RESOLUTION APPROPRIATING \$6,470,000 FOR THE TRUMBULL
BOARD OF EDUCATION CAPITAL IMPROVEMENT PLAN 2026-
2027 AND AUTHORIZING THE ISSUANCE OF \$6,470,000 BONDS
OF THE TOWN TO MEET SAID APPROPRIATION AND PENDING
THE ISSUANCE THEREOF THE MAKING OF TEMPORARY
BORROWINGS FOR SUCH PURPOSE

RESOLVED:

Section 1. The sum of \$6,470,000 is hereby appropriated by the Town of Trumbull, Connecticut (the “Town”) for the planning, acquisition, upgrades, replacement and construction of school projects comprising the Trumbull Board of Education Capital Improvement Plan 2026-2027, as adopted and amended by the Town Council from time to time, and consisting of improvements to various school facilities, and fleet acquisition and maintenance, as defined in the plan, and for appurtenances, equipment and services related thereto, as listed below, and for related legal, consulting, advisory and administrative fees and expenses and costs of issuance related thereto, said appropriation being inclusive of any and all State and Federal grants-in-aid thereof (the “Projects”):

<u>Project</u>	<u>Amount</u>
Madison Middle School	\$ 240,638
Middlebrook Elementary School	183,000
Daniels Farm Elementary School	1,673,944
Jane Ryan Elementary School	94,996
Booth Hill Elementary School	86,964
Tashua Elementary School	87,000
Frenchtown Elementary School	883,910
Trumbull Agriscience & Biotechnology Center	119,948
Trumbull High School	1,754,269
Long Hill Administrative Building	1,129,600
Fleet	149,000
Costs of Issuance	<u>66,731</u>
	<u><u>\$6,470,000.00</u></u>

Section 2. The balance of any appropriation for any Project, or the proceeds of any bonds authorized hereby, which is not required to meet the actual cost of the Project may be transferred by the First Selectman, upon approval of the Town Council, to meet the actual cost of any other public improvement of the Town (including Projects authorized hereby and capital projects authorized by prior and future capital resolutions) for which an appropriation and bond authorization has been adopted; provided that the aggregate amount of the appropriation and bonds authorized pursuant to such transfer shall not exceed 10% of the CIP funding by purpose as last approved by the Town Council.

Section 3. To meet said appropriation \$6,470,000 bonds of the Town or so much thereof as shall be necessary for such purpose, shall be issued, maturing not later than the maximum maturity permitted by the General Statutes of Connecticut, Revision of 1958, as amended from time to time (the “Connecticut General Statutes”). Said bonds may be issued in one or more series as determined by the First Selectman and the Town Treasurer, provided that the total amount of bonds to be issued shall not be less than an amount which will provide funds sufficient, with other funds available for such purpose, to pay the principal of and the interest on all temporary borrowings in anticipation of the receipt of the proceeds of said bonds outstanding

at the time of the issuance thereof, and to pay for the administrative, financing, legal and other costs of issuance of such bonds. The bonds shall be in the denomination of \$1,000 or a whole multiple thereof, be issued in fully registered form, be executed in the name and on behalf of the Town by the facsimile or manual signatures of the First Selectman and the Town Treasurer, bear the Town seal or a facsimile thereof, be certified by a bank or trust company, which bank or trust company may be designated the registrar and transfer agent, be payable at a bank or trust company, and be approved as to their legality by Robinson & Cole LLP, Hartford, Connecticut. The bonds shall be general obligations of the Town and each of the bonds shall recite that every requirement of law relating to its issue has been duly complied with, that such bond is within every debt and other limit prescribed by law, and the full faith and credit of the Town are pledged to the payment of the principal thereof and interest thereon. The aggregate principal amount of the bonds of each series to be issued, the annual installments of principal, redemption provisions, if any, the certifying, registrar and transfer agent and paying agent, the date, time of issue and sale and other terms, details and particulars of such bonds, including the approval of the rate or rates of interest, shall be determined by the First Selectman and the Town Treasurer, in accordance with the Connecticut General Statutes.

Section 4. Said bonds shall be sold by the First Selectman and the Town Treasurer, in a competitive offering or by negotiation, in their discretion. If sold in a competitive offering, the bonds shall be sold at not less than par and accrued interest on the basis of the lowest net or true interest cost to the Town. A notice of sale or a summary thereof describing the bonds and setting forth the terms and conditions of the sale shall be published at least five days in advance of the sale in a recognized publication carrying municipal bond notices and devoted primarily to financial news and the subject of state and municipal bonds. If the bonds are sold by negotiation, the purchase agreement shall be approved by the First Selectman and the Town Treasurer.

Section 5. The First Selectman and the Town Treasurer are authorized to make temporary borrowings in anticipation of the receipt of the proceeds of said bonds. Notes evidencing such borrowings shall be signed by the First Selectman and the Town Treasurer, have the seal of the Town affixed, be payable at a bank or trust company designated by the First Selectman and the Town Treasurer, be approved as to their legality by Robinson & Cole LLP, Hartford, Connecticut and be certified by a bank or trust company designated by the First Selectman and the Town Treasurer, pursuant to Section 7-373 of the Connecticut General Statutes. The notes shall be issued with maturity dates which comply with the provisions of the Connecticut General Statutes governing the issuance of such notes. The notes shall be general obligations of the Town and each of the notes shall recite that every requirement of law relating to its issue has been duly complied with, that such note is within every debt and other limit prescribed by law, and that the full faith and credit of the Town are pledged to the payment of the principal thereof and the interest thereon. The net interest cost on such notes, including renewals thereof, and the expense of preparing, issuing and marketing, to the extent paid from the proceeds of such renewals or said bonds, shall be included as a cost of the Projects. Upon the sale of the bonds, the proceeds thereof, to the extent required, shall be applied forthwith to the payment of the principal of and the interest on any such notes then outstanding or shall be deposited with a bank or trust company in trust for such purpose.

Section 6. The Town hereby expresses its official intent pursuant to Section 1.150-2 of the Federal Income Tax Regulations, Title 26 (the "Regulations"), to reimburse expenditures paid sixty days prior to and any time after the date of passage of this resolution in the maximum amount of the Projects with the proceeds of bonds, notes, or other tax-exempt obligations ("Tax-Exempt Obligations") authorized to be issued by the Town. The Tax-Exempt Obligations shall be issued to reimburse such expenditures not later than eighteen (18) months after the later of the date of the expenditure or the substantial completion of the Projects, or such later date the Regulations may authorize. The Town hereby certifies that the intention to reimburse as expressed herein is based upon its reasonable expectations as of this date. The Director of Finance or her designee is authorized to pay Project expenses in accordance herewith pending the issuance of the Tax-Exempt Obligations.

Section 7. The First Selectman and the Town Treasurer are hereby authorized, on behalf of the Town, to enter into agreements or otherwise covenant for the benefit of bondholders to provide information on an annual or other periodic basis to the Municipal Securities Rulemaking Board (the “MSRB”) and to provide notices to the MSRB of certain events as enumerated in Securities and Exchange Commission Exchange Act Rule 15c2-12, as amended, as may be necessary, appropriate or desirable to effect the sale of the bonds and notes authorized by this resolution. Any agreements or representations to provide information to MSRB made prior hereto are hereby confirmed, ratified and approved.

Section 8. The First Selectman and the Town Treasurer, or either of them, are hereby authorized, on behalf of the Town, to enter into any other agreements, instruments, documents and certificates, including tax and investment agreements, for the consummation of the transactions contemplated by this resolution. The First Selectman and the Town Treasurer, or either of them, are hereby authorized, on behalf of the Town, to apply for and accept any and all Federal and State loans and/or grants-in-aid of the Project, to expend said funds in accordance with the terms hereof, and in connection therewith to contract in the name of the Town with engineers, contractors and others.

Section 9. The Board of Education is authorized in the name and on behalf of the Town to (a) prepare schematic drawings and outline specifications for the Projects and (b) apply to the Commissioner of Administrative Services for and accept or reject grants for the Projects.

REQUEST FOR PROJECTS**

DEPARTMENT

BOE - Madison Middle School

Provide narrative to describe and justify the requested project and answer the following questions as applicable.

Media Center 5 ton RTU unit, Main Office 4 ton RTU, and Computer lab 5 ton units are aging out and failing. No A/C will be available in those areas if the unit fails. Additional \$16k on control connections and programming.

What existing facilities or conditions will be affected by the project? How will this project improve these?

Will this project necessitate staffing increases?

NO

What is the general plan and timeline for completion?

Summer 2026

Are there any outside funding sources, e.g., grants?

NO

PROJECT NAME	CALENDAR YEAR FUNDING					TOTAL

Re: Madison Middle School Main Office RTU Replacement

On behalf of my company, I would like to thank you for your interest in A&B Mechanical, LLC. We are pleased to submit a quotation to replace the 4 ton RTU in accordance with our discussion and service call.

A & B Mechanical, LLC will supply and install the following scope of work:

HVAC Scope of Work for RTU

- 1) Demo existing Carrier 4 ton RTU
- 2) Disconnect gas, electrical connections
- 3) F&I one (1) new Carrier 4 ton RTU.
- 4) Reconnect gas & electrical connections
- 5) Start and Test
- 6) Standard business hours wage included
- 7) Controls connection, Programming by others

The above work can be done for the sum of **Eighteen Thousand Seven Hundred Forty-Eight Dollars \$ 18,748.00 Excluding Tax**

HVAC Exclusions

- 1) Structural steel
- 2) Shutdown & startup of heating system
- 3) Cutting, patching & painting
- 4) Labor and material taxes
- 5) Controls connection and programming
- 6) Permit fees
- 7) Overtime and off hours
- 8) Items other than listed above

Guarantee: All labor, and material supplied by A & B Mechanical, LLC will carry a one (1) year guarantee from the date on installation against defects for both workmanship and material.

If you have any questions with our work please do not hesitate to call.

Thank you for the opportunity of working with you,

Arnie Jones Jr

Madison Middle Main Office 4 ton RTU Replacement

Terms and Conditions Projects & Installations

1. Services provided under this agreement will be performed during normal working hours.
2. The guarantees and services provided under the scope of this agreement are conditioned upon customer properly operating and maintaining systems / equipment. Customer will do so according to industry accepted practices and in consideration of A&B Mechanical LLC, hereafter A&BM, and recommendations.
3. Customer will provide and permit reasonable and safe means of access to all equipment. A&BM will be allowed to start and stop equipment as necessary to perform its services.
4. Customer agrees to pay invoices within thirty (30) days of receipt. A&BM reserves the right to cancel this and / or stop work under this agreement without notice, should payment become forty-five (45) days or more delinquent.
5. At its prevailing rates or at negotiated lump sum prices, A&BM will perform work not covered by this Agreement. This shall include responding to abnormal conditions for system(s) and equipment not covered by this Agreement, changes in scope of work and/or undeclared or hidden conditions. Repairs or replacements necessitated by reason of customer negligence or misuse are not included.
6. In the unlikely event of failure to perform its obligations. A&BM's liability is limited to repair or replacement at its option and such shall be customer's sole remedy. Under no circumstances will A&BM be responsible for loss of use, loss of profits, increased operating or maintenance expense, claims of customer's tenants or clients, or any special, indirect or consequential damages.
7. The Agreement does not include responsibility for system design deficiencies, such as, but not limited to poor air distribution, water flow imbalances, etc. It does not include responsibility for system, equipment and component obsolescence, electrical failures, and equipment beyond its serviceable life.
8. A&BM will not be liable for delays or failure to obligate due to fire, flood, strike lockout, freezing, and unavailability of material, riot, acts of God, or any cause beyond reasonable control.
9. Work necessitated by present or future requirements by government or insurance laws and or requests is not included.
10. Only A&BM personnel or agent are authorized to perform the work included in the scope of this Agreement. A&BM may, at its option, cancel this Agreement should non-authorized individuals perform such work.
11. In the event either party must commence a legal action in order to enforce any rights under this contract, the successful party shall be entitled to all court costs and reasonable attorney's fees as determined by the court for prosecuting and defending the claim, as the case may be. Additionally, should it become necessary for A&BM to turn the account over to a collection agency, A&BM shall be entitled to all reasonable collection costs.
12. In addition to the prices quoted, customer shall be responsible for all taxes applicable to the services and / or material provided here under.
13. We guarantee all prices quoted in this agreement shall remain firm for a period of thirty (30) days from the date shown on page one.

**TOWN OF TRUMBULL
REQUEST FOR PROJECTS**

DEPARTMENT

BOE -Madison Middle School

Provide narrative to describe and justify the requested project and answer the following questions as applicable.

Replacement and modernization of the elevator unit. Elevator asset management plan completed in 2025 by KONE, and deficiencies found in the existing unit hydraulics, ADA phone, and hoistway.

What existing facilities or conditions will be affected by the project? How will this project improve these?

Will this project necessitate staffing increases?

NO

What is the general plan and timeline for completion?

Summer 2026

Are there any outside funding sources, e.g., grants?

NO

PROJECT NAME	CALENDAR YEAR FUNDING					TOTAL
	CY 2025	CY 2026	CY 2027	CY 2028	CY 2029	
Elevator Replacement	155,638					155,638
						-
						-
						-

JUSTIFY NEED FOR CAPITAL OUTLAY (Attach relevant documentation for your request. Insufficiently documented requests **WILL NOT** be considered for the plan.)

KONE Asset Management Plan Trumbull Public Schools

2025

KONE Asset Management Plan

The KONE Asset Management Plan (AMP) provides a summary of your building's elevator and escalator requirements to assist you in budgeting and prioritizing available upgrades.

We have categorized recommendations as:

	Code		Aesthetics
	Safety		Eco-Efficiency
	Performance & Reliability		Modernization
	Accessibility		

- Budget figures are provided for your financial planning.
- Modernization figures if that is more cost-effective to your situation.
- Firm proposals will be provided upon request.

**KONE 1st Year
Safety Item**

Executive and Equipment Summary

Top left, and clockwise:

- Frenchtown Elementary, obsolete soft starter.
- Middlebrook Elementary, controller is obsolete and on borrowed time. Unable to source parts.
- Trumbull High School, original single bottom piston, original New cylinders are all double bottom, to code.
- Jane Ryan, original power unit, dry mounted and leaks.

Elevator Emergency Phone

An elevator emergency phone device provides, by code, a two-way communication from inside the elevator cab to an outside monitored line. Built-in, hands-free microphone and speaker, will activate by the push of a single button. KONE can also provide emergency phone monitoring as an option, that will call directly to the KONE Customer Care Center where trained agents provide immediate assistance.

**KONE 1st Year
Safety Item**

Potential Benefits include:

- Creates a safer operating environment
- Complies with current code and the Americans with Disabilities Act (ADA)
- Peace of Mind – the ability to communicate with someone outside the elevator for assistance in the event of an entrapment

Code

Safety

Performance &
Reliability

Accessibility

Aesthetics

Eco-Efficiency

Modernization

Elevator Hoistway Cleandown

Normal elevator operation creates air drafts in the hoistway which pull dirt and debris into the shaft. Over time the dirt and debris can build-up on components and lead to erratic elevator operation, component failures, increased shutdowns, fires, and other issues.

Potential Benefits include:

- Creates a safer operating environment
- Reduces service interruptions caused by dirt and debris build-up on components
- Reduce operating expenses related to costly repairs not covered under your maintenance agreement

Code

Safety

Performance &
Reliability

Accessibility

Aesthetics

Eco-Efficiency

Modernization

Door Operator Upgrade

Most elevator service interruptions occur due to door related issues. Such items as older / outdated equipment, age, and wear and tear can impact elevator door operation.

Replacement of the existing door operator provides a new upgraded door operator, helping address the above concerns.

Potential Benefits include:

- Creates a safer operating environment
- Reduce service interruption downtime
- Improve passenger and tenant satisfaction
- Decrease door operation noise
- Increase equipment reliability

Code

Aesthetics

Eco-Efficiency

Modernization

Hydraulic Power Unit

A hydraulic power unit is comprised of four major components: tank, valve, pump & pump motor. These components control and drive the elevator system while in operation.

Aging power unit components can lead to increased shutdowns, leveling issues, passenger entrapments, overall performance concerns, and more.

Replacing all components at once, instead of individually, provides the most proactive approach to reduce equipment downtime and address service interruptions.

Potential Benefits include:

- Creates a safer operating environment
- Reduce service interruption
- Improve overall operation of equipment including ride quality, leveling, and availability
- Reduce operating expenses related to obsolete components

Code

Safety

Performance &
Reliability

Accessibility

Aesthetics

Eco-Efficiency

Modernization

Elevator Soft Start

Older elevators utilize mechanical starters. These starters are hard on elevator components, as the power source is either full current on or off.

A Soft Start replaces an older obsolete mechanical starter with a starter that provides electrical feed control when starting the elevator. A Soft Start also protects from over-voltage and under-voltage, which helps to prevent motor burnout during potential phase loss.

Potential Benefits include:

- Increase elevator availability, ride quality, and motor life
- Reduce operating noise and downtime related to power related issues
- Energy savings

Code

Safety

Performance &
Reliability

Accessibility

Aesthetics

Eco-Efficiency

Modernization

Traction Modernization

Traction modernization provides owners with all new components and starts the life cycle of the elevator over.

A full modernization can include:

- KONE ReSolve Control System
- KONE ReNova Door Equipment
- Non-Proprietary Design
- On-Board Diagnostics (no service tool required)
- KONE Signalization
- KONE 24/7 Connected Services capabilities

NOTE: Additional options, including machine replacement are available.

Potential Benefits include:

- Creates a safer operating environment
- Starts life cycle of elevator over

Code

Attn: John Morello

Re: Middlebrook School – Unit Ventilator Replacement

On behalf of my company, I would like to thank you for your interest in A&B Mechanical, LLC. We are pleased to submit a **BUDGET** quotation to replace the failing Unit Ventilator in accordance with our discussion.

A & B Mechanical, LLC will supply and install the following scope of work:

HVAC Scope of Work for Unit Ventilator

- 1) Demo existing Unit Ventilator
- 2) Disconnect electrical and duct connections
- 3) Rig old Unit Ventilator out of space off the roof
- 4) F&I one (1) new Unit Ventilator (More Investigation Needed)
- 5) Rig new Unit Ventilator into space
- 6) Reconnect duct & electrical connections
- 7) Start and Test .
- 8) Standard business hours wage included
- 9) Controls connection, Programming by others
- 10) Disposal of Unit Ventilator
- 11) Trucking and storage of Unit Ventilator

The above work can be done for the sum of One Hundred Twenty Eight Thousand Sixty Dollars **\$ 128,000.00 Excluding Tax**

Note: More investigation with Trane needs to be carried out to get a more accurate number as the current Unit Ventilator in very outdated and no longer in Trane's database. More info to be had in the upcoming weeks.

HVAC Exclusions

- 1) Structural steel
- 2) Shutdown & startup of heating system
- 3) Cutting, patching & painting
- 4) Labor and material taxes
- 5) Controls connection and programming
- 6) Permit fees
- 7) Overtime and off hours
- 8) Items other than listed above

Guarantee: All labor, and material supplied by A & B Mechanical, LLC will carry a one (1) year guarantee from the date on installation against defects for both workmanship and material.

If you have any questions with our work please do not hesitate to call.

Thank you for the opportunity of working with you,

Arnie Jones Jr

Middlebrook School – Unit Ventilator Replacement

Terms and Conditions **Projects & Installations**

1. Services provided under this agreement will be performed during normal working hours.
2. The guarantees and services provided under the scope of this agreement are conditioned upon customer properly operating and maintaining systems / equipment. Customer will do so according to industry accepted practices and in consideration of A&B Mechanical LLC, hereafter A&BM, and recommendations.
3. Customer will provide and permit reasonable and safe means of access to all equipment. A&BM will be allowed to start and stop equipment as necessary to perform its services.
4. Customer agrees to pay invoices within thirty (30) days of receipt. A&BM reserves the right to cancel this and / or stop work under this agreement without notice, should payment become forty-five (45) days or more delinquent.
5. At its prevailing rates or at negotiated lump sum prices, A&BM will perform work not covered by this Agreement. This shall include responding to abnormal conditions for system(s) and equipment not covered by this Agreement, changes in scope of work and/or undeclared or hidden conditions. Repairs or replacements necessitated by reason of customer negligence or misuse are not included.
6. In the unlikely event of failure to perform its obligations. A&BM's liability is limited to repair or replacement at its option and such shall be customer's sole remedy. Under no circumstances will A&BM be responsible for loss of use, loss of profits, increased operating or maintenance expense, claims of customer's tenants or clients, or any special, indirect or consequential damages.
7. The Agreement does not include responsibility for system design deficiencies, such as, but not limited to poor air distribution, water flow imbalances, etc. It does not include responsibility for system, equipment and component obsolescence, electrical failures, and equipment beyond its serviceable life.
8. A&BM will not be liable for delays or failure to obligate due to fire, flood, strike lockout, freezing, and unavailability of material, riot, acts of God, or any cause beyond reasonable control.
9. Work necessitated by present or future requirements by government or insurance laws and or requests is not included.
10. Only A&BM personnel or agent are authorized to perform the work included in the scope of this Agreement. A&BM may, at its option, cancel this Agreement should non-authorized individuals perform such work.
11. In the event either party must commence a legal action in order to enforce any rights under this contract, the successful party shall be entitled to all court costs and reasonable attorney's fees as determined by the court for prosecuting and defending the claim, as the case may be. Additionally, should it become necessary for A&BM to turn the account over to a collection agency, A&BM shall be entitled to all reasonable collection costs.
12. In addition to the prices quoted, customer shall be responsible for all taxes applicable to the services and / or material provided here under.
13. We guarantee all prices quoted in this agreement shall remain firm for a period of thirty (30) days from the date shown on page one.

Resources & Guides

The Learniture® Mobile Stool Cafeteria Table is a great choice for your busy cafeteria. With multiple points of entry, kids can easily get in and out of their seats. Its simple design makes set up and storage simple. An individual locking mechanism keeps it firmly in place when in use. EasyLift torsion bars provide a smooth operation when opening and closing the tables, and the dual release storage latch allows you to safely release and unlock the tables from either side. The steel frame and particleboard top withstand heavy use and make clean-ups fast, and the four thermo-polyurethane casters make the table easy to move.

Description

Specs

Resources & Guides

The Learniture® Mobile Stool Cafeteria Table is a great choice for your busy cafeteria. With multiple points of entry, kids can easily get in and out of their seats. Its simple design makes set up and storage simple. An individual locking mechanism keeps it firmly in place when in use. EasyLift torsion bars provide a smooth operation when opening and closing the tables, and the dual release storage latch allows you to safely release and unlock the tables from either side. The steel frame and particleboard top withstand heavy use and make clean-ups fast, and the four thermo-polyurethane casters make the table easy to move.

Attn: John Morello

Re: Trumbull Agriscience RTU Replacement

On behalf of my company, I would like to thank you for your interest in A&B Mechanical, LLC. We are pleased to submit a quotation to replace the 4 ton RTU in accordance with our discussion and service call.

A & B Mechanical, LLC will supply and install the following scope of work:

HVAC Scope of Work for RTU

- 1) Demo existing Lennox 4 ton RTU
- 2) Disconnect gas, electrical connections
- 3) Remove lightning protection for reuse
- 4) F&I one (1) new Lennox 4 ton RTU.
- 5) Reconnect gas & electrical connections
- 6) Reinstall existing lightning protection
- 7) Start and Test
- 8) Standard business hours wage included
- 9) Controls connection, Programming by others

The above work can be done for the sum of **Nineteen Thousand Nine Hundred Forty-Eight Dollars \$ 19,948.00 Excluding Tax**

HVAC Exclusions

- 1) Structural steel
- 2) Shutdown & startup of heating system
- 3) Cutting, patching & painting
- 4) Labor and material taxes
- 5) Controls connection and programming
- 6) Permit fees
- 7) Overtime and off hours
- 8) Items other than listed above

Guarantee: All labor, and material supplied by A & B Mechanical, LLC will carry a one (1) year guarantee from the date on installation against defects for both workmanship and material.

If you have any questions with our work please do not hesitate to call.

Thank you for the opportunity of working with you,

Arnie Jones Jr

Trumbull Agriscience 4 ton RTU Replacement

Terms and Conditions **Projects & Installations**

1. Services provided under this agreement will be performed during normal working hours.
2. The guarantees and services provided under the scope of this agreement are conditioned upon customer properly operating and maintaining systems / equipment. Customer will do so according to industry accepted practices and in consideration of A&B Mechanical LLC, hereafter A&BM, and recommendations.
3. Customer will provide and permit reasonable and safe means of access to all equipment. A&BM will be allowed to start and stop equipment as necessary to perform its services.
4. Customer agrees to pay invoices within thirty (30) days of receipt. A&BM reserves the right to cancel this and / or stop work under this agreement without notice, should payment become forty-five (45) days or more delinquent.
5. At its prevailing rates or at negotiated lump sum prices, A&BM will perform work not covered by this Agreement. This shall include responding to abnormal conditions for system(s) and equipment not covered by this Agreement, changes in scope of work and/or undeclared or hidden conditions. Repairs or replacements necessitated by reason of customer negligence or misuse are not included.
6. In the unlikely event of failure to perform its obligations. A&BM's liability is limited to repair or replacement at its option and such shall be customer's sole remedy. Under no circumstances will A&BM be responsible for loss of use, loss of profits, increased operating or maintenance expense, claims of customer's tenants or clients, or any special, indirect or consequential damages.
7. The Agreement does not include responsibility for system design deficiencies, such as, but not limited to poor air distribution, water flow imbalances, etc. It does not include responsibility for system, equipment and component obsolescence, electrical failures, and equipment beyond its serviceable life.
8. A&BM will not be liable for delays or failure to obligate due to fire, flood, strike lockout, freezing, and unavailability of material, riot acts of God, or any cause beyond reasonable control.
9. Work necessitated by present or future requirements by government or insurance laws and or requests is not included.
10. Only A&BM personnel or agent are authorized to perform the work included in the scope of this Agreement. A&BM may, at its option, cancel this Agreement should non-authorized individuals perform such work.
11. In the event either party must commence a legal action in order to enforce any rights under this contract, the successful party shall be entitled to all court costs and reasonable attorney's fees as determined by the court for prosecuting and defending the claim, as the case may be. Additionally, should it become necessary for A&BM to turn the account over to a collection agency, A&BM shall be entitled to all reasonable collection costs.
12. In addition to the prices quoted, customer shall be responsible for all taxes applicable to the services and / or material provided here under.
13. We guarantee all prices quoted in this agreement shall remain firm for a period of thirty (30) days from the date shown on page one.

TRANE CENTRAVAC® R'NEWAL® SERVICE PROGRAM

Trane's CenTraVac R'newal Service Program is an exclusive, comprehensive factory warranted solution designed to restore critical components of your CenTraVac unit(s) to original operating condition, reliability, and life expectancy. The R'newal program is designed to decrease your chances of unscheduled downtime. This process replaces worn materials, restores compressor performance, and updates applicable components to current design. This service program is performed by Trane field personnel. Its intent is to address components whose wear over time presents a significant risk to unit reliability and operation. It is intended for owners with midlife equipment that want to get many more years out of their units.

The CenTraVac R'newal program is backed with a Trane warranty covering the compressor motor, bearings and lubrication system failures. This unique warranty reflects Trane's confidence in our motors as well as our factory-authorized service technicians who work on them.

Per the attached proposal, it is our recommendation that your chiller be scheduled for a CenTraVac Compressor R'newal service.

Thank you for giving us this opportunity. If you have any questions or concerns, please call me at (860) 616-6600.

Sincerely,

Jeff Polisky
Account Manager, LEED AP

PROPOSAL

We are pleased to offer you this proposal for performance of the following Services for the Equipment listed:

Trumbull High School

The following "Covered Equipment" will be serviced at Trumbull High School:

Equipment	Qty	Manufacturer	Model Number	Serial Number	Asset Tag
Centrifugal Chiller	1	Trane	CVHE050FA4	L11D01819	CH-1
Centrifugal Chiller	1	Trane	CVHE050FA4	L11D01820	CH-2

manufactured Dec 2011

SCOPE OF SERVICES

CENTRAVAC® COMPRESSOR R'NEWAL® SERVICE

- Refrigerant removal and replacement per applicable law
- Dismantling of the centrifugal compressor
- Refrigerant Analysis using Trane Chemical Laboratory*
- Inspection and verification of the inlet guide vane assembly, motor shaft, labyrinth seals, and the impellers compared to Trane specifications*.
- Motor inspection including a rotor bar and resistance analysis of the motor to Trane specifications*
- Verification and adjustment of the controls and measuring devices*
- Inspection of the overload controls, contactors, wiring, and other starter components*.
- Cleaning and inspection of the lubrication system including the oil pump, regulator, filters, heating elements, and sump*
- Cleaning and inspection of economizer and liquid line flanges (recommend repair as necessary*)
- Installation of new Trane compressor motor bearings
- Speed balance the rotor and impellers as one operating assembly prior to reassembly of the compressor
- Reassembly of the centrifugal compressor, auxiliary vapor and liquid lines, and sight glasses with all new Trane gaskets
- Selectable Options:
 - Replace oil pump and motor - included
 - Clean and verify purge
 - Perform vibration analysis as a base line at chiller start-up - included
- Installation of motor terminal board using new Trane approved gaskets and terminal O-rings
- Replace relief valve carbon disk and gaskets
- Chiller evacuation and leak testing to Trane specifications
- Charge with refrigerant and adjust charge as necessary (any additional refrigerant required must be provided by the Owner. Owner's approval will be required if refrigerant cleaning or additional refrigerant is needed.)
- Start-up and operation check by certified Trane technician
- Verification of operating parameters and adjustment of the chiller as per its original specifications
- Trane extended warranty on compressor motor, bearings, and lubrication system
- Installation of Trane R'newal nameplate indicating Trane issues CenTraVac compressor R'newal serial number.
- Factory parts and labor warranty – see Warranty section (below) for details

** Evaluations will be by Trane representative. Any required additional repairs will be brought to your attention, quoted separately, and will be done only following your approval.*

CENTRAVAC R'NEWAL WARRANTY

CenTraVac R'newal includes a one-year standard parts warranty and 90 days labor on all components replaced as part of the offering.

In addition, the compressor motor, compressor motor bearings, and lubrication system will be covered by the Limited Factory Warranty for the term purchased:

- **2 Years Parts & Labor:** This offering requires the purchase of a Trane Service Agreement. The service agreement shall include, at a minimum three inspections and one oil analysis per year. The oil analysis will be completed by Trane Chemical Laboratory. If the Trane Service Agreement is cancelled before the end of the warranty period, the Limited Factory Warranty is void. As a condition of the program, the motor must be sent to Charlotte if the chiller is over 20 year.

CLARIFICATIONS TO CHILLER R'NEWAL PORTION

- The existing chiller refrigerant will be re-used provided it meets standards. Refrigerant cleaning, reclaiming, and additional refrigerant are not included and will be billable in addition to this proposal.
- Liquid and economizer line repairs, upon inspection, will be quoted in addition to this proposal.
- ASHRAE Std. 15 requirements for refrigerant monitor and self-contained breathing apparatus are not included. Please request a separate proposal if the equipment room does not meet this requirement.
- Disposal of waste oil shall be handled by the customer in accordance with EPA regulation. Trane will remove the oil from the chiller, put into 5-gallon containers with lids and mark as "used oil" for the customer to arrange disposal of at their convenience.
- The existing insulation will be re-used when possible. New insulation, if necessary, will be quoted in addition to this proposal.
- Labor is at normal working hours only and excludes labor costs due to unusual equipment access. All crane costs are excluded.
- The Limited Factory Warranty is available at the URL listed below and is incorporated herein by this reference: [RNC-SVW001A-EN_07132021.pdf \(trane.com\)](https://www.trane.com/literature/SVW001A-EN_07132021.pdf)

TRANE ADAPTIVE FREQUENCY DRIVE (AFD) R'NEWAL®

The AFD R'newal service program is a comprehensive factory warranted solution designed to restore your CenTraVac® chiller AFD to its original operating condition, reliability, and life expectancy. The AFD R'newal program is backed with a Trane warranty covering key AFD power components. This unique warranty reflects Trane's confidence in our AFD components as well as our factory-authorized service technicians who work on them.

The AFD R'newal Service Program is an exclusive, comprehensive factory warranted solution designed to restore your CenTraVac® chiller AFD to its original operating condition, reliability, and life expectancy. The AFD R'newal program is designed to decrease your chances of unscheduled downtime. This service program is performed by Trane field personnel. Its intent is to address components whose wear over time presents a significant risk to unit reliability and operation.

The AFD R'newal program covering key AFD power components. This unique warranty reflects Trane's confidence in our components as well as our factory-authorized service technicians who work on them.

Per the attached proposal, it is our recommendation that your AFD be scheduled for an R'newal service.

SERVICE FLOWS

AFDE_CVHE R'Newal

Description

- Other Interventions for Optional Scope of Service
- Customer Notification of Unit Maintenance
- KestrelView Connection
- Record Drive Settings
- Tracer TU Disconnection
- Lock Out Tag Out (Chiller)
- Recover Refrigerant/Low Pressure
- Inspect AFD Drive
- Disassemble AFD Refrigerant Cooled
- Remove Power Core & input capacitor bank and Ship Back to Factory for Core Credit
- Supply and install Refrigerant Cooled AFD Power Module & Input Capacitor Bank
- Nitrogen Leak Check after Repair
- Evacuate System after Repair with Standing Vacuum Test
- Charge Refrigerant Low Pressure
- Remove Lock Out Tag Out and Restore Power
- Restore Saved Drive Settings
- Tracer TU Connection
- Validate Binding Starter
- Check AFD and Chiller Setpoints
- Run Service Report from Tracer TU
- Tracer TU Disconnection
- Mount R'newal Name Plate

AFD R'NEWAL WARRANTY

AFD R'newal includes a one-year standard parts warranty and labor on all components replaced as part of the AFD R'Newal offering.

In addition, the AFD Power Module and Input Capacitor Bank (if installed) will be covered by the Limited Factory Warranty for the term purchased:

- **2 Years Parts & Labor:** This offering requires the purchase of the Trane Service Agreement. The service agreement shall include, at a minimum three annual inspections of the chiller. If the Trane Service Agreement is cancelled before the end of the warranty period, the Limited Factory Warranty is void.

CLARIFICATIONS TO AFD PORTION

- The R'newal price assumes the original AFD Power Module and Capacitor Bank (if installed) will be returned to the Trane R'newal facility for core charge credit within 45 days of R'newal component shipment. Therefore, if these components are not returned an additional charge of \$() will be included.
- Cooling system and other components not covered by the extended power component warranty will be covered by the standard Trane one- year parts only warranty.
- Unless specified as an option, upgrades to the chiller controls are not included in this proposal.
- Labor is at normal working hours only and excludes labor costs due to unusual equipment access. All crane costs are excluded.
- The Limited Factory Warranty is available at the URL listed below and is incorporated herein by this reference: [RNC-SVW001A-EN_07132021.pdf \(trane.com\)](https://www.trane.com/literature/SVW001A-EN_07132021.pdf)

- Disconnect Refrigerant Line Flanges from Refrigerant Pump
- Disconnect Oil Supply Line
- Remove Oil Tank Block
- Remove Oil Sump Transducer
- Remove Oil Pump Motor Terminal Block
- Remove Oil Tank Cover
- Remove Oil Heater
- Replace Sight Glass(es)
- Clean Oil Sump
- Replace Oil Pump and Motor Assembly (with Refrigerant Pump)
- Reinstall Heater Well and Gasket
- Reinstall Oil Tank Cover
- Reconnect Refrigerant Line Flanges to Refrigerant Pump
- Reinstall Oil Pump Motor Terminal Block
- Replace/Reinstall Oil Regulator on Block (with Rotary Valve)
- Replace Oil Regulator (without Rotary Valve)
- Reinstall Oil Tank Block
- Replace Oil Filter (with Oil Removed)
- Reconnect Oil Line
- Replace/Reinstall Oil Sump Transducer
- Replace/Reinstall Oil Heater
- Replace Oil Pump Relay and Capacitor
- Reconnect Oil Tank Junction Box Wiring
- Replace Vertical Style Eductor Filter
- Replace Horizontal Eductor Filter/Drier
- Reinstall Internal Oil Supply Line
- Reinstall Bearing Oil Seal Mounting Plate
- Reinstall Bearing Oil Seal
- Reinstall 3rd Stage Impeller
- Reinstall 3rd Stage Suction Cover
- Reinstall 3rd Stage Impeller Nose Seal
- Reinstall 3rd Stage Inlet Vane Assembly
- Reinstall 2nd or 3rd Stage Vane Operator Assembly
- Reinstall Interstage Spacer (2nd/3rd Stage)
- Reinstall 2nd Stage Vane Plate
- Reinstall Interstage Spacer Seal (2nd/3rd Stage)
- Reinstall 2nd Stage Impeller
- Reinstall 2nd Stage Suction Cover
- Reinstall 2nd Stage Impeller Nose Seal
- Reinstall 2nd Stage Steel Shroud Assembly
- Reinstall Interstage Spacer (1st/2nd Stage)
- Reinstall 1st Stage Diffuser Plate
- Reinstall Interstage Spacer Seal (1st/2nd Stage)
- Reinstall 1st Stage Impeller and Impeller Locknut
- Reinstall 1st Stage Suction Cover
- Reinstall 1st Stage Impeller Nose Seal
- Reinstall 1st Stage Vane Assembly
- Reinstall 1st Stage Vane Operator Assembly
- Connect Oil Eductor Line
- Connect Oil Sump Vent Line
- Reinstall Vane Linkage and Actuator
- Reinstall Economizer
- Reconnect Starter
- Replace Rupture Disc
- Remove Pipe to Flare Angle/Service Valve
- Replace Pipe to Flare Angle/Service Valve
- Add Oil to Sump (with Portable Pump)
- Test Start Oil Pump
- Air Run Compressor for Balance
- Reinstall Suction Elbow

- Nitrogen Leak Check after Repair
- Start Oil Heater
- Evacuate System after Repair with Standing Vacuum Test
- Charge Refrigerant Low Pressure
- Disconnect External Power
- Pre-Start Chiller Check
- Start Unit (includes Log)
- Recharge Chiller (with Existing Refrigerant Charge)
- Adjust Oil Regulator after Start Up
- Reapply Insulation after R'Newal
- Mount R'newal Name Plate

PRICING AND ACCEPTANCE

TOTAL PRICE (EXCLUDING TAXES): **\$397,972.16**

CLARIFICATIONS

1. Price does not include applicable sales taxes, which will be added and reflected in the invoice(s).
2. Any service not listed is not included.
3. Work will be performed during normal Trane business hours.

I appreciate the opportunity to earn your business and look forward to helping you with all of your service needs. Please contact me if you have any questions or concerns.

In addition to any other amounts then due hereunder, if this Agreement is terminated or cancelled prior to its scheduled expiration, Customer shall pay to Company the balance of any amounts billed to but unpaid by Customer. In the event a "Service Project" is also included as part of the Agreement funding option, Customer shall pay to Company the Cancellation Fee which shall be set forth in "Exhibit A" Cancellation Schedule attached hereto, which Cancellation Fee represents unbilled labor, non-labor expenses, and parts materials and components. Subject only to a prior written agreement signed by Trane, payment is due upon receipt of invoice in accordance with Section 7 of the attached Terms and Conditions – Quoted Service.

This proposal is valid 30 days from September 29, 2025.

This agreement is subject to Customer's acceptance of the attached Trane Terms and Conditions – Quoted Service.

TERMS AND CONDITIONS – QUOTED SERVICE

“Company” shall mean Trane U.S. Inc..

To obtain repair service within the scope of Services as defined, contact your local Trane District office identified on the first page of the Agreement by calling the telephone number stated on that page. That Trane District office is responsible for Company's performance of this Agreement. Only Trane authorized personnel may perform service under this Agreement. For Service covered under this Agreement, Company will be responsible for the cost of transporting a part requiring service.

1. Agreement. These terms and conditions are an integral part of Company's offer and form the basis of any agreement (the “Agreement”) resulting from Company's proposal (the “Proposal”) for the services (the “Services”) on equipment listed in the Proposal (the “Covered Equipment”). **COMPANY'S TERMS AND CONDITIONS ARE SUBJECT TO PERIODIC CHANGE OR AMENDMENT.**

2. Connected Services. In addition to these terms and conditions, the Connected Services Terms of Service (“Connected Services Terms”), available at <https://www.trane.com/TraneConnectedServicesTerms>, as updated from time to time, are incorporated herein by reference and shall apply to the extent that Company provides Customer with Connected Services, as defined in the Connected Services Terms.

3. Acceptance. The Proposal is subject to acceptance in writing by the party to whom this offer is made or an authorized agent (“Customer”) delivered to Company within 30 days from the date of the Proposal. If Customer accepts the Proposal by placing an order, without the addition of any other terms and conditions of sale or any other modification, Customer's order shall be deemed acceptance of the Proposal subject to Company's terms and conditions. If Customer's order is expressly conditioned upon the Company's acceptance or assent to terms and/or conditions other than those expressed herein, return of such order by Company with Company's terms and conditions attached or referenced serves as Company's notice of objection to Customer's terms and as Company's counteroffer to provide Services in accordance with the Proposal. If Customer does not reject or object in writing to Company within 10 days, the Company's counteroffer will be deemed accepted. Customer's acceptance of the Services by Company will in any event constitute an acceptance by Customer of Company's terms and conditions. In the case of a dispute, the applicable terms and conditions will be those in effect at the time of delivery or acceptance of the Services. This Agreement is subject to credit approval by Company. Upon disapproval of credit, Company may delay or suspend performance or, at its option, renegotiate prices and/or terms and conditions with Customer. If Company and Customer are unable to agree on such revisions, this Agreement shall be cancelled without any liability, other than Customer's obligation to pay for Services rendered by Company to the date of cancellation.

4. Cancellation by Customer Prior to Services; Refund. If Customer cancels this Agreement within (a) thirty (30) days of the date this Agreement was mailed to Customer or (b) twenty (20) days of the date this Agreement was delivered to Customer, if it was delivered at the time of sale, and no Services have been provided by Company under this Agreement, the Agreement will be void and Company will refund to Customer, or credit Customer's account, the full Service Fee of this Agreement that Customer paid to Company, if any. A ten percent (10%) penalty per month will be added to a refund that is due but is not paid or credited within forty-five (45) days after return of this Agreement to Company. Customer's right to cancel this Agreement only applies to the original owner of this Agreement and only if no Services have been provided by Company under this Agreement prior to its return to Company.

5. Cancellation by Company. This Agreement may be cancelled by Company for any reason or no reason, upon written notice from Company to Customer no later than 30 days prior to performance of any Services hereunder and Company will refund to Customer, or credit Customer's account, that part of the Service Fee attributable to Services not performed by Company. Customer shall remain liable for and shall pay to Company all amounts due for Services provided by Company and not yet paid.

6. Services Fees and Taxes. Fees for the Services (the “Service Fee(s)”) shall be as set forth in the Proposal and are based on performance during regular business hours. Fees for outside Company's regular business hours and any after-hours services shall be billed separately according to the then prevailing overtime or emergency labor/labour rates. In addition to the stated Service Fee, Customer shall pay all taxes not legally required to be paid by Company or, alternatively, shall provide Company with acceptable tax exemption certificates. Customer shall pay all costs (including attorneys' fees) incurred by Company in attempting to collect amounts due.

7. Payment. Payment is due upon receipt of Company's invoice. Company reserves the right to add to any account outstanding for more than 30 days a service charge equal to the lesser of the maximum allowable legal interest rate or 1.5% of the principal amount due at the end of each month. Customer shall pay all costs (including attorneys' fees) incurred by Company in attempting to collect amounts due or otherwise enforcing these terms and conditions.

8. Customer Breach. Each of the following events or conditions shall constitute a breach by Customer and shall give Company the right, without an election of remedies, to terminate this Agreement or suspend performance by delivery of written notice: (1) Any failure by Customer to pay amounts when due; or (2) any general assignment by Customer for the benefit of its creditors, or if Customer becomes bankrupt or insolvent or takes the benefit of any statute for bankrupt or insolvent debtors, or makes or proposes to make any proposal or arrangement with creditors, or if any steps are taken for the winding up or other termination of Customer or the liquidation of its assets, or if a trustee, receiver, or similar person is appointed over any of the assets or interests of Customer; (3) Any representation or warranty furnished by Customer in connection with this Agreement is false or misleading in any material respect when made; or (4) Any failure by Customer to perform or comply with any material provision of this Agreement. Customer shall be liable to the Company for all Services furnished to date and all damages sustained by Company (including lost profit and overhead).

9. Performance. Company shall perform the Services in accordance with industry standards generally applicable in the state or province where the Services are performed under similar circumstances as of the time Company performs the Services. Company is not liable for any claims, damages, losses, or expenses, arising from or related to work done by or services provided by individuals or entities that are not employed by or hired by Company. Company may refuse to perform any Services or work where working conditions could endanger property or put at risk the safety of people. Parts used for any repairs made will be those selected by Company as suitable for the repair and may be parts not manufactured by Company. Customer must reimburse Company for services, repairs, and/or replacements performed by Company at Customer's request beyond the scope of Services or otherwise excluded under this Agreement. The reimbursement shall be at the then prevailing applicable regular, overtime, or holiday rates for labor/labour and prices for materials. Prior to Company performing the additional services, repairs, and/or replacements, Customer may request a separate written quote stating the work to be performed and the price to be paid by Customer for the work.

10. Customer Obligations. Customer shall: (a) provide Company reasonable and safe access to the Covered Equipment and areas where Company is to work; and (b) unless otherwise agreed by Customer and Company, at Customer's expense and before the Services begin, Customer will provide any necessary access platforms, catwalks to safely perform the Services in compliance with OSHA, state, or provincial industrial safety regulations or any other applicable industrial safety standards or guidelines.

11. Exclusions. Unless expressly included in the Proposal, the Services do not include, and Company shall not be responsible for or liable to the Customer for, any claims, losses, damages or expenses suffered by the Customer in any way connected with, relating to or arising from any of the following:

- (a) Any guarantee of room conditions or system performance;
- (b) Inspection, operation, maintenance, repair, replacement or performance of work or services outside the Services;
- (c) Damage, repairs or replacement of parts made necessary as a result of the acts or omission of Customer or any Event of Force Majeure;
- (d) Any claims, damages, losses, or expenses, arising from or related to conditions that existed in, on, or upon the premises before the effective date of this Agreement (“Pre-Existing Conditions”) including, without limitation, damages, losses, or expenses involving a Pre-Existing Condition of building envelope issues, mechanical issues, plumbing issues, and/or indoor air quality issues involving mold/mould, bacteria, microbial growth, fungi or other contaminants or airborne biological agents; and
- (e) Replacement of refrigerant is excluded, unless replacement of refrigerant is expressly stated as included with the Proposal.

12. Limited Warranty. Company warrants that: (a) the material manufactured by Company and provided to the Customer in performance of the Services is free from defects in material and manufacture for a period of 12 months from the earlier of the date of equipment start-up or replacement and (b) the labor/labour portion of the Services is warranted to have been properly performed for a period of 90 days from date of completion (the “Limited Warranty”). Company obligations of equipment start-up, if any are stated in the Proposal, are coterminous with the Limited Warranty period. Defects must be reported to Company within the Limited Warranty period. Company's obligation under the Limited Warranty is limited to repairing or replacing the defective part at its option and to correcting any improperly performed labor/labour. No liability whatsoever shall attach to Company until the Services have been paid for in full. Exclusions from this Limited Warranty include claims, losses, damages, and expenses in any way connected with, related to, or arising from failure or malfunction of equipment due to the following: wear and tear, end of life failure; corrosion; erosion; deterioration; Customer's failure to follow the Company-provided maintenance plan; unauthorized or improper maintenance; unauthorized or improper parts or material; refrigerant not supplied by Company; and modifications made by others to Company's equipment. Company shall not be obligated to pay for the cost of lost refrigerant or lost product. Some components of Company equipment may be warranted directly from the component supplier, in which case this Limited Warranty shall not apply to those components and any warranty of such components shall be the warranty given by the component supplier. Notwithstanding the foregoing, all warranties provided herein terminate upon termination or cancellation of this Agreement. Equipment, material and/or parts that are not manufactured by Company (“Third-Party Product(s)”) are not warranted by Company and have such warranties as may be extended by the respective manufacturer. **CUSTOMER UNDERSTANDS THAT COMPANY IS NOT THE MANUFACTURER OF ANY THIRD-PARTY PRODUCT(S) AND ANY WARRANTIES, CLAIMS, STATEMENTS, REPRESENTATIONS, OR SPECIFICATIONS ARE THOSE OF THE THIRD-PARTY**

MANUFACTURER, NOT COMPANY AND CUSTOMER IS NOT RELYING ON ANY WARRANTIES, CLAIMS, STATEMENTS, REPRESENTATIONS, OR SPECIFICATIONS REGARDING THE THIRD-PARTY PRODUCT THAT MAY BE PROVIDED BY COMPANY OR ITS AFFILIATES, WHETHER ORAL OR WRITTEN.

THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY ARE THE SOLE AND EXCLUSIVE REMEDIES FOR WARRANTY CLAIMS PROVIDED BY COMPANY TO CUSTOMER UNDER THIS AGREEMENT AND ARE IN LIEU OF ALL OTHER WARRANTIES AND LIABILITIES, LIABILITIES, CONDITIONS AND REMEDIES, WHETHER IN CONTRACT, WARRANTY, STATUTE, OR TORT (INCLUDING NEGLIGENCE), EXPRESS OR IMPLIED, IN LAW OR IN FACT, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE OR FITNESS FOR A PARTICULAR PURPOSE AND/OR OTHERS ARISING FROM COURSE OF DEALING OR TRADE. COMPANY EXPRESSLY DISCLAIMS ANY REPRESENTATIONS OR WARRANTIES, ENDORSEMENTS OR CONDITIONS OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF QUALITY, FITNESS, MERCHANTABILITY, DURABILITY AND/OR OTHERS ARISING FROM COURSE OF DEALING OR TRADE OR REGARDING PREVENTION BY THE SCOPE OF SERVICES, OR ANY COMPONENT THEREOF. COMPANY MAKES NO REPRESENTATION OR WARRANTY OF ANY KIND, INCLUDING WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. ADDITIONALLY, COMPANY MAKES NO REPRESENTATION OR WARRANTY OF ANY KIND REGARDING PREVENTING, ELIMINATING, REDUCING OR INHIBITING ANY MOLD, FUNGUS, BACTERIA, VIRUS, MICROBIAL GROWTH, OR ANY OTHER CONTAMINANTS (INCLUDING COVID-19 OR ANY SIMILAR VIRUS) (COLLECTIVELY, "CONTAMINANTS"), WHETHER INVOLVING OR IN CONNECTION WITH EQUIPMENT, ANY COMPONENT THEREOF, SERVICES OR OTHERWISE. IN NO EVENT SHALL COMPANY HAVE ANY LIABILITY FOR THE PREVENTION, ELIMINATION, REDUCTION OR INHIBITION OF THE GROWTH OR SPREAD OF SUCH CONTAMINANTS INVOLVING OR IN CONNECTION WITH ANY EQUIPMENT, THIRD-PARTY PRODUCT, OR ANY COMPONENT THEREOF, SERVICES OR OTHERWISE AND CUSTOMER HEREBY SPECIFICALLY ACKNOWLEDGES AND AGREES THERETO.

13. Indemnity. To the maximum extent permitted by law, Company and Customer shall indemnify and hold harmless each other from any and all claims, actions, costs, expenses, damages and liabilities, including reasonable attorneys' fees, resulting from death or bodily injury or damage to real or personal property, to the extent caused by the negligence or misconduct of the indemnifying party, and/or its respective employees or authorized agents in connection with their activities within the scope of this Agreement. Neither party shall indemnify the other against claims, damages, expenses, or liabilities to the extent attributable to the acts or omissions of the other party or third parties. If the parties are both at fault, the obligation to indemnify shall be proportional to their relative fault. The duty to indemnify and hold harmless will continue in full force and effect, notwithstanding the expiration or early termination of this Agreement, with respect to any claims based on facts or conditions that occurred prior to expiration or termination of this Agreement.

14. Limitation of Liability. NOTWITHSTANDING ANYTHING TO THE CONTRARY, NEITHER PARTY SHALL BE LIABLE FOR SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL LOSSES OR DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION REFRIGERANT LOSS, PRODUCT LOSS, LOST REVENUE OR PROFITS, OR LIABILITY TO THIRD PARTIES), INCLUDING CONTAMINANTS LIABILITIES, OR PUNITIVE DAMAGES WHETHER BASED IN CONTRACT, WARRANTY, STATUTE, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, INDEMNITY OR ANY OTHER LEGAL THEORY OR FACTS. NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, THE TOTAL AND AGGREGATE LIABILITY OF THE COMPANY TO THE CUSTOMER WITH RESPECT TO ANY AND ALL CLAIMS CONNECTED WITH, RELATED TO OR ARISING FROM THE PERFORMANCE OR NON-PERFORMANCE OF THIS AGREEMENT, WHETHER BASED IN CONTRACT, WARRANTY, STATUTE, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, INDEMNITY OR ANY OTHER LEGAL THEORY OR FACTS, SHALL NOT EXCEED THE COMPENSATION RECEIVED BY COMPANY UNDER THIS AGREEMENT. IN NO EVENT SHALL SELLER BE LIABLE FOR ANY DAMAGES (WHETHER DIRECT OR INDIRECT) RESULTING FROM MOLD, FUNGUS, BACTERIA, MICROBIAL GROWTH, OR OTHER CONTAMINANTS OR AIRBORNE BIOLOGICAL AGENTS. TO THE MAXIMUM EXTENT ALLOWED BY LAW, COMPANY SHALL NOT BE LIABLE FOR ANY OF THE FOLLOWING IN CONNECTION WITH PROVIDING THE ENERGY AND BUILDING PERFORMANCE SERVICES: INTERRUPTION, DELETION, DEFECT, DELAY IN OPERATION OR TRANSMISSION; CUSTOMER'S NETWORK SECURITY; COMPUTER VIRUS; COMMUNICATION FAILURE; THEFT OR DESTRUCTION OF DATA; GAPS IN DATA COLLECTED; AND UNAUTHORIZED ACCESS TO CUSTOMER'S DATA OR COMMUNICATIONS NETWORK.

15. CONTAMINANTS LIABILITY

The transmission of COVID-19 may occur in a variety of ways and circumstances, many of the aspects of which are currently not known. HVAC systems, products, services and other offerings have not been tested for their effectiveness in reducing the spread of COVID-19, including through the air in closed environments. IN NO EVENT WILL COMPANY BE LIABLE UNDER THIS AGREEMENT OR OTHERWISE FOR ANY INDEMNIFICATION, ACTION OR CLAIM, WHETHER BASED ON WARRANTY, CONTRACT, TORT OR OTHERWISE, FOR ANY BODILY INJURY (INCLUDING DEATH), DAMAGED TO PROPERTY, OR ANY OTHER LIABILITIES, DAMAGES OR COSTS RELATED TO CONTAMINANTS (INCLUDING THE SPREAD, TRANSMISSION MITIGATION, ELIMINATION, OR CONTAMINATION THEREOF) (COLLECTIVELY, "CONTAMINANTS LIABILITIES") AND CUSTOMER HEREBY EXPRESSLY RELEASES COMPANY FROM ANY SUCH CONTAMINANT LIABILITIES.

16. Asbestos and Hazardous Materials. The Services expressly exclude any identification, abatement, cleanup, control, disposal, removal or other work connected with asbestos or other hazardous materials (collectively, "Hazardous Materials"). Should Company become aware of or suspect the presence of Hazardous Materials, Company may immediately stop work in the affected area and shall notify Customer. Customer will be responsible for taking any and all action necessary to correct the condition in accordance with all applicable laws and regulations. Customer shall be exclusively responsible for any claims, liability, fees and penalties, and the payment thereof, arising out of or relating to any Hazardous Materials on or about the premises, not brought onto the premises by Company. Company shall be required to resume performance of the Services only when the affected area has been rendered harmless.

17. Insurance. Company agrees to maintain the following insurance during the term of the contract with limits not less than shown below and will, upon request from Customer, provide a Certificate of evidencing the following coverage:

Commercial General Liability	\$2,000,000 per occurrence
Automobile Liability	\$2,000,000 CSL
Workers Compensation	Statutory Limits

If Customer has requested to be named as an additional insured under Company's insurance policy, Company will do so but only subject to Company's manuscript additional insured endorsement under its primary Commercial General Liability policies. In no event does Company or its insurer waive its right of subrogation.

18. Force Majeure. Company's duty to perform under this Agreement is contingent upon the non-occurrence of an Event of Force Majeure. If Company shall be unable to carry out any material obligation under this Agreement due to an Event of Force Majeure, this Agreement shall at Company's election (i) remain in effect but Company's obligations shall be suspended until the uncontrollable event terminates or (ii) be terminated upon ten (10) days' notice to Customer, in which event Customer shall pay Company for all parts of the Services furnished to the date of termination. An "Event of Force Majeure" shall mean any cause or event beyond the control of Company. Without limiting the foregoing, "Event of Force Majeure" includes: acts of God; acts of terrorism; war or the public enemy; flood; earthquake; lightning; tornado; storm; fire; civil disobedience; pandemic insurrections; riots; labor disputes; labor or material shortages; sabotage; restraint by court order or public authority (whether valid or invalid); and action or non-action by or inability to obtain or keep in force the necessary governmental authorizations, permits, licenses, certificates or approvals if not caused by Company and the requirements of any applicable government in any manner that diverts either the material or the finished product to the direct or indirect benefit of the government.

19. General. Except as provided below, to the maximum extent provided by law, this Agreement is made and shall be interpreted and enforced in accordance with the laws of the state or province in which the Services are performed without regard to choice of law principles which might otherwise call for the application of a different state's or province's law. Any dispute arising under or relating to this Agreement that is not disposed of by agreement shall be decided by litigation in a court of competent jurisdiction located in the state or province in which the Services are performed. To the extent the premises are owned and/or operated by any agency of the United States Federal Government, determination of any substantive issue of law shall be according to the United States Federal common law of Government contracts as enunciated and applied by Federal judicial bodies and boards of contract appeals of the Federal Government. This Agreement contains all of the agreements, representations and understandings of the parties and supersedes all previous understandings, commitments or agreements, oral or written, related to the Services. No documents shall be incorporated herein by reference except to the extent Company is a signatory thereon. If any term or condition of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, all other terms and conditions of this Agreement will nevertheless remain in full force and effect as long as the economic or legal substance of the transaction contemplated hereby is not affected in a manner adverse to any party hereto. Customer may not assign, transfer, or convey this Agreement, or any part hereof, without the written consent of Company. Subject to the foregoing, this Agreement shall bind and inure to the benefit of the parties hereto and their permitted successors and assigns. This Agreement may be executed in several counterparts, each of which when executed shall be deemed to be an original, but all together shall constitute but one and the same Agreement. A fully executed facsimile copy hereof or the several counterparts shall suffice as an original. No modifications, additions or changes may be made to this Agreement except in a writing signed by Company. No failure or delay by the Company in enforcing any right or exercising any remedy under this Agreement shall be deemed to be a waiver by the Company of any right or remedy.

20. Federal Requirements. The Parties shall comply with all United States federal labor law obligations under 29 CFR part 471, appendix A to subpart A. THE FOLLOWING PROVISIONS ARE INCORPORATED HEREIN BY REFERENCE: Executive Order 11701 and 41 CFR §§ 60-250.5(a), 60-300.5; Executive Order

11758 and 41 CFR § 60-741.5(a); U.S. immigration laws, including the L-1 Visa Reform Act of 2004 and the H-1B Visa Reform Act of 2004; and Executive Order 13496. The Parties shall abide by the requirements of 41 CFR 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to protected veteran status or disability. The Parties certify that they do not operate any programs promoting DEI that violate any applicable United States anti-discrimination laws and acknowledge and agree that their compliance with all applicable federal anti-discrimination laws is material to the federal government's payment decisions. The Parties acknowledge and agree that their employment, procurement, and contracting practices shall not consider race, color, sex, sexual preference, religion, or national origin in ways that violate United States federal civil rights laws.

21. U.S. Government Contracts.

The following provision applies only to direct sales by Company to the US Government. The Parties acknowledge that all items or services ordered and delivered under this Agreement / Purchase Order are Commercial Items as defined under Part 12 of the Federal Acquisition Regulation (FAR). In particular, Company agrees to be bound only by those Federal contracting clauses that apply to "commercial" suppliers and that are contained in FAR 52.212-5(e)(1). Company complies with 52.219-8 or 52.219-9 in its service and installation contracting business. **The following provision applies only to indirect sales by Company to the US Government.** As a Commercial Item Subcontractor, Company accepts only the following mandatory flow down provisions: 52.219-8; 52.222-26; 52.222-35; 52.222-36; 52.222-39; 52.247-64. If the Services are in connection with a U.S. government contract, Customer agrees and hereby certifies that it has provided and will provide current, accurate, and complete information, representations and certifications to all government officials, including but not limited to the contracting officer and officials of the Small Business Administration, on all matters related to the prime contract, including but not limited to all aspects of its ownership, eligibility, and performance. Anything herein notwithstanding, Company will have no obligations to Customer unless and until Customer provides Company with a true, correct and complete executed copy of the prime contract. Upon request, Customer will provide copies to Company of all requested written communications with any government official related to the prime contract prior to or concurrent with the execution thereof, including but not limited to any communications related to contractor's Customer's ownership, eligibility or performance of the prime contract. Customer will obtain written authorization and approval from Company prior to providing any government official any information about Company's performance of the Services that are the subject of this offer or agreement, other than the Proposal or this Agreement.

22. Limited Waiver of Sovereign Immunity. If Customer is an Indian tribe (in the U.S.) or a First Nation or Band Council (in Canada), Customer, whether acting in its capacity as a government, governmental entity, a duly organized corporate entity or otherwise, for itself and for its agents, successors, and assigns: (1) hereby provides this limited waiver of its sovereign immunity as to any damages, claims, lawsuit, or cause of action (herein "Action") brought against Customer by Company and arising or alleged to arise out of the furnishing by Company of any product or service under this Agreement, whether such Action is based in contract, tort, strict liability, civil liability or any other legal theory; (2) agrees that jurisdiction and venue for any such Action shall be proper and valid (a) if Customer is in the U.S., in any state or United States court located in the state in which Company is performing this Agreement or (b) if Customer is in Canada, in the superior court of the province or territory in which the work was performed; (3) expressly consents to such Action, and waives any objection to jurisdiction or venue; (4) waives any requirement of exhaustion of tribal court or administrative remedies for any Action arising out of or related to this Agreement; and (5) expressly acknowledges and agrees that Company is not subject to the jurisdiction of Customer's tribal court or any similar tribal forum, that Customer will not bring any action against Company in tribal court, and that Customer will not avail itself of any ruling or direction of the tribal court permitting or directing it to suspend its payment or other obligations under this Agreement. The individual signing on behalf of Customer warrants and represents that such individual is duly authorized to provide this waiver and enter into this Agreement and that this Agreement constitutes the valid and legally binding obligation of Customer, enforceable in accordance with its terms.

Supersedes 1-10.48 (1024)

SECURITY ADDENDUM

This Addendum shall be applicable to the sale, installation and use of Trane equipment and the sale and provision of Trane services. "Trane" shall mean Trane U.S. Inc. for sales and services in the United States, or Trane Canada ULC for sales and services in Canada.

1. **Definitions.** All terms used in this Addendum shall have the meaning specified in the Agreement unless otherwise defined herein. For the purposes of this Addendum, the following terms are defined as follows:
"Customer Data" means Customer account information as related to the Services only and does not include HVAC Machine Data or personal data. Trane does not require, nor shall Customer provide personal data to Trane under the Agreement. Such data is not required for Trane to provide its Equipment and/or Services to the Customer.
"Equipment" shall have the meaning set forth in the Agreement.
"HVAC Machine Data" means data generated and collected from the product or furnished service without manual entry. HVAC Machine Data is data relating to the physical measurements and operating conditions of a HVAC system, such as but not limited to, temperatures, humidity, pressure, HVAC equipment status. HVAC Machine Data does not include Personal Data and, for the purposes of this agreement, the names of users of Trane's controls products or hosted applications shall not be Personal Data, if any such user chooses to use his/her name(s) in the created accounts within the controls product (e.g., firstname.lastname@address.com). HVAC Machine Data may be used by Trane: (a) to provide better support services and/or products to users of its products and services; (b) to assess compliance with Trane terms and conditions; (c) for statistical or other analysis of the collective characteristics and behaviors of product and services users; (d) to backup user and other data or information and/or provide remote support and/or restoration; (e) to provide or undertake: engineering analysis; failure analysis; warranty analysis; energy analysis; predictive analysis; service analysis; product usage analysis; and/or other desirable analysis, including, but not limited to, histories or trends of any of the foregoing; and (f) to otherwise understand and respond to the needs of users of the product or furnished service. "Personal Data" means data and/or information that is owned or controlled by Customer, and that names or identifies, or is about a natural person, such as: (i) data that is explicitly defined as a regulated category of data under any data privacy laws applicable to Customer; (ii) non-public personal information ("NPI") or personal information ("PI"), such as national identification number, passport number, social security number, social insurance number, or driver's license number; (iii) health or medical information, such as insurance information, medical prognosis, diagnosis information, or genetic information; (iv) financial information, such as a policy number, credit card number, and/or bank account number; (v) personally identifying technical information (whether transmitted or stored in cookies, devices, or otherwise), such as IP address, MAC address, device identifier, International Mobile Equipment Identifier ("IMEI"), or advertising identifier; (vi) biometric information; and/or (vii) sensitive personal data, such as, race, religion, marital status, disability, gender, sexual orientation, geolocation, or mother's maiden name.
"Security Incident" shall refer to (i) a compromise of any network, system, application or data in which Customer Data has been accessed or acquired by an unauthorized third party; (ii) any situation where Trane reasonably suspects that such compromise may have occurred; or (iii) any actual or reasonably suspected unauthorized or illegal Processing, loss, use, disclosure or acquisition of or access to any Customer Data.
"Services" shall have the meaning set forth in the Agreement.
2. **HVAC Machine Data; Access to Customer Extranet and Third Party Systems.** If Customer grants Trane access to HVAC Machine Data via web portals or other non-public websites or extranet services on Customer's or a third party's website or system (each, an "Extranet"), Trane will comply with the following:
 - a. **Accounts.** Trane will ensure that Trane's personnel use only the Extranet account(s) designated by Customer and will require Trane personnel to keep their access credentials confidential.
 - b. **Systems.** Trane will access the Extranet only through computing or processing systems or applications running operating systems managed by Trane that include: (i) system network firewalls; (ii) centralized patch management; (iii) operating system appropriate anti-malware software; and (iv) for portable devices, full disk encryption.
 - c. **Restrictions.** Unless otherwise approved by Customer in writing, Trane will not download, mirror or permanently store any HVAC Machine Data from any Extranet on any medium, including any machines, devices or servers.
 - d. **Account Termination.** Trane will terminate the account of each of Trane's personnel in accordance with Trane's standard practices after any specific Trane personnel who has been authorized to access any Extranet (1) no longer needs access to HVAC Machine Data or (2) no longer qualifies as Trane personnel (e.g., the individual leaves Trane's employment).
 - e. **Third Party Systems.** Trane will provide Customer prior notice before it uses any third party system that stores or may otherwise have access to HVAC Machine Data, unless (1) the data is encrypted and (2) the third party system will not have access to the decryption key or unencrypted "plain text" versions of the HVAC Machine Data.
3. **Customer Data; Confidentiality.** Trane shall keep confidential, and shall not access or use any Customer Data and information that is marked confidential or by its nature is considered confidential ("Customer Confidential Information") other than for the purpose of providing the Equipment and Services, and will disclose Customer Confidential Information only: (i) to Trane's employees and agents who have a need to know to perform the Services, (ii) as expressly permitted or instructed by Customer, or (iii) to the minimum extent required to comply with applicable law, provided that Trane (1) provides Customer with prompt written notice prior to any such disclosure, and (2) reasonably cooperate with Customer to limit or prevent such disclosure.
4. **Customer Data; Compliance with Laws.** Trane agrees to comply with laws, regulations governmental requirements and industry standards and practices relating to Trane's processing of Customer Confidential Information (collectively, "Laws").
5. **Customer Data; Information Security Management.** Trane agrees to establish and maintain an information security and privacy program, consistent with applicable HVAC equipment industry practices that complies with this Addendum and applicable Laws ("Information Security Program"). The Information Security Program shall include appropriate physical, technical and administrative safeguards, including any safeguards and controls agreed by the Parties in writing, sufficient to protect Customer systems, and Customer's Confidential Information from unauthorized access, destruction, use, modification or disclosure. The Information Security Program shall include appropriate, ongoing training and awareness programs designed to ensure that Trane's employees and agents, and others acting on Trane's, behalf are aware of and comply with the Information Security Program's policies, procedures, and protocols.
6. **Monitoring.** Trane shall monitor and, at regular intervals consistent with HVAC equipment industry practices, test and evaluate the effectiveness of its Information Security Program. Trane shall evaluate and promptly adjust its Information Security Program in light of the results of the testing and monitoring, any material changes to its operations or business arrangements, or any other facts or circumstances that Trane knows or reasonably should know may have a material impact on the security of Customer Confidential Information, Customer systems and Customer property.
7. **Audits.** Customer acknowledges and agrees that the Trane SOC2 audit report will be used to satisfy any and all audit/inspection requests/requirements by or on behalf of Customer. Trane will make its SOC2 audit report available to Customer upon request and with a signed nondisclosure agreement.
8. **Information Security Contact.** Trane's information security contact is Local Sales Office.
9. **Security Incident Management.** Trane shall notify Customer after the confirmation of a Security Incident that affects Customer Confidential Information, Customer systems and Customer property. The written notice shall summarize the nature and scope of the Security Incident and the corrective action already taken or planned.
10. **Threat and Vulnerability Management.** Trane regularly performs vulnerability scans and addresses detected vulnerabilities on a risk basis. Periodically, Trane engages third-parties to perform network vulnerability assessments and penetration testing. Vulnerabilities will be reported in accordance with Trane's cybersecurity vulnerability reported process. Trane periodically provides security updates and software upgrades.

11. Security Training and Awareness. New employees are required to complete security training as part of the new hire process and receive annual and targeted training (as needed and appropriate to their role) thereafter to help maintain compliance with Security Policies, as well as other corporate policies, such as the Trane Code of Conduct. This includes requiring Trane employees to annually re-acknowledge the Code of Conduct and other Trane policies as appropriate. Trane conducts periodic security awareness campaigns to educate personnel about their responsibilities and provide guidance to create and maintain a secure workplace.
12. Secure Disposal Policies. Trane will maintain policies, processes, and procedures regarding the disposal of tangible and intangible property containing Customer Confidential Information so that wherever possible, Customer Confidential Information cannot be practicably read or reconstructed.
13. Logical Access Controls. Trane employs internal monitoring and logging technology to help detect and prevent unauthorized access attempts to Trane's corporate networks and production systems. Trane's monitoring includes a review of changes affecting systems' handling authentication, authorization, and auditing, and privileged access to Trane production systems. Trane uses the principle of "least privilege" (meaning access denied unless specifically granted) for access to customer data.
14. Contingency Planning/Disaster Recovery. Trane will implement policies and procedures required to respond to an emergency or other occurrence (i.e. fire, vandalism, system failure, natural disaster) that could damage Customer Data or any system that contains Customer Data. Procedures include the following
 - (i) Data backups; and
 - (ii) Formal disaster recovery plan. Such disaster recovery plan is tested at least annually.
15. Return of Customer Data. If Trane is responsible for storing or receiving Customer Data, Trane shall, at Customer's sole discretion, deliver Customer Data to Customer in its preferred format within a commercially reasonable period of time following the expiration or earlier termination of the Agreement or, such earlier time as Customer requests, securely destroy or render unreadable or undecipherable each and every original and copy in every media of all Customer's Data in Trane's possession, custody or control no later than [90 days] after receipt of Customer's written instructions directing Trane to delete the Customer Data.
16. Background Checks Trane shall take reasonable steps to ensure the reliability of its employees or other personnel having access to the Customer Data, including the conducting of appropriate background and/or verification checks in accordance with Trane policies.
17. DISCLAIMER OF WARRANTIES. EXCEPT FOR ANY APPLICABLE WARRANTIES IN THE AGREEMENT, THE SERVICES ARE PROVIDED "AS IS", WITH ALL FAULTS, AND THE ENTIRE RISK AS TO SATISFACTORY QUALITY, PERFORMANCE, ACCURACY AND EFFORT AS TO SUCH SERVICES SHALL BE WITH CUSTOMER. TRANE DISCLAIMS ANY AND ALL OTHER EXPRESS OR IMPLIED REPRESENTATIONS AND WARRANTIES WITH RESPECT TO THE SERVICES AND THE SERVICES PROVIDED HEREUNDER, INCLUDING ANY EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR THAT THE SERVICES WILL OPERATE ERROR-FREE OR UNINTERRUPTED OR RETURN/RESPONSE TO INQUIRIES WITHIN ANY SPECIFIC PERIOD OF TIME.

October 2024
Supersedes: November 2023v2

APPENDIX

SAFETY

Since 2003, U.S. Bureau of Labor Statistics records have consistently shown the Total Recordable Incident Rate (TRIR) and Days Away From Work (DAFW) for Trane have been significantly lower than those for HVAC repair and maintenance contractors and specialty trade contractors (construction). The company's safety culture in America is unparalleled in the building service industry, with proven results in the continuous reduction of injury rates. Trane incident rates (OSHA) are consistently 50 to 70 percent below the industry average.

A wide range of safety training and resources are available to Trane technicians, including:

- Safety training—20 hours per year
- Electrical safety—NFPA 70E compliant, electrical PPE
- Fall protection
- Ergonomics
- USDOT compliance
- Refrigerant management training

ENVIRONMENTAL PRACTICES

Trane policies and procedures are compliant with all federal and state regulations. Refrigerant (and substitutes) handling, storage and leak repair processes are compliant with Environmental Protection Agency regulation 40 CFR Part 82. Service technicians are Universal-certified and use only certified recovery equipment.

Refrigerant Management Software (RMS) captures, manages and reports all refrigerant activity at your site. Upon request, Trane can send you an annual report documenting all refrigerant activity that we performed for each piece of equipment during the past 12 months.

Trane adheres to all environmental regulations when removing used oil from refrigeration units.

CONSISTENCY

Nationwide, Trane technicians follow documented, formal processes that ensure uniform service delivery. As an OEM, Trane has developed exclusive service procedures which provide the most reliable outcomes, and extended equipment longevity, at the most cost-effective price.

- Exclusive service work flow processes provide detailed steps and information encompassing parts, materials, tools and sequence of execution
- Additional steps addressing safety, quality control, work validation and environmental compliance
- Technicians must consistently reference documented processes to ensure no critical steps are skipped or omitted
- Applicable service processes meet or exceed ASHRAE 180-2008 Standard Practice for Inspection and Maintenance of Commercial Building HVAC Systems

**TOWN OF TRUMBULL
REQUEST FOR PROJECTS**

DEPARTMENT

BOE - Trumbull High School

Provide narrative to describe and justify the requested project and answer the following questions as applicable.

Phase 1 - Parking lot install, drainage, site work, administration. Also includes \$100k for Phase 2 drawings, planning, administration completed in 2026 for 2027.

What existing facilities or conditions will be affected by the project? How will this project improve these?

Will this project necessitate staffing increases?

NO

What is the general plan and timeline for completion?

Summer 2026,2027,2028

Are there any outside funding sources, e.g., grants?

NO

PROJECT NAME	CALENDAR YEAR FUNDING					TOTAL
	CY 2025	CY 2026	CY 2027	CY 2028	CY 2029	
Parking lot	1,963,590					1,963,590

Re: **Amendment No. 1 - Trumbull High School Parking Expansion, Circulation Design, & Drainage Improvements
Trumbull, CT**

Dear Mr. Dion:

Tighe & Bond, Inc. has prepared this Amendment No. 1 to our original proposal, dated June 2, 2023 and revised April 4, 2024, for Parking Expansion, Circulation Design, and Drainage Improvements at Trumbull High School (THS). Our initial proposal included improvements to bus drop-off, parent drop-off, and traffic circulation at the high school and an investigation of maximizing the available on-site parking by as described below:

1. Extend the east THS lot southward toward Cardinal Circle,
2. Extend the south THS lot westward into the athletic fields.
3. Adding ADA-accessible parking spots south of the track along the north side of the internal site driveway.
4. Additionally, conceptual circulation improvements recommended under Tighe & Bond's previous traffic and circulation study for the THS and Hillcrest Middle School (HMS) campuses completed in August and September 2022 will be advanced to design under this project.

During the preliminary investigation phase, wetlands were located south of the east parking lot prohibiting the expansion south and the Athletics program objected to the south parking lot expanding into the adjacent athletic fields. As discussed during the concept review meeting on February 27, 2025, Tighe & Bond was directed to investigate alternative locations that additional parking could be added. Three areas were considered north of the high school and ultimately a new lot was conceptually approved located north of the high school between the two existing driveways off Strobel Road. The inclusion of the parking area, in addition to the desire to perform the work during summers, a phased project approach is needed to accomplish the project. The following phases were discussed with the project team and are as follows:

Phase 1

- Expand the existing parking located adjacent to the school entrance north towards Strobel Road.
- Construct drainage improvements associated with the new lot and drainage improvements for the north driveways and loop driveway.

Phase 2

- The addition of ADA-accessible parking spots near the south side of the football field and track.
- Construct circulation improvements including bus and parent drop-offs and circulation modifications.

Expansion of impervious areas (pavement) will need to be in accordance with the Town of Trumbull Engineering Department's "Administrative Policy for Stormwater Management and Drainage Design Standards" which require that there is no increase in drainage flow from the site after development. This is usually accomplished through the construction of stormwater detention basins or underground infiltration systems.

The following Scope of Services is included in this proposal:

Scope of Services

Task 1 – Subsurface Explorations

Tighe & Bond will coordinate a subsurface exploration program to evaluate the suitability of the site's subsurface conditions to support the proposed parking lot, retaining wall, and infiltration system. The subsurface explorations program will include the following:

- 1.1 Site History and Geologic Conditions** – Review available existing United States Geologic Survey (USGS) mapping for the area to aid in preparation of the subsurface exploration and sampling program. Based on preliminary review of the Surficial Materials Map of Connecticut, the surficial conditions are anticipated to consist of glacial till. Based on the Bedrock Geologic Map of Connecticut, the bedrock at the site is anticipated to consist of Pinewood Adamellite microcline, albite, quartz, and muscovite.

For the purposes of this proposal, it is assumed that the retaining wall will be founded on non-cohesive and reasonably dense soils or bedrock suitable to support a conventional, shallow spread footing foundation system. If actual subsurface conditions require a deep foundation or ground improvement to support the proposed structure, additional explorations, laboratory testing, and analyses may be required under a revised scope and fee.

- 1.2 Exploration Layout and Coordination** – Mark the proposed exploration locations in the field. Locations will be established by taping off of existing site features. It is recommended that a surveyor be engaged if more accurate locations are required. It is assumed that all explorations, both borings and test pits, will be marked concurrently in one site visit. Once exploration locations are marked, Tighe & Bond will coordinate the required Call Before You Dig (CBYD) utility clearance notification for the borings with our drilling subcontractor. It should be noted that CBYD only clears utilities on public roads. Utility clearance on private property is the responsibility of the Owner. We ask that the Owner provides a utility plan showing locations of existing utilities on site. Tighe & Bond and our drilling subcontractor will not be responsible for damages to utilities that are not clearly marked on the property or not located on the utility plan.

Reasonable care will be exercised in locating underground structures in the vicinity of proposed subsurface explorations. This will include contact with the local agency coordinating subsurface utility information and/or a review of plans provided by the Trumbull High School. Tighe & Bond shall be entitled to rely upon any information or plans prepared or made available by others. The presence of possible underground utilities may restrict the location of our explorations.

- 1.3 Borings** – Subcontract with a drilling contractor to complete one day of borings within or near the proposed retaining wall. It is assumed that the boring locations will be accessible with an ATV rig. It is anticipated that up to two borings will be completed within the time budgeted. Borings not completed within this time frame will either be eliminated or completed under a contract amendment. The borings are proposed along the proposed retaining wall. Borings will be advanced with hollow-stem augers or flush joint casing using drive and wash methods to target depths of up to 30 feet below the existing ground surface, 15 feet into glacial till, or refusal, whichever is shallowest. If auger or rollerbit refusal is encountered at shallower depths, refusal will be confirmed by split-spoon refusal and the boring will be terminated.

Split-spoon samples using Standard Penetration Test (SPT) procedures will be obtained continuously through existing fill or organic soils to a maximum depth of 6 feet, and at 5-foot maximum intervals thereafter. A 10-foot rock core will be performed in one of the borings, if refusal is encountered at a depth of 20 feet below grade or shallower. Otherwise, an offset boring will be performed to confirm refusal depths, as time allows. Groundwater monitoring wells are not proposed but groundwater levels will be noted during drilling, if encountered. The number, location and depth of the proposed borings may be modified in the field based on actual conditions encountered during drilling.

Boreholes will be backfilled with cuttings or sand if there is an insufficient amount of cuttings to fill the hole. Any drill cuttings unable to be returned to the hole will be spread near the boring location in a vegetated upland area. No other surface repair is included such as regrading, landscaping, or seeding due to boring or drill rig activities. For an additional fee, Tighe & Bond will subcontract with a landscaper to repair damage by the drill rig if mutually agreed upon under a contract amendment.

We anticipate and this proposal assumes that no investigation derived waste (IDW) requiring off-site disposal will be generated from the borings or test pits (discussed in the next section). However, if IDW is generated that should not be placed on the ground surface, the excess soils will then be drummed and the drum will be labeled and left on site at a location identified by the Town. Tighe & Bond will conduct sampling and analytical testing of the drummed soils under a mutually agreed upon contract amendment. Tighe & Bond will coordinate transportation and disposal of the drummed soils with a disposal contractor. The Town will be responsible for engaging and compensating the disposal contractor directly for the transportation and disposal of the drummed material.

Tighe & Bond will be on site to coordinate the drilling subcontractor, observe and document drilling and in-situ testing, log soil samples using the modified Burmister classification method, and record rock core recovery and Rock Quality Designation (RQD).

- 1.4 Test Pits** – It is assumed that test pits for the infiltration system will be performed by the Town of Trumbull. Tighe & Bond will coordinate with the Town to conduct one day of test pits. It is assumed that the Town will provide an excavator and operator and will contact CBYD prior to test pit excavation. The excavator should be able to excavate

test pits to depths of up to 10 feet below grade surface. Approximately three test pits are anticipated but is dependent on test pit location accessibility and excavation difficulty. Test pits should be backfilled with excavated materials placed in lifts and compacted with the heel of the bucket.

- 1.5** Tighe & Bond will be on site to coordinate the test pits, observe and document test pits, perform infiltration tests using an infiltrometer, and log soil samples using the modified Burmister classification method.
- 1.6** **Permits/Coordination** – Scheduling of our field work will be coordinated with Town personnel. We have also assumed that the explorations will not be conducted in a public right of way; therefore, an allowance for a police detail or traffic controls has not been included. Our scope currently includes no permitting effort for these subsurface explorations.

Tighe & Bond requires access to the site by the property owner. By acceptance of our proposal, without information to the contrary, we consider this as authorization to access the property for conducting field exploration in accordance with our scope.

Noise from the drill rig can be disruptive. However, it is assumed that explorations can be performed within an 8-hour period during weekdays sometime between 7 am and 5 pm without interruption to reduce cost. Alternatively, Tighe & Bond can perform explorations during the weekend or outside of school hours for an increased fee under a mutually agreed upon contract amendment, should the noise and assumed work hours not be acceptable.

- 1.7** **Material Testing** – Conduct six grain size analyses on select samples obtained in the explorations to aid in soil classification, assist with correlating properties of the subsurface materials, and evaluation of the suitability of materials for re-use as fill on-site.

Task 2 – Phased Construction Documents

Develop the construction document drawings of the project to account for phasing of the parking lot construction, drainage improvements, and site circulation upgrades. The phased drawings will identify sequential construction phasing

- 2.1** **Prepare Drawings** – The following is a list of sheets that are expected to be included in the drawings package.
 - 1. Site Plan** – The site plan includes the geometric layout of proposed site features and materials proposed on-site including the design of the site elements including the driveways, surface parking, sidewalks, curbing, etc.
 - 2. Site Grading and Drainage Plans and Details** – We will prepare the site grading and drainage plan based on the site survey and proposed site plan. The grading will show retaining walls and top and bottom elevations.
 - 3. Stormwater Management Details** – We will prepare stormwater management details for catch basins, manholes, outfalls, hydrodynamic separators, and possible sedimentation and detention structures.
 - 4. Site Utilities Plan and Details** – We will prepare the site utility plan to document the existing utilities and proposed site utility modifications. This plan will show the utility services including domestic water, fire protection, electrical, tele-data, sanitary

sewer, and gas within the vicinity of the project for coordination purposes. Campus infrastructure relocations and utility enabling phases are excluded.

5. **Soil Erosion Control Plan and Details:** Prepare the soil erosion and sedimentation control plan and details that would define the erosion control measures during construction and permanent control measures for post construction that would be part of the overall storm water management program for the site. The soil erosion and sedimentation control plan will conform to the "2023 Connecticut Guidelines for Erosion and Sediment Control," CTDEEP Bulletin 34.
6. **Landscape and Lighting Plan and details:** We will prepare a landscape and lighting plan including trees for the new parking areas. New light fixtures will be shown to provide illumination of the new parking areas. Light poles and fixtures will be selected to match existing on-site lighting and will be arranged to provide similar photometric performance to the existing lighting layout.

Assumptions and Exclusions

In an effort to provide you with a reasonable fee for the requested services, we have prepared a detailed scope of services based on our understanding of the project needs. In the same regard, the following list includes the assumptions that serve as the basis of our proposal and services that are not included. If these services are required, we will modify our proposal accordingly to meet your needs.

1. The assessment and design of off-site improvements is not included.
2. It is assumed that the Board of Education will pay all permit and application fees directly, if required.
3. Meetings beyond those identified in the Scope of Services are excluded.
4. The stormwater management plan will be designed to treat the water quality volume of the additional proposed hardscape areas only. Modifications to the existing off-site drainage systems are excluded. If required, these services will be provided under a separate amendment to this proposal.
5. Subsequent site/civil design phase beyond the scope of work described in this proposal are excluded.
6. It is assumed that both phases of the project will be bid as one project and constructed over the course of two summers.
7. Construction administration and observation is excluded and can be provided under a separate proposal.
8. Services of an environmental professional are excluded.
9. Design of new or relocated sports fields is excluded.
10. Traffic Engineering services related to the increase in parking or changes in circulation patterns, beyond those services which were provided during the previous Tighe & Bond traffic and circulation study completed in August and September 2022, are excluded given the negligible increase in site traffic and the fact that the building is not being modified.

11. It is assumed that additional site lighting will be provided by new light poles located in the expanded parking areas and will be wired to the existing site lighting circuit. The building's existing electrical systems are assumed to be sized sufficiently to support the additional lighting. Modifications to the existing building or the building's electrical system are excluded.
12. The project is under 5 acres of ground disturbance with a local land use approval and will not require a registration under the Connecticut General Permit for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities. Project registration under the General Permit is excluded.
13. It is assumed that the collection of wetland delineation data forms and preparation of wetlands functions and values assessment will not be required and is excluded from this proposal. If required, these services will be provided under a separate amendment to this proposal.
14. No warranty, or guarantee, is expressed or implied concerning the granting of permits or approvals required for this project, or timelines for review and action by regulatory agencies.
15. All services not specifically identified in the scope of work are excluded.

Fee

Tighe & Bond will perform these services on a time and expense basis in accordance with the terms and conditions of our current On-Call Engineering Services agreement, dated July 28, 2021. In the event that the scope of work is increased for any reason, the limiting fee to complete the work shall be mutually revised by written amendment. We recommend an increase in our budget in the amount of **\$46,000** to cover these additional services, increasing the total budget to \$135,000. Services performed by subcontractors or materials purchased directly for this project, will be invoiced at cost plus ten percent.

We greatly appreciate the opportunity to continue providing services to the Town. If you should have any questions, please contact Patrick Ready at 203-712-1108 paready@tighebond.com or Andrew White at 203-712-1116 apwhite@tighebond.com.

Sincerely,

RE: Rooftop Duct Insulation

Mr. Morello,

We are pleased to furnish you with our quotation to supply labor and materials to perform work at Trumbull High School in Trumbull, CT.

Scope of Work & Specifications:

Task One- At approximately 200 areas of bird-damaged duct insulation, Anchor will strip around damaged insulation and repair it with either rigid 2" Polyisocyanurate board or expanding spray foam, depending on size of damaged area. We will then cover insulation with a silver embossed non-permeable vapor barrier jacketing.

Labor & Materials: \$14,130.00

Task Two- Anchor will strip damaged fiberglass insulation off 2,108 square feet of air duct located on the buildings' roof above the main entrance area. We will then install 2" Polyisocyanurate board on the ducts' surface and clad it in a silver embossed, non-permeable vapor barrier jacketing. The underside sections of duct will get 10 gage pins installed, using manufacturers recommended adhesive, to secure the Polyiso board to the ducts' surface.

Labor & Materials: \$35,398.00

Price for Both Tasks combined: \$49,528.00

Notes & Clarifications:

- A PO# is required before work can begin.
- Price excludes taxes. If business is tax exempt a certificate of exemption is required.
- Price is based on performance of work during first shift, Monday – Friday.
- Price is good for 90 days.
- Dumpster provided by others.

Thank you for the opportunity to provide you with our services. Please contact me if you have any questions.

Sincerely,

Neilson Spencer

KONE Asset Management Plan Trumbull Public Schools

2025

KONE Asset Management Plan

The KONE Asset Management Plan (AMP) provides a summary of your building's elevator and escalator requirements to assist you in budgeting and prioritizing available upgrades.

We have categorized recommendations as:

	Code		Aesthetics
	Safety		Eco-Efficiency
	Performance & Reliability		Modernization
	Accessibility		

- Budget figures are provided for your financial planning.
- Modernization figures if that is more cost-effective to your situation.
- Firm proposals will be provided upon request.

**KONE 1st Year
Safety Item**

Executive and Equipment Summary

Top left, and clockwise:

- Frenchtown Elementary, obsolete soft starter.
- Middlebrook Elementary, controller is obsolete and on borrowed time. Unable to source parts.
- Trumbull High School, original single bottom piston, original New cylinders are all double bottom, to code.
- Jane Ryan, original power unit, dry mounted and leaks.

Elevator Emergency Phone

An elevator emergency phone device provides, by code, a two-way communication from inside the elevator cab to an outside monitored line. Built-in, hands-free microphone and speaker, will activate by the push of a single button. KONE can also provide emergency phone monitoring as an option, that will call directly to the KONE Customer Care Center where trained agents provide immediate assistance.

**KONE 1st Year
Safety Item**

Potential Benefits include:

- Creates a safer operating environment
- Complies with current code and the Americans with Disabilities Act (ADA)
- Peace of Mind – the ability to communicate with someone outside the elevator for assistance in the event of an entrapment

Eco-Efficiency

Modernization

Elevator Hoistway Cleandown

Normal elevator operation creates air drafts in the hoistway which pull dirt and debris into the shaft. Over time the dirt and debris can build-up on components and lead to erratic elevator operation, component failures, increased shutdowns, fires, and other issues.

Potential Benefits include:

- Creates a safer operating environment
- Reduces service interruptions caused by dirt and debris build-up on components
- Reduce operating expenses related to costly repairs not covered under your maintenance agreement

Modernization

Door Operator Upgrade

Most elevator service interruptions occur due to door related issues. Such items as older / outdated equipment, age, and wear and tear can impact elevator door operation.

Replacement of the existing door operator provides a new upgraded door operator, helping address the above concerns.

Potential Benefits include:

- Creates a safer operating environment
- Reduce service interruption downtime
- Improve passenger and tenant satisfaction
- Decrease door operation noise
- Increase equipment reliability

Modernization

Hydraulic Power Unit

A hydraulic power unit is comprised of four major components: tank, valve, pump & pump motor. These components control and drive the elevator system while in operation.

Aging power unit components can lead to increased shutdowns, leveling issues, passenger entrapments, overall performance concerns, and more.

Replacing all components at once, instead of individually, provides the most proactive approach to reduce equipment downtime and address service interruptions.

Potential Benefits include:

- Creates a safer operating environment
- Reduce service interruption
- Improve overall operation of equipment including ride quality, leveling, and availability
- Reduce operating expenses related to obsolete components

Once

Reliability

Accessibility

Aesthetics

Eco-Efficiency

Modernization

Elevator Soft Start

Older elevators utilize mechanical starters. These starters are hard on elevator components, as the power source is either full current on or off.

A Soft Start replaces an older obsolete mechanical starter with a starter that provides electrical feed control when starting the elevator. A Soft Start also protects from over-voltage and under-voltage, which helps to prevent motor burnout during potential phase loss.

Potential Benefits include:

- Increase elevator availability, ride quality, and motor life
- Reduce operating noise and downtime related to power related issues
- Energy savings

Costs

Modernization

Traction Modernization

Traction modernization provides owners with all new components and starts the life cycle of the elevator over.

A full modernization can include:

- KONE ReSolve Control System
- KONE ReNova Door Equipment
- Non-Proprietary Design
- On-Board Diagnostics (no service tool required)
- KONE Signalization
- KONE 24/7 Connected Services capabilities

NOTE: Additional options, including machine replacement are available.

Potential Benefits include:

- Creates a safer operating environment
- Starts life cycle of elevator over

RESOLUTION APPROPRIATING \$15,620,000 FOR THE TRUMBULL (TOWN) CAPITAL IMPROVEMENT PLAN 2026-2027 AND AUTHORIZING THE ISSUANCE OF \$15,620,000 BONDS OF THE TOWN TO MEET SAID APPROPRIATION AND PENDING THE ISSUANCE THEREOF THE MAKING OF TEMPORARY BORROWINGS FOR SUCH PURPOSE

RESOLVED:

Section 1. The sum of \$15,620,000 is hereby appropriated by the Town of Trumbull, Connecticut (the “Town”) for the planning, acquisition and construction of the various projects comprising the Trumbull (Town) Capital Improvement Plan 2026-2027, as adopted and amended by the Town Council from time to time, and consisting of: (i) Roadways, (ii) Public Facilities, (iii) Park Improvements, (iv) Fleet and Equipment, (v) other projects, including Engineering and Economic Development, and (vi) Enterprise (WPCA); and including appurtenances, equipment and services related thereto, as listed below, and for related legal, consulting, advisory and administrative fees and expenses and costs of issuance related thereto, said appropriation being exclusive of and in addition to any and all State and Federal grants-in-aid thereof (the “Projects”):

<u>Project</u>	<u>Amount</u>
Roadways	\$ 5,381,173
Public Facilities	2,737,450
Park Improvements	1,529,246
Fleet and Equipment	1,556,297
Other (Engineering and Economic Development)	1,560,000
Enterprise (WPCA)	2,700,000
Costs of Issuance	<u>155,834</u>
	<u>\$15,620,000.00</u>

Section 2. The balance of any appropriation for any Project, or the proceeds of any bonds authorized hereby, which is not required to meet the actual cost of the Project may be transferred by the First Selectman, upon approval of the Town Council, to meet the actual cost of any other public improvement of the Town (including Projects authorized hereby and capital projects authorized by prior and future capital resolutions) for which an appropriation and bond authorization has been adopted; provided that the aggregate amount of the appropriation and bonds authorized pursuant to such transfer shall not exceed 10% of the CIP funding by purpose as last approved by the Town Council.

Section 3. To meet said appropriation \$15,620,000 bonds of the Town or so much thereof as shall be necessary for such purpose, shall be issued, maturing not later than the maximum maturity permitted by the General Statutes of Connecticut, Revision of 1958, as amended from time to time (the “Connecticut General Statutes”). Said bonds may be issued in one or more series as determined by the First Selectman and the Town Treasurer, provided that the total amount of bonds to be issued shall not be less than an amount which will provide funds sufficient, with other funds available for such purpose, to pay the principal of and the interest on all temporary borrowings in anticipation of the receipt of the proceeds of said bonds outstanding at the time of the issuance thereof, and to pay for the administrative, financing, legal and other costs of issuance of such bonds. The bonds shall be in the denomination of \$1,000 or a whole multiple thereof, be issued in fully registered form, be executed in the name and on behalf of the Town by the facsimile or manual signatures of the First Selectman and the Town Treasurer, bear the Town seal or a facsimile thereof, be certified by a bank or trust company, which bank or trust company may be designated the registrar and transfer agent, be payable at a bank or trust company, and be approved as to their legality by Robinson & Cole LLP, Hartford,

Connecticut. The bonds shall be general obligations of the Town and each of the bonds shall recite that every requirement of law relating to its issue has been duly complied with, that such bond is within every debt and other limit prescribed by law, and the full faith and credit of the Town are pledged to the payment of the principal thereof and interest thereon. The aggregate principal amount of the bonds of each series to be issued, the annual installments of principal, redemption provisions, if any, the certifying, registrar and transfer agent and paying agent, the date, time of issue and sale and other terms, details and particulars of such bonds, including the approval of the rate or rates of interest, shall be determined by the First Selectman and the Town Treasurer, in accordance with the Connecticut General Statutes.

Section 4. Said bonds shall be sold by the First Selectman and the Town Treasurer, in a competitive offering or by negotiation, in their discretion. If sold in a competitive offering, the bonds shall be sold at not less than par and accrued interest on the basis of the lowest net or true interest cost to the Town. A notice of sale or a summary thereof describing the bonds and setting forth the terms and conditions of the sale shall be published at least five days in advance of the sale in a recognized publication carrying municipal bond notices and devoted primarily to financial news and the subject of state and municipal bonds. If the bonds are sold by negotiation, the purchase agreement shall be approved by the First Selectman and the Town Treasurer.

Section 5. The First Selectman and the Town Treasurer are authorized to make temporary borrowings in anticipation of the receipt of the proceeds of said bonds. Notes evidencing such borrowings shall be signed by the First Selectman and the Town Treasurer, have the seal of the Town affixed, be payable at a bank or trust company designated by the First Selectman and the Town Treasurer, be approved as to their legality by Robinson & Cole LLP, Hartford, Connecticut and be certified by a bank or trust company designated by the First Selectman and the Town Treasurer, pursuant to Section 7-373 of the Connecticut General Statutes. The notes shall be issued with maturity dates which comply with the provisions of the Connecticut General Statutes governing the issuance of such notes. The notes shall be general obligations of the Town and each of the notes shall recite that every requirement of law relating to its issue has been duly complied with, that such note is within every debt and other limit prescribed by law, and that the full faith and credit of the Town are pledged to the payment of the principal thereof and the interest thereon. The net interest cost on such notes, including renewals thereof, and the expense of preparing, issuing and marketing, to the extent paid from the proceeds of such renewals or said bonds, shall be included as a cost of the Projects. Upon the sale of the bonds, the proceeds thereof, to the extent required, shall be applied forthwith to the payment of the principal of and the interest on any such notes then outstanding or shall be deposited with a bank or trust company in trust for such purpose.

Section 6. The Town hereby expresses its official intent pursuant to Section 1.150-2 of the Federal Income Tax Regulations, Title 26 (the "Regulations"), to reimburse expenditures paid sixty days prior to and any time after the date of passage of this resolution in the maximum amount of the Projects with the proceeds of bonds, notes, or other tax-exempt obligations ("Tax-Exempt Obligations") authorized to be issued by the Town. The Tax-Exempt Obligations shall be issued to reimburse such expenditures not later than eighteen (18) months after the later of the date of the expenditure or the substantial completion of the Projects, or such later date the Regulations may authorize. The Town hereby certifies that the intention to reimburse as expressed herein is based upon its reasonable expectations as of this date. The Director of Finance or her designee is authorized to pay Project expenses in accordance herewith pending the issuance of the Tax-Exempt Obligations.

Section 7. The First Selectman and the Town Treasurer are hereby authorized, on behalf of the Town, to enter into agreements or otherwise covenant for the benefit of bondholders to provide information on an annual or other periodic basis to the Municipal Securities Rulemaking Board (the "MSRB") and to provide notices to the MSRB of certain events as enumerated in Securities and Exchange Commission Exchange Act Rule 15c2-12, as amended, as may be necessary, appropriate or desirable to

effect the sale of the bonds and notes authorized by this resolution. Any agreements or representations to provide information to MSRB made prior hereto are hereby confirmed, ratified and approved.

Section 8. The First Selectman and the Town Treasurer, or either of them, are hereby authorized, on behalf of the Town, to enter into any other agreements, instruments, documents and certificates, including tax and investment agreements, for the consummation of the transactions contemplated by this resolution. The First Selectman and the Town Treasurer, or either of them, are hereby authorized, on behalf of the Town, to apply for and accept any and all Federal and State loans and/or grants-in-aid of the Project, to expend said funds in accordance with the terms hereof, and in connection therewith to contract in the name of the Town with engineers, contractors and others.

**CAPITAL IMPROVEMENT PLAN
NARRATIVE
CY 2026-CY 2030**

Summaries are listed below.

STANDARD DEFINITION FOR CAPITAL IMPROVEMENT

- Any acquisition or lease of land
- Purchase of major equipment or vehicles in excess of \$10,000 with life expectancy 5+ years
- Construction of new building facilities with cost in excess of \$10,000
- Major building improvements with a cost in excess of \$10,000
- Major equipment or furnishings in excess of \$10,000

BOARD OF EDUCATION

The Board of Education Facilities Director, Kevin Dion, BOE Facilities Manager, prepared the plan. Town of Trumbull Engineer developed quotes for school paving projects. The plan was reviewed and approved by the BOE

BOE ENGINEERING

-Daniels Farm Elementary School Paving- \$950,000 CY2026. The proposed project includes crucial elements, including sidewalk replacement, improvements to parking lot drainage, and paving. The addition of new pavement will not only improve the overall appearance but also create a secure, smooth, and long-lasting surface for students, staff, and visitors. This funding allocation underscores our dedication to ensuring a safe and inviting educational environment within our schools. Additionally, design improvements will enhance student drop-off areas, focusing on safety and efficiency. \$1,200,000 was funded in CY2025 for Phase I, with construction completed in Summer 2025. The department now requests \$950,000 for Phase II.

- Frenchtown Elementary Parking Lot Drainage, Paving - \$200,000-This project will address aging pavement, sidewalks, and drainage conditions across the school campus through a two-phase approach, with \$200,000 requested in CIP2026 for Phase I and the final phase planned for CIP2027. Work will include rebuilding deteriorated sidewalks, correcting drainage issues within the parking and drive areas, and repaving worn surfaces. These upgrades will extend the life of the site infrastructure while improving safety and accessibility for students, staff, and families.

ROADWAYS

Estimated cost is \$6,352,055 in CY2026

The Town plans its paving program using a data-driven approach that evaluates pavement condition, safety needs, drainage issues, and roadway usage. Streets are prioritized based on overall condition and risk, ensuring that both high-traffic roads and lower-traveled roads in poor condition receive appropriate attention. Grouping roads geographically helps reduce contractor mobilization costs and improve efficiency.

In addition to full paving projects, the Town continues to advance its pavement preservation initiative, which focuses on extending road life through treatments such as crack sealing, pot hole repairs, and other targeted repairs. These lower-cost strategies help delay full reconstruction and stretch capital dollars further across the network.

Capital plan narrative for Town – CY 2026 thru 2030

Paving and preservation efforts typically include drainage improvements, road base preparation, milling or reclamation, new asphalt, and restoration of curbing and shoulders as needed. Video inspections are performed to identify hidden drainage or structural issues, and annual contingency funds are included to address repairs uncovered through that process. Cost estimates reflect current pricing and anticipated escalation.

PUBLIC FACILITIES

Costs are based on professional estimates. Projects were reviewed and updated as necessary. Projects will be bid as required by Charter and Purchasing Policy and costs are subject to change. **Estimated cost is \$5,773,450 in CY 2026.**

Library

- Library Interior Upgrades and Service Area Modernization (two phases)–\$105,000 CY2026 + \$66,000 CY2027– This two-phase project updates aging study areas, counters, and lighting to support modern technology and improve public workspace. It also refinishes worn service desk carousels, improves circulation, updates interior finishes, and includes long-overdue painting to refresh and protect library spaces while enhancing the patron experience.

Town Hall

- Sidewalk Replacement and Pedestrian Safety Improvements at Town Hall (\$50,000 CIP2026) - Continuous rehabilitation of the sidewalks is necessary to ensure their ongoing safety, comfort, and compliance with ADA accessibility standards. \$25,000 was approved yearly in CIP2020–2024, and the work is complete.

- Asbestos Analysis and Abatement - \$30,000 CY2026 - Most of the Town Hall building was constructed before the 1989 asbestos ban, and contaminated materials remain in various offices and corridors. In some areas, new flooring was installed over older asbestos tile, requiring both layers to be handled as hazardous material. Our current practice is full abatement and removal—*not encapsulation*—whenever asbestos is identified. We request this as an ongoing effort, with funds used on a not-to-exceed basis to support systematic abatement as needed. \$30,000 was approved in CIP2024 (*via supplemental appropriation*), and another \$30,000 was approved in CIP2025. These funds will also support asbestos testing and abatement required during the upcoming TH service counter upgrades necessary to meet ADA accessibility requirements and to safely modify the counter areas so the public can be served more effectively.

Police Headquarters

-Ceiling and Lighting Improvements at Main Entrance - \$30,000 CY2026 - This project will replace the interlocking ceiling tiles at the main entrance with a conventional architectural tile system and upgrade entry lighting. These improvements will reduce maintenance costs, enhance durability, and improve the entrance's overall appearance, safety and efficiency.

-Detective Division Renovation, Second Floor - \$1,500,000 CY2026 - This renovation project will update the Detective Division's workspace on the second floor of headquarters to meet the needs of a modern investigative unit. By repurposing unused rooms and reconfiguring the original floorplan, the project will create dedicated spaces for Technology and Forensics within the existing footprint. Originally built over 40 years ago, the space now requires upgrades to support today's investigative functions. Design funding was approved in CIP2023 for \$40,000 (*design is in progress*).

-PD Garage Door replacements - \$32,450 CY2026 - Replace aging garage doors with new motorized, insulated units to improve safety, reliability, and energy efficiency. Upgraded doors reduce maintenance and support smoother daily operations.

-Roof replacement - \$396,000 CY2026 - The main roof over the Police Station has exceeded its life and the EPDM and flashing are failing. This is an urgent request. A smaller section already leaking is being replaced now as an emergency using operating budget funds (~\$83K).

-Window replacements - \$20,000 CY2026 - The Police Department windows need replacement due to age and poor efficiency. Phase I funds design and evaluation, with full replacement planned for bid in 2027. New windows will improve security, energy performance, and comfort.

Senior Center

- New Facility Concept Development - Revised Building Plan, Site Evaluation & Schematic Design Study \$275,000 CY2026-

- Priscilla Place Existing Facility Modernization Study - Feasibility, Assessment, Renovation & Schematic Design \$225,000 CY2026-

The Senior Center at Priscilla Place has reached the end of its lifecycle. We have two options to consider: first, we can renovate the existing facility to make it like new, or second, we can begin the process of designing and constructing a new facility. Major capital investments in the current building have been postponed, as we anticipated a positive outcome from the referendum. A substantial investment is required to modernize the facilities and support the programming studies developed by the building committee. Priscilla Place is an old school building constructed in 1920, and its layout poses challenges for today's programming and activities in a modern Senior Center. The building will require a thorough investigation to assess its structural deficiencies and identify corrective measures, while also reconfiguring larger open spaces. The second option will be to redesign a new facility, considering the Grace Church, Hardy Lane, and Priscilla Place sites. The first two have been thoroughly studied, and existing designs can be modified. The third Priscilla Place will require more focus, including a traffic study, demolition impact study, and an environmental analysis.

Public Works Yard

-Phased Public Works Yard Building Systems Efficiencies & Improvements - \$200,000

CY2026 + \$100,000 CY2027- The Public Works complex has 13 buildings, with Building #1, constructed in the mid-1950s, serving as the Highway Department's office, Fueling Station, and Mechanics Repair Bays. Half of its space has been updated, while the rest needs renovation due to wear and safety concerns. In the 1980s, DPW staff built the remaining structures for various divisions, but they now show structural deterioration (*extensive corrosion damage to foundations and knee walls, T111 siding that has become so brittle that it can no longer be secured to framing, damage to most of the overhead doors*). A multi-year restoration plan will cost-effectively preserve these essential buildings and protect the Town's significant equipment investments. The department used the \$50,000 funded in CIP2023 to complete several repairs, including garage doors, Fleet garage exhaust fans, and urgent window replacements. The request was deferred in CIP2024; therefore, funding is being requested again in 2026 to continue the plan for repairing the infrastructure.

-Emergency Stairwell Building #6 - \$80,000 CY2026. The building's exterior stairway has significant deterioration that must be addressed to maintain structural integrity and ensure safe access. The stairwell also no longer meets current building and fire code standards and replacing it will reduce risk and bring the structure into compliance.

-Garage Siding Replacements (phased) - \$200,000 CY2026. Many of the existing garages within DPW are deteriorating beyond practical repair and need new siding. This phased project focuses on upgrading deteriorating garages within DPW by replacing worn siding and doors. Insulation and modest heating will be added to help preserve equipment and materials. Work will be completed by on-call contractors as funds allow, with a not-to-exceed budget based on current quotes. This approach ensures essential upgrades are made to enhance durability and maintain operational efficiency. \$200,000 was funded in CIP2025, and repairs are currently underway at DPW Buildings 4, 5, 6, and 8.

- Renovation of Town Fueling Station - \$1,700,000 - CY2026. This is a critical, high-priority project. The Town's fueling station supports all municipal vehicles—including Police, Fire, EMS, school buses, and DPW trucks—making it essential to daily operations and emergency response. The 27-year-old system, built with used equipment, now urgently needs full replacement. Dispensers are failing more often, parts are scarce, and the canopy, islands, and control system are deteriorating. Design funded in CIP2024 (\$70,000) – preliminary assessment/design is complete & estimates construction at \$1.7M.

- Bin Cover - \$185,000 CY2026. Install a shed-style tent structure over the material bins at the Public Works yard to keep salt and roadway materials dry, usable, and protected from weather-related deterioration. The project includes the new structure and an asphalt base, with paving costs estimated using O&G state bid pricing.

Animal Shelter

Site Improvements - \$65,000 CY2026 - The Trumbull Animal Shelter provides humane refuge for homeless, abandoned, and surrendered cats and dogs, and works to place them in permanent, loving homes. The animal population fluctuates throughout the year and is cared for by a dedicated staff. The first phase involved applying an industrial-grade epoxy coating in the kennel areas to maintain a clean and sanitary environment. Initial improvements focus on the kennel runs and quarantine rooms. A purchase order for this phase is already in place for \$9,400, funded through the Animal Fund Special Agency account.

Town-wide

-Town wide Sidewalks - \$80,000 each year CY 2026-CY 2030. The sidewalks require ongoing rehabilitation to provide for continued safe and comfortable usage and to meet ADA accessibility standards. Sidewalk replacement and repairs are necessary and will cycle through the community, focusing on different neighborhoods over several years as repairs become necessary. This program has been funded annually from CIP2020–2025 and has completed work on Church Hill, Booth Hill, Park Lane, Lindeman, Strobel, Mayflower, and other areas. Construction costs are not to exceed the approved budgeted amount each year.

-Building Security Updates – phased \$100,000 CY2026 and CY2027 - Several years ago, an initial security assessment was performed on all Town Public facilities in collaboration with the Trumbull Police Department. This assessment analyzed the physical layout of each complex and recommended areas where cameras would provide the most significant benefits. This year, we will continue our focus for video surveillance installations and access controls with locations identified as having the greatest overall need. The Town has completed numerous installations at key areas and expanded secure building access throughout multiple buildings. These improvements enhance safety for staff, visitors, and the community. This work has been funded and completed over several years, including CIP2023–2025.

PARK IMPROVEMENTS

Estimated total cost is \$1,819,246 for CY2026

Parks Various Locations

- Twin Brooks Irrigation (replacement)- \$148,737 in CY 2026. This project will update, replace, and refurbish the irrigation system to improve reliability and efficiency. Twin Brooks' current steel system is more than 35 years old and in frequent failure, making full replacement necessary. Cost estimates were provided by the Parks Department.

-Wooden Guardrails and Installation - \$30,000 in CY 2026. The Town's Parks system has various locations that have existing guard rails or other vehicle deterrents such as pipes and chains that are well past their useful life and need to be replaced. This work has been funded in CIP2019, 2021–2022, and 2025, with improvements completed each year as budgets allowed. Work continues in phases and remains in progress to ensure safe, well-protected park areas.

-Bills Property Athletic Field (phased) - \$20,000 CY2026 design -Parks and Recreation will lose valuable field space during construction of the new Hillcrest Middle School, creating pressure on already limited capacity for town leagues. Developing Bill's property into a new athletic field will help meet ongoing demand for practice and game space. Phase I will focus on full site design, including access planning and utility layout. Phase II will construct the field, which will require a proper driveway, utilities, paving, irrigation, and installation of a grass playing surface.

Bridges/Trails

-Rails to Trails Safety Fencing - \$75,000 per year CY2026-2028- The Rails to Trails safety fencing, strategically positioned over seven miles and consisting of over 1,000 eight-foot sections, requires replacement. The Town will be using a more robust post and rail system to maintain safety standards

for our visitors. This phased initiative addresses critical pedestrian and bike safety. Pricing will be based on fencing state bids and will be completed as not to exceed budget (NTE) and completed in phases as budget allows.

- Playscapes various locations -Phase I Beaches Park - \$605,000 CY2026 - Many playgrounds at Beaches, Unity, Island Brook, Twin Brooks, Davidow, Tashua, and A. Nichols were installed in the early 2000s and are showing significant wear, with some parts no longer available for repair. Safety, ADA access, and updated standards drive the need for replacement. The plan is to upgrade these sites over several years, with order adjusted as conditions change. Year 1 focuses on the aging Beach Memorial Playground, the only 2-5 play area, which now requires full replacement for safety and accessibility.

-Abraham Nichols Historic Society Building- Repairs and Preservation - \$200,000 CY2026 - 2027- The Abraham Nichols Historic Society building, with portions dating back 100–200 years, requires major repairs to preserve the structure. Work will include foundation stabilization, roof repairs, window and door replacement, and necessary mechanical, electrical, and plumbing upgrades. The Town will use on-call contractors for design and construction, completing the work in phases within a not-to-exceed budget.

Parks Paving

-Twin Brooks Paving (parking lot/drive by Franklin St)- \$290,000 CY2026 - This project addresses a remaining area of Twin Brooks Park that was not included in the major improvement project. It provides additional paving near the Franklin Street entrance and adjacent parking areas, so they blend seamlessly with the newly completed work. The project also improves pavement conditions along Twin Brooks Drive that were not previously paved.

-Old Mine/Counseling Center Paving - \$249,930 CY2026 - This project addresses the deteriorated driveway and parking areas which are in very poor condition and pose safety concerns. Improvements will include full-depth paving of the roadway and parking lot, along with necessary drainage upgrades. The work will be completed in two phases. Phase I focuses on the driveway and parking area serving the Mary Sherlach Counseling Center, which requires complete reconstruction due to its current state of disrepair.

-Abraham Nichols Park (phase II) - \$ 114,800 CY2026 - Paving improvements include roadway, parking, and drainage upgrades. Phase I, funded in CIP2024 for \$110,000, addressed the front section of the park and is now complete. Phase II will reconstruct and repave the Shelton Road driveway and parking area serving the upper portion of Abraham Nichols Park, including access to the orchard and community gardens.

-Tashua Knolls Park sidewalks - \$85,779 CY2026 - The existing walkway is a soft surface that becomes unsafe during rain, washing onto the lower courts and creating slip hazards for players. It also sits on a steep grade and does not properly connect to the upper court entrances. Re-grading the area and installing a concrete sidewalk will greatly improve safety, accessibility, and overall walkability.

FLEET & EQUIPMENT

Estimated total cost is \$1,610,397 for CY2026

EMS Fleet

EMS Ambulance Remount - \$241,366 in CY 2026 - This request adds a van-style ambulance to the EMS fleet to keep pace with rising call volume and the staffing levels required to meet community needs. The vehicle will match the van-type ambulance approved three years ago. If funded, it will be equipped with all necessary medical and safety components to meet Connecticut Office of Emergency Medical Services requirements.

Highway Fleet

The Highway Department replaces equipment based on usage and condition. The vehicle may have rust and corrosion due to road or work conditions that require replacement. The general rule is to replace this equipment every 15 to 20 years.

Cost estimates are based on active State Contract pricing & quotes obtained.

-Snowplows - \$602,401 CY2025 - Older trucks have extensive rust and corrosion damage due to road or work conditions. Older plow trucks have various mechanical and structural issues that make them cost prohibitive to remain in service in such a necessary job. We have established a replacement list for the future for budgeting purposes. The Town has 24 routes and ideally 3 spares, so no route is without coverage. Pricing based on current State Contracts. Replacement plan for CY2026 – 2006 International and 2007 Kenworth (53TR and 133TR).

-Roller- \$54,100 CY2026 - This request is to replace the current roller - 2006 Ingersoll Rand Roller. Road maintenance is at the center of the Highway Department's responsibilities. This new roller will be an updated version of our current roller that is more reliable, maneuverable and has improved rolling/compaction characteristics which are critical for the longevity and durability of our asphalt repairs. This upgraded roller will also support roadway repair efforts and strengthen the Town's pavement preservation program.

Rock and Concrete Separator- \$32,100 CY2026 - This request is for a new Grizzly Concrete Separator, which removes oversized materials from piles before they enter the screening equipment. This task is currently done manually with a loader or excavator, an inefficient and time-consuming process that also causes unnecessary wear on those machines. A dedicated separator will improve efficiency and reduce strain on existing equipment.

Trailer extra wide split tilt equipment hauler - \$17,300 CY2026 - This request replaces a 23-year-old equipment trailer that has significant frame deterioration and is undersized for current machinery. A new trailer is needed to safely transport modern equipment, support daily operations, and ensure reliable, compliant hauling.

Pothole patching trailer - \$99,550 CY2026 - A new pothole patching trailer will expand the department's ability to perform road repairs in-house. Currently, we rely on a subcontractor for only two weeks each year, which limits the amount of work that can be completed. This new trailer will allow staff to repair more lane miles on side roads while the contractor focuses on main roads during their limited availability. Adding this capability supports our pavement preservation efforts and helps extend the useful life of Town roadways.

Craig Boxer Bucket- \$20,625 CY2026 – This request replaces the worn-out Tinks bucket/claw currently in use. The new Craig bucket provides a more efficient design that is essential for the Town's bulk leaf pickup program. Its floating design reduces damage to roadways and grass areas, improving both performance and surface protection.

Garbage Truck- \$297,370 CY2026 – This request replaces the Town's 2003 Autocar refuse truck, *the only garbage truck in the fleet*, which supports bulk pickup and bagged leaf programs. Its ability to compact material reduces trips to the Transfer Station and improves operational efficiency. After years of heavy use, the truck and its packing unit are experiencing significant wear, leading to more frequent maintenance and extended downtime. Replacing this vehicle is essential to maintaining operations and the highway programs that serve the community.

High profile, High Lift Plow Attachment- \$12,395 CY2026 – This purchase replaces the existing snowplow attachment, which is no longer capable of effectively removing snow from roadways. The new Everest plow is designed to provide better control, improved snow containment, and safer maneuverability. The current plow allows snow to flow over the top and is difficult to handle in tight spaces, making replacement necessary.

Smartlift w/Liquid Detection and Truck Adapters - \$33,100 CY2026 – This request replaces the existing single-post in-ground lift in Bay 4, which is more than 40 years old and no longer meets modern safety or operational standards. The new 12,000 lb. Smartlift includes liquid detection and truck adapters, providing leak protection and enhanced safety, environmental features. Its higher capacity will allow staff to service a wider range of fleet vehicles safely and efficiently.

Parks Fleet

-Ford F-550 Truck with Plow- \$ 199,550 CY2025 – This request replaces a lighter-duty 2013 Chevy 3500 with a heavier-duty truck equipped with a plow attachment to support winter and year-round operations. Its smaller overall size compared to full-size Freightliner units allows it to access tighter areas such as tight cul-de-sacs, narrow roads, and parking lots. The improved maneuverability also helps reduce the likelihood of curb, sidewalk, and landscape damage. This upgrade will enhance operational efficiency and improve service in locations that are difficult to reach with larger trucks.

ECONOMIC DEVELOPMENT

Estimated cost is \$350,000 in CY 2026

-White Plains Rd Trail Connection - sidewalk connection from State Commuter Lot to Twin Brooks - \$50,000 CY2026 - The Town has secured a DEEP Section 319 NPS grant for the construction phase, but the Department is seeking an additional \$50,000 in CIP2026 to cover any unforeseen costs or incidentals not included in the grant. This investment will facilitate greater outdoor recreational opportunities and improve safety for users. This project aims to enhance connectivity and accessibility in the community through several key elements. It will include modifications and signage for the commuter lot to establish a dedicated trailhead, installation of sidewalks leading to the Twin Brooks area to connect the trail in both directions, and the construction of a footbridge.

-Bicycle and pedestrian master plan- \$100,000 CY2026 - The plan will prioritize improvements, connections and repairs needed to promote safe walkability and bike ability in key

Capital plan narrative for Town – CY 2026 thru 2030

areas (commercial centers, schools, etc.) Currently, the town does not have a comprehensive and prioritized plan. The plan will develop priority projects and estimate costs for such projects.

- Long Hill Schoolhouse Restoration - \$200,000 CY2026 - This project will reconstruct the historic 1894 Upper Long Hill Schoolhouse on the Town Hall campus using preserved materials recovered from the original structure. The rebuilt schoolhouse will serve as a small community space. Funding is expected from multiple sources, including community fundraising. Planned timeline: fundraising in late 2025, site work and slab in spring 2026, framing and exterior work in summer 2026, and interior finishes in fall 2026.

ENGINEERING

Estimated cost is \$3,250,000 in CY 2025.

-Townwide Culverts, Bridges and Infrastructure Inspection- \$200,000 yearly CY 2026-CY2030- This ongoing project supports routine assessments, inspections, and minor repairs for the Town's bridge and culvert infrastructure. Regular evaluations help identify early structural or drainage issues before they become unsafe or costly emergencies. Work includes field reviews, engineering analysis, reporting, small repairs, and design plans if targeted reconstruction is needed. Funding is for maintenance and planning—*not major culvert construction*. Project costs are NTE (not to exceed) the approved budget each year and work remains ongoing.

-Townwide Culverts design and construction (Park Street)- \$950,000 CY 2026- These reconstruction projects are identified through the Town's ongoing culvert inspections and assessments. Trumbull manages over 260 culverts, many of which are undersized or at the end of their useful life, creating risks for roadway stability and stream flow. The current phased plan includes Park Street, Valley View, and West Mischa, though the sequence may change based on conditions. In CY2025, \$800,000 was approved for the Williams and Edison Road culverts, and that work is now in progress. These improvements are essential to maintaining safety and reliability across the community.

-Daniels Farm Road drainage improvements - \$1,300,000 CY 2026 - This project is intended to replace and/or add drainage systems along Daniels Farm Road. Various drainage pipes are corrugated metal pipe and need replacement. The project will improve roadway surface stormwater runoff during a rainstorm. Construction costs are estimates based on past projects; final costs will be determined after design phase is complete. This project will be completed in several phases with Phase I and II for drainage in CY2026-2027 and paving in CY2027-2029.

Lower Nichols Drainage Improvements Construction - Phase II \$450,000 CY2026 - Although the design for Contract 5's sanitary sewer project was completed; it was determined that the project itself will not advance. The extensive deterioration of the roadways in the Lower Nichols area have reached a critical point, necessitating immediate paving. The asphalt is severely distressed, and patching is no longer effective. The area requires drainage infrastructure improvements to rectify inadequate drainage conditions. Once these drainage improvements are completed, the entire Lower Nichols area will be primed for pavement enhancements. Phase I of the drainage construction improvements was funded in CIP2023 for \$750,000 and is currently underway.

Old Town Road & Quarry Road Traffic Signal Replacement - Phase I Design - \$250,000 CY2026 - The existing traffic signal at Old Town Road and Quarry Road is outdated and no longer meets current CTDOT Traffic Signal Design standards. Much of the equipment is at the end of its service life and requires frequent maintenance to remain operational. This project will replace the signal system

with modern equipment that complies with current CTDOT requirements, improves pedestrian accessibility, and enhances connectivity to public transportation. The upgraded signal will provide safer, more reliable operation for all roadway users. The Department will seek LOTCIP funding to complete this project.

OTHER

-PD Bidirectional Amplifier (BDA) radio - \$ 40,000 CY 2026 - The police radio system includes a special component installed at the high school to provide communications into the building. This Bidirectional Amplifier (BDA) boosts the radio signals so that officers can communicate with police dispatchers and other personnel during emergencies and daily activity. Without the BDA, radio signals cannot penetrate the building structure and officers are unable to contact others when necessary. Original hardware was installed in 2011 and has now failed. Project cost estimate document with additional detail is attached.

ENTERPRISE

WPCA

Estimated cost is \$4,640,000 in CY 2026.

WPCA projects are provided by Town Engineer for various town wide repairs.

-Townwide Pump Station and sewer system evaluation - \$400,000 yearly starting CY 2025 - 2030

This project focuses on an ongoing comprehensive evaluation of the existing pump stations and sanitary sewer systems within the WPCA. The assessments will detail the current condition of these facilities while also considering future capacity needs. The preliminary design phases will identify necessary upgrades to enhance the efficiency and reliability of the sewer system. By addressing these critical infrastructure components, the project aims to ensure long-term sustainability and effectiveness in wastewater management. Project costs are capped at the approved annual budget, and work remains ongoing.

-Wildwood Pump Station rehabilitation and upgrades - construction - \$2,00,000 CY 2026

The existing Wildwood Pump Station requires major repairs and replacement of various components. Various components of the pump station are close to the end of their useful life. Wildwood Pump Station upgrade will include more efficient pumps and electrical systems, cost estimate based on prior projects for Old Town Road and Reservoir pump stations. Design was funded in CIP 2024 for \$ 270,000 (*in progress*).

-Force Main Evaluations for pump stations \$250,000 each year CY2026-2030

-I/I Evaluations, Design & Repairs for Various Pump Stations \$250,000 each year CY2026 - 2029 – At present, we have over 180 miles of sanitary gravity sewer mains and 10 miles of forced mains (excluding Beardsley). This project's objective is to assess the condition of the forced mains, conducting necessary repairs to maintain uninterrupted operation on an ongoing basis as budget allows. We will also evaluate and address inflow and infiltration issues into sewer mains in various areas. Project costs are capped at the approved annual budget, and work remains ongoing.

-Gravity Main and System Pipe Lining - \$250,000 yearly CY2026-2030- As the Town's WPCA sanitary sewer system continues to age, it becomes increasingly important to prioritize maintenance & repair efforts for the purpose of safely conveying sewer flow and preventing sanitary sewer overflows. Addressing and repairing faulty sections of the pipe is essential for minimizing inflow and

infiltration (I&I) issues. The WPCA oversees a vast 186-mile network of sanitary sewer infrastructure. This will be an ongoing project. Project costs are capped at the approved annual budget, and work remains ongoing.

-Hawley Lane Pump Station Design – Phase II Construction - \$990,000 CY 2026 - The Hawley Lane Pump Station needs significant repairs and component replacements, as many elements are approaching the end of their useful life. To ensure continued functionality and reliability, the Department is requesting design funds in CIP2026 for the construction & rehabilitation of this facility. This investment will facilitate the planning and implementation of necessary upgrades, ultimately enhancing the efficiency and performance of the pump station for the community's needs. Design was funded in CIP2025 (\$150,000) and is currently underway.

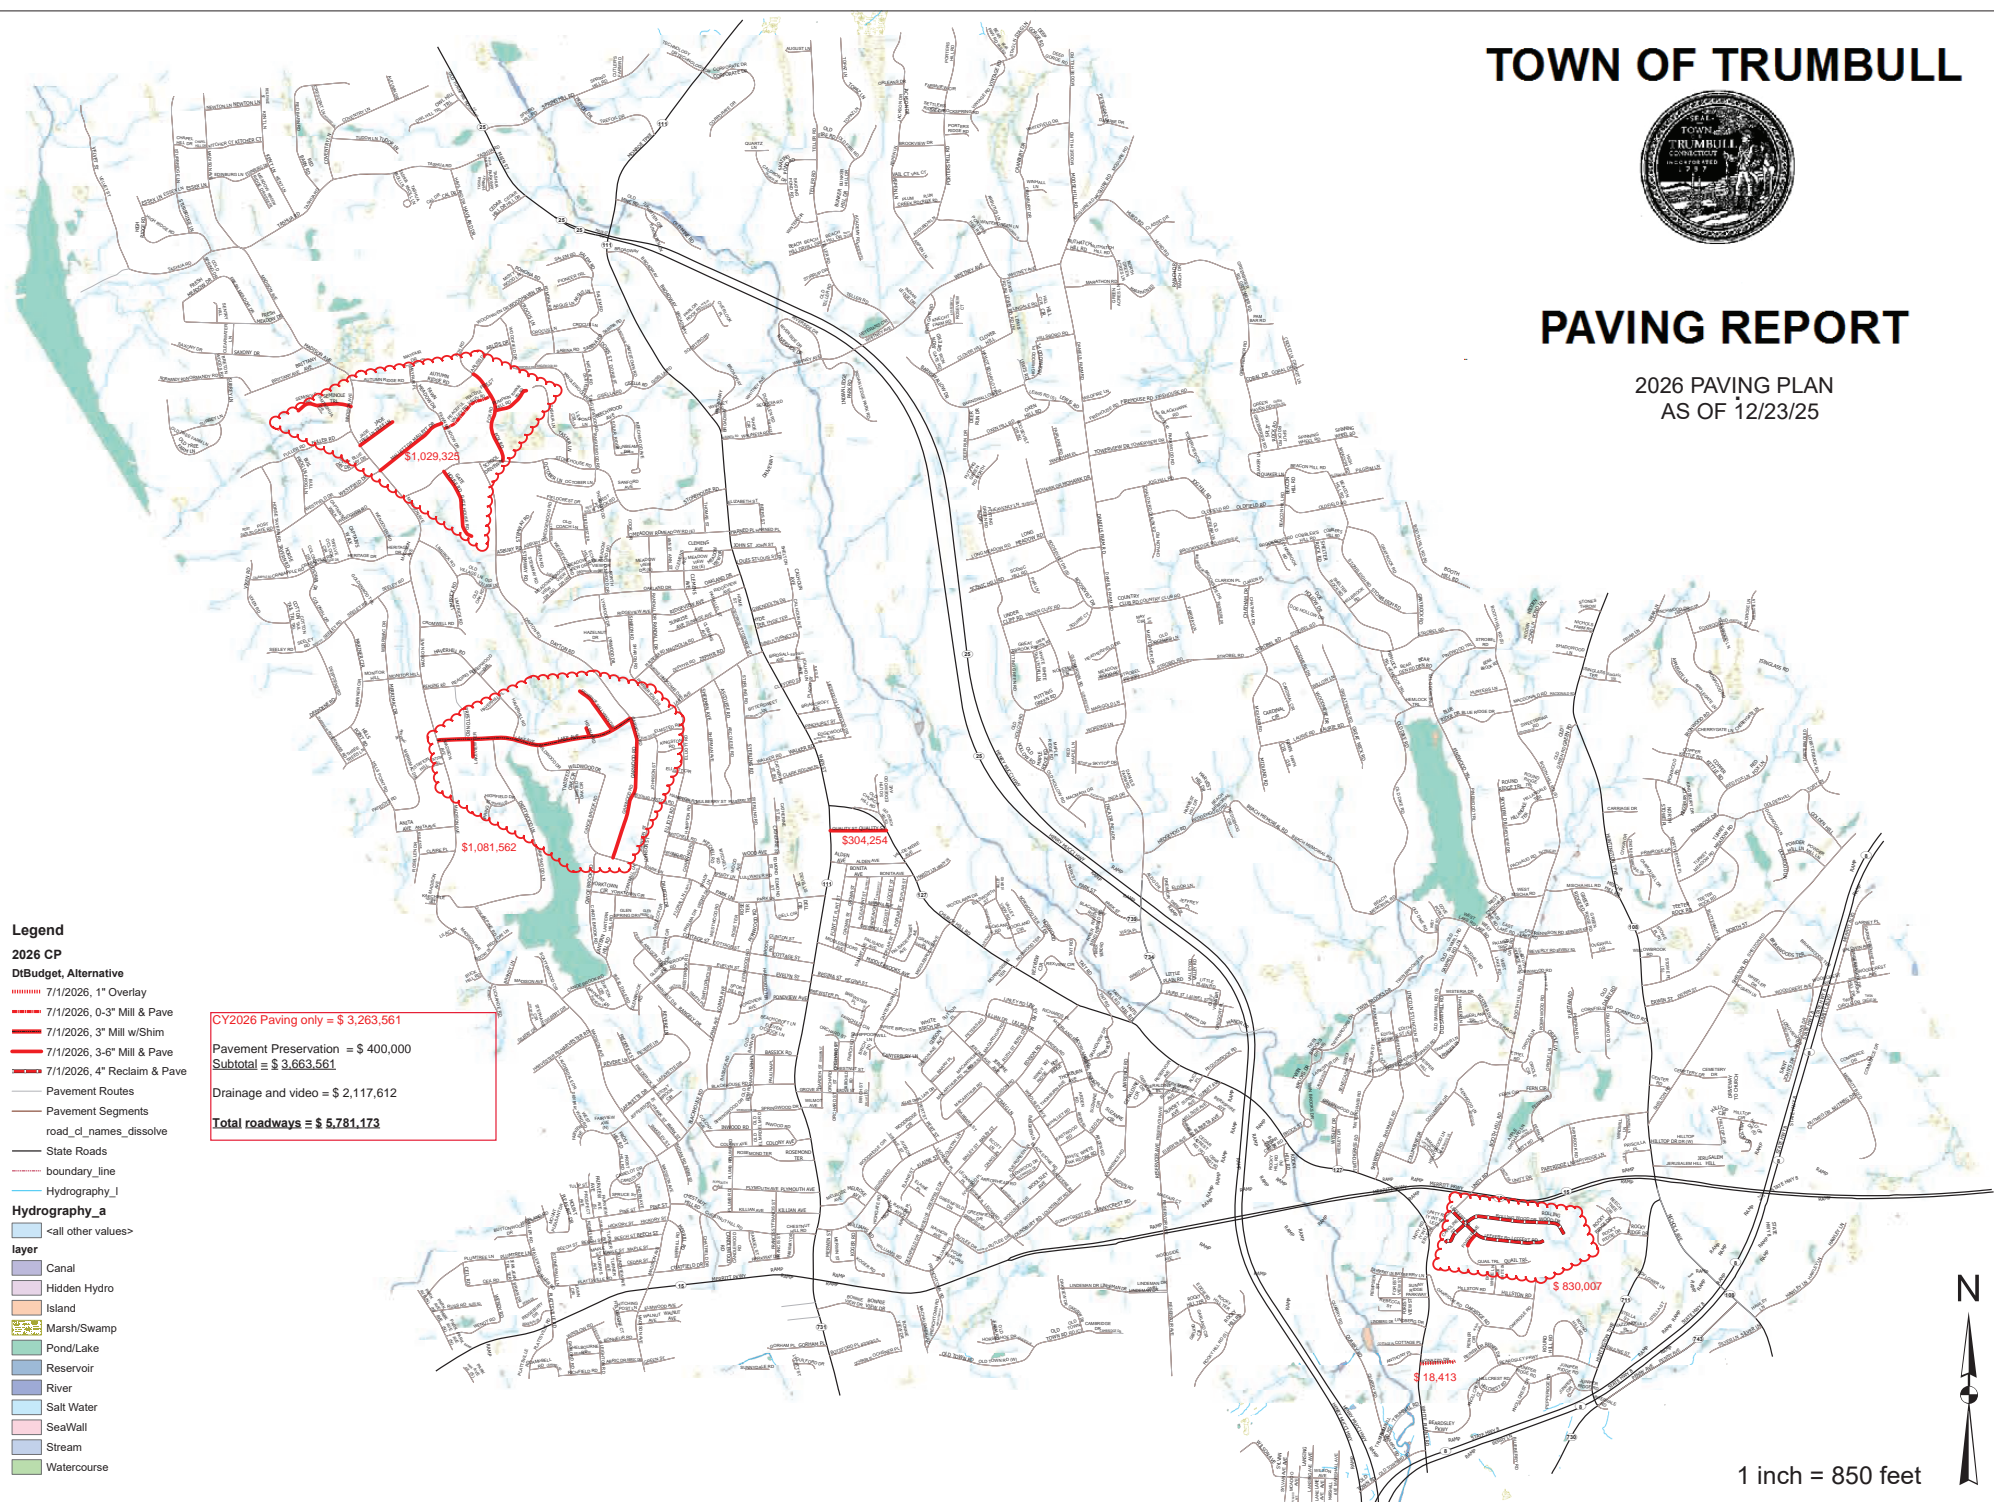

-Beardsley Pump Station Garage Floor Repair - \$500,000 CY 2026 - This is a critical, high-priority project. The concrete garage floor above the pump room at the Beardsley Pump Station is severely deteriorated, with pieces of concrete breaking loose and falling nearly 20 feet into the pump room below. This creates a serious safety hazard for staff and threatens vital pumps, controls, and electrical systems. The project will remove the failing concrete and fully restore the floor to protect personnel and essential infrastructure.

Re: Professional Design Services;
New Counters & Lighting
Trumbull Library
33 Quality Street
Trumbull, CT 06611

Dear Mr. Lyhne,

We are pleased to provide you with this proposal for the professional services required for the proposed new counters and lighting at the Trumbull Library located at 33 Quality Street, Trumbull, CT.

EXECUTIVE SUMMARY

The Trumbull Library System is seeking a proposal from Antinozzi Associates to provide schematic designs for the proposed new counters and lighting at the Trumbull Quality Street Library branch. Based on our meeting on site on April 3, 2024, it is our understanding that the scope of work includes providing new continuous work counters with new task lighting at four (4) locations within the existing building as reviewed on site.

SCOPE OF SERVICES

Schematic Design

1. We will meet with you and your staff to determine your vision along with documenting the existing conditions.
2. The Schematic Design documents will include a floor plan, showing the locations of the new counters, a typical detail of the counter construction, as well as specifications for the lighting.
3. We will present the schematic designs to you and your team for review and approval.

FEE PROPOSAL

For the professional design services described above, we propose the following fees:

Schematic Design Documents:	\$ 4,800
------------------------------------	-----------------

If any other additional services are required that are not part of this proposal, that time will be invoiced monthly on a time card basis per our standard hourly rates.

Exclusions:

- Construction Documents
- Bidding Phase Services
- Construction Phase Services
- Mechanical & Electrical Engineering
- Structural Engineering
- Hazmat / Environmental consulting
- Professional Cost Estimating
- Reimbursable expenses (overnight deliveries and printing other than in-house coordination prints). These items will be billed at cost plus 15%.

If you have any questions, comments, or require further explanation for any part of this proposal, please do not hesitate to contact me. Thank you for this opportunity.

Very truly yours,
ANTINOZZI ASSOCIATES, PC

PD Windows

Cost Justification for Window Replacement Design and Evaluation at PD

Window replacement for the Police Department building requires architectural expertise across multiple disciplines to meet building codes, security standards, and law enforcement operational requirements.

The Department has established a not-to-exceed cost of **\$20,000** for design services using **on-call architectural** firms at the hourly rates from **Bid 6527**:

- Principal Architect: \$175/hr
- Project Architect: \$115-\$125/hr
- Assistant Architect: \$95-\$105/hr
- Draftsperson: \$75-\$85/hr
- Clerical: \$75/hr

Using these pre-bid competitive rates provides cost control through the not-to-exceed cap while giving flexibility to assign the right level of expertise as the project demands.

The \$20,000 budget provides approximately 100-200 hours of professional services depending on staffing mix—sufficient for site assessment, design development, specifications, and construction documents.

Request: \$20,000 not-to-exceed for architectural design services per Bid 6527 rates.

Bid price list attached.

Public Facilities DPW Siding

Cost Justification for Siding Replacement at DPW On-Call Contractor Bid #6484

The siding replacement work for multiple garage buildings will continue to be completed in phases using on-call contractor services under Bid #6484.

On-Call Contractor Rates (Bid #6484):

- Foreman: \$55/hr
- Carpenters: \$45/hr
- Journeyman: \$35/hr
- Painters: \$37/hr
- Materials: As required

For reference, a similar four-building siding project completed last year cost approximately \$196,000 for labor and materials.

A not-to-exceed budget of **\$100,000** has been established to cover labor across multiple disciplines and materials necessary to continue the phased siding replacement work. This approach allows flexibility to address buildings as priorities dictate while maintaining cost control through the established competitive bid rates. We will complete as many additional garages as possible within the available funds.

The phased methodology ensures work can proceed efficiently while staying within budgetary constraints and utilizing pre-qualified contractors with competitive pricing already in place.

Request: Not-to-exceed amount of \$100,000 for phased siding replacement using on-call contractor rates per Bid #6484.

General contractor bid rates attached

Parks Bills Property

Cost Justification - Bill's Property Development

Parks and Recreation will lose athletic fields during construction of the new Hillcrest Middle School. To maintain capacity for town leagues, Bill's property will be developed into a new athletic field to replace this lost capacity.

The project requires comprehensive design services including site access, full field layout, utilities, paving, irrigation systems, and grass surface installation.

On-Call Engineering Firm Rates (Bid #6527):

- Project Manager: \$260/hr
- Project Engineer: \$165/hr
- Assistant Engineer: \$135/hr
- Draftsperson: \$140/hr
- Project Environmental Scientist: \$195/hr
- Environmental Scientist: \$125/hr
- Clerical: \$95/hr

Estimated Service Allocation (\$20,000 budget):

- Project Manager: 15-20 hrs (oversight, coordination) = \$3,900-\$5,200
- Project Engineer: 30-40 hrs (civil design, utilities) = \$4,950-\$6,600
- Assistant Engineer: 20-25 hrs (design support) = \$2,700-\$3,375
- Draftsperson: 25-30 hrs (construction documents) = \$3,500-\$4,200
- Project Environmental Scientist: 10-12 hrs (permitting) = \$1,950-\$2,340
- Environmental Scientist: 15-20 hrs (site assessment) = \$1,875-\$2,500
- Clerical: 5-10 hrs (administrative support) = \$475-\$950

Total Estimated Hours: 120-157 hours

Parks # 3
RTT fencing

Attn : Dmitri Paris
Re : Paddock Fence
Ref : State of Connecticut DAS contract #19PSX0136

Scope of Work

Furnish & Install 3 Rail Paddock fence constructed of 6" x 6" pressure treated posts with chamfered tops and Installed approx. 8' on center, rails will be 2" x 6" pressure treated. Fence will be 4' high and to be face nailed.

Unit Price : \$ 25.00 - \$ 30.00 per foot installed

Demo and Remove existing fence

Unit Price : \$ 5.00 per foot

\$35/LF

- Note : Budget prices, site unseen , price may vary upon terrain + access

Approx 2,150 LF x \$35/LF = \$ 75,000
Project will be completed as to not exceed available budget

The location of fence or property is the responsibility of the buyer. The purchaser assumes liability for all damages to underground utilities and obstruction. If underlying rock is encountered an additional charge will be made to cover drilling expenses. The purchaser will pay all costs of collection and reasonable attorney fees incurred in the collection of the amount of this contract or any balance that may be due here under. Any changes to project described in the above contract must be approved by Frankson Fence Company's main office before work can be performed.

Terms: 50% Down/Balance Upon Completion

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dmitri,

See attached for initial design. Don't worry about colors – those can be changed to whatever you want.

My designer did use pretty much all of the available space that I gave him. We can certainly scale this back a bit to reduce costs.

Playground equipment is about \$330,000.00
Shipping will probably be 4 or 5 truckloads, so that's another \$25K-\$30K
You'll need about 575 cubic yards of playground mulch – about \$22,000.00 including delivery
Then the installation of the equipment and mulch – Probably about \$130,000.00 (assuming PW rates)

These numbers don't include demo and disposal of the old equipment, nor general excavation of the area and disposing of that material. I would estimate about \$35,000.00 for these steps.

Add all this up and we're at nearly \$550,000.00

Plus 10%
TOTA REQUEST = \$605,000

plus 5% = \$ 602,401 request

COMMENTS / OPTIONS FOR CONSIDERATION:

- Issuance of a purchase order will secure a 2026 model year allocation slot for a unit built in calendar year 2025 fully dependent upon when the order is placed and while allocation remains available.
- Shall chassis become a later model year it will be subject to all model year increases.
- Chassis portion will be invoiced upon delivery to the body vendor.
- A discount of \$6,156.00 per unit can be taken IF payment is received within 30-days of invoicing.
- If a secondary financing source is utilized, the same discount can be applied IF a partial receiver payment for the chassis portion is received within 30-days of invoicing. Funds shall be set into escrow with an expected partial receiver payment being made for the chassis upon delivery to body vendor.
- All warranties will not start until after final delivery of the completed unit is made and placed into service.
- Body equipment quote is valid for orders received by September 23rd, 2025. Receipt of purchase order / signed quote beyond that date may require equipment package to be requested / validated.

MASTER AGREEMENT #050625
CATEGORY: Roadway Maintenance Equipment
SUPPLIER: Cimline, Inc.

This Master Agreement (Agreement) is between Sourcewell, a Minnesota service cooperative located at 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and Cimline, Inc., 2601 Niagara Lane N., Plymouth, MN 55447 (Supplier).

Sourcewell is a local government and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) offering a Cooperative Purchasing Program to eligible participating government entities.

Under this Master Agreement entered with Sourcewell, Supplier will provide Included Solutions to Participating Entities through Sourcewell's Cooperative Purchasing Program.

Article 1:
General Terms

The General Terms in this Article 1 control the operation of this Master Agreement between Sourcewell and Supplier and apply to all transactions entered by Supplier and Participating Entities. Subsequent Articles to this Master Agreement control the rights and obligations directly between Sourcewell and Supplier (Article 2), and between Supplier and Participating Entity (Article 3), respectively. These Article 1 General Terms control over any conflicting terms. Where this Master Agreement is silent on any subject, Participating Entity and Supplier retain the ability to negotiate mutually acceptable terms.

- 1) **Purpose.** Pursuant to Minnesota law, the Sourcewell Board of Directors has authorized a Cooperative Purchasing Program designed to provide Participating Entities with access to competitively awarded cooperative purchasing agreements. To facilitate the Program, Sourcewell has awarded Supplier this cooperative purchasing Master Agreement following a competitive procurement process intended to meet compliance standards in accordance with Minnesota law and the requirements contained herein.
- 2) **Intent.** The intent of this Master Agreement is to define the roles of Sourcewell, Supplier, and Participating Entity as it relates to Sourcewell's Cooperative Purchasing Program.
- 3) **Participating Entity Access.** Sourcewell's Cooperative Purchasing Program Master Agreements are available to eligible public agencies (Participating Entities). A Participating Entity's authority to access Sourcewell's Cooperative Purchasing Program is determined through the laws of its respective jurisdiction.
- 4) **Supplier Access.** The Included Solutions offered under this Agreement may be made available to any Participating Entity. Supplier understands that a Participating Entity's use of this Agreement is at the Participating Entity's sole convenience. Supplier will educate its sales and service forces about

Cimeline #050625-CME

Pricing for contract #050625-CME offers Sourcewell participating agencies the following discounts:

- 12% off standard MSPR on all catalog items except the line-item SKU for 33,000 GVW Chassis.
- Additional discounts are available for multi-unit purchases. 3-4 base model units receive an additional 3% discount; 5 or more base model units receive an additional 5% discount.

SMARTLIFT®

INGROUND LIFT SERIES

8,000 lbs. / 10,000 lbs. / 12,000 lbs. CAPACITIES

WHY SMARTLIFT®?

Since 1995, Rotary SMARTLIFTS have been the #1 choice for dealers to increase their shop's productivity and profitability.

From every angle, Rotary designed the SMARTLIFT® to maximize space, increase technician productivity and lower total cost of ownership, ultimately resulting in higher profits.

Rotary delivers the SMART dealer choice for productivity and profit.

Don't take just our word for it...

"Every technician who uses the Shock-wave-equipped lift loves it. It's a lot easier to rack the vehicles and they love the speed: It goes up a lot quicker and comes down faster, too!"

**- Chris Musselman, Service Manager
Bush Auto Place**

"In this business, seconds count. It's amazing how much faster we can service vehicles. Anything that gets the customer in and out quick is that much better."

**- Brent Ross, Service Director,
Germain Nissan**

"It takes me half the time to rack, half the time to raise and lower. I can be on my job within two minutes of pulling the vehicle into the bay."

**- Rich Hofer, Service Technician
Chandler Chevrolet**

"It's the best lift I've ever used. It's quicker, it's more efficient, and it operates very smoothly. The technicians love these lifts. I wouldn't even consider putting anything else in."

**- Gene Byrd, Fixed Operations Director
Ed Morse Automotive Group**

Choose the right lift for your shop.

Rotary Lift.

PATENTED TRIO™ THREE- STAGE ARMS

**FASTER, EASIER SPOTTING OF
EXOTIC AND LOW-PROFILE CARS.**

Versatile two-piece, three-stage arm design allows for quick positioning of the adapter to the vehicle pickup point with no need to move heavy two or three stage inner arms.

**18%
GREATER
VEHICLE REACH**

TRIO arms spot a greater variety of vehicle types versus standard lift arms.

INTERCHANGEABLE ADAPTER OPTIONS

**Technicians can choose
the best optional adapter
set for their lifting needs.**

Service cars, trucks and EVs
on the same arm.*

TA Truck Adapters

Frame-engaging polymer adapters thread-up for additional reach.

Four (4) 3.5" and four (4) 5" stackable adapter inserts are standard on TA models

Required when lifting trucks and frame vehicles
Available for use with stackable inserts

RA Round Adapters

Round, padded RA polymer adapters thread-up for additional positioning.

Also available for use with stackable inserts

OPTIONAL EV PAD ADAPTER

Padded polymer adapters thread-up for additional positioning.

*SMARTLIFTS WITH TRIO ARMS COME STANDARD WITH YOUR CHOICE OF RA OR TA ADAPTERS.

EACH ADDITIONAL ADAPTER SET IS SOLD SEPARATELY.

FEATURES DESIGNED FOR **HIGHER PROFITS**

Get the most from your service facility and see bigger savings over the life of your shop lifts.

SMART MONEY

NO ADDITIONAL EQUIPMENT IS NEEDED

There are no hidden costs for special compressors, airlines or equipment while easily operating on typical shop air system - at only 90-120 psi.

FASTER, EASIER INSTALLATION*

SAVE UP TO

35%

Smartlifts are preassembled and install easier and faster in a new or existing facility with minimal excavation. Smartlifts require less materials versus other wide stance lifts that need multiple pours, more assembly and longer time to complete installation.

SMARTLIFT TECHNOLOGY
FASTER ROUTINE SERVICE
AT A LESSER COST*

Easy Access™

REDUCE DOWNTIME BY
75%

PRESERVE BAY REVENUE WITH LOWER SERVICE REPAIR COSTS*

PATENTED EASY ACCESS™ cylinders allow all routine cylinder maintenance to be done at floor level with no forklifts cutting downtime by 75%.

MAINTAIN ALL INTERIOR SYSTEMS
FROM THE SHOP FLOOR

Easy to remove center cover allows floor level service to air fittings, hydraulic hoses, air lock cylinder, and locking system.

*WHEN COMPARED TO COMPETITIVE DESIGNS

MORE UP TIME

LESS LOST REVENUE

No other lift brand rigorously life cycle tests its equipment to the same standards as Rotary. Testing validates components, minimizes lift failures and maximizes working time in the bay - matching years of reliable service.

OPERATING CONTROLS and POWER UNIT CONFIGURATIONS

AVAILABLE OPTIONS FOR 8,000 lbs., 10,000 lbs. and 12,000 lbs. SERIES LIFTS

INTEGRATED BENCH CONTROLS

Improve your facility's image with an open and clear floor. Increase technician efficiency with the ease of use.

Available for conventional and SHOCKWAVE-equipped lifts.

Contact Rotary for details.

Shown: Center controls on work bench

SINGLE TOUCH CONTROLS

ONE TOUCH CONTROL with Liquid Detection System

Raising and lowering the lift is simplified with a single button. The lift can be lowered and the safety locks disengaged with one finger.

CONVENTIONAL CONTROLS

CONVENTIONAL

Efficient and easy to use, power units feature a heavy-duty electric motor with single up button switch and a single lowering valve release handle.

CHOOSE FROM WALL-MOUNTED OR PEDESTAL STAND CONFIGURATIONS

Options are available for conventional, one-touch, and SHOCKWAVE-equipped lifts. Contact Rotary for details.

OPTIONAL ACCESSORIES

Specialty Adapters for GM Pickup Trucks

Drop-In Truck Adapter Kits for Standard and TRIO™ Arms

Adapter kits for lifting 2019 Chevrolet Silverado and GMC Sierra 1500 trucks.

- Maximum width: 7"
- Capacity 3,000 lbs. per adapter

#FJ6257KIT

Set of two specifically designed for TRIO arms.

These adapters are wider to fit the wider frame of the vehicle. You'll replace the front two adapters on the lift and continue to use the current truck adapters on the rear arm.

TECH LIGHT™ Line Light R

Rechargeable LED inspection hand lamp with top spot light. Supplied with flexible suspension clips holder with both hook and magnet for positioning the light where you need it.

- 180 lumen in main light operates for up to 3 hours
- 120 lumen in spot light operates for up to 6 hours
- 4 hour charging time

#FA5702

Wheel Wing™ Tire Arm

100 lbs. capacity Wheel Wing tire arm mounts on arm and holds a tire at lift arm height. Folds away when not in use.

- Adjustable to fit various lift arms
- Includes 2 arms, 2 magnetic lug nut dishes, shims

#FA5974

Lock Light™ Patent pending

Provides an instant green light visual confirmation when lift is lowered to its locks. Compatible with high-pressure lifts that use an electric/hydraulic power unit providing an unused pressure port is available.

Kit includes:

- Indicator light assembly
- Pressure switch

#FA834-KIT / 110V
#FA835-KIT / 220V

MW-200 Tire Lift

Air operated tire and wheel lift. 200 lbs. capacity.

- Quick transfers to tire balancers with easy positioning of the tire and wheel
- Includes air hose and air tool connection

#MW-500

500 lbs. capacity model available

#MW-200

SPOTLINE™ Laser Kit

Motion activated laser helps center vehicles in bays quickly and accurately. Laser guided system comes complete with motion sensor and mounting hardware.

White Plains Rd
Connection

White Plains Trail Connection cost justification

The local match requirement for the White Plains Trail Connection project totals \$345,380 (see summary attached). The previously approved funding (CIP2022 & 2025) totaled \$340,000, resulting in an overage of only \$5,380. However, we are requesting \$50,000 to cover any unforeseen changes in scope by the state that may require additional match funding beyond the current requirement.

0144-0199: ROUTE 127 TRAIL CONNECTOR

Specific Needs:

Contractors

We are in need of skilled professionals for roofing, siding, and general construction to assist with reconstruction efforts. Components include framing, painting, windows, roofing, interior walls/trim, flooring, slab/power, blending corners/walls/siding, cupola/bell, entrance overhand, landscaping, lighting, HVAC, stove stack, insulation, signage/plaque/historic information, etc.

Materials

We are seeking building materials, including plywood, shingles, insulation, etc.

Volunteers

Volunteers are needed to assist with debris removal, distribution of supplies, cleanup, etc.

Fundraising Help

In order for this to be possible, a goal of \$100,000 will need to be met. This funding will come through corporate sponsorships, grants, and personal donations.

Project Timeline

- Fall 2025 - Winter 2026: Fundraising
- Spring 2026: Permits, Power, Slab
- Summer 2026: Framing, Roofing, Windows
- Fall 2026: Finish Trim, Paint, and Interior
- October 30, 2026: Completion Goal

If you'd like to be part of this historic effort, please contact Rina Bakalar, Director of Economic and Community Development, at rbakalar@trumbull-ct.gov or John Naeher of Christina Heritage School at jnaeher@chskingsmen.org.

Thank you for your support!

Upper Long Hill Schoolhouse Community Restoration Project

Trumbull's Opportunity to Honor Its Past and Inspire the Future

Trumbull has been presented with a rare opportunity to honor its heritage and bring a powerful symbol of town pride into the present. During recent renovations at Long Hill Green, a small structure slated for demolition caught the attention of the community. At first glance, it seemed insignificant. However, a mandated demolition review by the Trumbull Demolition Review Committee—a team led by Zoning Enforcement Officer Brian Fitzgerald, Historical Society Co-President Debra Silber, and Historical Society member and Christian Heritage School Student Life Coordinator John Naehrer—revealed something remarkable: this was no ordinary building. Constructed in 1894, it was the last one-room schoolhouse built in Trumbull, the Upper Long Hill School.

This modest building carries deep historical and emotional significance. It marked the beginning of Miss Jane Ryan's distinguished career in education, a figure who would go on to found Trumbull's first public library. Among the school's students were the children of Igor Sikorsky, the famed helicopter pioneer, further anchoring the schoolhouse to Trumbull's legacy.

Once its true history was uncovered, a team came together to safeguard the schoolhouse's remains, and the Parks Superintendent Dmitri Paris worked with the committee, private developer, and volunteer experts to dismantle and relocate the structure. The leadership of those who recognized its historical significance was instrumental in ensuring the original components were saved. Once relocated, an initiative led by John Naehrer engaged students and families from Christian Heritage School to volunteer their time cleaning and preparing the recovered boards for future reconstruction. These materials will remain safely stored at the school until the fundraising goal is met.

Rebuilding the Historic Schoolhouse: A Call to Action

The vision is to reconstruct the schoolhouse on Town Hall property and transform it into a vibrant, multipurpose community space. More than just a building, it will serve as a bridge between Trumbull's past and future - a place to reflect on where we've been, who we are, and what we can accomplish together.

To bring this vision to life, community involvement is essential. Volunteers are needed to contribute time, skills, materials, and financial support. Whether you're a tradesperson, a local business, or simply someone eager to help, your participation will make a lasting impact. Refer to the back for specific roles that need to be filled.

The fundraising goal is \$100,000, and with enough support and enthusiasm, the reconstructed schoolhouse could open as early as fall 2026.

Let's come together to celebrate our shared history—and build something meaningful for future generations.

"Preserving Trumbull's past. Inspiring for the future"
Upper Long Hill School House Restoration
Built ca. 1894

Jane Ryan, a longtime Trumbull educator for whom the former Park Lane School is named, got her start teaching at the Upper Long Hill School in 1927. She and other instructors at the school helped establish the town's first library. A teacher at ULHS is also credited with the first "school lunch" offered in Trumbull. Published reports indicate that the children of helicopter pioneer Igor Sikorsky were pupils at the school.

Jane Ryan reflected on her early days as an educator in this schoolhouse. "I came to upper Long Hill School in 1927. I taught the first three grades and the seventh grade. The building up on the hill near the Kimberly Inn was the school. We had a potbellied stove. We had an outhouse.

"We were there until 1930. we had a wonderful time"

Join us as we restore this Trumbull historical landmark that served many of our early Trumbull families and prepared students for productive and fruitful lives!

Engineering

Townwide Culverts and
Infrastructure
Inspections and Design

Cost Justification - Townwide Culverts and Infrastructure Inspection, Design, and Repairs (Ongoing)

This project funds assessments, inspections, design for the Town's critical bridge and culvert infrastructure. This initiative helps identify structural issues, or drainage concerns etc.

The scope includes field evaluations, engineering analyses, reporting, corrective work, and preparation of design plans for targeted reconstruction projects.

On-Call Engineering Firm Rates (Bid #6527):

Project Manager: \$260/hr

Project Engineer: \$165/hr

Assistant Engineer: \$135/hr

Draftsperson: \$140/hr

Project Environmental Scientist: \$195/hr

Environmental Scientist: \$125/hr

Clerical: \$95/hr

The department will utilize the on-call engineering contract to perform structural assessments, design services, construction documents, environmental permitting, and site evaluations as needed throughout the fiscal year. Work will be assigned based on priority and urgency identified during inspections.

Costs will be determined using the existing on-call contract rates and procured in accordance with the Town's purchasing policy. All work will remain within the approved project budget of \$200,000 (Not to Exceed).

Engineering # 3

Mr. William Maurer, PE, LS
Town Engineer
Town of Trumbull
366 Church Hill Road
Trumbull, Connecticut 06787

Re: **Engineering Services Proposal for the Reconstruction of
Daniels Farm Road - Phase 1**

Dear Bill,

Tighe & Bond is pleased to submit our proposal to provide engineering services for Phase 1 of the Reconstruction of Daniels Farm Road. The project includes multi-modal roadway improvements along Daniels Farm Road from the intersection with Strobel Road north approximately 3,700 lineal feet to the intersection with Jog Hill Road. The project also includes the design of a raised multi-use trail along the east side of Daniels Farm Road.

Project Understanding

We understand that the Town has/will apply for funds through the Connecticut Bond Commission. This project will follow a two-step design process and be reviewed by the Town at Preliminary Design (30% completion) and at Final Design (90% completion). We have assumed that the Town will conduct a public information meeting at the 30% design.

Daniels Farm Road currently serves as a minor arterial road (as per the CT DOT Functional Classification Map) from Moose Hill Road to White Plains Road/Church Hill Road, running in a northeasterly direction. Phase 1 runs from Jog Hill Road to Strobel Road and is approximately 3,700 feet in length.

The proposed project will include full depth reconstruction of the roadway and correction of vertical geometric deficiencies where feasible. We have assumed the project will also include the following elements:

- Raised multi-use trail on the east side
- Accessible ramps at each intersecting street
- New drainage and curbing along the entire project length
- Street trees and park benches (where sufficient ROW exists)

We assume that design services will commence in the spring of 2025, and will be completed by the end of 2025. We have also assumed that construction will occur in 2026 and span one season.

It should be noted that Tighe & Bond was authorized by the Town on June 6, 2019 (PO-20191194-00) to complete a drainage design of the existing roadway. That work was approximately 90% complete. The existing drainage analysis and survey that was completed under that assignment has been taken into account for development of this proposal, where applicable.

We propose the following scope of services to meet the project requirements to support the Town of Trumbull with this project:

Scope of Services

Task 1A - Survey

We propose subcontracting with Martin Surveying Associates for land surveying services. Project base mapping will be prepared at 1" = 20' scale with 1-foot contour intervals. The survey limits will be from Strobel Road to approximately 150 north of Jog Hill Road and will extend approximately ten (10) feet beyond the existing Right-of-Way.

1A.1 Survey for Engineering Design

1. Accuracy shall be to Class T-2 (topography), Class V-2 (vertical control), and A-2 (boundary) in accordance with the Code of Recommended Practice for Land Surveyors in Connecticut, Section 20-300b-1 through 20-300b-20.
2. Deliverables to the Town will include paper copies and digital file formats in AutoCAD 2021.
3. The survey will locate existing features and improvements. Existing utility facilities will be shown based on field survey and record search of existing utility facility mapping. Frame elevations and pipe inverts of existing drainage structures and sanitary sewer lines will be provided on the plan.
4. Horizontal control will be tied into the State of Connecticut coordinate system, NAD 83, and vertical control will be tied to NAVD 88. Benchmarks at intervals no greater than 200 feet will be provided, with coordinates and ties for construction clearly described.
5. A digital terrain model of the project area representing the existing ground conditions will be prepared.
6. Construction Plans will be prepared at a scale of 1" = 20'. Profiles will be presented at a horizontal scale of 1" = 20' and a vertical scale of 1" = 2'. Cross sections will be at a scale of 1" = 5'.

1A.2 Property Line Survey

1. The survey will show street lines and property lines for all properties within the project limits shown on Figure 1.
2. Surveys will conform to Section 20-300b-5, Right-of-Way Survey, of the Standards for Surveys and Maps in the State of Connecticut, with adjoining property boundaries from record maps and deeds. Coordinate values will be placed at angle points and lot corners, with bearings and distances clearly shown.
3. Control points will be established in the field and will be shown on the plan with the appropriate coordinate values and recover ties marked clearly.

1A.3 Topographic Survey

1. The topographic survey will show topography within the project area as depicted on Figure 1. Topographic contours will be one foot with critical spot elevations shown in flat areas or where contours do not accurately depict the slope of the land. Drainage and sewer frames, grates, and invert elevation information will be collected and shown to the nearest one hundredth of a foot.

Note: Survey work authorized by the Town on June 6, 2019 (PO-20191194-00) will be utilized and has been taken into account for this proposal.

Task 1B – Property Acquisition Mapping

Based on a desktop review, property actions may be required to implement the proposed improvements. The Town of Trumbull Tax Maps indicate that portions of the existing sidewalks, particularly on the east side of the roadway, may be located on private property and outside of the public Right-of-Way (ROW). There are 35 properties (14 on the east side and 14 on the west side) that have frontage on Daniels Farm Road.

In recognition of the likelihood that impacts to adjacent properties may be required, Tighe & Bond, through the project surveyor Martin Surveying Associates, has included a unit cost allowance for the preparation of property maps and the preparation of Property Acquisition Maps along with up to two revisions per map in the fee. Maps will be prepared in accordance with the CT DOT's Policies and Procedures for Property Maps. Maps will be prepared on an as-needed basis, based on the impacts determined at the completion of the Preliminary Design phase. We anticipate initiating the property acquisition process following completion of Preliminary Design and receiving authorization to advance to Final Design.

Task 2 Preliminary Design (30% Submission)

The Preliminary Design phase will begin following a kickoff meeting with the Town. The following scope describes the tasks that will be provided during Preliminary Design.

2.1 Deliverables

The following deliverables will be provided to the Town of Trumbull, constituting the Preliminary Design submission.

2.1.1 Preliminary Design Drawings

The following drawings are anticipated to constitute the Preliminary Design Drawings. We will provide one electronic copy of the drawings in Adobe PDF format as well as two hard copies to the Town for review.

- a. Title Sheet (1 drawing)
- b. Existing Condition Sheets, Scale 1"=20' (8 drawings)
- c. Typical Sections (1 drawing)
- d. Construction Plan Sheets, Scale 1"=20' (8 drawings)
- e. Profile Sheets, Scale 1" =20' (Hor), 1" =2' (Ver) (8 drawings)
- f. Landscape Plan Sheets, Scale 1"=40' (7-8 drawings)
- g. Critical Cross Section Sheets (1 drawing)

2.1.2 Preliminary Design Report

In support of the Preliminary Design submission we will prepare a Preliminary Design Report outlining the details of the Preliminary Design. The report will describe the following project elements:

- Project Area
- Intersection Traffic Control
- Existing Drainage
- Utility Impacts
- Geometric Design and Design Exceptions
- Rights of Way and Property Acquisition
- Permitting Requirements
- Construction Costs

2.1.3 Drainage Report

We will prepare the drainage report documenting the analysis and listing those sections of the existing network that need to be upgraded to meet Town and CT DOT standards. We will also prepare the drainage checklist for submission to the CT DOT Hydraulics & Drainage section, if requested.

2.1.4 Opinion of Probable Construction Cost

We will prepare an Opinion of Probable Construction Cost (OPCC). We will compute quantity takeoffs for major cost items, and minor items and incidental work will be estimated based on guidance in the CT DOT Estimating Guidelines. The OPCC will not include estimates of property acquisition costs or utility relocations costs.

2.2 Preliminary Design

The Preliminary Design will be prepared to convey the design intent selected by the Town of Trumbull. The following sections of this scope of services describe the various design elements and activities that will be included in the development of the Preliminary Design.

2.2.1 General Information Drawings

1. Prepare Existing Conditions Sheets for inclusion in the construction drawings. The existing conditions drawings will be to the same scale and layout as the roadway drawings and provide the survey base mapping on project drawings. Plans will include survey notes, tie-downs, and survey control information.
2. Prepare typical sections for Daniels Farm Road. Typical sections will include a proposed pavement section, curb types, multi-use trail width and materials, sidewalk widths and materials, grass strip widths (if applicable) and define the slopes and grading treatments for matching into existing edge conditions. Typical sections will also define roadway cross slopes, sidewalk slopes, and utility strip slopes.

2.2.2 Roadway Geometry

1. Prepare a coordinated roadway centerline for Daniels Farm Road. The horizontal geometry will be computed to the nearest 1/100th of a foot. The roadway centerline will serve as the construction baseline.
2. Prepare a profile of Daniels Farm Road at a scale of 1" = 20' (Hor) / 1" = 2' (Ver).
3. Prepare the Preliminary Construction Plans at a scale of 1" = 20' to provide the detailed design information required by the Town to review and approve the Preliminary Design.

2.2.3 Drainage Analysis and Storm Drainage System Design

Drainage design computations will be performed in accordance with the CT DOT 2000 Drainage Manual, as amended, and Town requirements. The design will be prepared pursuant to the following guidance:

1. The closed drainage system design will be based on Chapter 11 of the 2000 CT DOT Drainage Manual and the Urban Drainage Design Manual (HEC-22) 3rd edition, Sept 2009, revised August 2013 and will consider the 10-Year storm event.
2. Prepare the existing drainage analysis for the project area by delineating the watershed contributing to each catch basin under existing conditions in the project area, including the contributing drainage systems located in adjacent and intersecting side streets to the north of the project. The existing storm flows will be determined and utilized to establish the baseline storm flows. Hydraflow Storm Sewers or a similar

hydraulic analysis model will be used. Areas subject to flooding under existing conditions will be highlighted.

3. Prepare proposed drainage analysis to determine system capacity improvements required as a result of the proposed increase in impervious area associated with the proposed cycle track and need for additional catch basins to lower gutter spreads to allowable levels.
4. Prepare a drainage report to include existing and proposed conditions watershed maps, catch basin sub-watershed computations, and the output of the storm sewer analysis. The report will also contain a narrative of the methodology, and recommendations for improvements as appropriate.

Note: The existing conditions analysis authorized by the Town on June 6, 2019 (PO-20191194-00) will be utilized and is accounted for in the development of this proposal.

5. Copies of the Hydraulics Report and Prints of the conceptual plans will be submitted to the Town, and if necessary to CT DOT for review and comment.

2.3.5 Maintenance and Protection of Traffic

During Preliminary Design, we will review the proposed construction, consider means and ways to manage traffic through the work area, and provide a narrative description of the construction phasing approach. Formal Maintenance and Protection of Traffic (M&PT) drawings will not be developed during this phase of the work.

2.3.6 Rectangular Rapid Flashing Beacon (RRFB)

The CT DOT review of potential pedestrian safety countermeasures, included a Rectangular Rapid Flashing Beacon (RRFB) at the Daniels Farm Elementary School crossing. If warranted, we will prepare a traffic control signal plan for a new RRFB at the crossing, assumed to include one layout plan and detail sheets, if required. The layout plans will show the location of the proposed crossing and associated signage and pavement markings.

Conduct a field meeting with representatives from the utility company and the Town of Trumbull to discuss available, and preferred, electrical connection options.

Prepare one drawing noting the location of the proposed pedestrian actuated devices and the electrical connection along with the associated revisions to the warning signage and pavement markings at the crossing.

Prepare details and/or technical specifications for the required construction products and activities.

Respond to one round of comments from the Town on the plans and specifications.

Submit the plans, details and specifications to the CTDOT in support of an encroachment permit application.

2.3.7 Landscaping Plans

The landscape design will focus on supplementing and enhance the roadway corridor with plantings, such as street trees or planted buffers, and other landscape features to improve the overall experience for bicyclists, pedestrians, and drivers where sufficient Right-of-Way exists for these features.

Preliminary design services include the development of a schematic design plan, material palette, and precedent imagery to convey the design intent. Based on input from the Town, the design will be advanced to a Preliminary Design level.

2.3.8 Critical Cross Sections

We will prepare critical cross sections along Daniels Farm Road to identify critical controls and facilitate the identification of design controls. Critical sections may be prepared at locations of significant side sloping, existing walls, tight property constraints, etc. Based on the design of the cross-sectional elements, we will provide a recommended plan for the treatment and blending to meet existing edge conditions. This proposal assumes that matching existing conditions can be accomplished with earth slopes. Design of retaining walls or engineered slope stabilization methods is not included.

2.3.9 Permits

During the Preliminary Design phase, Tighe & Bond will review permitting requirements as they relate to disturbance areas, drainage and stormwater, stormwater management during construction, and other project elements.

We will prepare a section of the Preliminary Design Report that describes the permitting requirements. Tighe & Bond will coordinate with state and local regulators to facilitate the permitting process. It has been our experience that involving regulatory agencies at the start of a project to provide input on proposed design concepts creates a positive relationship that is beneficial to the project as it moves forward.

We anticipate that the project will require the following permits:

- Trumbull Inland Wetlands Agency
- CTDOT for a Rectangular Rapid Flashing Beacons (RRFB)

Task 3 – Public Outreach

The public outreach effort intends to solicit feedback from the public and project stakeholders regarding the multi-use facility alternatives. This task includes participating in one (1) Public Information Meeting, developing and maintaining an online project page to communicate project updates, and developing an online survey to solicit feedback.

3.1 Public Information Meeting

A public information meeting will be held at the 30% design stage. As part of the Preliminary Design phase, the Town of Trumbull will conduct an in-person Public Information Meeting to advise the public and the neighborhood of the proposed improvements and obtain feedback from the public on the project. The CTDOT Public Involvement Program Guidelines will be followed. In support of the public information meeting, Tighe & Bond will provide the following:

1. Conduct one Public Information Meeting with the Town of Trumbull. Presentation materials will be prepared and provided to the Town through email for review and comment prior to the meeting.
2. We have assumed that the Town of Trumbull will develop a list of abutters for purposes of advertising the Public Information Meeting. We have also assumed that the advertisements and mailings will be completed by the Town of Trumbull and these services, and their associated fees are excluded.
3. Prepare a presentation and colored display plans for presentation at the meeting. The presentation and plans will be in conformance with the CTDOT Consultant Manual and Town requirements.

4. We will document the discussions of the meeting for the project file and provide a meeting summary to the Town.

3.2 Project Webpage

Tighe & Bond will develop an ArcGIS StoryMap webpage for the Town of Trumbull to host in order to communicate important project information to the public in an accessible, interactive, and engaging format. Graphic materials developed for the Public Information Meetings will be used as the content for the webpage.

3.3 Online Survey

Tighe & Bond will develop an online survey that will be incorporated into the Project Webpage to solicit public feedback. We will collaborate with the Town on the intended outcomes of the survey and specific questions. We will provide surveys in English and Spanish to maximize participation from users.

Task 4 – Final Design (90% Submission)

The Final Design submission will be prepared and submitted to the Town once the design reaches 90% complete. The intent of the Final Design is to incorporate the Preliminary Design review comments provided by the Town, and to advance the design to a level adequate to establish the final roadway layout, drainage system, vertical geometry, and signing and pavement marking plans. We will also determine the approach to managing traffic during construction and secure permits during this phase.

We anticipate initiating Final Design following receipt of the Preliminary Design review comments and acceptance of the Preliminary Design by the Town.

Initially, we will review the Preliminary Design comments and prepare a written response. The response will indicate the comments that are incorporated into the design and, if necessary, indicate comments that are not incorporated including the reasons why they were not incorporated. Tighe & Bond will review the responses with the Town to confirm that we have appropriately addressed comments in conformance with Town direction.

4.1 Deliverables

The following documents and drawings will be provided, constituting the Final Design submission.

4.1.1 Final Design Drawings

Final drawings will be prepared in accordance with the Town of Trumbull requirements. We will provide one electronic copy of the drawings in Adobe PDF as well as two hard copies to the Town for review and comment.

- a. Title Sheet (1 drawing)
- b. Existing Condition Sheets, Scale 1" = 20' (8 drawings)
- c. General Notes, Legend, Abbreviations (1 drawing)
- d. Typical Sections (1 drawing)
- e. Miscellaneous Detail Sheets (4 drawings)
- f. Baseline Layout Plans, Scale 1" = 20' (8 drawings)
- g. Construction Plan Sheets, Scale 1" = 20' (8 drawings)
- h. Intersection Grading Plans Scale 1" = 10' (2-3 drawings)
- i. Sedimentation and Erosion Control Plan Sheets, scale 1" = 20' (8 drawings)
- j. Profile Sheets, Scale 1" = 20' (Hor) / 1" = 2' (Ver) (8 drawings)

- k. Signing and Pavement Marking Plan Sheets, Scale 1" =20' (8 drawings)
- l. Maintenance and Protection of Traffic Plan Sheets, scale 1" =20' (8 drawings)
- m. Landscape Plan Sheets, Scale 1" =20' (8 drawings)
- n. Traffic Signal Plan for RRFB (1 drawing)
- o. Roadway Cross Section Sheets, at 50 ft intervals scale 1" =5' (22-26 drawings)

4.1.2 Opinion of Probable Construction Cost

The Opinion of Probable Construction Cost (OPCC), including quantity takeoffs, will be updated to reflect the Final Design. Costs will be based on detailed quantity takeoffs from the design plans, CT DOT Master Bid Items, and recent bidding results to establish project costs. Bid items will follow CT DOT format for item numbers based on Form 819.

4.1.3 Final Design Report

Prepare a Final Design Report containing a similar level of detail to the Preliminary Design Report, updated to reflect design changes incorporated in Final Design.

4.1.4 Drainage Report

Update the drainage report as needed based on the Final Design.

4.1.5 Special Provisions

Prepare Special Provisions to address special requirements of the project that may require modifications to the Standard Specifications included in the CT DOT Form 819. Special Provisions will follow the Form 819 format and item numbers.

4.2 Final Design

4.2.1 General Information Drawings

Develop one General Notes, Legend, and Abbreviation sheet. The plan will provide the general notes and information for the project, a graphic legend for the symbols used to convey the existing and proposed design elements, and project abbreviations.

4.2.2 Typical Sections

Update the typical sections prepared during the Preliminary Design phase to address Preliminary Design review comments.

4.2.3 Miscellaneous Drawings

During the preparation of the design, we anticipate that elements of the design will require the development of supplemental drawings to convey the design intent and configuration of proposed elements.

1. Prepare up to four miscellaneous detail sheets for the project. Details may include Town, State, and project specific details.
2. Intersection grading plans may be prepared for each intersection along Daniels Farm Road as required including:
 - a. Strobel Road/Meadow Wood Road
 - b. Heatherfield Dr
 - c. Roosevelt Dr/Country Club Road
 - d. Scenic Trail Road/Bridle Trail
 - e. Jog Hill Road

4.2.4 Roadway Construction Drawings

1. Prepare Baseline Layout Plans which provide the detailed geometric layout of the proposed road design. Drawings include centerline geometric data and layout information, curb layout, and other dimensional callouts to facilitate the layout of the design in the field.
2. Update the Roadway Construction Drawings to address the Preliminary Design comments. Roadway Construction Drawings will also depict the proposed drainage system for the roadway, if any new drainage is proposed. Drawings will provide locations and descriptions of storm drainage system components including catch basins, manholes, and pipe descriptions, if any new drainage is proposed. The drawings content will be based on the analysis conducted in the hydraulics and drainage tasks.
3. Update the Roadway Profile drawings to address comments from the Preliminary Design phase.

4.2.5 Sedimentation and Erosion Control Drawings

1. Prepare Sedimentation and Erosion Controls drawings at 1" = 20' scale to define the sedimentation and erosion control measures including the placement of erosion control features such as temporary hay bales, check dams, silt fence, erosion control matting, etc.
2. Prepare Detail Sheets in accordance with the 2024 CT Guidelines for Soil Erosion and Sediment Control.

4.2.6 Pavement Markings and Signing

1. Develop a pavement marking and signing plan. The signing design will adhere to the latest sign standards and practices of CT DOT and the guidelines as found in the 2009 Manual of Uniform Traffic Control Devices (MUTCD). Markings will include edge lines, centerlines, and any parking or bike lane related markings that are required.
2. Prepare roadway signing and pavement marking drawing at a scale of 1' = 20' describing the proposed layout along Daniels Farm Road.

4.2.7 Maintenance and Protection of Traffic

1. In anticipation of the proposed project construction elements, Tighe & Bond will review constructability, maintenance and protection of traffic options. Lane shifts and other temporary traffic measures may be required to accommodate construction while maintaining traffic.
2. Prepare Maintenance and Protection of Traffic (M&PT) plans to manage traffic through the work area during construction. The plan will be prepared at a scale of 1" = 80' or greater to convey the general traffic control for the major construction efforts.
3. Prepare a short narrative section for the Final Design report that describes the approach to the M&PT.
4. Prepare the associated special provisions describing the M&PT requirements in coordination with the Town to establish allowable work hours, workdays, and minimum required traffic flow accommodations.

4.2.8 Traffic Signal Plan for RRFB

Prepare the necessary details and technical specifications for the RRFB construction. Submit the semi-final plans, details and specifications to CTDOT in support of an encroachment permit application.

Respond to one round of comments from CTDOT on the plans, details and specifications to facilitate preliminary encroachment permit approval. It is assumed that the Contractor will submit the necessary documentation to obtain the encroachment permit following the approval and bidding of the project.

Facilitate a letter from the Town of Trumbull Local Traffic Authority to the CTDOT Traffic Engineering Department notifying them that a Rectangular Rapid Flashing Beacon (RRFB) will be installed on a Town of Trumbull roadway, per Federal Highway Administration interim approval requirements.

4.2.9 Cross Sections

Prepare roadway cross section drawings along the baseline of Daniels Farm Road at fifty (50) foot intervals. Cross Sections will be prepared at a scale of 1" = 5' horizontal and vertical. Cross sections will show limits of cut and fill slopes, drainage structures, existing utilities at drainage crossings and typical cross-sectional elements.

4.2.10 Landscaping Plans

Based on the approved Preliminary Design and further input from the Town, the landscape effort in this phase will focus on the further development of plans and detailing.

Deliverables will include a Final Design Landscape package, consisting of a proposed layout/materials plan, site improvement details and enlarged plans. Drawings will include general location and layout of site improvements, plantings, and site furniture/ features.

Task 5 – Construction Documents (100% Complete)

Following Final Design reviews by the Town and Third Party as required by funding source, Tighe & Bond will complete the design and prepare the Final Design (FD) submission, constituting a 100% complete bid ready package of plans, specifications, and estimate. This proposal also includes the incorporation of minor comments received on the Final Design (90%) submission to finalize the Bid Documents.

The activities and deliverables associated with the Construction Documents (100%) Submission are described in Section 5.1.

5.1 Construction Documents Deliverables

5.1.1 Drawings

The plans set will represent a 100% complete set of drawings. The plans will reflect the incorporation of the Town and third party review comments. We will provide one electronic copy of the drawings in Adobe PDF as well as two hard copies, and we will provide the Town with electronic AutoCAD files of the design.

5.1.2 Quantity Estimate and Opinion of Probable Construction Cost

We will update the quantities and opinion of probable cost based on revisions to the design. The quantity estimate notebook will be updated to reflect quantity take-off revisions.

5.1.3 Final Design Report

The Final Design report will be revised to reflect any pertinent comments received during the Town and Third Party reviews and submitted.

5.1.4 Special Provisions and Bid Manual

We will prepare the Bid Manual, including front-end documents provided by the Town of Trumbull, Special Provisions and Specifications, and Bid Form.

Task 6 – Meetings & Permitting

Tighe & Bond will participate in the following meetings in support of the design development process and to coordinate the design.

6.1 Design Coordination Meetings

During the course of the design process, it is expected that various design issues will arise that will require coordination between the Town and Tighe & Bond. Tighe & Bond will attend meetings with no more than two staff members. The Project Manager will attend all project meetings, and one additional staff member will attend as needed to support the meeting agenda. Tighe & Bond anticipates attending up to six (6) Design Coordination/Review Meetings throughout the course of the design. We have assumed 3 meetings will be held virtually and 3 meetings will be held in person in Trumbull Town Hall or at the project site.

We anticipate that the Town may utilize a 3rd party consultant to review the plans at the Final Design stage (90% Submission), after which Tighe & Bond will attend one debriefing meeting.

6.2 CT DOT Coordination Meetings

In support of the CT DOT Division of Traffic Engineering review process for the RRFB, Tighe & Bond will coordinate and attend up to two (2) meetings with CT DOT to review the design plans as they develop. We anticipate one meeting to be held at the completion of the Preliminary Design phase and one meeting will be held during the Final Design (90%) phase prior to submission to CT DOT. We will document the meeting discussions with CT DOT in a memorandum and distribute the memorandum to meeting attendees.

6.3 Utility Coordination and Meetings

Following the completion of the Preliminary Design phase, we will provide the Preliminary Design construction plans to the utility companies to initiate the process of obtaining relocation design plans from the utility companies.

The utilities to be contacted will include the following:

- a. Electric: United Illuminating Company
- b. Gas: Southern Connecticut Gas Company
- c. CATV: Charter Communications Of Western Connecticut
- d. Telecommunications: Frontier Communications of Connecticut, Crown Castle Fiber, LLC, GONETSPEED, MCI metro Access Transmission Services, LLC
- e. Water: Aquarion Water Company

In support of the utility coordination process up to four (4) utility coordination meetings will be held during the course of design. Tighe & Bond will set up the meetings and prepare the meeting record. We have assumed one virtual meeting with all the affected utility companies following the Preliminary Design completion to present the project and initiate the coordination process.

6.4 Trumbull Inland Wetlands and Watercourses Commission

It is our understanding that the Trumbull Inland Wetlands and Watercourses Commission (IWWC) holds a public hearing on any Town project brought before them. As there are no surface wetlands or watercourses within the upland review area, wetland flagging is not anticipated or included. Tighe & Bond anticipates attending one regular meeting and one Public Hearing with the Trumbull IWWC. We will prepare colored display plans for the presentation. We will also provide the plans in electronic format to facilitate integration into a digital presentation of the project.

Task 7 Bid Phase Assistance

Tighe & Bond will provide the following services during the bidding stage:

1. Attend one Pre-bid meeting with the Town and potential Contractors.
2. Receive questions and requests for information from bidders and prepare up to two (2) addenda.
3. Attend the bid opening. Tabulate the bids, perform bid analysis to identify any bid irregularities, conduct a reference check on the low bidder and advise the Town of our bid assessment to confirm that the bid complied with the requirements.

Assumptions and Exclusions

Assumptions, Exclusions and Additional Services (not covered in the fee but may be included if requested).

1. Permitting services are limited to Trumbull Inland Wetlands and Watercourses Commission and CT DOT Division of Traffic Engineering design review. Any meetings/permits with Town or State Agencies beyond what is included within this proposal are excluded.
2. We do not anticipate any retaining walls on this project and our proposal does not include retaining wall design.
3. Construction Administration and Construction Observation services are not included. These services can be provided to the Town under a subsequent agreement in accordance with the funding grant, which provides funds to the Town to administer the construction based on the bid amount.
4. It is our understanding the Town is seeking funding through the Connecticut Bond Commission. It is assumed the State funds will require a third-party review of the 90% design documents. Tighe & Bond reserves the right to modify this proposal and scope of services to include any additional requirements determined by the funding source once the funding source has been finalized.

Fee

Tighe & Bond will perform these services on a time and expense basis in accordance with the terms and conditions of RFP # 6527 and our current On-Call Engineering Services agreement, dated August 26, 2024. In the event that the scope of work is increased for any reason, the limiting fee to complete the work shall be mutually revised by written amendment.

We recommend the following initial budgets:

Lump Sum Services			
Task	Description of Work	Fee	
1A	Survey (Property Line, Topography)	\$19,275	Request \$ 200,000
2	Preliminary Design (30%)	\$149,160	
3	Public Outreach	\$28,540	
4	Semi Final Design (90%)	\$179,560	
5	Final Design - Construction Documents (100%)	\$61,860	
6	Meetings & Permitting	\$23,160	
7	Bidding Assistance	\$9,885	
Direct Expenses		\$2,900	
Lump Sum Services Total		\$474,335	
Project Allowances			
1B	Property Acquisition Mapping (Assume 35 @ \$2,000 each)	\$70,000	

We greatly appreciate the opportunity to continue providing services to the Town. If you have any questions, please contact Andrew at (203) 712-1116 apwhite@tighebond.com or Fred at 203-712-1123 ajmascia@tighebond.com.

Sincerely,

TIGHE & BOND, INC.

Re: **Proposal for Roadway & Traffic Control Signal Design Services
Old Town Road at Quarry Road, Trumbull, CT**

Dear Bill:

Tighe & Bond has prepared this proposal to provide roadway and traffic control signal design services to support the replacement of the existing traffic signal equipment at Old Town Road at Quarry Road in Trumbull. Based on discussions with you, we understand that the replacement will support the Town of Trumbull's (Town) efforts to transfer ownership of the signal to the Connecticut Department of Transportation (CTDOT) as they own the immediately adjacent signals accessing the Route 8 and Route 25 expressway ramps as well as the Old Town Road bridge over the Pequonnock River where ownership was recently transferred from the Town to CTDOT. The following scope of services includes design, permitting, and construction phase services required to replace the traffic signal equipment and extend multi-modal connectivity to pedestrian infrastructure to the north along Quarry Road. The potential transfer of ownership requires that additional design services per the CTDOT Complete Streets policy be followed including the installation of sidewalks, crosswalks, and illumination.

Scope of Services

The following tasks detail the work items to design a new mast arm supported traffic signal at the intersection of Old Town Road at Quarry Road along with associated roadway improvements that will be required to meet current CTDOT Complete Streets criteria. The design will be prepared in accordance with the Manual on Uniform Traffic Control Devices, the CTDOT Traffic Signal Design Manual and Highway Design Manual, and the appropriate CTDOT and Town of Trumbull Standards.

Task 1 – Survey & Resource Delineation

Tighe & Bond will secure the services of a Connecticut Licensed Land Surveyor to prepare an A-2/V-2/T-2 class accuracy field survey of the site referenced to NAD 83 Connecticut State Plane coordinates and NAVD 88 vertical datum. The Survey will capture Old Town Road at Quarry Road extending 500 feet down each roadway approach. The survey limits will extend approximately 20 feet past the edge of road through the project limits. The following work items are included:

1. Accuracy shall be to Class T-2 (topography), Class V-2 (vertical control), and A-2 (boundary) in accordance with the Code of Recommended Practice for Land Surveyors in Connecticut, Section 20-300b-1 through 20-300b-20. The survey shall conform to Section 20-300b-5, Right-of-Way Survey, of the Standards for Surveys and Maps in the State of Connecticut, with adjoining property boundaries from record maps and deeds. Coordinate values shall be placed at angle points and lot corners, with bearings and distances clearly shown.

2. The survey will show street lines and property lines for all properties within the project limits.
3. The survey will locate existing features and improvements. Existing utility facilities will be shown based on field survey and compiled locations based on record search of existing utility facility mapping. Frame elevations and pipe inverts of existing drainage structures and sanitary sewer lines will be field collected.
4. Horizontal control will be tied into the State of Connecticut coordinate system, NAD 83, and vertical control will be tied to NAVD 88. Benchmarks will be set at intervals no greater than 200 feet, with coordinates and ties for construction clearly described.
5. All plans, profiles, and cross sections will be prepared in accordance with the general guidelines for drawing preparation per Town requirements. Drawings will be prepared at a scale of 1" = 40'. Profiles will be presented at a horizontal scale of 1" = 40' and a vertical scale of 1" = 4'. Cross sections will be at a scale of 1" = 10'.
6. Wetland resource areas subject to local, state, and federal jurisdiction will be identified and their boundaries flagged by a Tighe & Bond wetland and soil scientist. The wetland boundaries will be flagged in advance of field survey activities, so that flags can be surveyed and plotted onto the existing conditions plan.

Task 2 - Preliminary Design

1. Conduct one site visit to field review and identify possible improvements to traffic control signal equipment and pedestrian accommodations in accordance with the current standards and/or guidelines. Conduct sightline measurements to identify the need for potential clearing of vegetation and/or need for No Turn on Red restrictions.
2. We will retain a traffic counting vendor to conduct traffic turning movement counts (TMCs) to record all vehicular turning movements, vehicle types, pedestrians, and bicyclists for the following intersections and durations:

Intersection	Counting Period
Old Town Road at Quarry Road <i>[Signal No. 144-900]</i>	Weekday – 6:00 AM to 8:00 PM Saturday – 10:00 AM to 2:00 PM
State Route 127 (White Plans Road) at Old Town Road / State Route 8 Expressway Ramps <i>[Signal No. 144-202]</i>	Weekday – 6:00 AM to 8:00 PM Saturday – 10:00 AM to 2:00 PM
State Route 127 (White Plans Road) at Broadbridge Road <i>[Signal No. 015-278]</i>	Weekday – 6:00 AM to 8:00 PM Saturday – 10:00 AM to 2:00 PM
Old Town Road at State Route 25 Expressway On-Ramp <i>[Unsignalized]</i>	Weekday – 6:00 AM to 8:00 PM Saturday – 10:00 AM to 2:00 PM

Conduct one (1) automatic traffic recorder (ATR) count for a 96-hour period (4 days) collecting directional traffic volume flows, travel speeds, and vehicle classification on Old Town Road in the vicinity of the project intersection.

The data collection will support the development of time-of-day timing patterns and signal coordination patterns as the three signalized intersections are included in a time-based coordination system.

3. Determine the weekday AM and PM peak hours of commuter and school traffic and Saturday midday peak hours from the TMC data and conduct capacity and queue analyses utilizing Synchro software. Review the capacity and queue analyses, detection zones, and field conditions. Based on the results, we will recommend signal phasing and sequence for the intersection.
4. Conduct a preliminary utility clearance assessment to determine the implications of locating new traffic signal equipment relative to adjacent abutters and utilities both overhead and underground. Also identify if the installation of traffic signal equipment would necessitate the replacement/relocation of any utility poles.
5. Prepare 1 in. = 40 ft. scale traffic control signal plan. Signal plan will be prepared in standard CTDOT format using survey base data collected in Task 1. Plans will depict the preliminary layout of signal pole locations, signal indication locations, types of signal faces, cabinet location, and detection zones layout. The plans will be designed in MicroStation OpenRoads software and utilize the CTDOT Digital Design Environment per CTDOT standards.
6. Complete the vehicular and pedestrian clearance intervals and dilemma zone detection calculations based on the proposed design to support the signal plan and capacity analyses.
7. Perform design following the CTDOT Complete Streets criteria and standards detailed [here](#). Related to this project, the Complete Streets infrastructure is expected to include full pedestrian access (signals and ramps) on all legs of the intersection, illumination for all crosswalks, and sidewalk to transit stops located 400 feet north on Quarry Road. These features will be detailed on separate roadway construction plans and incorporated into the traffic control signal plan and the CTDOT Complete Streets worksheets will be prepared.
8. Prepare a technical memorandum summarizing the intended design features, calculations, and analyses. The statement shall explain any proposed changes to the traffic signal phasing, timings, and/or signage as a result of the findings. The statement will also detail any other proposed traffic signal equipment and treatments, such as the inclusion of emergency pre-emption and black painted signal equipment. Submit the memorandum to the Town for their review.
9. Prepare for and participate in one meeting with the Town to discuss the results of the preliminary engineering tasks, reasons for design choices, along with limitations caused by existing conditions. We will prepare a meeting summary and action items as needed and provide to the Town.

Task 3 - Final Design

1. Incorporate the Town's comments on the preliminary design submission.
2. Arrange and attend a utility coordination meeting at the project site. Provide project drawings to the utility companies in advance of the meeting. Document the discussions and prepare a meeting summary.

3. Prepare roadway construction plans detailing the proposed sidewalk connection to the existing bus stops and sidewalk infrastructure to the north of the intersection area. The roadway plans will include construction plan, grading plan, and cross sections within the limits of the proposed sidewalk construction.
4. Complete Traffic and Electrical designs, including, but not limited to, phasing, timings, handholes, conduit, cabling, construction notes, pavement marking notes, pre-emption design and notes, and other information as needed.
5. Finalize the capacity analyses based on the final design and prepare time-space diagrams to modify the existing time-based coordination system for the new signal. It is assumed that revised signal plans for Signals 144-202 and 015-278 will not be required for the coordination modifications.
6. Assemble standard traffic control signal and highway details that support the design based on published details from CTDOT.
7. Prepare special provisions for the proposed traffic signal equipment and highway items. We anticipate compiling special provisions based on published documents by CTDOT and the CTDOT Division of Traffic Engineering.
8. Prepare an opinion of probable construction costs, based on CTDOT standard items from the master item list and published unit prices.
9. Submit the traffic control signal drawing, details, special provisions, and opinion of probable construction costs to the Town for review. The submission will be provided in PDF format.
10. Prepare for and participate in one virtual meeting with the Town to accomplish the Final Design phase. We will record Meeting Minutes and action items as needed and provide to the Town.

Task 4 – Permitting & CTDOT Coordination

The services under this task include the coordination required with the Town of Trumbull Local Traffic Authority (LTA; Trumbull Police Commission), CTDOT, and the Office of the State Traffic Administration (OSTA) for traffic permitting as well as environmental permitting with the Trumbull Inland Wetlands and Watercourses Commission (IWWC).

Due to the existing traffic signals being owned and maintained by the Town of Trumbull, the LTA will be required to formally sign and submit the traffic control signal revision application to OSTA. In addition, coordinating tasks with the CTDOT District 3 and Division of Traffic are included to facilitate the potential transfer of traffic signal ownership. The following tasks describe the coordination that Tighe & Bond will undertake to facilitate approvals by the Town and State.

1. Prepare a template cover letter and a draft of the traffic control signal revision application to the LTA for review and sign to support the Signal Revision Application.
2. Prepare for and attend one meeting with the Trumbull LTA (Trumbull Police Commission) to present the signal replacement design and respond to questions or comments.
3. Coordinate with the Town to submit the traffic control signal revision application to OSTA. As previously mentioned, the traffic control signal revision application must be signed by the LTA.

4. Prepare written responses to OSTA design review comments. For the purposes of the estimated budget, we have assumed three rounds of minor comments and revisions.
5. Coordinate with CTDOT Division of Traffic to facilitate their review and approval of the proposed revisions to the time-based coordination system.
6. Coordinate with CTDOT to facilitate review of the Complete Streets design and worksheets. Should the project not meet any of the controlling design criteria, attend one (1) two-hour design exceptions meeting with CTDOT to provide justification for the design. Prepare a response to comments or revise the design based on comments received from CTDOT on Complete Streets.
7. Prepare for and attend up to three (3) conference calls and/or meetings with CTDOT District 3 and Division of Traffic to discuss the signal replacement and transfer of signal ownership.

If the project includes activities within 100 feet of the Pequonnock River or associated inland wetlands or tributaries, then an approval from the Trumbull IWWC will be required. We are including the submission of an IWWC permit with this scope based on our current assessment of the work and wetland resource area limits. Tighe & Bond will conduct the following tasks to support the Town of Trumbull with the submittal of an IWWC permit application.

1. Prepare a draft IWWC application including a narrative description of the adjacent wetlands and watercourses and the erosion and sedimentation control measures incorporated into the project design, for Town of Trumbull review and submittal.
2. Prepare for and attend one meeting with the Trumbull IWWC to present the signal replacement design project and respond to questions or comments.

Task 5 – Construction Documents

Following the completion of the Final Design and approval by the Town and OSTA, Tighe & Bond will prepare final Construction Documents to facilitate procurement of a Contractor by the Town. The Construction Documents will include construction drawings and special provisions describing the proposed work. The following tasks are provided to prepare the Construction Documents:

1. Prepare final construction drawings that incorporate the comments from the Final Design and Permitting tasks.
2. Update the final design documents, including drawing revisions, special provisions, and opinion of probable costs, to respond to comments.
3. Submit the final traffic control signal plan, details, front-end documents, bid form, special provisions, and opinion of probable construction costs to the Town for bidding.

Task 6 – Bidding, Construction Administration, & Observation

Following the completion of the design stage, Tighe & Bond will provide construction phase support services to the Town of Trumbull. The services include bid phase support, construction administration, and full-time construction observation. An initial budget for these services, based on the anticipated scope of design and the tasks below, is provided for budgeting but subject to change and the budget will be finalized following completion of the design. The following services are anticipated:

Bid Phase Services

1. We have assumed that bidding will be conducted by the Town of Trumbull following Town procedures. Tighe & Bond may participate in one pre-bid meeting, if requested by the Town. We will prepare an agenda and facilitate the pre-bid meeting. Meeting notes will be taken, and questions raised during the meeting will be addressed by addenda, if necessary.
2. Requests for information (RFIs) that are submitted by the bidders associated with our design deliverables will be responded to in coordination with the Town. We will prepare and issue one addendum, if necessary.

Engineering Support and Contract Administration Services (Office Support)

Provide engineering support services and contract administration assistance to the Town during the construction phase of the PROJECT. Services contemplated during this phase include but are not limited to the following:

1. Arrange, conduct, and attend a preconstruction meeting with Town and the Contractor. The agenda of the preconstruction meeting will include development of a project communication protocol, identify the staff that will be involved in the construction phase from all involved parties, review Contractor schedule, identify construction milestones, initiate public information and coordination between the Town, the Contractor and Tighe & Bond personnel, and identify emergency services that may be affected and need to be advised of ongoing work. Define a regular meeting schedule during construction. Prepare minutes from the preconstruction meeting and distribute to all attendees.
2. Review the following documents and distribute to field observation personnel:
 - a. Process detailed construction, shop and erection drawings for compliance with design concept and intent.
 - b. Laboratory, shop, and mill test reports and certificates for materials and equipment.
 - c. Review and respond to Contractor's questions and RFI's during construction. We have assumed responding to up to 5 RFI's.
 - d. Review and provide responses to potential change orders (PCO), if necessary. We have assumed reviewing up to 2 PCOs.
 - e. Review and provide responses to substitution requests proposed by the Contractor(s). We have assumed up to 4 substitution requests.
3. Review Contractor payment schedule and reporting requirements.
4. Meet periodically with Town officials to review construction progress.
5. Attend bi-weekly scheduled construction meetings at the project site.
6. Review and process contractor pay requisitions (assume 16 requests).

7. Provide periodic project updates to the Town's Project Manager in the form of an email (assume monthly progress reports).
8. Conduct a field review of the completed construction and prepare a punch list report of deficiencies, corrective actions required, and recommendations for final acceptance of the PROJECT. Following the completion of the punch list, conduct a final observation to confirm items have been sufficiently addressed.
9. Review the Contractor's record drawings.

Construction Observation Service (Field Support)

Under this task, Tighe & Bond will provide field observation services and record keeping of construction activities to confirm general compliance with the construction documents. Services to include:

1. Furnish a construction observer throughout construction. The construction observer will be on-site on an as needed basis during times of active construction work in alignment with ongoing activities.
2. Provide construction record keeping based on the CTDOT four-book system as described in the Municipal Manual, Version 2, November 2013. Since the project does not require strict compliance with the CTDOT reporting system, we will adjust our record keeping providing the documentation required for LOTCIP while adhering to the funding.

The four-book system includes

- Volume 1: Inspector Daily Work Reports
- Volume 2: Contract Items and Material Testing
- Volume 3: Computations, and Quantity Summaries
- Volume 4: Miscellaneous Contract Data

We will provide completed volumes to the Town the end of construction.

3. Field check the Contractor's shop drawings and working drawings and compare them with the approved plans.
4. Provide measurement, computation, and checking of quantities of work performed and quantities of materials in place for partial and final payments to the contractor. Maintain field observation reports and other project records to document the work.
5. Monitor adherence to construction contract requirements. Document the observations and provide notification to the Contractor if the work is not in general conformance.
6. Provide oversight and coordination of outside testing and observation services. Document field, laboratory, or shop tests for construction materials as specified to be completed by the Town in the drawings and specifications.
7. Prepare daily work reports (DWR), including project photographs, covering the work in progress, and documenting delays to construction, unusual events, visitors to the work site, equipment and staff on site, extra work activities and weather conditions. The DWRs and photographs will be uploaded to the Trumbull GIS web site on a weekly basis

8. Attend a final inspection meeting at the project site. We anticipate the development of a punch list, in coordination with Town staff. We will prepare a meeting summary and action items as needed and provide to the Town.
9. Prepare traffic signal record drawings documenting the final layout of equipment as provided by the Contractor or construction observer.
10. Provide the Town a construction sign-off letter.

It is not the intent of this section of the AGREEMENT to provide supervisory personnel for the Contractor, or have control over the Contractor's work, means and methods, or safety measures and precautions.

NOTE: We have provided fees for direct expenses and laboratory testing. We have assumed if any effort for field surveying is needed to confirm field information, it would be provided the Contractor or Town forces.

Assumptions & Exclusions

In an effort to provide you with a reasonable Fee for the desired services, we have prepared a detailed scope of services based upon our understanding of the project needs. In this regard, the following list includes our assumptions in developing our Scope of Services and those services that are not included in the development of our proposed Fee. If these services are required, we will modify our proposal accordingly to meet your needs.

- Tighe & Bond's deliverables may be submitted in a variety of formats, including hardcopy, PDF, and writeable electronic documents, such as Word or CADD. In doing so, the Town of Trumbull acknowledges that the signed and or signed/sealed documents will be the original documents for the project defined herein. Deliverables are not intended for reuse on other projects. Further, we will not be responsible for unauthorized use, alteration, misuse, or reuse of the electronic documents provided to the Town.
- This proposal assumes general town funding. Design and construction services required by other funding mechanisms are not contemplated and may require an amendment.
- Subsurface investigations, geotechnical engineering, and environmental services not otherwise described in the scope are excluded.
- The environmental permitting included in the scope is based on our current understanding of site conditions and project limits. Permitting beyond what is included in this scope is excluded. If additional permitting services are required, then an amendment will be required.
- Preparation of materials associated with any required easements or right-of-way acquisitions is excluded.
- Modifications to the existing bridge structure and walls along the south side of Old Town Road are not expected to be required and are excluded.
- Systems engineering, communications design, and traffic signal integration services are excluded. The signal is part of a time-based coordination system that will be updated as detailed in the scope. Deviations from the scope for additional coordination design will require an amendment. In addition, new traffic control signal plans are not expected to be required and are excluded for the other signals in the system; Signal No. 144-202 and 015-278.

- Responses to comments and/or attendance at additional meetings not specifically identified in the Scope of Services are excluded.
- Additional submissions not explicitly detailed in the scope are excluded.
- Signal appurtenance layout is assumed to be complete following the Preliminary Design stage and changes further along in the design are excluded.
- Design will follow CTDOT design standards in hopes that ownership of the signal can be transferred to CTDOT following completion of this project. This includes following the Complete Streets Design Criteria which will include sidewalk, pedestrian crossing, and illumination infrastructure. No direct services, other than discussions with CTDOT on the design details, in relation to the transfer of ownership, are included.
- The recently released CTDOT Intersection Control Evaluation (ICE) policy is not expected to be required as the roadway is owned and maintained by the Town of Trumbull. Should CTDOT require ICE as part of the potential ownership transition, an amendment will be prepared.
- Detailed illumination design is excluded. Illumination design is expected to be limited to including combination mast arm-luminaries and/or standalone light standards near the proposed pedestrian crossings.
- The most recent CTDOT traffic control signal support structure special provisions specify a Contractor design-build procurement process for both mast arms and mast arm foundations. All structural design is excluded.
- The scope of services assumes that all construction activities can be conveyed on the traffic control signal plan plus associated standard details. The development of additional drawings is excluded.
- Conducting post-construction studies, surveys, signal timing assessments, etc. are excluded. Our services are considered complete at substantial completion and as limited to the Scope of Services.
- Preparation of Temporary Traffic Control or Detour Plans is excluded.
- We assume that the Town and/or CTDOT will provide comments on the design documents within a timely period as agreed upon in the project schedule that will be set at the beginning of the project.
- Services not explicitly detailed in the scope are excluded.

Fee

Tighe & Bond will perform these services on a time and expense basis in accordance with the terms and conditions of our current On-Call Engineering Services agreement, dated August 26, 2024. In the event that the scope of work is increased for any reason, the limiting fee to complete the work shall be mutually revised by written amendment. We recommend an additional initial budget of **\$279,550**.

The following is a summary of our fee broken out by the tasks listed in the scope of services.

Task	Description	Fee
1	Survey & Resource Delineation (See below for External Costs)	\$5,500
2	Preliminary Design	\$35,400
3	Final Design	\$38,200
4	Permitting & CTDOT Coordination	\$21,500
5	Construction Documents	\$12,500
	Surveying Subconsultant Expense	\$17,000
	Traffic Counting Subconsultant Expense	\$8,800
	Design Services Total	\$138,900
6	Bidding, Construction Administration, & Observation	\$134,700
	Materials Testing Subconsultant	\$5,500
	Construction Services Total	\$140,200
	Direct Expenses	\$1,550

Services performed by subcontractors or materials purchased directly for this project will be invoiced at cost plus ten percent. In the event that the scope of work is increased for any reason, the limiting fee to complete the work shall be mutually revised by written amendment. Our previous Terms and Conditions is part of this letter agreement.

Request =
\$ 250,000

We appreciate the opportunity to continue providing services to the Town. If you should have any questions, please contact Craig Yannes at 203-712-1114 or cdyannes@tighebond.com.

Sincerely,

TIGHE & BOND, INC.

BDA-DAS System for Trumbull Police Frequency at the Trumbull High School

\$39,510.04

request = \$ 40,000

Overview

The Trumbull Police Department utilizes a system known as a “Bidirectional Amplifier” or BDA with a “Distributed Antenna System” or DAS to achieve two-way radio communications within the Trumbull High School which is located at 72 Strobel Road in Trumbull.

This system is required as the Trumbull Police portable radios do not have sufficient coverage within the high school building, absent a system which amplifies the existing outside radio signal.

The existing BDA radio has failed and police radio coverage within the school has degraded or is nonexistent and is in need of replacement. The original and current system was installed in 2011 and is out of support.

Norcom is offering this budgetary proposal to replace the existing BDA Radio and Donor Antenna System at the high school. Most, if not all, of the existing in-building antenna system will be reused providing that it is intact. Any in-building antennas which need to be replaced will be done on a as needed basis only.

Norcom Responsibilities:

- Install one (1) exterior donor Yagi antenna system on the exterior antenna rail.
- Install one (1) Fiplex 700/800 BDA with integrated NFPA 24-hour battery backup
- Ground all equipment per Motorola R56 installation standards and NEC electrical requirements
- Optimize and balance system performance
- Perform final coverage testing and document all signal strength, BER, and DAQ readings into final acceptance report. Provide As-Built documentation drawings to customer
- Perform ATP (Acceptance Test Plan) with customer
- Installation work to be performed and supervised by Motorola ETA R56 certified installation technicians, OSHA 10 certified and CT V6 licensed antenna system installers

Customer Responsibilities:

- Provide access to all spaces necessary for the installation of DAS, network, or alarm cabling.
- Customer to obtain approval for the installation of the BDA/DAS system from the high school
- Customer to provide suitable mounting location for wall mounted equipment cabinets.
- Customer provides one 20-amp 120-volt AC power circuit to BDA location terminated in a NEMA 5-20 duplexed outlet.
- Establish maintenance plan including an annual inspection and preventative maintenance
 - Option Post installation services
 - Annual inspection and PM \$1,250.00 (per PM)

Terms: Net 30 Days
Delivery: 8 – 12 Weeks
Price Validity: 15 Days
Warranty: Labor - 90 Days Normal Business Hours
Fiplex Equipment – Five-Year Depot Warranty as Quoted

Limit of Liability:

Northeastern Communications, Inc., dba NorcomCT will not be liable for any damages, including any lost profits, lost savings, loss of life or other incidental or consequential damages arising out of the use or inability to use this product, even if Northeastern Communications, Inc. or its employee has been advised of the possibility of such damages, or for any claim by any other party. Northeastern Communications, Inc. will have its liability limited to the repair or replacement of the supplied original equipment or program diskette, associated publication and any part or parts of the product or system purchased for the period of the warranty. Northeastern Communications, Inc. shall not be liable for any delays or failures in performance resulting from acts beyond its reasonable control including, without limitation, acts of God, terrorist acts, shortage of supply, a manufacturer's inability to deliver or produce the good or service, breakdowns or malfunctions, interruptions or malfunction of computer facilities, or loss of data due to power failures or mechanical difficulties with information storage or retrieval systems, labor difficulties, war, or civil unrest.

Applicable Sales Tax and Shipping Will Be Added.

Pricing, Descriptions, Quantities, Conditions and Terms have been read and accepted.

WPCA
Townwide Pump Station and
Sewer Systems

Cost Justification - WPCA Townwide Pump Station and Sewer System Evaluations and Preliminary Design

This project funds an evaluation of the Town's pump stations and sewer infrastructure to see what condition they're in, how well they're working, and whether they have enough capacity. The evaluation will identify problems, capacity issues, and what upgrades are needed based on growth, regulatory requirements, and long-term needs.

The work includes inspecting existing pump stations, analyzing the sewer system's capacity, reviewing operations, and creating preliminary designs for needed upgrades. This ensures the Town's wastewater system stays reliable, meets regulations, and can handle capacity.

On-Call Engineering Firm Rates (Bid #6527):

- Project Manager: \$260/hr
- Project Engineer: \$165/hr
- Assistant Engineer: \$135/hr
- Draftsperson: \$140/hr
- Project Environmental Scientist: \$195/hr
- Environmental Scientist: \$125/hr
- Clerical: \$95/hr

The department will use the on-call engineering contract for system evaluations, capacity analysis, condition assessments, regulatory reviews, and preliminary design work. Priorities for upgrades and construction will be set based on what the initial assessment finds.

Costs will be based on the existing on-call contract rates and follow the Town's purchasing policy. All work will stay within the approved project budget (Not to Exceed).

WPCA
Wildwood Pump
Station

Memo

**SUBJECT****Wildwood Pump Station**

Confirmation of Existing Conditions and Alternatives Review

TO

Town of Trumbull WPCA

William Maurer, PE – Town Engineer

DATE

September 19, 2025

OUR REF

30115445

The purpose of this memorandum is to document the analyses performed to evaluate three alternatives to rehabilitate the Wildwood Pump Station located in Trumbull, Connecticut.

Existing Conditions

The Wildwood Pump Station is a wet pit/dry pit, can-style pump station utilizing two constant speed centrifugal pumps in a lead/lag configuration. According to pump nameplates, the existing pumps are designed for 420 gallons per minute (GPM) at 66 feet of total dynamic head (TDH).

To confirm the existing design capacity of each pump, Arcadis performed drawdown testing at the Wildwood Pump Station on May 14, 2025. The drawdown testing involved (1) recording the observed time to fill the wet well and pump run time to confirm the flow rate of the pumps and (2) reviewing as-built drawings to determine wet well capacity and dimensions. The drawdown testing confirmed that Pump 1 has an average flow of 519 gpm and Pump 2 has an average flow of 735 gpm. Arcadis used the observed flow rates from the drawdown testing in further analyses to determine recommendations for the pump station rehabilitation.

Feasibility Review

Three alternatives were considered for rehabilitation of the Pump Station:

1. **Option 1:** Install new submersible pumps in the existing wet well.
2. **Option 2:** Install a new pre-cast submersible pump station with integral vault structure to replace the existing dry well.
3. **Option 3:** Replace the pumps in-kind within the existing dry well and relocate electrical and controls at grade.

Following discussions with the Town, Option 3 was removed from consideration due to the challenges associated with maintaining pumps in the existing configuration.

For both Options 1 and 2, electrical and control systems will be located above grade in weatherproof enclosures beneath a canopy, and the generator will be replaced. Both options will also include new isolation and check valves on each pump, a bypass connection, and a flow meter. The recommended pump for both options is the Flygt NP 3153 HT (duplex configuration: 1 duty, 1 standby), sized for 750 GPM to maintain a minimum force main velocity of 3 feet per second in accordance with TR-16 guidance. At this flow rate, the anticipated TDH required by the pump is approximately 67 feet, based on an analysis of the existing record drawings and the results of the drawdown testing discussed above.

Option 1: New Submersible Pumps in Existing Wet Well

This alternative involves reconfiguring the existing wet well to accommodate new submersible pumps, along with installation of new piping, valves, and appurtenances to connect to the existing force main. Review of as-built drawings indicates sufficient space for two new submersible centrifugal pumps within the wet well, but insufficient space for the required isolation and check valves. Consequently, a separate concrete valve vault (approximately 10' x 12' x 11' deep) would be constructed to house these components. Locating valves in a separate structure is also advantageous due to the corrosive atmosphere in the wet well.

Construction would require demolition of the entrance to the existing dry pit and filling in the structure to support the new valve vault. Additional modifications to the wet well would include:

- Creating new openings in the top and intermediate slabs for pump maintenance access.
- Installing a baffle wall to improve hydraulic conditions and reduce air entrainment.
- Partially filling the wet well to improve flow toward the pumps and minimize dead spots.
- Creating wall penetrations for piping from each pump to the valve vault.

Benefits:

- Requires less demolition of the dry pit and reuses existing structures.
- Expected to be less costly than constructing a new wet well.

Disadvantages:

- Risks associated with modifying and reusing the existing wet well, including construction challenges and potential for differential settlement between the wet well and new valve vault.

Figure 1. Option 1 plan view.

Figure 2. Option 1 isometric view.

Option 2: New Submersible Station with Integral Valve Vault

This alternative involves demolishing the existing dry pit and installing a new pre-cast concrete combination wet well and valve vault structure. The existing wet well would be modified to direct flow to the new structure. This approach is consistent with upgrades completed at the Reservoir Avenue and Old Town Road Pump Stations in 2025.

Figure 3. Option 2 isometric view.

Benefits:

- Provides a new, integrated wet well and valve vault, minimizing settlement risks.
- Aligns with recent pump station upgrades, facilitating consistent operations and maintenance.
- Offers operational flexibility and potential for additional storage; the existing wet well could be bypassed in the future if needed.

Disadvantages:

- Requires additional demolition of the existing dry pit.
- Higher construction costs compared to Option 1.

Cost Summary

For cost comparison, it was assumed that operating and maintenance costs for Options 1 and 2 would be similar. The major differences between these two options are summarized below:

Option 1:

1. Construction of concrete valve vault structure.
2. Partial demolition of dry-pit and installation of fill where dry-pit does not need to be demolished.
3. Additional piping and fittings associated with connecting pumps to the separate valve vault
4. Modifications to the existing wet well for submersible pump installation, including new openings, fill, and baffle wall(s).

Option 2:

- 1. Demolition of existing dry-pit
- 2. Installation of new wet well structure with integral valve vault
- 3. Modifications to existing wet well to direct flow to new wet well.

The primary cost differences are summarized below:

Option	Estimated Cost of Option Specific Scope Items
Option 1: Install Submersible Pumps in Existing Wet Well	\$323,000
Option 2: New Submersible Pump Station	\$433,000
Cost Difference (Option 2 - Option 1):	\$110,000

Estimated total project cost: Approximately \$2 million, based on recent bid results for similar projects.

Recommendation

While Option 1 presents a modest cost savings (~5% of anticipated total project cost), Option 2 is recommended.

Option 2 aligns with the design of recently upgraded pump stations, reduces long-term risks, and provides greater operational consistency.

Beardsley Pump Station Garage Floor Repairs

WPCA # 3

March 6, 2025

William C. Maurer, P.E., L.S.
Town Engineer / WPCA Administrator
Town of Trumbull

Trumbull, CT

Re: Beardsley Pumping Station - 119 White Plains Road, Trumbull CT 06661

Dear William:

As a follow up to our first report dated March 6th, 2025, DeStefano & Chamberlain was retained to perform additional testing of the first-floor garage slab of the Beardsley Pumping Station located at 119 White Plains Road in Trumbull CT.

The concrete slab in the south half of the garage, adjacent to the overhead doors had been patched in several locations on the top side. Additionally, there are areas of spalling and deterioration of the reinforcement visible on the underside of the slab.

As part of the first round of testing on January 23, 2025, Connecticut Materials Testing Laboratory was retained to take two (2) cores around the slab closest to the overhead doors to determine the water-soluble chloride ion content of the concrete. To further understand the extent of deterioration of the remainder of the garage floor slab, Connecticut Materials testing laboratory returned on April 16, 2025, to take three (3) additional cores to be tested for water soluble ion content.

The results from these tests confirmed our findings indicated in the first report that the concrete slab in the front half of the garage forward of the second column should be removed and replaced. A plan view taken from the original construction documents is attached below showing the area of damaged concrete with the location of the core samples indicated.

Due to the nature of the structure, this repair would be phased to limit disturbance to the existing facility. The new structure would consist of a steel framed slab-on-metal deck with a waterproofing membrane and a topping slab pitched to the existing drainage system or another slab protection system.

While the structure is not in immediate risk of collapse, the loose and spalling concrete on the underside of the slab will continue and likely get worse over time. This constitutes a falling debris risk to people and machinery operating below in the deep basement area. The replacement of the floor structure should be part of a larger capital improvement plan for the pump station.

DeStefano & Chamberlain, Inc. ■ Structural and Architectural Engineering

50 Thorpe Street, Fairfield, CT 06824 ■ Tel. 203.254.7131 ■ www.dcstructural.com

The scope of this report is limited to the garage floor slab. No other areas of the building were reviewed as part of this investigation.

Please review this report and contact me with any questions or areas where more discussion would be helpful.

Respectfully,

Richard Way, P.E.

Existing First Floor Plan – Not To Scale

REPORT OF CHLORIDE ANALYSIS

Project:

Beardsley Pump Station

Reported To:

Connecticut Materials Testing Lab, Inc
7 Lexington Ave.
South Norwalk, CT 06854

APS Project No.:

P-0040489

Attn:

Robin Marshlow

Date:

February 17, 2025

INTRODUCTION

This report presents the results of laboratory work performed by our firm on two (2) concrete core samples you submitted on January 28, 2025. The scope of our work was limited to documenting the water-soluble chloride content of the cores at specified depths in accordance with ASTM C1218.

TEST RESULTS

Table 1 – Water-Soluble Chloride Content

This document shall not be reproduced, except in full, without written approval from American Engineering Testing, Inc.

TEST PROCEDURES

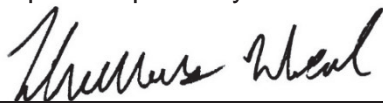

Laboratory testing was performed on February 11, 2025, and subsequent dates in accordance with ASTM C1218-20, "Standard Test Method for Water-Soluble Chloride in Mortar and Concrete." The core samples were cut at the designated depths, crushed, dried in an oven, and processed to pass a U.S.A. Standard Test Sieve No. 20. Results presented in Table 1 are reported on a dry weight 105 °C basis.

REMARKS

The test sample(s) will be retained for a period of at least sixty days from the date of this report. Unless further instructions are received by that time, the sample(s) may be discarded. The test results relate only to the sample(s) tested. No warranty, expressed or implied, is made.

Sincerely,
American Engineering Testing

**Board of Finance Meeting
Long Hill Conference Room, Trumbull Town Hall
Unapproved Minutes
December 17, 2025
7:00 pm**

Call To Order

Chairman McHugh called the meeting to order at 7:00 pm. All joined in the Pledge of Allegiance followed by a moment of silence for the victims at Brown University and in Sidney, Australia.

Present

Chairman, Lainie McHugh, Rosemary Seaman, Paul Timpanelli, David Galla, David Pia, Massimo Mallozzi, Nathan Tinker (Alternate) and Vincent DeGennaro (Alternate)

Also Present

Maria Pires, Director of Finance; Town Attorney Daniel Schopick (entered at 7:03 pm); Rebecca Lopez, Internal Auditor; Dmitri Paris, Superintendent of Parks and Recreation; Carl Massaro, Town Council Chairman and State Representative David Rutigliano

Election of Officers

Mr. Galla nominated Lainie McHugh for the position of Chairman; seconded by Mr. Timpanelli and approved by unanimous consent.

Mr. Timpanelli nominated David Galla for the position of Vice-Chairman; seconded by Mr. Mallozzi and approved by unanimous consent.

Mr. Timpanelli nominated Massimo Mallozzi for the position of Secretary; seconded by Mr. Galla and approved by unanimous consent.

Attorney Schopick entered the meeting at 7:03 pm.

Mrs. McHugh announced Rosemary Seaman was stepping down from the Board of Finance as of December 18, 2025. Mrs. Seaman had a 37-year career with Trumbull Public Schools holding various positions. She also served on the Board of Finance for a prior term, served on the Board of Education, served as a Trustee for the Trumbull library system and was an adjunct professor

at UCONN. People do not realize the time she invested in Trumbull and thanked her for her time and effort.

Mrs. Seaman thanked everyone and was especially appreciative for being appointed to the Board of Finance as a democrat on the Republican Unity ticket. This points to the trust the residents of Trumbull have in her to make the right decisions for the Town.

Public Comment

Mr. Rutigliano presented Mrs. Seaman an official citation from the Town of Trumbull and the State of Connecticut to recognize her volunteer and dedicated service to the Town. Mr. Massaro congratulated Mrs. Seaman on her extensive career and as a wonderful role model in public service in the education and financial world and everything in between. Mr. Schopick also noted her many accomplishments during her career and thanked her for her dedication to the community.

Internal Auditor

Rebecca Lopez updated the Board with current items being addressed and other outstanding items. Calendar year 2026 is coming up and asked the Board for any departmental function or business unit to be taken into consideration for the upcoming audit plan. The following are being considered:

1. Employee expenditure reimbursed via ATM payroll
2. Police Department's revenue collections
3. At the request of the Senior Center department head, a cash management review.

Current audit updates –

1. Finalizing the Town Health Benefits Administration audit. Nothing significant stands out at this time. There are minimal documentation processes so there is a need to develop policies and procedures. There may be an automation application recommended because it is a manual process at this time. Expects a completed report in January.
2. Follow-up audit findings at the Library include the recent hiring of an Assistant Director. She will meet with her to discuss the findings of the last audit and review the implementation of the new systems software for cash and credit card payments.
3. Waiting for the blight violation information for the Planning and Zoning audit.
4. Transfer station is still under construction. Has not been back to review the new system due to this construction but will contact Public Works as to where it stands.
5. Parks and Rec – working on the Employee Action Form (PAF) for seasonal workers. This is still a manual process.
6. Working on the fourth quarter ARPA with Mrs. Pires and the unclaimed property for the 2025 report that is due in March. Accounts Payable has done a good job in sending out the due diligence notices and whatever responses not received will be dealt with according to State regulations.
7. Updating the Accounting Policy Manual with the Director of Finance. Should finalize the manual by the end of the year.

Discussion was held regarding the updating of the systems for HR. This could be a different software from what is currently being used. The PAFs could be through MUNIS. Any suggestions should be sent to the Chair for discussion at the next meeting when they set the audit schedule.

Treasurer's Report

Mr. Musto was unable to attend. Mr. Galla would like Mr. Musto advice as to what he anticipates the rates will look like with the rate cuts by the federal government. Mr. Galla also requested clarification of the M&T rate change.

Review of Rules and Procedures

Mrs. McHugh noted there are no suggested changes from last year. Motion to accept was made by Mr. Timpanelli; seconded by Mr. Galla. Approved by unanimous consent.

Review of Intra-Departmental Transfer Policy and Procedures

Motion to accept as presented was made by Mr. Timpanelli; seconded by Mr. Galla. Mr. Galla questioned the date on Page 4 under Duration. Questioned if this could be in line with the first meeting of the year instead of a specific date. It was suggested this be changed to the Board of Finance meeting in December. Mr. Galla made a motion to change the date to December 17; seconded by Mr. Timpanelli and approved by unanimous consent. Motion to accept as amended made by Mr. Galla; seconded by Mr. Mallozzi and approved by unanimous consent.

Review of Proposed Regular Meeting Schedule

Motion made by Mr. Galla to accept the proposed meeting schedule, subject to change if proper notification is given; seconded by Mrs. Seaman and approved by unanimous consent.

Review of FY 2027 Proposed Budget Meeting Schedule

Chairman McHugh explained the process noting the Board can decide at a later date whether to conduct virtual or in-person sessions with the departments. Public hearings are hybrid. These tentative dates were accepted by unanimous consent.

FY 2-25-2026 Supplemental Appropriation

Mr. Galla presented Resolution 12-25-01, Supplemental Appropriation for \$166,066, from Fund Balance to 01030200-578802, Maintenance and Repair for Building and Equipment for various unanticipated repairs/upgrades for EMS, PD and Senior Center for a total of \$166,066 and moved its adoption. Seconded by Mr. Timpanelli.

Mr. Paris presented the three repairs/updates noting:

1. The Police Department roof exists in the Capital Plan and it was anticipated to be completed this coming year but two sections (secondary roofs) failed and could not be repaired.
2. A Safety Committee review of all Town buildings revealed many life safety issues at EMS that included the fire doors and fire panel. The doors do not seal allowing gasses from

the garages to pass into the offices and living space. The fire panel is outdated and not operational.

3. The Senior Center also had a fire panel issue. When the building flooded and the boiler was underwater, the fire panel froze up with no communication from the building.

Mr. Paris also noted, in the future, the Animal Shelter will need an emergency generator. The unit is unrepairable at this point. They are currently working with one of the fire districts to secure one of their generators and make repairs to make it functional. Cost of a new unit is \$60,000. The repair of the used unit would run labor and parts as the unit is being donated.

Mr. Timpanelli exited the meeting at 7:30 pm. Mr. DeGennaro will be voting in his place.

Mr. Pia questioned invoices and who signs off on them. Mr. Paris noted he approves them for payment. Discussion was held regarding the vetting of vendors and the use of certain vendors for projects within the Town. Mr. Pia questioned the amounts on the invoices and felt there should be more due diligence to find the best value. Mrs. McHugh suggested this could be a topic for review as to how the vendor lists are prepared and the process followed. Mr. Paris noted his situation is often a time crunch event and the vetting process helps solve a problem in an expedient manner. Mr. Mallozzi also felt due diligence should be done on the labor prices and questioning the sourcing of materials for a better value should be considered. This topic will be considered for the auditor in 2026.

Mr. Mallozzi questioned the cost of the repair as it relates to the total cost of roof replacement at the Police Department. Mr. Paris noted the two secondary roofs repaired are not part of the main roof cost in the plan.

In favor of the Supplemental Appropriation – Galla, Timpanelli, Mallozzi, Seaman and McHugh; Opposed – Pia; Abstention – 0. Motion passed 5-1-0.

Discussion Items

1. Year to Date Budget Report – Expenditures FY 2026 - Mrs. Pires discussed salaries and overtime. Mr. Mallozzi questioned why they plan for overtime if there are part-time employees to cover the hours. Mrs. Pires explained how the salary, full-time and part-time employees cover hours with regard to overtime and union contracts. Mrs. McHugh noted this topic will be discussed with the individual departments at budget time. Mrs. Pires will provide an update on PD staffing. Vacancies are budgeted for, as well as some overtime, as the departments assume the position will be filled.
2. Year to Date Budget Report – Revenue FY 2026 – no discussion.

Approval of Minutes

Motion was made by Mr. Galla to accept the minutes as presented; seconded by Mrs. Seaman. In favor – Seaman, Galla, McHugh; Opposed – none; Abstentions – DeGennaro, Pia, Mallozzi. Motion passed 3-0-3.

Adjournment

There being no further business, motion was made by Mrs. Seaman to adjourn the meeting at 7:53 pm; seconded by Mr. DeGennaro and approved by unanimous consent.

Respectfully submitted,

Barbara Crandall
Acting Clerk
