## **Community Meeting for Route 111 Chip's Plaza Traffic Light and Trail Improvements**

Trumbull, CT—Residents, businesses and property owners are invited to a community meeting to discuss the design concepts for the installation of a light at the entrance to the Chip's plaza and the redirection of the trail crossing to the light. Several additional enhancements will be included in the project. All of the proposed enhancements are part of the Route 111/25 study recommendations proposed by MetroCOG, the regional planning agency.

In November of 2018, town staff submitted a grant request to MetroCOG and the Connecticut Department of Transportation for funding to implement the improvements. The funding request has been fully approved and the project is in the design phase. An initial community meeting was held in June 2019 to discuss concepts for the project.

The meeting will be held on Tuesday, October 29 from 6:00-7:30PM in the Trumbull Town Council Chambers at Town Hall. Town staff, design consultants, and representatives from MetroCOG will be presenting and answering questions.

The meeting is open to anyone who would like to attend from the public. The town intends to host several community meetings during the project design and construction phases to keep stakeholders informed.
