities; however, in the event of a serious situation the Chief of Police calls him. When there is a serious problem within the town, the appropriate Commission does not get the phone call, the First Selectman does. All departments are run by individuals who will ultimately report to the First Selectman on a daily basis, not their respective Commissions. He went on to add that he has a problem waiting 30 days when it comes to public safety, since this should have been done sooner.

Mrs. Penkoff agreed with the First Selectman and indicated that the Charter is not written to accommodate this position.

Mr. Palo indicated that he disagrees with the First Selectman when he said that waiting 30 days would be a problem. He went on to add that the EMS is doing a great job and the consultants have confirmed that they would continue to do so. And, they will continue to do so. He asked that the section of the Charter referencing the EMS be read, which Mr. Tesoro did.

Mr. Tesoro indicated there was a need to clarify the role of the Commission and the proposed director of EMS. He went on to add that he wants to hear what the Commission thinks.

First Selectman Herbst indicated that the Commission reviewed the job description and their Chairman sat on the selection panel. If there was any concern on the line of reporting, it would have been addressed by the Commission.

Mrs. Penkoff indicated that all of these issues have already been addressed in the job description. Mr. Palo suggested that we ask the Commissioners since they are all here. Mr. Tesoro did not agree and reiterated that the First Selectman and the Commission should sit and discuss this. He went on to add that no one has given him a reason why this would be a bad idea. Mrs. LaFrance indicated that waiting could possibly jeopardize the safety of the townspeople. Mr. Lupien questioned the wording and asked if it could be changed, since how do you report to two people. The First Selectman assured him that it would be resolved.

Mr. Tesoro moved, seconded by Mr. Palo, to table the item until next month.

Vote: 3-2-1 (against: Palo, Tesoro) (abstained: Lupien) Motion Fails

TOWN TREASURER'S REPORT

Mr. Lavoie indicated that the interest income on a 7 month basis is well within budget.

Mr. Lupien moved, seconded by Mrs. LaFrance, to approve the Treasurer's report as presented by Mr. Lavoie in the absence of Mr. Ponzio.

Vote: 5-0-1 (abstained: Tesoro)

AUDITOR'S REPORT

Mr. Henderson presented his report on the Special Agency Funds with the Recreation Department.

Mrs. Penkoff thanked him for including the details that she requested. She went on to add that she has questions on how the revenues being collected by the department are being used and will address them at the time the Recreation budget is reviewed.

Mr. Lupien moved, seconded by Mrs. Penkoff, to approve the Auditor's report as presented by Mr. Henderson.

Vote: 6-0 Motion Passes

YEAR TO DATE BUDGET TO ACTUAL REPORT

Mrs. Pires indicated that Legal Notices appear to be going over budget in some departments and needs to be reviewed.

Mrs. Penkoff moved, seconded by Mr. Palo, to accept the Budget to Actual Report as presented by Mrs. Pires.

Vote: 6-0 Motion Passes

APPROVAL OF MINUTES – January 9, 2013 and January 10, 2013

Mrs. LaFrance moved, seconded by Mr. Lupien, to approve the minutes of the January 9, 2012 Special Meeting.

Vote: 3-1-2 (against: Tesoro) (abstained: Palo, Lupien) Motion Passes

Mr. indicated that he wanted the record to reflect the he was in attendance not as a Board member at the January 9, 2013 meeting and that he did not consider the meeting to be valid Board of Finance meeting, since he did not receive an Agenda Package prior to the meeting.

First Selectman Herbst indicated that he wanted the record to reflect that the reason the meeting was Noticed was to comply with the Freedom of Information Act because you and I both know, Mr. Palo, if that meeting wasn't properly Noticed, somebody would have complained or informed one of the Board of Finance members that it was not properly Noticed and would have been in FOI violation, that is number one; number two, I want the record to also reflect that this Board was the body that voted to approved the commissioning of the audit. Ultimately, it is your audit. You commissioned the audit, you voted to approve the funding to commission the audit. And that's why the report was made for the Board of Finance. The EMS personnel present at that meeting– there wasn't a quorum of the EMS Commission, I should point out– and we advised the EMS Commission that if they had a quorum there could be FOI issues. That is why it was Noticed; that is why the Board of Finance was sitting up there; ultimately it was your audit that you commissioned; I would like the record to reflect this.

Mr. Palo indicated once again that he did not receive Notice and never receive and Agenda and wanted it noted for the record.

Mrs. LaFrance moved, seconded by Mr. Lupien, to approve the minutes of the January 10, 2012 meeting.

Vote: 5-0-1 (abstained: Lupien)

By unanimous consent the meeting was adjourned at 8:30 pm.

Respectfully submitted,

Phyllis Collier, Board of Finance Clerk

DISCUSSION ITEMS

- Year to Date Budget to Actual Report – Expenditures FY 2013

Mrs. Pires indicated that the overtime accounts are over budget at this time. This has to do with the Storm Nemo; some of the expense will be reimbursed by FEMA; however, we don't know how much. In addition to this, Workman's Compensation may be \$200,000 short. Mrs. Pires indicated that some funds have been received from FEMA, but not for Storm Nemo.

APPROVAL OF MINUTES – February 14, 2013

Mr. Lavoie moved, seconded by Mr. Tesoro, to table the minutes of February 14, 2013 until the April 11, 2013 meeting.

Vote: 6-0-0

By unanimous consent the meeting adjourned at 9:26 p.m.

Respectfully submitted,

Phyllis C. Collier, Board of Finance Clerk

DRAFT – Subject to Modification and Approval

**BOARD OF FINANCE
Minutes
March 14, 2013**

CALL TO ORDER

Chairman Hammers called the Board of Finance meeting to order at 7:05 p.m. at the Town Hall, Trumbull, Connecticut. All those present joined in the Pledge of Allegiance.

PUBLIC COMMENT

Cindy Katske
129 Meadow View Drive

Feels that there was a lack of transparency regarding:

- Decision to separate the sewer related costs from the non-sewer related costs. Wants to know where it is documented.
- WPCA decision to spend a large portion of funds authorized for sewer items on non-sewer items without seeking approval from the Town Council or the Board of Finance.
- Addition of Tighe & Bond costs to the assessment cost of the project when they were initially omitted by the WPCA.

Members present and absent as follows:

PRESENT

Paul Lavoie
Andrew Palo
Cindy Penkoff, Alternate
Susan LaFrance, Alternate
Tom Tesoro (arrived @ 7:15 pm)
Vincent DeGennaro, Alternate
Elaine Hammers
Dave Rutigliano

ABSENT

Steve Lupien

Also present: First Selectman Timothy M. Herbst, Maria Pires, Finance Director; James Henderson, Auditor; John Ponzio, Treasurer; John Marsilio, Director of Public Works; Graham Bissett, Building Official; Suzanne Burr Monaco, Town Clerk; Elaine Wang, Chief of Staff; Frank Smeriglio, Town Engineer; Attorney Dennis Kokenos; Karen Egri, Chairman WPCA; Laura Pulie, WPCA; Tim Hampford, WPCA.

Chairman Hammers indicated that Mr. DeGennaro would be voting for Mr. Lupien.

F/Y/E 2013 SUPPLEMENTAL APPROPRIATION

3-13-01	Graham Bissett Building Official	FROM: AVAILABLE FUND BAL TO: #01023200-501102 Salaries-PT Part time Building Inspector was budgeted for 832 hours but should have been 1,014 hours (19.5 hrs. per week)	5,067 5,067
---------	-------------------------------------	--	--------------------

Mr. Lavoie moved, seconded by Mr. Rutigliano, to transfer \$5,067 from the Available Fund Balance to account 01023200-501102 Salaries-PT.

Mr. Bissett indicated that the part time position was budgeted for 832 hours; however, it was increased to 1014 hours and the difference not included. These hours are to finish off this year.

Vote: 6-0-0 Motion carries

F/Y/E 2013 SUPPLEMENTAL APPROPRIATION

3-13-02	Suzanne Burr Monaco Town Clerk	FROM: AVAILABLE FUND BAL	11,201
		TO: #01013600-522205 Program Expenses	1,201
		TO: #01013600-522204 Services and fees-contr	10,000
		For Muni Code updates not anticipated and Cott System audits	

Mr. Lavoie moved, seconded by Mr. Tesoro, to move \$11,201 from the Available Fund Balance to #01013600-522205 Program Expenses \$1,201 and # 01013600-522204 Services and fees-contr \$10,000.

Mrs. Burr Monaco indicated that COTT is a records management system. Their billing system has changed, so we are now being billed monthly, and we currently owe 18 months, since they billed on an annual basis. In addition, we usually have only 1-2 Muni Code updates per year and this year we had 4.

Vote: 6-0-0 Motion carries

F/Y/E 2013 TRANSFER

3-13-03	Suzanne Burr Monaco Town Clerk	FROM: #01013600-534402 Program Supplies	455
		#01013600-545501 Legal Notices	2,000
		#01013600-556601 Prof Seminars	300
		#01013600-578803 Maintenance/Rep Program	200
		TO: #01013600-522205 Program Expenses	2,955
		For shortage in the account due to Muni Code updates #27-#30 not anticipated	

Mr. Lavoie moved, seconded by Mr. Tesoro, to move \$455 from #01013600-534402–Program Supplies; \$2,000 from #01013600-545501–Legal Notices; \$300 from #01013600-556601–Prof Seminars; \$200 from #01013600-578803–Maintenance/Rep Program to #01013600-522205–Program Expenses.

Mrs. Burr Monaco indicated that they send us 70 copies that we distribute so books can be updated. In addition, the Municipal Code is also posted to our web site.

Vote: 6-0-0 Motion carries

F/Y/E 2013 TRANSFER

3-13-04	Elaine Wang Chief of Staff	FROM: #01013800-511160 Contingency	1,288
		TO: #01012600-501101 Technology-Salaries-FT	1,288
		To upgrade IT Director	

Mr. Lavoie moved, seconded by Mr. Tesoro, to move \$1,288 from #01013800-511160–Contingency to #01012600-50110–Technology-Salaries-FT

Mrs. Wang indicated that there was a change in the job description and now will be paid from one account, not 2; a portion was coming from Emergency Management.

Vote: 6-0-0 Motion carries

F/Y/E 2013 TRANSFER

3-13-05	Maria Pires Finance Director	FROM: #01011000-501101 Finance-Salaries-FT	6,800
		TO: #01011000-522202 Finance-Service & Fees Professional	6,800
		Professional services required for the budget process due to Accounting Manager's vacancy	

Mr. Lavoie moved, seconded by Mr. Palo, to move \$6,800 from #01011000-501101-Finance-Salaries-FT to #01012600-50110–Technology-Salaries-FT

Mrs. Pires indicated that due to a vacancy in the department, part time assistance was required to assist with the preparation of the budget.

Vote: 6-0-0 Motion carries

Town Treasurer's Report – John Ponzio

Mr. Ponzio presented his report:

- We are on target for the YTD budget.
- We received 3.5 million towards the THS renovations. That brings us to 10 million over the last 6 months.
- The Feds indicated that they will continue to hold rates low through 2015, which will influence budgeting for next year.
- We are at 12% right now with government backed securities; we are currently earning 2-3%.
- Pension Fund balance is currently in excess of \$22 million as of February 15, which represents an increase of \$1.5 million since December 31.

- During the 4th quarter, we had over \$263,000 positive cash flow in our Pension Fund. The Pension Board is not recommending any changes at this time.
- The First Selectman recommended that the town pension be funded at its ARC -- actuarially recommended contribution of \$4,576,000; an increase of \$800,000 for the next fiscal year.
- We may want to look at funding the Police Pension next.
- Benefit will come when we let the bond rating agencies know we have met our ARC and we are serious about correcting the problem.
- We made \$2.5 million in bond payments this month.
- Town pension is funded at 27% and the Police are funded at 56%.

Internal Auditor's Report – Jim Henderson

Mr. Henderson presented his report:

- He will have the Special Funds Audit completed by the end of the month for next month.
- Blum Shapiro wants us to close all agency funds that we do not use; asking us to close as many as we can.
- In connection with the Time and Attendance Audit, he has been reviewing time sheets, and it all depends on the accuracy of the input person. There are addition mistakes, transpositions and wrong code errors.
- Audit Plan for next fiscal year: Remaining projects from this year will be rolled forward and can vote on final plan in June.

The Chair asked Mr. Henderson to submit the status on the outstanding items and e-mail to the Board of Finance members.

Mr. Palo asked if the managers are signing off on the time sheets. Mr. Henderson indicated that they are, but there are still errors; they should be proofed before they input and he has been assisting with the timesheets. The Chair asked if we are looking into an automated system, and if not, was it a question of money. Mrs. Pires indicated that we are looking into it; however, we have not been able to automate the system since it needs to be integrated with Munis or we will be duplicating efforts.

Meeting recessed at 7:35 pm and reconvened at 7:45 pm

WPCA – North Nichols Sewer Project – First Selectman Timothy Herbst; John Marsilio, Director of Public Works; Frank Smeriglio, Town Engineer

First Selectman Timothy M. Herbst spoke regarding the **North Nichols Sewer Project**, introducing members of the W/PCA—Chairman Karen Egri, Laura Pruilile and Tim Hampford—as well as employees John Marsilio, Director of Public Works and Frank Smeriglio, Town Engineer; Attorney Dennis Kokenos.

He wants everyone to:

- Understand what is going on with this project.
- Become fully aware of all issues and history before and after.
- Be aware of the costs associated with the project and previous project.

The Contract IV project began in 2009 in North Nichols by soliciting bids, which almost immediately followed the Contract III project. The Contract III project affected 735 homes in the Jog Hill area whereas the Contract IV project affects 960 homes in the North Nichols area.

In the spring of 2009 when Contact III project was complete, several residents attended town meetings and expressed concerns over the assessments and quality control issues, since there road that were cracking and sinking. The assessments were not set in 2009, and at the same time Contract IV was bid and was set into motion in the fall of 2009. The members of the WPCA that First Selectman Herbst appointed were required to come into a situation where they had to set assessments for a project not under their supervision and assume control of a project where they and not been previously involved in the planning.

First Selectman Herbst indicated that he wanted to discuss what constitutes a sewer cost and what constitutes a capital cost and which costs should be borne by the rate payer and which should be borne by the town.

First Selectman Herbst went on to discuss that he has heard the roads paved under Contract IV are inconsistent with the previous sewer practices. He indicated that the town's position is that we should pave once, pave it correctly, and thereby ensure that it will have a 25 year useful life.

The power point presentation illustrated the difference in quality control with Contract III and Contract IV

- Coral Drive – depicts a storm drain that has been paved over.
- Country Club Road - area has significant sinking and road is less than 5 years old.
- Heatherfield Drive – road is not yet 5 years old and looks as if it has passed its 25 year useful life
- Daniels Farm Road – heavily traveled by residents and has 3 schools on it; it has considerable sinking and settlement.
- Shelton Road, contract IV – this articulates the difference from Contract III; curbs have been rehabilitated and there are new storm drains and catch basins, ensuring the road will have a 25 year life consistent with the paving practices that we have used when we have paved roads through the operating budget, complete reclamation of the roads with the use of proper compaction to keep roads from settling.
- Booth Hill Road - complete reclamation and curb rehabilitation; you can clearly see the difference in the quality of the paving.
- Both Contract III and Contract IV were the largest sewer expansion projects that the town has ever undertaken--735 homes in the Jog Hill area and 960 homes in the North Nichols area.
- Do you want to repeat the same mistakes of the past or do you want to make sure when you pave these roads that they have a 25 year useful life so you can address some of the other capital needs of the town.
- Stonehouse Road was paved as in the past and now needs to be redone at the tax payers' expense once again.

Mr. Smeriglio, Town Engineer and Sewer Administrator spoke on the following:

- Currently 99% of the sewer mains have been installed
- We started to restore some of the easement areas that were completed last year
- In the spring, we need to evaluate all of the storm drainage and roadways
- We paved the main roadways this year: Shelton Road, Huntington Turnpike, and Booth Hill Road.
- When evaluating roads, there are 3 different solutions :
 - Remove 2" of asphalt and install new asphalt (Huntington Turnpike)
 - Reclaim the road by grinding asphalt and process and then grade the road to match the finished portion. (Booth Hill Road)
 - If completely destroyed, dig out the asphalt along with 8" underneath to remove all the material and bring in another 8" of process and then 3-5 inches of asphalt. (Shelton Road)
- We also need to evaluate the drainage and recommend upgrades or replacements. You can't upgrade all of them but you have to at least look at them and make recommendations.
- The biggest hurdle is the roadwork and you can't use just one solution for the roads or you will have a problem in 5-6 years.

Table 1—(See Attachment 1, attached hereto and made a part hereof)

- This is a snap-shot of where we stand as of 2/26/2012.
- Column 1 – Total Anticipated costs \$36,981,678, recommendation he has made --includes sewer work, drainage upgrades
- Column 2 – Total paid as of 12/31/2013—\$29,566,364
- Column 3 – Unpaid retainage – funds we hold back on a contractor
- Column 4 – Anticipated remaining unpaid balance —\$7,475,314
- Column 5 & 6 – WPCA portion and Town portion of costs

You must separate sewer and street upgrades that are unrelated to the sewer project. You must also consider what constitutes a property benefit for residents.

First Selectman Herbst addressed the following:

Under what authority does the WPCA have to in their judgment segregate the sewer costs from capital costs?

He asked that Sec. 7-249 of the Connecticut General Statute, which discusses the Assessment of Benefits, be made a part of the record. (See Attachment 2, attached hereto and made a part hereof). He read into the record:

“At any time after a municipality, by its water pollution control authority, has acquired or constructed, a sewerage system or portion thereof, the water pollution control authority may levy benefit assessments upon the lands and buildings in the municipality which, in its judgment, are especially benefited thereby, whether they abut the sewerage system or not ...”

The First Selectman went on to point out that the statute by these words "At any time after a municipality, by its water pollution control authority" does not separate the municipality from its water pollution control authority, but rather it can be interpreted as the WPCA acts on behalf of the municipality.

He went on to add that the statute is very clear when it says "may levy benefit assessments upon lands and buildings in the municipality which, in its judgment...". That language is very clear. It provides the WPCA, and only the WPCA, with the statutory authority to determine what is a proper assessment based upon the sewer benefit being provided to the homeowner.

Selectman Herbst indicated that when we talk about transparency, and honoring statutory obligations and following the letter of the law, and despite the fact that the statutes are very clear as to the WPCA's discretion, a legal opinion from our Bond Counsel, Attorney Joseph Fasi, which provided further clarification, was sought before the WPCA set any assessments

He asked that the letter from Attorney Joseph Fasi, Bond Counsel for the Town of Trumbull, dated October 16, 2012, be made a part of the record. He then read the entire letter into the record. (See Attachment 3, attached hereto and made a part hereof).

The First Selectman then went on to explain that every sewer project from the inception of the installation of sanitary sewers in the town of Trumbull was financed by the Town of Trumbull through General Obligation Bonds that required the approval of the Board of Finance and the Town Council.

The WPCA cannot borrow money on its own and then determine how to pay it back. They use the full faith and credit of the Town as a municipal corporation to borrow the money and they in turn by their statutory authority determine how much revenue they are going to collect to pay for the sewer benefit to offset the cost incurred by the municipality in borrowing the money and approving the Bond Resolutions.

Therefore, when people ask "where is the authority derived", it is codified in the Connecticut General Statutes and if there was any question about it, despite that statutory authority, the Board and the Town Council with that authority when they approved the General Obligation Bonds.

First Selectman Herbst then entered into the record a copy of the August 13, 2009 Board of Finance Minutes (See Attachment 4, attached hereto and made a part hereof).

He went on to note that the Board met on August 13, 2009 to act on the bond resolution and bond counsel was present. On page 2 of those minutes, there was a very brief discussion regarding the initial bond authorization for Contract IV. As indicated in the minutes that were approved by the Board of Finance, Mr. Crooks who was on the Board at the time asked a series of questions as they related to the bid because there were concerns raised with the previous bid on Contract III. That project was initially bid at \$15,000,000 on Contract III and concluded at \$21,000,000. The First Selectman noted that there is a pattern of cost over runs with these projects. After the questions were answered the Board of Finance then approved the bond resolution.

First Selectman Herbst then entered into the record a copy of the September 9, 2009 Town Council Minutes (See Attachment 5, attached hereto and made a part hereof).

He went on to note that the Town Council met September 9, 2009. At that meeting, Resolution TC22-222 was presented and the Town Council approved an additional \$25,540,000 for the completion of the Contract IV project. In addition, they also voted to make this emergency legislation, which expedited the approval which in turn expedited the construction.

First Selectman Herbst indicated that he was entering this on the record so that when people question – ***What authority the WPCA had to act on this*** – it is significant to point out that a previous WPCA brought this request for a Bond resolution forward and there were bodies of the Town that acted on it.

At the time, there was no discussion in the minutes about contract documents or design specifications, or whether or not there was oversight on the project adequate to address the problems that had already been identified in Contract III.

This was all finalized in the meeting of September 9, 2009; shortly thereafter, newly appointed members of the WPCA had to step-in and assume their roles in the largest capital project involving the expansion of sewers on a contract that they did not have a role in drafting, did not help review or implement and put on the street, and did not have the opportunity to review the dig documents and assess the design documents for to see if the problems connected with Contact III were addressed in Contract IV.

This is why there are so many questions being raised about what can be extracted as capital costs benefitting the entire town and sewer costs paid for through an assessment.

First Selectman Herbst entered into the minutes a letter dated March 13, 2013 from Frank Smeriglio, PE -Town Engineer regarding the Stonehouse Road Project as an example of what should be included. (See Attachment 6, attached hereto and made a part hereof).

Mr. Smeriglio indicated that in 1993, 1999 and 2003 three sewer projects occurred on Stonehouse Road as part of larger projects. The cost to install sanitary sewers was \$927,000 and included asphalt in the sanitary sewer trench and asphalt overlay over the entire road. In 2011, the Town implemented a roadway reconstruction project on Stonehouse Road, due to infrastructure deficiencies. The project included sanitary sewer repairs, storm drainage repairs and full depth roadway reclamation/paving. The cost for the sanitary sewer improvement was \$300,000 and for storm and roadway improvements \$1,100,000.

First Selectman Herbst indicated that this was germane to the discussion because as a matter of policy we are committed to the principal that if we pave a road we should pave it once, pave it correctly, and thereby ensure that it will have a 25 year useful life.

This is why the taxpayers of Trumbull were required to pay for the paving of Stonehouse Road twice. Under the 75% / 25% formula, which has never been made part of any municipal ordinance and is considered an unwritten rule, the taxpayers covered 25% of the \$927,000 and 100% of the \$1,100,000 incurred 10 years later.

With respect to Contract III, we are currently involved in litigation with the contractor and if we do not prevail or get the \$9 million should we reassess the residents of Jog Hill and give them a second assessment to fix the roads in Contract III or should this expense be borne by the entire town?

First Selectman Herbst indicated that there are currently 5 members on the WPCA. Mr. Palo asked if the town side \$10.7 million was approved by the Board of Finance or the Town Council.

First Selectman Herbst indicated that the bond funding was approved by the Board of Finance and the Town Council. You need to approve the bond resolution before you can to out to bid; the funding must be in place. He went on to add that this will not happen again since the Charter has been changed. Now, if a capital project is in excess of \$15,000,000 it must go before the people.

Mr. Lavoie asked how long will the litigation for Contract III will take. First Selectman Herbst indicated that we are trying to work within the legal system to see if the Town can be made whole and get the defects fixed. If there is no settlement we will then have to decide how we will pay for this.

Mr. Lavoie asked why we went ahead with Contract IV using the same contractor as Contract III based on all the problems we were having with the Contract III work. First Selectman Herbst indicated that the first thing he did when he took office in 2009 was to have the attorneys review Contract IV. There was no way to break the contract without exposing the town to damages and breach of contract and the costs that would be associated with that.

The town already knew that there were problems with Contact III. The Jog Hill Road residents were complaining and were very dissatisfied with the work and assessments; however, despite the complaints and problems, the decision makers at the time decided to proceed with the same design team, the same contractor and same level of oversight. So, we needed to make a decision, since it was too late to back out of Contract IV. Either we repeat what happened in Contract III or make the necessary changes to insure that the same problems would not occur on Contract IV. Therefore, we commissioned a forensic audit on Contract III and the following was determined:

- We did not have the proper oversight.
- Contracts were not properly designed or bid.
- As a result of the above-mentioned, there were a lot of change orders and cost overruns.

Therefore, based upon the results and recommendations of the audit, and the observations of the Public Works Director and the new WPCA, it was determined that a project of over \$30 million needed the same type of quality of oversight as the project of \$66 million at 72 Strobel Road–Trumbull High School–and that is why we brought in Tighe and Bond.

Mr. Tesoro addressed the following WPCA members who were present. Mrs. Egri, Chairman, Mrs. Pulie, and Mr. Hampford. He asked if they were aware that the bonded resolution was \$34 million, and if so, how could they spend an additional \$2.5 million without coming back to the Board for authorization. He asked for an explanation as to why they did not come back to the Board of Finance.

Mr. Hampford indicated that when they came onto the project they looked at what needed to be done and realized that additional road work was going to be needed on Contract III and IV. Mr. Marsilio and the First Selectman came up with a plan to address that. The discussion was let's do it right and let's do it together.

Mr. Hampford added that his concern was that we were not going to put in a dime more than we told the folks on the assessments. In my mind the money was coming from the town. Frankly, I was worried about the WPCA budget and wanted to stick to what we told the folks. Mr. Marsilio came up with a sound plan that made sense on how to use the money; we knew the town was going to put in some money and I look at it as we are spending the money.

Mr. Tesoro went on to add that he does not believe that any Board or Commission has the authority to spend money without coming to the Board of Finance or the Town Council. Mr. Hampford indicated that the WPCA is an Enterprise Fund and operates under a different set of rules. Mr. Tesoro indicated that his issue is that they have gone over budget and now you are going to come back to us after the fact and ask us to fund it. We have the authority to refuse to pay it, but realistically do we have that choice? If so, what are we are going to tell you – to do a lousy job – not to do it – to do it correctly.

The Chair asked if all the funds have been expended and was told no. She is looking at \$36 million of which \$34 million the Board has already approved. So the WPCA has not exceeded the approved amount yet. They are telling us that this is what we need and we are going to have to come back to us. This isn't the first time that something has gone over budget.

Once again, Mr. Tesoro indicated that they should have come to us when they knew they were going to need the additional funds. By doing it this way, we have no choice in the matter.

Mr. Marsilio indicated that this was a moving target; the original bond was for \$27 million and we came back and asked for an increase to \$30 million when we got into the project and realized we needed oversight. Then we found all the sins; we had to fix the chimney for \$1.5 million and then we found a problem with Shelton Road and we came back for \$34.5 million. So now here we are with accumulated costs; currently we have \$1 million in extras that we are negotiating; we are giving you our best estimate of what this project is going to be and hopefully it won't be this high. We are probably going to ask you to go up to the \$2.5 million. This project had an amalgamation of problems; this was the first project in the Town of Trumbull that had proper permits from the Army Corps of Engineers that cost nearly \$100,000. As we knew about the expenses the WPCA came back to the Board each time. We have not yet spent the \$2.5 million.

Mr. Tesoro indicated that the original concept of sewers came about when the septic systems in town began to leach into the water supply. So they came up with a plan and because all citizens would benefit from clean water the town came up with the 75/25 system.

He went on to add that when you make a large change, the Board of Finance should have been advised. You had an obligation to advise us once you had the knowledge that there was going to be such a large material change.

Mr. Marsilio asked what he should advise him of if the project is finished at \$34 million. Mr. Tesoro indicated that the 75/25 should then be changed to reflect this.

Mr. Marsilio went on to add that when he made the decision to assume the project, the paving line item changed by \$1.8 million in savings, which is very close to the \$2.5 million. He indicated that he imposed this overage on the WPCA.

Mr. Tesoro went on to indicate that the residents should have been made aware once this decision was made.

The Chair indicated that we pay the bond at 25/75 and that at some point we did not actually pay 25%. That is because we provided in-kind services. It was finally formalized and the bond debt was split in the budget. The in-kind services were charged back to the project and then the 25/75 was applied.

The Chair then pointed out that all of this was done without coming back to the Board of Finance. The point is, she stated, that policy changes do not always come back to the Board of Finance. She went on to add that she does not feel that the WPCA overspent their budget yet; however, they will have to come back to the Board of Finance if they have a projection that it will exceed their budget.

The Chair continued that it would have been nice if they had clarified to us the policy was changing and why. If we are going to do a road for the benefit of everyone it isn't fair to charge those who are having the sewers put in.

Mrs. Penkoff indicated that she cannot believe Contract IV was approved given the mess with Contract III. She does not believe that they are over budget as yet and that they will have to come back to the Board. Mrs. Penkoff added that she believes that roads benefit everyone and is agreement with the policy change. She also asked if Tighe and Bond is included in the bonding or was approved separately. Mr. Marsilio indicated that it is in the bonding.

Mr. Marsilio went on to add that the overage is comprised of a multitude of items. This project from the very beginning was never a \$27 million project, and yet it was accepted and it went forward. In his 5 year Cap X plan that has been approved, you will see all the roads in Contract IV and he is asking for enough bonding authorization for all of the roads to be funded. He knows that he won't need bonding for all of the roads, that a portion of it will still be a part of the initial funding. He can't tell us what portion is going to be over and above the \$34 million.

Attorney Kokenos indicated that he needed to clarify the 25/75, by reading from the statute. A follow-up question to the ***What authority the WPCA had to act on this is What obligation does this statute incur on these people*** because it also restricts their ability for what they can get regardless of what the Board of Finance or the Town Council says, since they can only do and assess a certain way and the revenue from the assessment can only be used for construction of a sewer system. They have an obligation to make sure that all of the costs that are going toward the assessment are only for the construction of the sewer system.

This is not just a sewer project and it is important to know that the statute imposes restrictions. If you spend 50% on the sewers and 50% on the road, then the split is 50/50.

The Chair indicated that the sewers and road work were split 50-50; when the town goes to pay the bond and the cost of that sewer, we split it 75% to the people getting the sewer and 25% to the general obligation bond.

Mr. Tesoro indicated that based upon what Attorney Kokenos said, the WPCA can do whatever it pleases, as long as they follow the rules. Attorney Kokenos indicated that this was incorrect.

First Selectman Herbst indicated that he previously referenced statute 7-249 and he would like to reference another part, and read the following into the record:

“Revenue from the assessment of benefits shall be used solely for the acquisition or construction of the sewerage system providing such benefits or for the payment of principal of and interest on bonds or notes issued to finance such acquisition or construction. No assessment shall be made against any property in excess of the special benefit to accrue to such property.”

The First Selectman paraphrased Mr. Tesoro's concern, as follows:

“The WPCA went ahead and completed a sewer project and made a decision to pave roads in conjunction with that sewer project and in your opinion exceeded their authority because the funding was not in place.” Mr. Tesoro indicated that is correct, up to the last part.

The First Selectman then continued: “The WPCA should have come back to the Board of Finance and told them it was going to cost \$36,000,000 instead of \$34,000,000 or given the Board of Finance a “guestimate” before they made the decision to do that. Mr. Tesoro replied, “That’s part 1 of 2, yes, but I will let you finish.”

First Selectman Herbst continued, indicating that this is where they disagree, because his reading of that statute tells him that they have already come to Board of Finance and asked then for the money that directly relates to the installation and construction of the sanitary sewer. He went on to add that when you say to the WPCA that they should come back to the Board of Finance to get authority for the additional road repaving, his position is that under the statute that is not their job; that is Frank’s job. And they are coming back to Board of Finance, with the Capital Plan, and telling them that the roads are in the Capital Plan. The roads are not their responsibility and, to a point that Commissioner Hampford just made, this 25/75 unwritten rule emanated many years ago when the projects were much smaller and it was easier to determine those costs.

Mr. Tesoro indicated that we were handed this and we had no choice in this matter, no logical sensible choice. The Chair then asked if that option would have changed if they had asked us 6 or 8 months ago, if it was logical and the thing we would need to do in order to do the roads the right way, to do this. Mr. Tesoro indicated that it was the process; that the representatives of the people should have had the chance to speak with us.

The Chair indicated that the Board of Finance needs to set-up regular updates with the WPCA, and First Selectman Herbst indicated that the scope of any projects will be held to \$15,000,000 or less.

DRAFT 2– Subject to Modification and Approval

**BOARD OF FINANCE AND TOWN COUNCIL JOINT MEETING
BOARD OF FINANCE MINUTES**

**Town Council Minutes filed separately
April 11, 2013**

CALL TO ORDER

Chairman Hammers called the Board of Finance meeting to order at 7:05 p.m. at the Town Hall, Trumbull, Connecticut. All those present joined in the Pledge of Allegiance.

PUBLIC COMMENT

Chief Kiely spoke regarding the purchase of vehicles. He indicated that he had been leaning toward the Chevy Caprice. The difference between the Caprice and the Ford Utility is \$3000, not \$1000 as originally thought, and he wants to go with the Ford instead of the Caprice, which is less expensive. In addition, it is 20% more fuel efficient.

ATTENDANCE

Board of Finance members:

PRESENT

Paul Lavoie
Andrew Palo
Cindy Penkoff, Alternate
Susan LaFrance, Alternate
Tom Tesoro
Vincent DeGennaro, Alternate
Elaine Hammers
Dave Rutigliano

ABSENT

Steve Lupien

Town Council members:

PRESENT

Suzanne S. Testani
Ann Marie Evangelista
Jane Deyoe
Tony J. Scinto
Debra A. Lamberti
Thomas Whitmoyer
John A. DeVecchio, Jr.
Vicki Tesoro
Kristy Waizenegger
Martha A. Jankovic-Mark
Michael J. London
Fred Palmieri, Jr.
Carl A. Massaro, Jr.
James F. Meisner
Mark LeClair
Jeffrey Donofrio
Chadwick Ciocci
Gregg Basbagill

ABSENT

David R. Pia
Jeff S. Jenkins
Thomas Whitmoyer
James Blose

Also present: First Selectman Timothy M. Herbst, Maria Pires, Finance Director; John Ponzio, Treasurer; Ralph Iassogna, Superintendent of Schools; Al Barbarotta, BOE Plant Coordinator; John Marsilio, Public Works Director; Attorney Joseph Fasi, Bond Counsel; Gary Cialfi, Assistant Superintendent of Schools; Shawn O’Keefe Business Manager; Deborah Herbst, Board of Education; Loretta Chory, Board of Education; Michael Herbst, THS Athletic Director; Steve Kennedy, BOE Facilities Director; Jeff Hackett, BOE Technology Director.

Chairman Hammers indicated that Mr. DeGennaro would be voting for Mr. Lupien in his absence.

TOWN TREASURER’S REPORT – John Ponzio

Mr. Ponzio presented his report:

- Cash balances are lower than last month, since this is a slower time for collections.
- Cash flow is good.
- Returns are not as high as we would like, since the Feds are keeping the rates artificially low; however, we are on target for the YTD budget.
- Invested excess balance of cash in Janney Funds of \$330,000 into Freddie Mac mortgage backed securities at 1.65% for about 4 years duration.
- Fourth quarter pension payment of \$880,000 for the Town, for a total of \$3.7 million for the year, which is the closest to the ARC as it has ever been. We also funded \$400,000 for the Police Pension, a total of \$1.6 million for the year.
- Pension Board does not meet again in May; however, our interests are doing well at the present interest rates; currently, there is \$22 million in the fund, a considerable increase since 2009.

F/Y/E 2013 SUPPLEMENTAL APPROPRIATION

4-13-01	Jean Ferreira Senior Center Director	FROM: General Fund TO: 01050600-581888 Capital Outlay To finance town portion of new bus purchase, net of grant funding, over 5 years. Cost inadvertently left out of budget.	\$ 3,420 \$ 3,420
---------	---	--	--------------------------

Mr. Lavoie moved, seconded by Mr. Rutigliano, to appropriate \$3,420 from the General Fund to account 01050600-581888 Capital Outlay to finance the town portion of new bus purchase, net of grant funding, over 5 years. Cost inadvertently left out of budget.

Mrs. Pires indicated that the State had given us a grant of \$40,000 leaving a balance due of \$17,100 to be funded over 5 years. This request of \$3,420 is for one year. It was left out of budget, since we were not aware of the grant funding and we might lose grant money if we wait until July.

Mr. Tesoro asked that Mrs. Pires update him at the next meeting with the number of supplemental requests made this year, since he has lost track.

Vote: 6-0 motion carries

Mr. Lavoie moved, seconded by Mr. Tesoro, to transfer \$874,000 from account 01-315400 FB Committed for Sect 10-248a to 06120100-581888-S0600 BOE-Projects Sect 10-248a, for the unexpended funds FY 2011-2012 BOE surplus per Section 10-248a of the General Statutes of Connecticut.

Vote: 6-0

Mrs. Pires indicated that an outside audit confirmed the surplus of \$874,000. In addition, the auditors were very specific that we set-up a Capital Project Fund account that would carry forward, so the 06120100 account was set-up and the funds moved into that account to be used for the purpose intended.

Vote: 6-0 motion carries

The Board of Finance moved into joint session with the Town Council, as follows:

DISCUSSION ITEM

Snow removal – Board of Education

First Selectman Timothy Herbst spoke to the joint session regarding the snow removal efforts during 2011 and 2013. He indicated that in the last 2.5 years, we experienced 5 FEMA, which is unprecedented. In addition, we learned that the requirements of FEMA for emergency clean-up reimbursement are very detailed and labor intense.

In early March, while working with Public Works and the Finance Department to prepare a cost summary for Storm Nemo-2013, he was briefed by our attorney that there was a pending mediation with Judge Freedman regarding 2011 storm costs. In reviewing these costs, there were areas of concern:

- Cost to clean the entire Town of Trumbull, which included police and public works overtime and equipment costs vs. Cost incurred by the Board of Education.

They determined that between 2011 and 2013 the Town spent \$300,000- \$375,000 and the Board of Education spent over \$900,000 – \$750,000 in 2011 and \$163,000 in 2013. We are trying to drill-down to more specific numbers on these items for our meeting with Judge Freedman, as well as our insurance company, so we can properly defend these costs, and because we have a moral legal and ethical obligation to let the Board of Finance and the Town Council know what is being done to justify these costs and to answer your questions. A further breakdown was provided, at the request of Mrs. Penkoff:

- 2013 Board of Education \$163,000 – majority to clean roofs of schools
- 2013 Town \$158,000 – every road in town; includes overtime and equipment costs
- 2011 Board of Education \$750,000 – contracted out
- 2011 Town \$300-350,000 – town employees able to handle

The First Selectman indicated that the Board of Education paid an average of \$65 per hour in 2011 and \$55 per hour in 2013.

Mr. Iassogna indicated that 11 schools could not be opened until the roof load was lessened, along with constraints imposed under state statute regarding the length of the school year and contractual problems with teachers. In times of crisis, you are at the beck and call of the service people and the going rate, which at that time was \$55-65 / per hour. He indicated that going forward they will have an open-ended bid in place coordinated by Al Barbarotta the BOE Plant Coordinator.

Mr. Kennedy, BOE Facilities Director indicated that you can't compare shoveling with plowing, since it is more labor intense to shovel and you cannot put a plow on the roof. They would prefer not to have people on the roof; however, with all the attention being given to roofs collapsing, they have to shovel the

snow in order to reduce the load. We have added snow guards to the roofs, to keep snow from sliding, and we are looking to make additional changes to alleviate this problem. We will need to hire an engineer to assist with making those decisions.

Mr. Iassogna indicated that they were initially told to get local vendors and to check with the National Guard for assistance. There were no vendors available, and the Guard could not assist, so we did what was necessary.

Mr. Kennedy indicated that when John Barbarotta started contacting people he was quoted \$35 - \$75 an hour; roofing companies wanted upwards of \$125 per hour, so we capped our rate at \$55 per hour. Since the load bearing capacity rate on the roofs is about 12", and there was another storm on the way, they needed to bring it down to 6", and therefore did what they had to do to insure the integrity of the roofs.

First Selectman Herbst added that in 2011 there was more of a demand for help. Since we took more of a hit than Newtown, there were able to assist us with mutual aid on the town side. Mr. Marsilio indicated that he also needed to outsource one truck during 2011.

Mrs. Penkoff indicated that with regard to the time constraints mentioned, we still had April vacation to use and there other days available at the end of the year. In addition, since our charter has a \$10,000 threshold for contracts why didn't we get a signed bid waiver for amount over? Had these contractors done work for us in the past? What are their qualifications and what did we get for insurance verification.

Mr. Iassogna indicated the following:

- He takes full responsibility for not doing a Bid Waiver. It was a case of just get it done any way you can.
- There are many monetary logistical problems going into the April vacation or at the end of the year. People have vacations planned for April; and at the end of the year it can jeopardize going into the next school year on July 1, causing a double payment with some staff and teachers. It was a board decision not to cancel April vacation.
- The contractors were all qualified, screened by John Barbarotta, and worked for us in 2011. We have no proof which contractors damaged the roof in 2011. Mr. Kennedy indicated that we used the same contractors in 2011, and given the conditions in 2011, we cannot hold them negligent for the roof damage. The roof is white, made of plastic, and extremely slippery and you had individuals shoveling in the dark. If you want proof, they didn't damage the roofs in 2013.
- All the detailed information needed for FEMA is now being coordinated by Mr. O'Keefe and being forwarded to Attorney Dennis Kokenos.

Mr. Al Barbarotta indicated that there were several hundred people over that period of time, and they were working on all of the school roofs doing something they had never done before. Mr. Barbarotta indicated that since he had never done this he reached out in different directions making sure that anyone we considered using could provide workman's compensation and insurance and individuals that had worked for them for a long period of time. In addition, getting down to 6" given the layers of ice and snow was very difficult. In 2013, we only needed to get down within 15". It seemed logical to use the same contractors, since they were experienced, and they completed the job the second time in 1/3 of the time.

Mrs. Penkoff indicated that the Board of Finance represents 6,000 households and they want these questions answered; this is not a personal affront.

Mr. Al Barbarotta indicated that he is now putting together a bid to see if we can get a fixed rate from people that can provide us with that type of labor at a rate better than \$55 per hour. We are asking them to commit to a storm that we don't know is coming, at an hourly rate, and guarantee us a labor force of 100 at the drop of a hat. We reached out to at least 20 companies that we have used previously and we need to see what comes back.

First Selectman Herbst indicated that if you do not have an RFP in place, you are subject to price gauging during emergencies. An RFP needs to be put out there before an emergency. We currently have an invoice for 912 hours for 2 days at Frenchtown, indicating that additional man hours were needed due to the shape and configuration of the roof. We are looking to recoup these funds from FEMA and our insurance company. In addition, he added that if we can actually determine who damaged the roofs we will also go after them.

Mr. Lavoie indicated that a series of decisions was made in the middle of an emergency, which may not have been in the best interests of the tax payers.

He went on to add that we can continue to discuss and justify what was done; however, what did we learn from going through this and what are we going to do to make sure that we do not expend money like we did during these storms. We had an open checkbook, approved invoices and sent money out, which was clearly not in the best interest of the taxpayers of this town.

Mr. Lavoie then asked how we are going to put controls and procedures in place before this happens again, making sure we keep the best interests of our taxpayer in mind.

First Selectman Herbst indicated the following:

- Need to have on call RFP for these services where we have the bid and the rate is locked.
- If we do not have an RFP, we will get a Bid Waiver, and it will be reviewed by several people before we hire the contractor.
- We need a policy change regarding when a bill is received and when it is paid so there is enough time to review the bill and require additional back-up if necessary prior to paying the bill.

Mr. O'Keefe indicated that bill coming in to the Board of Education in excess of \$10,000 will get much more scrutiny than those less than \$10,000. We should be able to have the Board of Education to verify the number of people on the roof shoveling for a set period of time.

First Selectman Herbst indicated that we are also going to be asking for references and checking them.

Mr. Tesoro indicated that we are probably still going to have to pay excessive fees because that is the reality during an emergency.

First Selectman Herbst indicated that in response to Mr. Tesoro he would like to introduce for the record Bid 5896 - Town Bid issued May 26, 2011 for on call equipment rental. Rental rate with operator, per day and per hour – we have 11 contractors that responded.

First Selectman Herbst indicated that we are in the process of putting the FEMA documents. Mr. O'Keefe contacted the contractors for 2011 and 2013 to get the names of the employees and number of hours worked and where. The insurance company will contact neighboring municipalities for their numbers and if not in sync with ours it will hurt our claim. After our attorneys go through these documents, if there is the slightest doubt as to the accuracy of the claim, I am not sending them in to defend something that they are uncertain about, as it compromises the integrity of the Town.

Mrs. LaFrance asked about the turn-around time on the invoices. First Selectman Herbst indicated that the invoice was generated by the contractor and approved for payment the same day. Mr. O'Keefe indicated that the invoice was received on 2/13, approved and sent to the Board of Education- Plant Operations on 2/15 for review by Mr. Kennedy and paid on 2/22. The total time was 9 days.

04-13-03 – BONDING RESOLUTION

Mr. Lavoie moved, seconded by Mr. Rutigliano, to read the title and Section 1 of the 2013-2014 CIP bond resolution in their entirety and to waive the reading of the remainder of the resolution, incorporating its full text into the minutes of the meeting.

Vote: 6-0 motion carries

RESOLUTION APPROPRIATING \$1,360,000 FOR THE TRUMBULL BOARD OF EDUCATION TECHNOLOGY CAPITAL IMPROVEMENT PLAN 2013-2014 AND AUTHORIZING THE ISSUE OF \$1,360,000 BONDS OF THE TOWN TO MEET SAID APPROPRIATION AND PENDING THE ISSUANCE THEREOF THE MAKING OF TEMPORARY BORROWINGS FOR SUCH PURPOSE

Section 1. The sum of \$1,360,000 is appropriated for the planning, acquisition and construction of the Town of Trumbull Board of Education Technology Capital Improvement Plan 2013-2014, as adopted and amended by the Town Council from time to time, and including, appurtenances, equipment and services related thereto, or for so much thereof or such additional improvements as may be accomplished within said appropriation, and for administrative, advertising, printing, legal and financing costs to the extent paid therefrom, said appropriation to be in addition to all prior appropriations for said purpose. The Town Council may by resolution transfer funding herein authorized among projects within the 2013-2014 Board of Education Technology CIP.

Mr. DeGennaro moved, seconded by Mr. Palo, to reduce the Bond to \$785,150.

The Chair indicated that based upon Mr. DeGennaro's background and expertise, she asked him to meet with Mr. Hackett, BOE Technology Director to see what they had in place and then to share his findings with the Board as to what could be bonded and what should be put in the operating budget. Mr., Hackett indicated that the majority of the bond is for replacement equipment.

Mr. DeGennaro spoke about his background as the Vice President for the Price Line Group, managing the global Infrastructure; having been in the business for 30 years; and his involvement working with education in surrounding town.

He then went on to talk about the list of questions he prepared for the Board of Education to complete. Once this was done, he met with Jeff and Linda to discuss the proposed technology, how they wanted to deploy it, why they wanted to deploy it and where they were going to use it.

Mr. DeGennaro then prepared a list of observations (see Exhibit A attached hereto and made a part here of) and then did his own research with the CT Board of Education Plan and looked again at the Catapult and the Gibson Report. It is certainly the right thing to upgrade the technology; we are woefully behind. We are consistent with the Gibson Report and the CT Board of Education Plan. There is also an element of operational efficiency that will come about by upgrading technology. There should be an annual line item in the budget for technology replacement. He does not know if Jeff and his team can complete this in a year; if he has enough resources. There is an additional \$802,000 in years 2 and 3 that needs to be addressed. The long term aspects need to be addressed, and how you are going to manage this going forward. The town should be treating this as a business would. He indicated the buying the IPAD 2 was suggested; however, the IPAD 3 is out and IPAD 4 is in process. He doesn't recommend buying outdated; you cannot keep up and there is no sense bonding it. However, he added, you can bond the wireless.

Mr. Tesoro indicated that funding for this started in the Operating Budget and then moved; we can't put it back into the operating budget; this is backwards.

First Selectman Herbst indicated that it was very clear when this was put into a bond package that he could not justify an upward 5% increase in taxes for the people of this town due to the current economic times. In the last 8 years, technology was not a priority, He remembers hearing that we needed a budget increase for full day kindergarten and it is in the operating budget and the \$874,000 was not used. He went on to add that the Gibson Report was very clear; this did not happen overnight; salaries and benefits were given at the Board of Education and technology was neglected. The high school renovation was a priority and other capital projects. An increase of 4.5% in this economy cannot be justified. There are other funds that can and should be used for non-recurring expenses so we do not create funding cliffs and we are finally making technology a priority which is why we are here tonight. It is up to the Board of Finance and the Town Council.

Mr. Tesoro indicated that he agreed with the first selectman; however, he wanted to know what he would do. First Selectman Herbst indicated that he would be proactive and go with Mr. DeGennaro's recommendations and if there are any surplus funds they can be used for towards IPADS.

Mr. Tesoro moved, seconded by Mr. Palo, to table this item.

Vote: 3-3 motion fails (Against: Lavoie, Rutigliano, Hammers)

Mr. Rutigliano moved, seconded by Mr. Lavoie, to call the question.

Vote 6-0 motion carries

Meeting recessed at 9:31 pm; reconvened at 9:50 pm

04-13-04 – BONDING RESOLUTION

Mr. Lavoie moved, seconded by Mr. Palo, to read the title and Section 1 of the 2013-2014 CIP bond resolution in their entirety and to waive the reading of the remainder of the resolution, incorporating its full text into the minutes of the meeting.

Vote: 6-0 motion carries

RESOLUTION APPROPRIATING \$740,000 FOR THE TRUMBULL BOARD OF EDUCATION McDUGALL STADIUM AND TRACK CAPITAL IMPROVEMENT PLAN 2013-2014 AND AUTHORIZING THE ISSUE OF \$740,000 BONDS OF THE TOWN TO MEET SAID APPROPRIATION AND PENDING THE ISSUANCE THEREOF THE MAKING OF TEMPORARY BORROWINGS FOR SUCH PURPOSE

Section 1. The sum of \$740,000 is appropriated for the planning, acquisition and construction of the Town of Trumbull Board of Education McDougall Stadium and Track Capital Improvement Plan 2013-2014, as adopted and amended by the Town Council from time to time, including appurtenances, equipment and services related thereto, or for so much thereof or such additional improvements as may be accomplished within said appropriation, and for administrative, advertising, printing, legal and financing costs to the extent paid therefrom, said appropriation to be in addition to all prior appropriations for said purpose. The Town Council may by resolution transfer funding herein authorized among projects within the 2013-2014 Board of Education McDougall Stadium and Track CIP.

The Board of Finance moved and seconded that said resolution be adopted as introduced.

In answer to Mr. Rutigliano's questions, Mr. Michael Herbst, THS Athletic Director indicated that the football field was last done 11 years ago and the life span for the turf was 8-10 years. The only maintenance expense associated with the turf is the actual grooming.

Mr. Palo asked why the original request included the tennis courts, and it is not in the bonding.

First Selectman Herbst indicated that he took the tennis courts out of the bond since they are not used as much as the fields. We treated the tennis courts 10 years ago and they serve a limited purpose - tennis. The field is used by many groups, including the band, and given the use of the field, and lack of use of the tennis courts, it was more imperative to replace the field. In addition, the cost to stage and replace the field and then have to come back and stage and replace the track later at a later time was prohibitive; it is more cost effective to stage and replace both the field and track at the same time. Mr. Herbst indicated that the football field needs to be done immediately and the tennis courts can be fixed.

Mr. Tesoro asked why the soccer field was left out of the bonding, since it has the same turf. The First Selectman indicated that they are trying to finish the high school project and if there are funds left over they will use consider using it towards the soccer field. It will need work; however, it is not a priority at this time. Mr. Tesoro asked if we would know by the time we do the football field and the First Selectman indicated that he did not think so.

Mr. Herbst indicated that they needed to wait until after graduation before doing the work, and it still needs to go out to bid. He indicated that they are looking for a way to encourage donations, i.e. a brick walk. The First Selectman indicated that he is looking to increase the Golf Classic this year possibly \$80,000 to \$100,000.

All those in favor of the Bond Resolution of \$740,000, as follows:

AYES

ADJOURNMENT

By unanimous consent the meeting adjourned at 11:00 pm.

Respectfully submitted,

Phyllis C. Collier
Board of Finance Clerk

Exhibit A

B of E Budget Summary (April 11, 2013):

Observations:

- Actions being proposed are consistent with submitted Connecticut State Department of Education Plan (CSDE) Goals submitted in May, 2012
- Actions being proposed are consistent with the recent Gibson Study and will reduce the number of "older" devices in current use
- Overall operational efficiency should improve for the technology support team with the implementation of new equipment
- Consideration should be given to an annual budget item for "Technology Refresh"
- Additional support (outsourced resources) may be required to complete the implementation of these services within the budget timeframe
- All requests exclude Trumbull HS which has already been addressed
- Years 2 and 3 Technology Plan Cost (\$802,200) needs to be considered

Suggested Changes for Funding (Year1):

For Operating Budget:

145,000 - Computer Lab Replacement - (290)
8,500 - Computer Lab Printer Replacement (10)
37,000 - Server Consolidation (Virtual - 4 Licenses)
9,350 - Main Office Laser Printers (11)
210,000 - Middle School and Elementary IPADS (300 IPAD2's)
165,000 - Laptop or Netbook Replacements (330)

Total - \$ 574,850

For Bond (Assumes at least a 5 Year Life)

332,000 - Full Wireless Access (Steps 1 and 2 - 3 year license)
242,550 - Smart Board Packages (63)
124,800 - Network Infrastructure (POE Switches to support 1GB) (26)
36,000 - Add Document Cameras (MS/EL)- (20)
36,000 - Document Cameras (ELMO) - (20)

Total - \$771,350

Combined Total - \$\$1,346,200
