RB-24-490	Residential Building Permit	Ryan Collins	44 FERN CIRCLE, TRUMBULL, CT 06611	8/24/2024	40000		This builds on prior 2022 approved permit for 44 Fern Circle renovation. We are in final stages and looking to add a front covered porch/deck (148 sq ft 18.5'x8') along with a 700 sq ft masonry patio in the rear.I have worked with Hem Kona, PE, on a stormwater management plan that includes a 16'x4'x18" retention system in the front yard which will collect all of the leader drain gutter water as well as the runoff from the new patio in back. This draft plan is attached for reference and was reviewed with Tatiana S in Engineering on 8/20/24.The deck will be supported by a 2x10 ledger board against the house, and three foundation footers in the front spaced 6 ft apart. Â Deck boards in the front and sides will double wrap 6x6 posts and be fastened with lag bolts. Joists will run into the ledger and deck board on the same plane utilizing simpson brackets. The deck will be 32" high (7" below the door threshold) and will be wrapped by a railing.The entrance to the deck will be near the front door and connect to the 9'x5' landing off the front door at the 32" height. The gutters from all front and rear roofing will flow into newly laid leader drains, which are pitched to flow into the retention system in front.To drive efficiency and cost, I am looking to bring in a concrete truck to pour the two balcony support footers (approved in 2022 renovation plans- permit still active for this) when I pour the 3 front deck footers along with the foundation support and retaining wall for the back entrance masonry steps. if there was any way to expedite footing inspections it would be much appreciated!Ryan Collins, 203.273.3931	Hem Khona
