TRANSPORTATION SPECIFICATIONS

ADDENDUM #2  
October 17, 2017

Pursuant to the terms of the Transportation Specifications issued by the Trumbull Public Schools with a proposal due date of October 25, 2017, this Addendum will clarify or modify certain identified aspects of the Specifications. This Addendum is made a part of the contract and is enforceable under the same terms and conditions as the original Specifications.

Whenever a page number, section or appendix is referred to in the following modifications/clarifications, the page, section or appendix refers to the Transportation Specifications as issued by the Trumbull Public Schools and as described above. In locations where paragraph numbers are identified, they are identified utilizing the paragraph symbol (¶) and the paragraph number refers to the full paragraphs on the designated page (not carry-over paragraphs from the previous page).

The items shown below are a result of questions that were submitted to the District subsequent to the meeting.

Q11. *Q&A #8 appears to indicate that you will be providing the charts on pages 53 and 54 in Excel format. I think it should be pages 52 and 53. Either way, I did not see an excel sheet on the Town website.*

*A8 also indicates that you will be providing mileage charts as part of the addendum. I could not locate those in the addendum.*

A11. Mileage information was included in Addendum 1. The information on drivers' hours is not available in the same format as shown in Appendix A of the specs. However, the information in Appendix A for last year is very similar to the current year. Additionally, we have included with this Addendum PDF reports showing driver sign-in hours for Reg Ed and Sped for this year.

Q12. *Regarding the requirement that five of the buses must be Single Rear Wheel for transport on the parkways. Assuming one spare of the SRW type, a minimum of 6 vehicles will need to be SRW.*

*It is your intent that:*

*A - 5 of the Type II 16-26 passengers are Single Rear Wheel? Or, that  
B - 5 of the 6-10 passenger STVs are Single Rear Wheel?*

*Reason for the question –*

*Thomas Built's normal Type A Dual Rear Wheel is a 30 passenger; in Single Rear Wheel they are projecting 16 passengers.*

*Collins has a similar unit which will fit more passengers; but not 26.*

*What is your preference?*

A12. Our intent is that the five Type II 16-26 passenger should all be single rear so they can travel on the parkway. The single rear wheel vehicles in our current fleet are 16 passenger so I would say that if the Thomas is a 16 passenger capacity that will work fine. If not, then the Collins larger unit.

The STVs that we have in mind are in our fleet now and are eight passenger, similar to the Ford Transit van, GMC Savana (12 passenger), etc. and they should all be single rear wheel.
