Subject: Follow-Up Regarding Sewer Connection Request – Historical Project Documentation

Dear Chairman and Members of the Trumbull WPCA,

Thank you for your time and consideration during the recent Board meeting regarding my request to connect my property at **11 Pam Bar Road** to the Trumbull sanitary sewer system.

Following the meeting, I obtained additional historical records from the City of Shelton that I believe are directly relevant to my request and respectfully ask that they be included in the Board's review.

The attached documents show that the Phase 4 sanitary sewer project was approved and constructed with the understanding that certain Shelton frontage properties, including **11 Pam Bar Road**, would benefit from and have the opportunity to connect to the Trumbull sanitary sewer system. The records further show that Shelton conditioned its approval for Trumbull to excavate within Shelton on allowing these properties to connect. After Trumbull confirmed those conditions had been satisfied, Shelton authorized the excavation, and later correspondence identifies **11 Pam Bar Road** as one of the Shelton properties for which a sewer lateral was installed.

I understand the Board's concern regarding the agreement with the Bridgeport WPCA, which provides that wastewater from a municipality that is not a party to the agreement requires prior written consent from Bridgeport. However, based on the attached historical documentation, I respectfully believe my property is not a new request for sewer service, but rather one of the original properties specifically included as part of the approved Phase 4 project. For that reason, I respectfully ask the Board to reconsider whether the Trumbull WPCA has the authority to approve this connection as part of the original project.

If the Board continues to believe that additional approval from the Bridgeport WPCA is required, I would greatly appreciate your guidance on how to proceed as soon as possible so that I may submit any necessary application before the next Bridgeport WPCA meeting. My goal is to avoid unnecessary delays that could postpone construction until the winter months, when excavation may no longer be practical.

Thank you for your time, consideration, and guidance. I appreciate the Board's review of the attached documentation and look forward to your response.

Respectfully,

Yngri Antigua

Re: Trumbull Sanitary Sewers in Shelton

Thank you for confirming that the City of Shelton residents who have frontage along your proposed sanitary sewer will have the opportunity to connect if they desire. We were led to believe that the plans were being revised to avoid Shelton streets due to capacity restraints which would prevent our residents from connecting.

Since that condition has been satisfied, your contractors may apply for and obtain an excavation permit as long as they meet all standard conditions including our requirement that hot Class 1 bituminous concrete shall be used for the temporary pavement. We do not permit cold patch to be used on our streets for non-emergency excavations.

In the event that your contractor does not have access to hot Class 1 Bituminous Concrete, construction in Shelton will have to wait until the plants reopen. We may consider the use of non-ConnDOT approved hot mix that is available through some contractors. However, that temporary pavement will need to be replaced with ConnDOT Class 1 mix in April.

Your contractor must post the appropriate bond and certificate of insurance and obtain Traffic Authority approval. Enclosed are copies of our requirement and forms.

Re: Proposed Town of Trumbull Jog Hill Area Sanitary Sewer – Phase 4

Dear Mr. Solemene:

The Shelton Planning & Zoning Commission issued a favorable 8-24 Referral Report on the above referenced project which will result in Trumbull sanitary sewer lines being installed on sections of Pam Bar Drive, Cricket Lane and Booth Hill Road in Shelton.

The Office of the City Engineer will grant the required excavation permits for this undertaking subject to the following conditions:

- The eleven residential properties in Shelton which will have frontage along the proposed sanitary sewer shall be allowed to connect to the Trumbull public sanitary sewer.
- The permanent paving restoration of the City of Shelton roads impacted by the construction shall consist of a 2 inch curb to curb Class I overlay.

Very truly yours,

Robert F. Kulacz, P.E.
City Engineer

David Bjorklund, President, Spath Bjorklund Assoc.

PUBLIC HEARING

Pursuant to Section 7-247a of the Connecticut General Statutes, the Trumbull Water Pollution Control Authority hereby gives notice of its intention to conduct a public hearing, Wednesday, March 28, 2007, in the Council Chambers of Town Hall, 5866 Main Street, Trumbull, Connecticut. Two individual 1½ inch or 2 inch force main sanitary sewer lines to serve houses 88 and 92 Autumn Ridge Road, approximately 180 feet west from the rear of the property line connecting to an existing 8" main line on Fox Road. An alternate route would require approximately 110 feet west onto the Autumn Ridge Road public right of way to intersection of Fox Road, then an additional 110 feet south to the existing 8" main line on Fox Road. Applicants: Gary Beers and Conway Rice

Chairman Biagioni called the public hearing to order at 7:30 p.m.

Mr. Solemene distributed maps to the Commissioners depicting the proposed sewer connections. Gary Beers of 88 Autumn Ridge Road and Conway Rice of 92 Autumn Ridge Road were present. If the homeowners decide to connect from the rear of the properties, an easement would be required. Sanitary sewers are not planned for Autumn Ridge Road. Both properties will be assessed. There was no one present to speak against the application.

- **Motion to close the public hearing by Goncalves, seconded by Salvey. Motion carried unanimously.**

The public hearing was closed at 7:45 p.m.

Respectfully submitted,

Jenny Francese

Janine Salvey
Paul Francese, Alternate

Also in attendance:
Joseph Solemene, Assistant W.P.C.A. Administrator
Neil Lieberthal, Esq., Town Attorney
David Bjorklund, President, Spath Bjorklund Assoc.

Chairman Biagioni called the meeting to order at 7:45 p.m.

MINUTES TO PREVIOUS MEETING:

- **Motion by Goncalves, seconded by Petriello, to accept the minutes of the February 28, 2007 meeting as written. Motion carried unanimously.**

NEW BUSINESS:

- **Motion by Goncalves, seconded by Salvey, to go out of order to Old Business. Motion carried unanimously.**

OLD BUSINESS:

David Bjorklund, President of Spath Bjorklund Associates, Inc. presented the Commission with a study of average sewer flows projected through the year 2020. The current contract with the Bridgeport W.P.C.A. limits daily flow to 4.2 million gallons, and the study will help to determine if additional flow will be required in the future.

NEW BUSINESS:

Rate Increase

Mr. Solemene introduced the proposed fiscal 2007-2008 budget for the Bridgeport W.P.C.A. The Authority projects a 10.7% rate increase, and sites increased electricity consumption and decreased flow as the contributing factors.

Phase IV, Part B, Contract 3

Bids for the project will be opened April 10th. To date seven contractors have purchased plans; Mark IV Construction from Bridgeport, Rondano from Norwalk, Guerrera from Oxford, Complete Construction from Ansonia, Baltazar Contractors from Ludlow, Massachusetts, and Cprojects from Southbury.

12 Eldor Lane

Mr. Solemene reported that the homeowners of 12 Eldor Lane came into the Engineering Office asking if sewer expansion was planned for Eldor Lane. Eldor Lane was an extension to the Half Acre contract, but the engineer was not aware of that fact and referenced a sewer map which was not updated to include Eldor Lane. She told the homeowners that Eldor Lane would not be getting sewers any time soon. Consequently, they invested in a new septic system at a cost of $16,300. Approximately one year later sewers were installed on Eldor Lane. The

Homeowners are unhappy with the turn of events and have taken their complaint to the First Selectman.
Mr. Solemene offered the Commission two options to consider:

1. The property qualifies for the maximum assessment of $150/foot, but could be reduced to the minimum assessment of $125/foot.
2. Full assessment, deferred for 15 years, to be activated once the house is connected to the sewer.

- **Motion by Salvey to approve the offer to defer the assessment on 12 Eldor Lane for 15 years, to be activated once the property is connected to the sewer system. Not seconded. Motion rejected.**

- **Motion by Biagioni, seconded by Goncalves, to table discussion of 12 Eldor Lane until the next meeting. Four in favor, one against. Motion carried.**

City of Shelton
Mr. Solemene reported that we will be going in and out of the City of Shelton during construction of the next sewer project. The Shelton Planning & Zoning Commission approved our application on the condition that temporary paving and curb to curb overlay are completed.

PUBLIC HEARING

- **Motion by Goncalves, seconded by Petriello, to accept 88 & 92 Autumn Ridge Road into the Trumbull sewer system in accordance with the requirements of the Engineering Department and the Water Pollution Control Authority. Motion carried unanimously.**

There being no other business before the Authority,

- **Motion to adjourn by Goncalves, seconded by Salvey. Motion carried unanimously.**

The meeting was adjourned at 8:50 p.m.

Respectfully submitted,

Jenny Francese
Clerk of the Commission

Raymond Baldwin, First Selectman
Raymond Rizio, Esq.

Chairman Biagioni called the meeting to order at 7:30 p.m.

MINUTES TO PREVIOUS MEETING:

- **Motion (Commissioner AIELLO), seconded (Commissioner SALVEY), to accept the minutes of the March 28, 2007 meeting as written. Motion carried unanimously.**

NEW BUSINESS:

Finance Report

Lynn Heim, Director of Finance, presented the Commission with a report of the sewer finances. Ms. Heim explained that her office records revenue reported by the Tax Collector and expenditures from the operating budget prepared by Mr. Solemene. Chairman Biagioni stated that the Commission would like a balance of the W.P.C.A. enterprise fund. A balance of $1.2 million was reported in May 2006. The audited net assets of the W.P.C.A. Enterprise Fund for 2006 is $946,488. Commissioner Francese asked if the operating revenues could be broken out into different categories of revenue. Ms. Heim replied that she could separate out the Tax Collector receipts. Commissioner Francese also questioned the breakdown of operating expenses. Ms. Heim replied that she could give the Commission a detail of the year to date budget report. The budget for the year is $4,513,006. The in-kind services are part of Mr. Solemene's budget. Commissioner Francese noted that in 2006 expenses exceeded revenues. Ms. Heim stated that there were extraordinary expenses in 2006, and Mr. Solemene added that there was one large failure at the Old Town Road pump station, about $120,000 in extraordinary repairs at the Beardsley pump station, and the repair at Governor's Ridge. Commissioner Francese also noted that with projected revenues of $3.3 million and a budget of $4.5 million, there will be another loss in 2007. Ms. Heim confirmed that money from retained earnings is not withdrawn without a request from Mr. Solemene, and approval of the Board of Finance. Commissioner Francese pointed out that if revenues do not cover expenses, the shortfall will come from retained earnings. Ms. Heim said that because the recorded revenue amounts were partial year and were not yet current to date, that she would analyze the revenue numbers and provide a revised projected revenue amount so a more accurate projected shortfall for 2007 could be determined.
The Commissioners thanked Ms. Heim for her report.

City of Shelton

Mr. Solemene received a letter from the City of Shelton granting permission to the Town of Trumbull to install sewers on parts of Trumbull streets that pass through Shelton on sections of Pambar Drive, Cricket Lane, and Booth Hill Road subject to the following condition: the 11 residential properties in Shelton which will have

frontage along the proposed sanitary sewers shall be allowed to connect to the Trumbull public sanitary sewers. Attorney Lieberthal contact the attorney for the City of Shelton, and the discussion was tabled for a future meeting.

OLD BUSINESS:

Monroe Sewer Connection

First Selectman Raymond Baldwin addressed the Commission about the relocation of the Jewish Home for the Elderly to Monroe, which would necessitate connecting to sewers through Trumbull into Bridgeport. The Towns of Trumbull, Monroe and the City of Bridgeport have worked out the details. Mr. Baldwin noted that with the aggressive approach taken with sewers in the next three phases, it necessitates us to make sure we have enough capacity in our system. Mr. Baldwin assured the Commission this is a residential project only, not a commercial project.

Some of the Commission's concerns were discussed:

a. How much flow? Based on 100 units, flow would be approximately 15,000 gallons per day.
b. Unit charges? 100 units at the current $500 unit charge would be $50,000.
c. This would be an isolated development, passage does not automatically allow Monroe development to participate in the Trumbull sewer system.
d. What will stop future Monroe development from connecting to Trumbull's sewer system? There is no precedent being set, the language is clear in the agreement with Monroe and Mr. Scinto that this is a one-time deal. Other deals would be required to come before the Trumbull W.P.C.A. for approval.

Mr. Baldwin requested the Commission come up with a list of items they would like included in the agreement, to be discussed at a future meeting.

Extraordinary Storm

Mr. Solemene reported there were record overflows during the recent Nor'easter. He will send supporting documentation of the extraordinary storm to the Bridgeport W.P.C.A.

Public Hearing – Rate Increase

The Bridgeport W.P.C.A. will raise rates by 10.7% effective July 1, 2007, necessitating a raise in Trumbull's sewer use rates.

- **Motion (Commissioner SALVEY) second (Commissioner AIELLO) to hold a Public Hearing in May on a sewer use rate increase. Motion carried unanimously.**

Eldor Lane

Item tabled from March meeting. After further discussion,

- **Motion (Commissioner SALVEY), second (Commissioner AIELLO) to defer sewer assessment on 12 Eldor Lane for fifteen (15) years or until the home is connected to the sewer system, whichever comes first. If the property is sold before either occurs, new owner will be required to connect to the sewer system and assessment will be instituted accordingly. Motion carried unanimously.**

Bid Result – Phase IV, Part B, Contract 3

Mark IV Construction, Inc. was the low bidder at $15,385,644.85.

- **Motion (Chairman BIAGIONI) second (Commissioner SALVEY) to accept the low bid of $15,385,644.85 submitted by Mark IV Construction, Inc. Motion carried unanimously.**

Public Hearing – Assessments

- **Motion (Commissioner SALVEY) second (Commissioner AIELLO) to hold a public hearing in May on the 2007assessments. Motion carried unanimously.**

There being no other business before the Authority,

- **Motion to adjourn (Commissioner SALVEY), seconded (Commissioner AIELLO). Motion carried unanimously.**

The meeting was adjourned at 9:40 p.m.

Respectfully submitted,

Jenny Francese

Chairman Biagioni called the meeting to order at 7:38 p.m.

MINUTES TO PREVIOUS MEETING:

- **Motion (Commissioner SALVEY), seconded (Commissioner GONCALVES), to accept the minutes of the April 25, 2007 meeting as written. Motion carried unanimously.**

NEW BUSINESS:

There were no items of New Business.

OLD BUSINESS:

Sewer User Rate Increase

The Commissioners discussed the May 29th public hearing on the sewer user rate increase. The Clerk read the public hearing notice. Chairman Biagioni noted the rate increase is 10.7%, but the increase in the annual maintenance fee is over 18%. The notice states, "The Maintenance Fee is determined by the total fixed costs of providing service." It has been determined that expenses will exceed revenue based on projections by the Finance Director at the last meeting. The result will be a shortfall and a reduction in the retained earnings account. Over the last two years, the account which is used as a reserve for capital expenditures and other unforeseen expenditures, dropped from $1.3 million to $900,000, and is on track to drop again for the fiscal year ending 2007.

2007 Sewer Assessments

The Commissioners discussed the May 29th public hearing on the 2007 sewer assessments. The Clerk distributed copies of the proposed assessments.

Jog Hill Project – Shelton Residents on Pam Bar Road and Cricket Lane

Regarding the 11 Shelton residents on Pam Bar Road and Cricket Lane, Chairman Biagioni reported that Mr. Solemene informed him that we cannot lien Shelton residents. Attorney Lieberthal concurred, stating that the liens would have to go through the City of Shelton. Mr. Solemene also mentioned the possibility of re-routing the sewer line in order to avoid the Shelton homes.

There being no other business before the Authority,

- **Motion to adjourn (Commissioner SALVEY), seconded (Commissioner AIELLO). Motion carried unanimously.**

The meeting was adjourned at 8:38 p.m.

MINUTES TO PREVIOUS MEETING:

- **Motion (GONCALVES) seconded (AIELLO) to accept the minutes of January 23, 2008, as written.**

Chairman Biagioni questioned an item in the Tax Collector Report. The report cites 232,315 units. The Commissioners would like an explanation of "units". Mr. Solemene will ask the Tax Collector for clarification and will report back next month.

PROGRESS REPORT:

Mr. Solemene distributed a map and gave the following report:
Four main line crews and two lateral crews worked this month in town. Crew #1 started on Greenbrier Road to Pam Bar Road on the Shelton line; Crew #2 started from the corner of Greenbrier and Coral Drive, proceeded to the end of the contract extension at corner of Cricket Lane, then completed Split Rock Road from Spinning Wheel; Crew #3 continued easement run from Towerview Drive to Firehouse Road, connected cross-country lines from Towerview Drive, Black Hawk and Firehouse; Crew #4 continued from Stoneleigh Road to intersection of Gray Rock, then started from Strobel and is currently working up on Gray Rock.

Sewer Paving Schedule
Daniels Farm Road: new curb-to-curb overlay after milling is scheduled to begin April 14th from Route 25 north to Country Club Road. The upper section starting at Country Club Road north to Firehouse Road was a problem area with significant settlement over the winter. We replaced the temporary pavement with new process material in the worst sections, will add drainage and new temporary pavement. This should be a significant improvement over the current rough road condition.

We approved a short extension of Daniels Farm Road from Firehouse to Whitney. This is going to be excavated this summer as soon as the design is complete.

Temporary paving is scheduled for the next month on all the roads we installed the sewer system over the winter: Greenbrier Road, Pam Bar Road, Coral Drive, Greenhaven Road, Split Rock Road, Spinning Wheel Road, Quaker Lane, Pilgrim Lane, High Meadow Road, Beacon Hill Road, Cobblers Hill Road, Stoneleigh Road, Gray Rock Road, and Shelter Rock Road.

Working together with the Board of Education who paid half the tab, the W.P.C.A. eliminated a two-pump force main system at Daniels Farm School by extending an 8" gravity line from the existing pump chamber to Chalon Road.

Spath-Bjorklund Associates, Inc. – proposal for sewer design of Jog Hill Expansion Area

Mr. Solemene stated that originally it was thought the design would be done in-house, but because of the loss of key employees through retirement and vacancies, it has been decided that Spath-Bjorklund should design the expansion. David Bjorklund presented his proposal for the design. It will be based on the unit price of the 1996 contract with added cost of living increase and the cost of prints, mileage and CAD time which adds 11%. The cost will be $4.27 per foot times 14,750 feet for a total of $62,982 plus $2,000 each for easement maps. Whitney Avenue will not be included because it flows in the wrong direction. Chairman Biagioni asked Mr. Bjorklund the following question: when Spath- Bjorklund submits the design, if there are any changes suggested by the Department would there be an extra charge? Mr. Bjorklund responded no, there would only be an extra charge if it is an expansion.

- **Motion (GONCALVES) seconded (AIELLO) to approve the proposal by Spath-Bjorklund Associates, Inc., for design of the extension to Phase IV, Part B, Contract 3, to include all or part of the following streets: Classic Drive, Daniels Farm Road, Green Acres Lane, Hurd Road, Marathon Road, North Green Acres Lane, Nuthatch Hill Road, Ranch Drive, and Wildfire Lane, and excluding Whitney Avenue. Motion carried unanimously.**

- **Motion (AIELLO) seconded (GONCALVES) to hold a public hearing for acquisition of easements for Phase IV, Part B, Contract 4. Discussion followed. Motion carried unanimously.**

Hunters Lane

At the request of Mr. Solemene, Mr. Bjorklund addressed the Commission about the possibility of designing sewers on Hunters Lane off of Booth Hill Road. This street was not included in the Pinewood Lake contract, but it may be possible to include these homes in the North Nichols contract. There are three houses on the street. To bring the sewer line to Booth Hill Road would require heavy duty pumps. It would be possible to install a gravity line through an easement to the existing sewer on Blue Ridge Drive. Mr. Solemene and Mr. Bjorklund will meet to discuss and have more information for the next meeting.

Retained Earnings Balance

No change in retained earnings this month.

Public Hearing

- **Motion (GONCALVES) seconded (AIELLO) to approve a public hearing for the application by Sara Cammarota for a sewer extension at 15 Country Road through an easement at 390 Edison Road. Motion carried unanimously.**

There being no other business before the Authority,

- **Motion to adjourn (AIELLO) seconded (GONCALVES). Motion carried unanimously.**

The meeting was adjourned at 9:30 p.m.

Respectfully submitted,

Jenny Francese
Clerk of the Commission

Fred Radford, Alternate

Also In Attendance:
Joseph Solemene, Assistant W.P.C.A. Administrator
Neil Lieberthal, Esq., Town Attorney

PUBLIC HEARING
SEWER USER RATE INCREASE

Pursuant to section 7-255 of the Connecticut General Statutes, the Trumbull Water Pollution Control Authority hereby gives notice of a Public Hearing, Wednesday, May 28, 2008 at 7:30 p.m. in the Court Room, Trumbull Town Hall. A 4.2% increase in the Sewer User Fee will be proposed.

The increase is necessary to offset the City of Bridgeport's proposed increase in Sewage Treatment costs to town residents. The Trumbull W.P.C.A. is co-dependent with the City's West Side Treatment Plant for wastewater disposal and must pass on the increase it inherited when the Bridgeport W.P.C.A. approved a 4.2% increase in the consumption rate budget for Fiscal 2008-09.

The Town's User Fee is developed in two parts: Maintenance Fee, which will remain unchanged, plus Sewage Treatment Costs. The sewage treatment portion of the User Bill is based on the amount of water consumed at each dwelling, measured in hundreds of Cubic Feet (CCF). The Maintenance Fee is determined by the total fixed costs of providing service. This portion of the fee is calculated as "Units." A single-family dwelling is charged one "Unit" each. The number of "Units" charged an Industrial/Commercial account is determined by the square foot size of each building. Residents using well water will be billed an Annual Flat Rate Charge based on the average household consumption.

The new rates listed below will be reflected on the next billing cycle mailed in August, covering the billing period through September.

- Annual Maintenance Fees Per "Unit" ..... $ 95.30 (unchanged)
- Residential Consumption Charge per (CCF) ..... $ 4.12
- Industrial/Commercial Consumption Charge per (CCF) ..... $ 4.48
- Annual Flat Rate Charge $475.99

Chairman Biagioni called the public hearing to order at 7:30 p.m., read the public hearing notice, and asked if there was anyone present to address the Commission.

Tony D'Aquila, 29 Valley View Road
Mr. D'Aquila stated that last year the Board of Finance requested the W.P.C.A. to increase its fund balance to $1 million. At that time the maintenance fee was increased by 18.8%. Mr. D'Aquila asked for the current fund balance. Mr. Solemene stated that by the end of the fiscal year the fund balance should be close to the $1 million goal.

Mr. D'Aquila stated that Connecticut State Statutes require a public hearing be held before revising usage fees. The statutes also require a notice of the time, place and purpose of the public hearing should be published at least 10 days before the public hearing. There were two public notices in the Connecticut Post; on May 16th which unfortunately was flawed with a conflict in the calendar day. The second notice was issued on May 20th, and this public hearing is held only eight days after the corrected notice was published. Mr. D'Aquila asked to have the Town Attorney comment on whether or not this public hearing has been properly noticed according to the statues. Attorney Lieberthal replied yes, it is obvious there was notice in the newspaper of when this public hearing was going to be, that this is considered a "scribner's error."

Mr. D'Aquila next commented on consumption charges. Last year the consumption charge was increased by 10.5%. This year the increase is 4.2%, which averages over the last two years 7.4%, more than twice the cost of living inflation rate. The City of Bridegeport's sewage treatment cost has in his opinion increased excessively. He urged the Commission to become pro-active and seek another municipality to treat our wastewater. Attorney Leiberthal stated that we get a discounted rate (13%) from Bridgeport based upon the current agreement.

Mr. D'Aquila suggested the Commission go before the Town Council and request a bond issue to build a wastewater treatment plant. Mr. Solemene stated we cannot operate a wastewater treatment plant much more inexpensive than what we are paying Bridgeport to treat our sewage. We pay Bridgeport according to our water consumption.

Mr. D'Aquila stated the Town Charter requires competitive bids for all contracts. Would the contract with the Bridgeport W.P.C.A. fall under that requirement? Attorney Leiberthal responded that we have a 20 year contract with the Bridgeport W.P.C.A. and it wasn't a competitive bid because there was no other place to go.

Edith Pearce, 21 Long Meadow Road
Concerned that it is becoming more difficult for a retired person to live in this town. A former employee of the Town of Trumbull, her pension never will increase. Social security went up 2.3%. If it is costing so much go to Bridgeport, why are we putting in more sewers. Chairman Biagioni answered that people want sewers, there is a public hearing for every new area. She said it is getting too expensive. Chairman Biagioni stated that we understand her position and many of us are in the same situation.

Mr. D'Aquila
Mr. D'Aquila stated that Statute 7-255 states any municipality by ordinance may provide for optional methods of payment of sewer use charges by the Water Pollution Control Authority by elderly taxpayers who are eligible for tax relief. Attorney Leiberthal stated that Trumbull has such an ordinance and it is tied into elderly tax relief.
Mr. D'Aquila stated it is the Commission's responsibility to communicate this information. Mr. Solemene added we have a program in place for elderly who cannot afford their sewer assessment. Mr. D'Aquila insisted the statute includes sewer usage and said he would investigate.

There being no one left to speak ,

- **Motion (SALVEY) seconded (GONCALVES) to close the public hearing. No discussion. Motion carried unanimously.**

REGULAR MEETING

MINUTES TO PREVIOUS MEETING:

- **Motion (GONCALVES) seconded (AIELLO) to accept the minutes of April 23, 2008, as written. No discussion. Motion carried unanimously.**

PROGRESS REPORT:

Joseph Solemene, Sewer Coordinator, distributed a map to the Commissioners and gave the following report: Ninety-five percent of the area is complete. The only portion left of the original contract is Booth Hill Road. We had Beacon Hill Road, Pilgrim Lane, Highmeadow Road and Oldfield Road this month. We finished the cross country easement line from Oldfield Road to Greenbrier Road. We have been getting a number of compliments on that section. It has been restored and it's like a park. Mark IV lost a dump truck in the cross country easement last month. The driver was rushed to emergency but he only suffered minor bruises. We are finishing the two easements from Grayrock to Olfield. Ninety-five percent of the roads are paved with either temporary or permanent paving. Mr. Solemene shared an email from one of the residents who complimented the job. All in all, things are going smoothly.

Mr. Solemene called Spath Bjorklund about the design of the extension, and was informed that they are hoping to deliver part of it by the middle of June.

Commissioner Goncalves asked if Shelton residents who live on Booth Hill will be allowed to connect to the sewer and can they be assessed? Mr. Solemene replied that yes they can be assessed. Two Shelton residents have requested to be connected to the sewer. They must pay one quarter of the approximate assessment to run the lateral to their property, and then they will pay the balance of the assessment in full at the time of the assessment. They cannot be liened.

We will be releasing nearly the whole project next month, after final testing of the line is completed.

INVOICE APPROVAL:

Mark IV Construction Co., Inc. – Phase IV, Part B, Contract 3 – Application #12: $1,071,985.96
Quantities verified by Clair Garard, Public Works Inspector.

- **Motion (GONCALVES) seconded (SALVEY) to approve Application #12 in the amount of $1,071,985.96 for payment, based on quantities verified by Clair Garard, Public Works Inspector.**

Discussion followed about the amount of change orders. Mr. Solemene explained this is due to relocating storm drainage and storm drain upgrades. Chairman Biagioni asked Mr. Solemene to break out the cost for storm drainage for next month's meeting. **Motion carried unanimously.**

OLD BUSINESS:

Request for Sewer Extension on Tungsten Circle

Tabled from April 23rd meeting. Maria Coreano of 8 Tungsten Circle made a written request for a sewer extension on Tungsten Circle. Since last meeting Mr. Solemene visited Tungsten Circle. There are seven houses on the street. It might be possible to get a gravity run to the sewer main on Old Mine Road. Chairman Biagioni directed Mr. Solemene to advise Ms. Coreano to petition her neighbors. If the majority are in favor, this area could be added to the South Nichols project.

NEW BUSINESS:

North Nichols Easements

Mr. Solemene reported that two easements have been finalized and closed; 43 and 49 Dogwood Lane. He met with five other homeowners; 26 Kingsbury Drive, 25 Dogwood Lane, 101 Golden Hill, 21 Sweetbriar Road and

20 Columbine Drive. Four of the five seem very receptive; the homeowners at 26 Kingsbury Drive are very upset at the prospect of losing trees.

Irrigation Systems on Separate Water Meters

Chairman Biagioni noted that in the past the Commission has requested contractors put their irrigation systems at condominium projects on separate water meters, and they agreed. The water company is refusing to do so. Mr. Solemene suggested that we require anyone with an irrigation to put in a separate water meter. The downside is the water company won't read the meter.

PUBLIC HEARING

- **Motion (SALVEY) seconded (AIELLO) to approve the 4.2% sewer use rate increase as proposed. No discussion. Motion carried unanimously.**

There being no other business before the Authority,

- **Motion to adjourn (SALVEY) seconded (GONCALVES). Motion carried unanimously.**

The meeting was adjourned at 9:05 p.m.

Respectfully submitted,

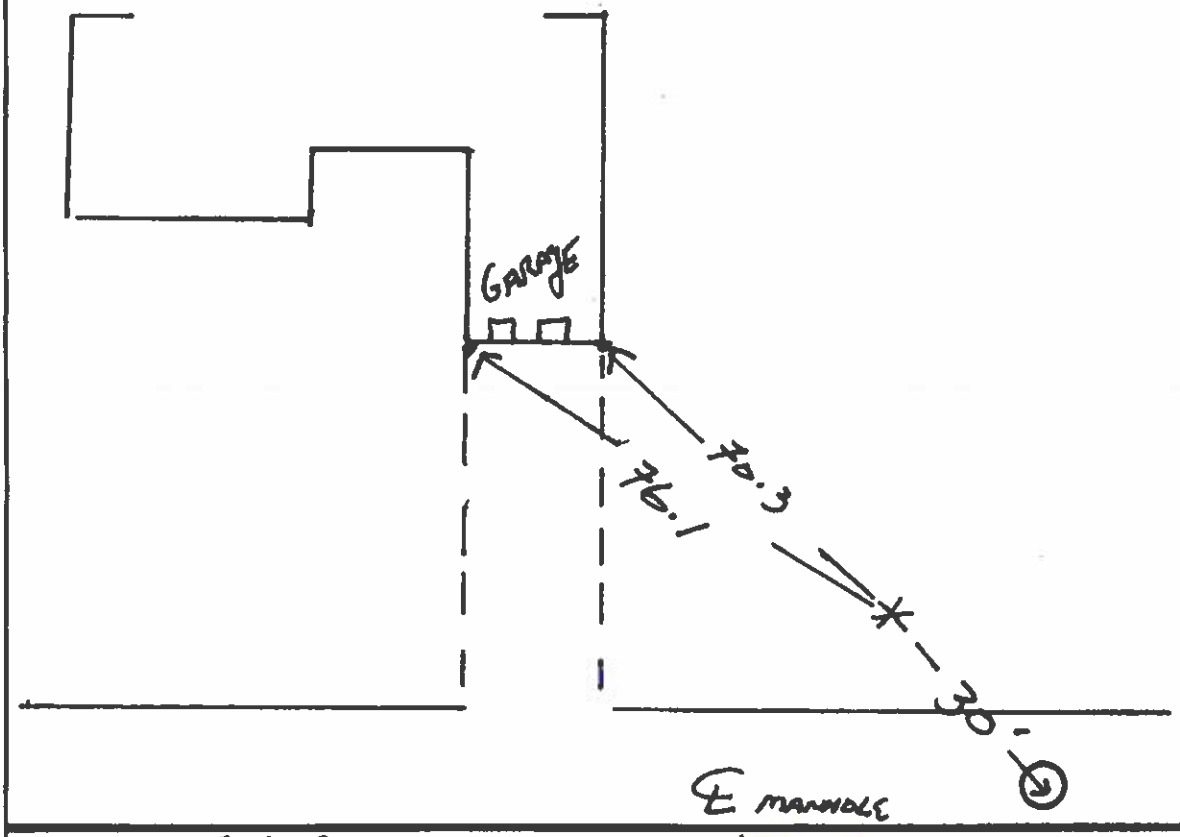

Jenny Francese
