**NFPA 54 Article 7.5.4 :** (a) Before replacing an existing appliance or connecting a vent connector to a chimney, the chimney passageway shall be examined to ascertain that it is properly lined, clear and free of obstructions and shall be cleaned if previously used for venting solid or liquid fuel-burning appliances or fireplaces.

*Exception: Where permitted by the authority having jurisdiction, existing chimneys shall be permitted to have their use continued when an appliance is replaced by an appliance of similar type, input rating and efficiency*

(b) Cleanouts shall be examined to determine they will be tightly closed when not in use.

(c) When inspection reveals that an existing chimney is not safe for the intended application, it shall be repaired, rebuilt, lined, relined, or replaced with a new vent or chimney to conform to *Standard for Chimneys, Fireplaces, Vents, and Solid Fuel- Burning Appliances*, NFPA 211 and be suitable for the equipment to be attached.

Article 7.5.7: Where a chimney that formerly carried flue products from liquid or solid fuel-burning appliances is used with an appliance using fuel gas, an accessible cleanout shall be provided. The cleanout shall have a tight-fitting cover and shall be installed so it's upper edge is at least 12" below the lowest chimney inlet opening.

**ADDITIONAL COMMENTS:** \_\_\_\_\_

I hereby make application for a permit to do this work according to the above statement according to the above detailed statement. All work shall be done in accordance with the 1996 edition of NFPA 54 and all regulations of the Town of Trumbull.
