

**TOWN OF TRUMBULL
ENGINEERING
REQUEST FOR PROPOSALS
RECONSTRUCTION OF MOOSE HILL ROAD**

RFP #6296 DUE: August 24, 2018 at 2:00 PM

Addendum #2 dated August 15, 2018

LOT/CIP NO. L144-0001

**BIDDER QUESTIONS
WITH RESPONSES**

1. *The specification says that temporary pavement is included in the 4" edge drain. There is an items for temporary pavement, how will the temporary pavement be paid?*

The temporary pavement is for the mainline storm drainage trenches. Where the 4" edge drains are being placed without a storm drainage main the temporary paving for these trenches will not be measured for payment.

2. *Can the necessary design parameters be provided for sizing the Hydrodynamic Separator unit?*

The Hydrodynamic separator shall be meet the following design parameters:

Drainage Design Flow (DDF) – 25 Year Storm = 10.07 cfs

Water Quality Flow (WQF) – 1 Year Storm = 4.52 cfs

Minimum Sediment Storage – 2 Cubic Yards

3. *What is the size of the underground tank at #107 Moose Hill Road and is there any product in the tank?*

For bidding purposes it shall be assumed that the underground tank is no greater than 2,000 gallons. It is unknown if there is any product in the tank.
